Summary

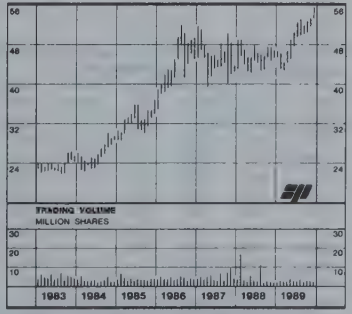
This leading electric utility serves the Piedmont sections of North and South Carolina. Near-term prospects are benefiting from strength of the regional economy, supportive regulation and strong cash flow. The company's longer-term outlook is enhanced by the development of nonutility businesses, diversified nuclear and coal generating facilities and the robust regional economy. The quarterly dividend was raised 5.4%, with the September, 1989 payment.

Current Outlook

Share earnings for 1990 are projected at $5.00, up from the $4.85 estimated for 1989.

The dividend, which was raised 5.4% with the September, 1989 payment, is expected to be maintained at $0.78 quarterly.

Share earnings for 1990 will benefit from higher kwh sales, reflecting continued regional economic growth. Longer-term prospects are enhanced by diversified fuel sources and the regional economy.



Electric Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	863	917	913	833
Jun.	877	830	858	784
Sep.	1,011	1,029	1,037	941
Dec.	---	850	899	843
	---	3,627	3,706	3,401

Revenues for the nine months ended September 30, 1989 fell fractionally (0.9%), year to year. However, following lower operating and maintenance expenses primarily in the fossil and nuclear operations, operating income was up 5.0%. Higher AFUDC more than offset increased interest charges, and net income rose 6.0%. Share earnings were $4.05, versus $3.79, which excludes a special credit of $1.01 from unbilled revenues.

	E4.85	3.90	4.40	4.04

Important Developments

Nov. '89— DUK said that, to date, it had estimated total costs relating to damages caused by Hurricane Hugo, which hit the company's service area on September 22, at approximately $63 million, consisting of $20 million in extraordinary maintenance expense and $43 million of capital expenditures.

Oct. '89— Profitability in 1989's third quarter benefited from lower plant maintenance costs which more than offset the effects of a decrease in kwh sales to other utilities. DUK reported that total electric sales declined 1.2% in the third quarter, reflecting a 15% decline in other energy and wholesale sales. Sales to general service and industrial customers increased 3.6% and 2.0%, respectively, while residential sales were down 0.5% due to a cooler summer season.

Next earnings report expected in late January.

Business Summary

Duke Power supplies electricity to the Piedmont sections of North Carolina (70% of 1988 revenues) and South Carolina (30%), with a population of some 4.5 million. DUK completed the acquisition of Nantahala Power & Light in November, 1988. Revenues by customer class:

Revenues	1988	1987	1986	1985
Residential	33%	33%	32%	32%
Commercial	23%	22%	22%	23%
Industrial	32%	32%	31%	33%
Other	12%	13%	15%	12%

Capacity of some 15,774 mw, in 1988, was composed of nuclear 45%, coal 41%, hydro 9%, oil/gas 4% and purchases 1%. Peak demand was 13,618 mw in 1988, and the capacity margin was 14%.

Share earnings in 1988 were restricted by a $0.46 charge representing the write-off of abandoned property. Revenues associated with the write-off were refunded in 1987. Also, included in 1988 share earnings was a $0.15 charge for benefits paid to laid-off employees and a $0.21 charge for the write-off of obsolete inventory and fire-damaged property.

DUK is building the 1,000 mw Bad Creek hydro facility scheduled for completion in the early 1990's. Bad Creek completes major construction for the foreseeable future.

Dividend Data

Dividends have been paid since 1926. A dividend reinvestment plan is available.

55¼	60¼-48⅜	19	2.00	3.6%	A+	1.09

Summary

This company is best known for its business services, among which are its credit ratings and reports. Other activities include publishing, direct mail marketing, Moody's financial information services, computer software and services, and A.C. Nielsen research services. During 1988 the company sold its Official Airline Guides, and completed a number of significant acquisitions, including IMS International, as part of an ongoing restructuring and streamlining program.

Current Outlook

Earnings for 1990 are tentatively projected at $3.45 a share, up 11% from the $3.10 estimated for 1989.

The $0.50 quarterly dividend is likely to be raised again in 1990, extending a 38-year practice.

Revenues in 1990 are expected to be relatively flat, reflecting a generally cool economy, price competition in certain marketing and information services, the absence of revenues from businesses sold, and reduced sales of credit services. Operating efficiencies and faster growth in higher-margined businesses will be beneficial, but profit gains will be limited by the factors affecting revenues and costs of expanding new media measurement technology.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,060	1,009	828	752
Jun.	1,058	1,059	811	767
Sep.	---	1,066	813	770
Dec.	---	1,132	906	825
	---	4,267	3,359	3,114

Revenues for the 1989 first half rose 2.4%, year to year (1988 restated to include IMS International). Operating income gained 12%. Following higher nonoperating income, and taxes at 38.0% versus 40.0%, net income rose 22%, to $1.57 a share from $1.29.

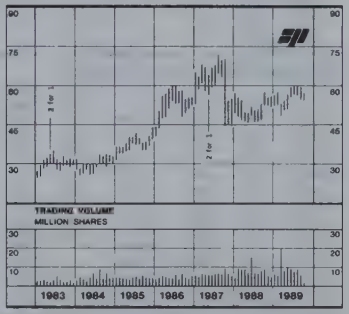
	E3.10	2.67	2.58	2.23

Important Developments

Jun. '89— DNB announced that it had settled a number of lawsuits seeking class-action status related to alleged improprieties by personnel at the credit services unit. The $18 million settlement had been previously provided for, so will not affect 1989 earnings. DNB said that the settlement does not effect existing or future lawsuits by individual customers, should they choose not to participate in the settlement. DNB also noted that credit services was continuing to experience softness in current sales.



Apr. '89— DNB sold Thomas Cook Travel USA to a unit of Britain's Pergamon Group PLC for an undisclosed amount. In December, 1988 DNB completed the sale of Official Airline Guides to another unit of that firm for $750 million.

Jan. '89— DNB acquired Sales Technologies, the leading supplier of salesforce automation systems based on lap-top computer technology.

Next earnings report expected in late October.

Summary

This broadly diversified company is the nation's largest chemical manufacturer, with interests in various chemicals, man-made fibers, plastics, health care, and consumer and industrial products. It also owns Conoco, which has large oil and gas and coal reserves. In January, 1989 directors authorized an 8% stock repurchase program to be funded by debt. Higher profits are expected for 1989 and 1990. A 3-for-1 stock split is pending and the dividend was raised twice in 1989.

Current Outlook

Share earnings for 1990 are projected at about $11.50, versus the $10.65 expected for 1989, before giving effect to the pending 3-for-1 stock split.

The quarterly dividend was recently raised 14%, to $1.20 from $1.05 (both unadjusted).

Earnings for 1990 are expected to improve, reflecting modest economic growth and continued strong worldwide demand and higher selling prices for the industrial chemicals, pigments, fibers, and pesticide businesses. The petroleum business is expected to advance with current oil prices and coal should improve with increased production. Possible restructurings of or cost reductions in the newer medical, electronics and imaging ventures would aid profits. The stock repurchase program should aid per-share comparisons.

Important Developments

Dec. '89— Shareholders approved a 3-for-1 stock split. DD said that most businesses continued to surpass 1988 levels in the third quarter, despite a stronger U.S. dollar and a weaker housing market. The industrial products, upstream petroleum and pesticide businesses posted strong improvements. Sales for the chemical businesses rose 10%, reflecting a 6% volume gain and a 4% increase in selling prices. Domestic volumes rose 2%. Petroleum benefited from higher crude oil and natural gas prices but U.S. refined product margins were lower.

Jan. '89— Directors authorized the repurchase of up to 20 million common shares (8% of the total outstanding). The program will be funded by debt, raising DD's debt ratio to about 30%-35%. The quarterly dividend was also raised 11%. DD said that it would continue to explore initiatives to benefit shareholders.

Next earnings report expected in late January.

Business Summary

Contributions by industry segment in 1988:

	Sales	Profits
Petroleum expl. & production	7%	2%
Petroleum ref., mkt., & trans.	27%	14%
Coal	5%	9%
Industrial products	9%	14%
Fibers	17%	28%
Polymers	18%	22%
Diversified businesses	17%	11%

Foreign operations accounted for 39% of sales and 35% of income in 1988.

Proved developed reserves at 1988 year-end were 837 million bbls. of oil, 2,799 billion bcf. of natural gas, and 6,048 million tons of recoverable coal.

Industrial products consists of commodity and specialty chemicals, including fluorcarbons and pigments. DD is a leading producer of man-made fibers for textile, carpets, and industrial uses; and polymers, elastomers, films, and fabricated and automobile products. Diversified businesses include agricultural pesticides, electronic components and materials, imaging systems, sporting arms and ammunition, instruments, environmental services, and medical products (X-ray, biological and diagnostics products, and pharmaceuticals).

Dec. 12'89	1989					
32 3/8	37 7/8-27 1/4	13	0.50	1.5%	A	1.23

Summary

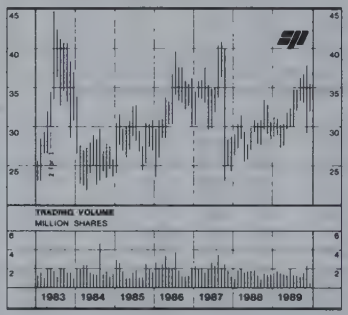
E-Systems is a major producer of advanced electronic systems and products for defense markets. A strong increase in new orders, largely for classified signal intelligence collection and processing programs, was experienced in the past two years, bringing the backlog to a record level. This should support improved earnings in 1989 and 1990.

Current Outlook

Earnings for 1990 are projected at $3.05 a share, up from the $2.70 estimated for 1989.

Dividends should continue at least at the current $0.12½ quarterly rate.

Sales for 1990 could increase approximately 10%, following an estimated gain of 12% for 1989. The rate of incoming orders has been strong in 1989, with year-end backlog likely to be at a record high. Margins should widen slightly, reflecting a smaller percentage of higher risk development contracts in the total.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	395	307	316
Jun.	---	396	364	292
Sep.	---	402	380	303
Dec.	---	---	388	316
	---	---	1,439	1,227

Sales for the first nine months of 1989 rose 13.5%, year to year, led by increased deliveries in the electronic warfare and guidance & controls product segments. Margins were maintained, but with interest expense up 17.3%, the gain in net income was held to 10.4%. Earnings per share were $1.92, compared with $1.75.

	E3.05	E2.70	2.40	1.95

Important Developments

Nov. '89— Total orders, including a record $778 million in the third quarter, were $1.573 billion in the first nine months of 1989, up 12.4%, year to year. More than half of the third quarter orders were in classified programs. The backlog on September 30 was $2.625 billion, up 17.9%.

Sep. '89— ESY introduced the D-500 (Egrett) high-altitude aircraft being developed for the West German government with Grob of West Germany.

Sep. '89— ESY received a $64.6 million initial production contract for the Commanders Tactical Terminal, a tactical intelligence dissemination system for the Army and Air Force.

Aug. '89— E-Systems acquired for about $23 million Engineering Research Associates.

Next earnings report expected in late January.

Business Summary

E-Systems produces and services military and commercial electronic systems. Sales and pretax profit contributions by product category in 1988:

	Sales	Profits
Electronic warfare	65%	74%
Command, control and communications	20%	13%
Guidance, controls and navigation	5%	8%
Aircraft maintenance	10%	5%

U.S. Government sales accounted for 87% of sales in 1988 and exports 10%.

The Electronic Warfare category includes "passive" systems for intelligence, reconnaissance and surveillance applications and "active" systems relating to electronic countermeasures and jamming and deception devices.

Command and Control systems allow for the gathering of information by electronic and conventional techniques and the data processing and displaying of such information in a form ready for use by the military.

The company makes automatic control products for aircraft, missile steering and tracking systems, and aircraft navigation aids. Aircraft maintenance is also provided.

Dividend Data

Dividends have been paid since 1966.

EG&G Inc.

NYSE Symbol EGG Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
34 1/8	35 1/2-28 3/8	15	0.68	2.0%	A	0.96

Summary

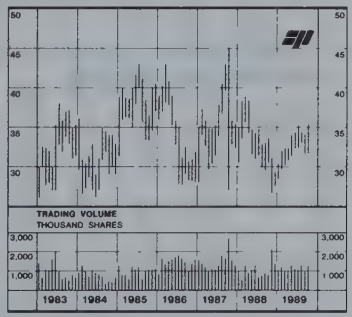
EG&G provides a variety of specialized scientific products and services to the Government and industrial customers for technical applications. Despite lower results in the instruments and components segments, earnings should increase for the third consecutive year in 1989, aided by stronger demand for services provided to the Government. A further gain is likely in 1990.

Current Outlook

Earnings for 1990 should approximate $2.85 a share, compared with the $2.50 projected for 1989.

The quarterly dividend is likely to be raised modestly late in 1989.

Revenues should grow meaningfully in 1990. EG&G's recent strategic initiative to expand its markets should result in a continuing increase in services provided to the Government, including Department of Energy support work. Somewhat restraining is likely to be a slowdown in instrument demand and weak component demand due to minimal growth in the electronics industry. Margins should benefit from the higher volume, well controlled costs and resolution of difficulties with product qualification and delivery in the commercial segment. An expansion of the company's technological base, including the use of acquisitions, and aggressive efforts to increase Government business should aid long-term results.



Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	391	332	297	276
Jun.	411	339	304	281
Sep.	---	348	319	287
Dec.	---	386	316	301
	---	1,406	1,236	1,145

Revenues for the six months ended July 2, 1989 increased 19% from those of the comparable year-earlier period. However, due to a 3.4 percentage point decline in the gross profit margin, pretax income was 3.9% lower. After taxes at 31.0%, versus 30.8%, net income declined 4.2%. Earnings per share were $1.16, compared with $1.19.

Business Summary

EG&G is a technologically diversified company. Industry segment contributions in 1988:

	Sales	Profits
Instruments	11%	13%
Components	16%	19%
Technical services	17%	23%
Aerospace	8%	11%
Defense	17%	16%
Department of Energy support	31%	18%

Foreign operations accounted for 7.6% of revenues and 6.9% of pretax income in 1988.

Uses for the company's instruments include physics research, analytical chemistry, life sciences research and geophysical and oceanographic surveys.

EG&G offers standard and custom electronic, optpelectronic, mechanical, electro-mechanical, and frequency-based compnents.

The technical services segment provides testing services to both industry and government, including vehicle and toxicology testing, as well as providing services for NASA.

The aerospace segment designs and manufactures various mechanical components and subassemblies that are used in commercial and military aircraft engines, missiles and propulsion system.

Specialized services (operations, data collection and analysis) and custom hardware to agencies within the Department of Defense.

Components for nuclear weapons and support activites for underground nuclear testing, nuclear power plant safety and other programs are provided to the Department of Energy.

Dividend Data

Dividends have been paid since 1965. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Nov. 28'89	1989					
31	33¾-22¾	12	1.40	4.5%	B-	0.81

Summary

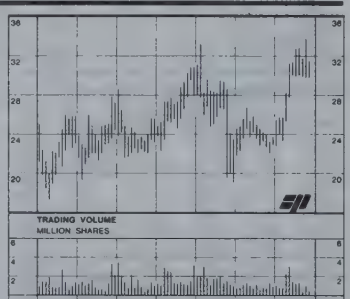
This company (formerly Eastern Gas & Fuel Associates) operates a gas utility in the Boston area, a major barge line, and through recent acquisitions has emerged as an important player in the water and wastewater treatment industry. In mid-1989 EFU disclosed plans to dispose of its 15% equity stake in Peabody Holding Co., the nation's largest coal producer. Profits should continue to advance in 1990, reflecting rising gas sales and increasing contributions from water treatment activities.

Current Outlook

Earnings for 1990 are estimated at $2.80 a share, versus the $2.50 anticipated for 1989.

Dividends at $0.35 quarterly are the minimum expected.

Profits for 1990 should improve moderately, paced by accelerating growth for Boston Gas' residential customer base and stepped up penetration of commercial and industrial markets as Boston gains access to increased gas supplies. Barge profits should advance moderately, reflecting gains for coal movements and a rebound in export grain markets. Supporting barge profits will be continued firmness in rates, reflecting tight industry capacity. Contributions from EFU'S recent acquisitions in the water treatment business should more than offset the accompanying higher interest expense. Contributions from Peabody (assuming a full-year inclusion) are likely to rise moderately, reflecting the absence of 1989's labor disruptions.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	257	232	221	392

	E2.50	2.18	2.05	0.82

Important Developments

Nov. '89— EFU completed the acquisition of Millipore Corp.'s Process Water Division (renamed Ionpure Technologies Inc.) for $54 million. The acquisitions reflects EFU's strategy to establish itself as a major force in the water treatment market. Ionpure, which manufactures and markets water purification systems for the commercial and industrial water treatment market, has annual sales of about $50 million. In November EFU terminated its agreement to buy George A. Caldwell Co., a distributor of products used in the treatment of municipal water and wastewater, for $6.8 million. In May EFU acquired Water Products Co., a Midwestern-based distributor of water systems components, for $40 million. In 1988 Water Products generated $65 million in sales.

Next earnings report expected in late January.

Business Summary

Eastern Enterprises' (formerly Eastern Gas & Fuel Associates) net income (in million $) in recent years was derived as follows:

	1988	1987	1986
Gas	$20.1	$22.8	$25.2
Marine	15.6	13.4	12.2
Coal	14.0	7.5	---

Boston Gas Co. distributes natural gas to some 496,000 residential, industrial and commercial customers in Boston and 73 communities in eastern Massachusetts. Non-interruptible gas sales in 1988 were 65.3 billion cubic feet, versus 63.9 billion cubic feet in 1987.

Midland Enterprises Inc. is the nation's second largest barge operator, providing service over the Ohio, Mississippi and Gulf Intracoastal Waterway systems. Midland, operating with a fleet of 2,220 barges and 90 tug and tow boats, transported 50.2 million tons in 1988, up from 48.9 million in 1987. Coal accounted for 60% of tonnage, grain represented 8.6% of volume and phosphates generated 4.6%. Some 41% of Midland's revenues are generated under contract agreements.

EFU also owns 15% of Peabody Holding Co., the nation's largest coal producer. In 1988 Peabody shipped 81.5 million tons of coal, versus 79.2 million tons in 1987. Peabody's recoverable reserves at 1988 year-end were 8.66 billion tons of coal. In August, 1989 EFU reported that retention of its 15% stake in Peabody no longer fit the firm's strategic plan. While an option to sell its Peabody stake to Newmont Mining for $173 million was terminated in August, EFU continues to seek alternative means for disposing of these holdings.

Dividend Data

Dividends have been paid since 1974. A dividend reinvestment plan is available.

Eastman Kodak

NYSE Symbol EK Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
42⅜	52⅜-42¼	15	2.00	4.2%	A-	0.97

Summary

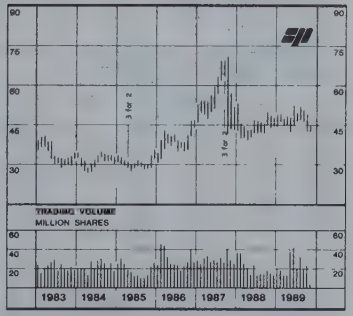
Eastman Kodak is the world's largest maker of photographic products, and also manufactures synthetic fibers, plastics and chemicals. In February, 1988 EK acquired Sterling Drug Inc., substantially expanding its presence in the health care area. A patent infringement suit brought by Polaroid Corp. could result in EK paying a large damage award or settlement in the future.

Current Outlook

Earnings for 1990 are estimated at $4.10 a share, up from the $2.20 expected for 1989. This includes 1989 restructuring charges, but excludes a potentially large damage award or settlement from a lawsuit.

The quarterly dividend may remain at $0.50.

Earnings in 1990 are expected to benefit from the absence of large restructuring charges and efforts by EK to cut costs. Also, an expected weakness in the value of the dollar should boost the translation of sales and profits from EK's sizable international operations. However, extremely weak recent profitability from EK's informations systems business is a concern, and EK's chemical business may have passed its peak-of-cycle profitability level.



Sales (Billion $)

Period:	1989	1988	1987	1986
12 Weeks: Mar.	3.90	3.33	2.66	2.35
12 Weeks: Jun.	4.50	4.13	3.21	2.69
16 Weeks: Sep.	5.11	5.03	3.91	3.48
12 Weeks: Dec.	---	4.54	3.53	3.03
	---	17.03	13.31	11.55

Sales for the 40 weeks ended October 1, 1989 increased 8.2%, year to year. However, net income fell 46%, to $1.82 a share (including a $0.70 restructuring charge) from $3.35.

12 Weeks: Jun.	0.18	1.20	1.07	d0.04
16 Weeks: Sep.	1.02	1.35	1.18	0.78
12 Weeks: Dec.	E0.38	0.96	0.75	0.22
	E2.20	4.31	3.52	1.11

Important Developments

Nov. '89— In 1989's third quarter, operating profit in each of EK's four business segments was flat or down, compared with year-earlier results. The biggest change was in information services, where a loss of $9 million contrasted with income of $97 million. Overall operating profit was hurt by higher costs and currency exchange rates. Also, EK said that although no additional restructuring charges were recognized in the third quarter, substantial restructuring costs are expected in 1989's fourth quarter, assuming that plans currently being considered are finalized. In 1989's second quarter, EK had $350 million (pretax) in restructuring charges, equal to $0.70 a share after taxes. Meanwhile, hearings related to a potential damage award against EK from a patent infringement suit brought by Polaroid are expected to end soon.

Next earnings report expected in early February.

Business Summary

Eastman Kodak is the largest producer of photographic products in the world, and is an important manufacturer of chemicals, fibers and plastics. Also, in 1988, EK acquired Sterling Drug Inc., whose products include prescription and over-the-counter medicines and other consumer products. Prior to 1988, health care-related results were included in EK's imaging segment. Also, starting in 1989, information system results are being reported as a separate segment. Industry segment contributions in 1988:

	Sales	Profits
Imaging	61%	57%
Chemicals	18%	21%
Health	21%	22%

Sales to customers outside the U.S. accounted for 41% of sales in 1988.

EK manufactures a wide variety of imaging products, including cameras, projectors, films, processing services, photographic papers, photofinishing equipment, audiovisual equipment, and office copy, microfilm and other business equipment. Also, EK's Verbatim unit provides flexible magnetic media for small computers. In 1988, EK acquired a substantial portion of IBM's copier business.

EK's chemical products are used primarily by manufacturers, including their use by EK in the manufacture of photographic products. Principal chemical product areas are olefin (ethylene and propylene), acetyl, polyester and specialty chemicals. Areas in which EK products are used include textiles and plastics packaging.

Dividend Data

Dividends have been paid since 1902. A dividend reinvestment plan is available.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.50	Nov. 11	Nov. 25	Dec. 1	Jan. '89
0.50	Feb. 10	Feb. 23	Mar. 1	Apr. '89
0.50	May 10	May 25	Jun. 1	Jul. '89
0.50	Aug. 11	Aug. 28	Sep. 1	Oct. '89

Next dividend meeting: Nov. 10'89.

Finances

In 1986 the U.S. Supreme Court denied a petition by EK appealing Polaroid's lower court victories in a patent infringement suit. A suit-related payment from EK to Polaroid is likely to follow.

Eaton Corp.

NYSE Symbol ETN Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
53⅞	67½-53	9	2.00	3.7%	B	0.98

Summary

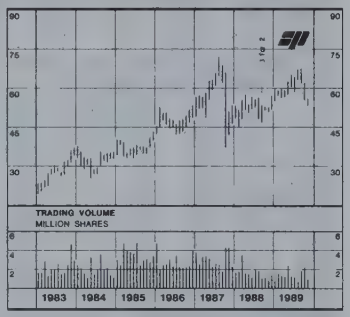
Eaton Corp. manufactures a wide range of products serving automotive, industrial, commercial and defense markets. Principal products include truck transmissions and axles, engine components, and electrical equipment and controls. In January, 1989 Rockwell International decided not to purchase the largest of ETN's discontinued defense electronics operations in the absence of definitive contracts with the U.S. Air Force on all aspects of the division's work on the B-1B program.

Current Outlook

Earnings for 1990 may decline to $5.25 a share from 1989's estimated $5.40.

The $0.50 quarterly dividend is the minimum expected.

Modest sales growth in 1990 should reflect increased use of ETN's engine valves, lifters, superchargers and other automotive parts by automakers and price increases. Demand for truck transmissions will slacken. Sales of the electronics and controls group may decline. Higher materials costs and interest expense may penalize margins and lead to lower net income.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	958	857	772	882

	---	3,469	3,138	3,812

Sales for the nine months ended September 30, 1989 rose 8.3%, year to year. Hurt by a $17.7 million charge related to an adverse court decision, pretax income was down 7.7%. After taxes at 37.5%, against 38.0%, income from continuing operations declined 7.0%, to $4.40 a share from $4.76, before income from discontinued operations of $0.14 and $0.04, respectively, and an extraordinary charge of $0.48 in the 1988 interim.

Important Developments

Oct. '89— During the third quarter ETN completed the purchase of King-Seeley, Inc., a U.S. appliance controls manufacturer and sold its Microwave Products Division. ETN also agreed to acquire a West German appliance control manufacturer. ETN acquired majority ownership in Industrial Data Technologies Corp., a manufacturer of real-time industrial workstations in May.

Jan. '89— Eaton announced that Rockwell International had decided not to purchase ETN's AIL division, the largest unit of its discontinued defense electronics operations, in the absence of definitive contracts with the U.S. Air Force on all aspects of AIL's work on the B-1B program. In December, 1988 Rockwell had agreed to negotiate the purchase of the divsion from ETN for its book value of some $300 million.

Next earnings report expected in mid-February.

Business Summary

Contributions by business segment in 1988 for this major industrial company were:

	Sales	Profits
Vehicle components	58%	66%
Electrical/electronic controls	42%	34%

Truck components accounted for 38% of total sales in 1988, automobile components for 12%, and off-highway vehicle components for 8%. Transmissions and axles are the principal product lines; other products include brakes, locking differentials, engine valves, valve lifters, tire valves, leaf springs, fan drives, pumps, emission control valves, superchargers, thermostats, hose tubing, motors, and couplings.

Electrical and electronic control products include electromechanical and electronic control systems, devices and assemblies; sensors and human interface devices; programmable controllers; switches; relays; counters; electrical adjustable speed drives; low-voltage power distribution equipment; aerospace power controls; fasteners and thermostats; semiconductor wafer fabrication equipment; automated materials handling systems.

Operating profits in 1988 were derived 68% from the U.S., 22% Europe, 6% Canada, and 4% Latin America and elsewhere.

In 1987 the company discontinued, for the purpose of divesting, its defense electronics operations. In 1988 these operations had sales of $768 million, a pretax loss of $43.5 million and net income of $2.3 million.

Dividend Data

Dividends have been paid since 1923. A "poison pill" stock purchase right was adopted in 1985. A dividend reinvestment plan is available.

Echlin Inc.

NYSE Symbol ECH Options on Pacific (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 27'89	1989					
16¼	18⅜-13¼	21	0.70	4.3%	A-	1.24

Summary

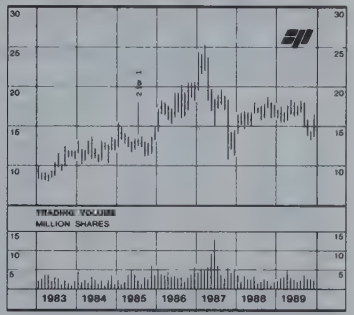
Echlin produces automotive aftermarket electrical, brake, fuel and emission systems. The company has a strong distribution system and concentrates on functional parts which tend to require a higher-than-average incidence of replacement. Lower unit sales, higher materials and service costs, and the writedown of an investment in Raytech Corp. resulted in sharply lower earnings for fiscal 1989. Continued sluggish demand led to lower earnings in the first quarter of fiscal 1990.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 may rise to about $1.00 a share from the $0.80 of fiscal 1989.

The dividend should continue at $0.17½ quarterly.

Sales for fiscal 1990 should benefit from prior year acquisitions, the offering of increasingly complex vehicle parts, and price increases of 4%-5%. Unit sales should recover from the depressed level of fiscal 1989, and margins should benefit from cost controls. A favorable trend is the rise in the number of vehicles in prime repair years, the continued rise in vehicle-miles of travel and more normal winter weather patterns this year.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Nov.	371	356	302	248
Feb.	---	345	306	269
May	---	381	331	282
Aug.	---	373	355	300
	---	1,455	1,294	1,100

Sales for the three months ended November 30, 1989 advanced 4.2%, year to year, reflecting acquisitions and price increases. Unit sales at comparable operations were down 2%. Hurt by higher raw materials and service costs, and the lower unit volume, net income decreased 11%, to $0.24 a share from $0.27.

Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7
Nov.	0.24	0.27	0.22	0.24
Feb.	E0.26	0.23	0.23	0.24
May	E0.25	0.24	0.32	0.22
Aug.	E0.25	0.06	0.35	0.18
	E1.00	0.80	1.12	0.88

Important Developments

Dec. '89— Lower first quarter earnings were the result of a decrease in unit sales and higher materials and services costs. However, ECH expected the rate of cost increases to slow, and with more normal winter weather this year, a pickup in unit sales.

Oct. '89— ECH said that after excluding acquired businesses' sales and the effect of price increases, comparable operations' unit sales were down about 4% in fiscal 1989. The decline was attributed to slack demand due to mild winter weather and an increase in interest rates which caused jobbers and warehouse distributors to reduce their rate of inventory replenishment, return inventory in lieu of payment and, in some cases, go out of business. Lower net income reflected higher costs of materials and services which were not recovered by price increases.

Next earnings report expected in mid-March.

Business Summary

This company is a worldwide manufacturer of automotive products primarily for the aftermarket. Sales by product classes in recent fiscal years:

	1989	1988
Brake system parts	44%	43%
Engine system parts	31%	34%
Clutches & power transmission parts	18%	17%
Other products	7%	6%

Engine system parts include condensers, contacts, complete distributors, distributor caps, ignition coils, rotors, control modules, sensors, voltage regulators, wire and cable products, carburetor and emission control parts, starter drives, fuel pumps and injection systems, EGR valves and PCV valves. Brake parts include hydraulic brake master cylinders, wheel cylinders for drum brake systems, rotors and calipers for disc brake systems, and brake shoes and pads. Wheel oil seals, compressors, valves, power boosters, pressure converters, antilock brake systems, air brake actuating products, spring brakes, connectors, and slack adjustors also are produced for the heavy-duty brake market.

Hard parts include heavy-duty clutches, remanufactured clutches, transmission parts, water pumps, and steering and suspension system components. Nonautomotive products include small engine parts, fork lift truck replacement parts, security access control products, and industrial wire and cable products.

Sales in fiscal 1989 were derived 78% in the U.S., 12% in Europe and 10% in other foreign countries, while operating income was divided 56% U.S., 28% Europe and 16% other foreign countries. Members of the National Automotive Parts Association (NAPA), including Genuine Parts Co., accounted for 11.4% of consolidated sales in fiscal 1989.

Summary

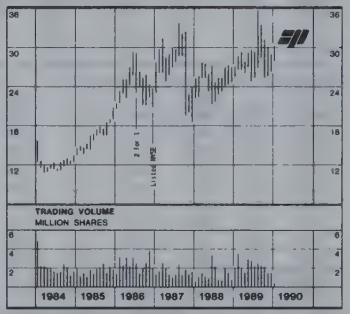
This company is a leading marketer of cleaning, sanitizing and maintenance services for the hospitality and institutional markets. It also owns ChemLawn, the nation's largest provider of lawn, tree and shrub care services. Earnings in recent years have been penalized by poor ChemLawn results, despite continued growth in the institutional and international businesses. In December, 1989 ECL sold $110 million of preferred stock (convertible into an 11.8% interest) to Henkel of West Germany.

Current Outlook

Share earnings for 1990 are projected at about $1.70, up from the $0.25 expected for 1989.

Dividends at $0.16½ quarterly are the minimum expected.

Earnings in 1990 are expected to benefit from continued growth in the institutional services and international segments, aided by product line and geographic expansions and increased contributions from the newer pest control, laundry care, and janitorial businesses. Moderating raw material costs and prices increases will also boost gains. The restructuring of ChemLawn will include cost reductions, including branch closings and personnel cuts. An improved customer base also enhances ChemLawn's outlook, assuming normal weather conditions.



Net Sales[1] (Million $)

Quarter:	1989	1988	1987	1986-7
Mar.	235	227	160	156
Jun.	360	335	286	161
Sep.	370	338	294	160
Dec.	---	312	280	286
	---	1,212	1,020	763

Sales for the first nine months of 1989 rose 7.2%, year to year, reflecting gains in all segments. Penalized by losses at ChemLawn (versus profits) due to higher payroll and marketing expenses, net income declined 25%, to $0.82 a share from $1.11.

Important Developments

Dec. '89— ECL sold $110 million of 7% Series A convertible preferred stock (representing an 11.8% interest) to Henkel KGaA, West Germany. The 1.1 million shares are convertible into ECL common at $40 a share. Proceeds will be used to repurchase common stock. ECL and Henkel were also discussing possible business combinations involving their respective international cleaning operations. If definitive business relationships are formed, the preferred stock will be converted into common stock at a conversion price of $30 a share. Henkel may also raise its interest in ECL to 20%. ECL also announced a restructuring of ChemLawn, including staff reductions and a reorganization of branch operations. The restructuring will result in a $28-$32 million after-tax charge in the 1989 fourth quarter. The charge would also include a goodwill write-off related to an unsuccessful international acquisition.

Next earnings report expected in late February.

Business Summary

Ecolab (formerly Economics Laboratory) provides cleaning, sanitizing and maintenance products and services for the institutional and residential markets. Segment contributions in 1988:

	Sales	Profits
Institutional services	46%	76%
ChemLawn	31%	13%
International	23%	11%

The Ecolab Services Group provides cleaners and sanitizers for warewashing, laundry, kitchen cleaning and general housekeeping, product dispensing equipment, and dishwashing racks and related kitchen sundries to the domestic foodservice, lodging and healthcare industries. It also provides institutional and commercial pest elimination services, janitorial products (floor cleaners, disinfectants, hand soaps, and odor control products) and laundry care products. The Klenzade division provides cleaning and sanitizing products and services to dairy farms and plants and food and beverage processors.

ChemLawn (acquired 1987) is the nation's largest provider of residential and commercial lawn (the application of fertilizer, weed control and insect control materials) and tree and shrub care services; residential pest elimination services are also provided.

International provides institutional warewashing, laundry and janitorial products and services and Klenzade products in more than 50 countries worldwide.

Edison Bros. Stores

NYSE Symbol EBS

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
61½	68⅞-32	13	1.80	2.9%	B	1.19

Summary

This company is a leading retailer of women's footwear, and also retails apparel. Operations are conducted through numerous store chains. Profitability was resumed in calendar 1988, and earnings for the first half of the new fiscal year ending January 31, 1990 rose substantially, due to higher same-store sales, a better sales mix, and closing of marginal units. In October, 1989 EBS agreed to acquire 229 Foxmoor women's apparel stores. In early 1989 EBS changed its fiscal year-end to January 31 from December 31.

Business Summary

Edison Brothers Stores is engaged in the retail sale of shoes and apparel through the operation of numerous chains of stores. Business segment contributions in calendar 1988:

	Sales	Profits
Footwear	50%	20%
Apparel	50%	80%

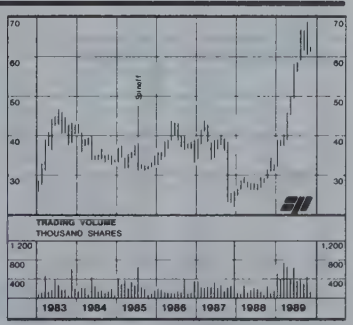
Stores in operation (not restated for Handyman spin-off in 1985) at year-end:

1988....	2,347	1985....	2,435	1982....	2,169
1987....	2,514	1984....	2,355	1981....	2,114
1986....	2,475	1983....	2,175	1980....	1,972

The shoe store division (1,116 stores and departments at year-end 1988) consists of the following chains: Bakers, Leeds, Burts, Chandlers, Wild Pair, and Sacha London stores, as well as leased shoe departments in department stores. This division's stores are concentrated in California, Texas, New York, Florida, Michigan, Illinois and Ohio. Most stores are in shopping centers in suburban communities.

The apparel division (1,231 stores at year-end 1988) consists of the following chains: Jeans West, Oak Tree, and J. Riggings (acquired in 1987) apparel stores; 5-7-9 Shops women's apparel stores; and Joan Bari accessories boutiques.

In calendar 1988, 172 new stores were opened (including 60 stores converted from Fashion Conspiracy format) and 60 marginal units were closed. The Fashion Conspiracy chain, which had been unprofitable, was phased out in 1987, and the unprofitable Gussini shoe store chain was sold to shareholders of Kobacker Co.



Important Developments

Nov. '89— EBS reported sales of $706.4 million for the 39 weeks ended October 28, up 15% year to year. Separately, in October EBS said that it agreed to acquire 229 Foxmoor women's apparel stores from Dylex Ltd., with the transaction expected to be completed in early January, 1990. Eventually, most of the outlets are to be converted to EBS's other apparel and shoe operations.

Aug. '89— EBS said that during the second quarter of fiscal 1989-90 it opened 18 stores (including three converted from Fashion Conspiracy to other chains) and closed 26, ending the period with 2,346 stores. EBS expected to open a total of about 140 stores in fiscal 1989-90.

Next earnings report expected early December.

		919	931

Sales for the 26 weeks ended July 29, 1989 (new fiscal period) advanced 20%, year to year, with more than two-thirds of the gain due to increased same-store sales and the balance to new stores. Higher same-store sales, an improved merchandise mix, and the closing of underperforming stores led to a more than doubling of operating income. Following an 8.6% rise in other expenses (net), pretax income advanced to $23.9 million from $3.5 million. After taxes at 39.3%, versus 40.0%, net income increased to $14.5 million ($1.45 a share) from $2.1 million ($0.21).

Summary

This company manufactures advanced electronic and specialized equipment for military and commercial aerospace, marine, and industrial markets. Important products include aircraft stores suspension and ejection systems, sonar equipment, mine countermeasure systems, and horizon sensors and cameras for satellites. Although net income for the first nine months of 1989 rose 18%, share earnings rose by a much smaller percentage due to larger preferrred dividend requirements.

Business Summary

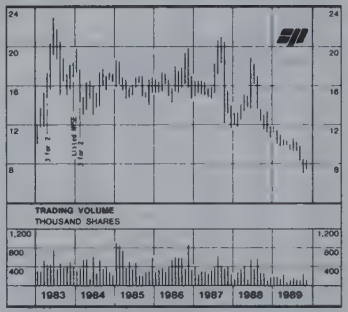
EDO Corp. designs and manufactures advanced electronic and specialized equipment for military aviation, marine and industrial markets. Contributions by major divisions in 1988 were:

	Sales	Profits
Military systems	68%	74%
Marine systems & specialized products	32%	26%

Export business accounted for 26% of sales in 1988 and U.S. Government 54%.

Military systems include aircraft stores suspension and ejection systems; anti-submarine warfare and other specialized sonoar; mine countermeasures; and command, control, communications, and intelligence. In addition, logistic support is provided following initial hardware deliveries. Such support consists primarily of training of operators and support personnel, supplying of spare parts, and providing repair and refurbishment services. Other products include seaplane and amphibious floats for general aviation aircraft.

Marine systems and specialized products consist primarily of piezoelectric products (used in sonar systems, medical instruments, ultrasonics, and specialized military products); electro-acoustic systems (acoustic transducers, sonar devices, precision navigation, and underwater positioning systems); spaceflight systems (electro-optical and related components and systems for defense, space, and commercial markets); infrared instrumentation (microthermal imagers for design and reliability analysis of semiconductors in commercial applications); laser countermeasures (laser-resistant visors); and fiber reinforced composite products (filament-wound stator rings for power turbines, water and waste holding tanks, and filament-wound composite launch tubes).



Important Developments

Nov. '89— EDO said in its third quarter report that its companywide emphasis on improving profitability continued to yield positive results, and it expected further operating improvements as it moved into 1990. The backlog at September 30, 1989 was $147.8 million, down 16%, year to year. EDO expected fourth quarter new order input to yield a higher backlog by year-end.

Jul. '89— EDO said it was notified that it was one of nine potentially responsible parties for possible environmental damage at a site in Norwalk, Conn., due to operations of its former Elinco division. The EPA estimated proposed remedial activities would cost $13.4 million. EDO believed its insurance covered its exposure.

Next earnings report expected in mid-February.

Eldon Industries

NYSE Symbol ELD

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 29'89	1989					
13⅞	17½-12⅜	16	0.24	1.7%	B+	0.69

Summary

Eldon manufactures office products, as well as production equipment for assembly and repair of electronic circuits. Sales and earnings have risen steadily in recent years, and the uptrend continued in 1989's first half, reflecting good demand for the company's products. Management was optimistic about ELD's prospects for 1989's second half, assuming a healthy economy. The shares were split 4-for-3 in June, 1989 and the dividend was effectively raised 33⅓%.

Business Summary

Eldon Industries is primarily engaged in the manufacture of office products, and production equipment for assembly and repair of electronic circuits. Business segment contributions in 1988:

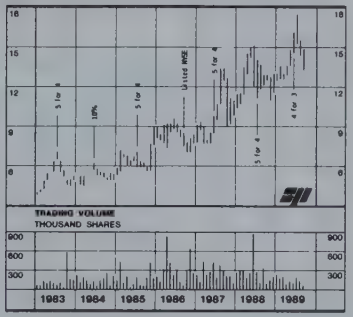
	Sales	Profits
Office products	86%	90%
Production equipment for assembly and repair of electronic circuits	14%	10%

Foreign operations (mainly in Canada) accounted for about 18% of total sales in 1988.

The Eldon Office Products division manufactures a line of products for the storage and handling of traditional commercial office paper flow and computer printouts; desk accessories; and office aids. These products, most of which are made of molded plastic, are moderately priced for use primarily in the business office and, to a lesser extent, in the home. Higher priced designer desk accessory lines are also sold. Products marketed under the Davson name include information boards (bulletin boards, changeable letter boards, dry erase melamine and porcelain marker boards, and chalk boards). Conference room furniture, primarily cabinets, credenzas and lecterns are sold under the LP Products name. The Movitex division's products include (in Australia only) information boards and planning systems.

Production equipment for assembly and repair of electronic circuits is produced under the Ungar name. These products include a line of sophisticated soldering systems, pencil type soldering tools, and a complete line of desoldering equipment. Other products include heat guns and a glue gun for industrial, general purpose, and consumer use.

The company also markets a line of swim and scuba products in Canada through its Canadian subsidiary, which also acts as a distributor of rechargeable batteries in Canada.



Important Developments

Aug. '89— Management said that results for the first half of 1989 were in line with expectations, as the company posted a record second quarter for net income as well as its 26th consecutive quarter of record sales. ELD also noted that it continued to have a strong market position and many opportunities for growth, including new product introductions scheduled for the balance of the year. Management was optimistic about prospects for 1989's second half, provided there is no further softening in the economy.

Aug. '89— ELD's Ungar division entered into an agreement with Marshall Industries to distribute Ungar's SMR 1000 surface mount repair system. Marshall stated it will stock the SMR 1000 at three distribution centers in California, Texas and Massachusetts and sell it through 47 U.S branch offices.

Next earnings report expected in early November.

12 Wks. Dec.		26.0	22.5	19.2
		101.4	84.2	72.8

Sales for the 28 weeks ended July 15, 1989 advanced 10%, year to year, primarily reflecting greater volume, higher selling prices and new product introductions for the office products segment. Margins narrowed slightly, but following interest income of $241,000, versus interest expense of $47,000, pretax profits also rose 10%. After taxes at 38.8%, against 38.3% net income was up 9.5%, to $0.45 a share from $0.41 (adjusted).

Nov. 15'89	1989					
36½	38¼-29½	14	1.26	3.5%	A+	1.19

Summary

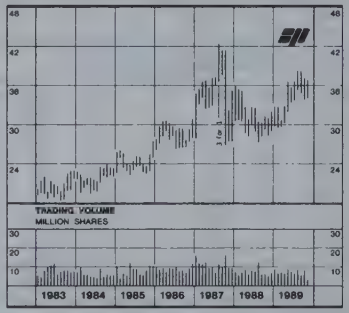
This established manufacturer of electrical and electronic products has compiled an outstanding record of earnings growth, aided by strong management, cost reductions and acquisitions. Higher earnings were reported in fiscal 1989, based largely upon an upturn in capital spending, strong international sales and well controlled costs. Improved results are also likely in fiscal 1990. The company has an active program of divestitures and acquisitions. The dividend was recently increased 12.5%.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 should approximate $2.85 a share, up from the $2.63 reported for fiscal 1989.

The quarterly dividend was raised 12.5%, to $31½ from $0.28, with the November, 1989 declaration.

Revenues for fiscal 1990 are expected to advance moderately, led by higher capital goods sensitive sales, which comprise the majority of the company's sales and appear to be in a long-term upturn. Consumer related businesses are likely to experience only modest growth, while defense operations are likely to have flat sales. Despite the recent strengthening of the dollar, exports and international sales should rise. Margins should be aided by the productivity gains, an improved pricing environment, and an on-going program of cost containment, as well as the company's leading market share in its markets.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Dec.	---	1,720	1,578	1,431
Mar.	---	1,805	1,628	1,533
Jun.	---	1,784	1,699	1,566
Sep.	---	1,763	1,747	1,640
	---	7,071	6,652	6,170

Sales for the fiscal year ended September 30, 1989 (preliminary) advanced 6.3%, year to year. Excluding divestitures, sales grew approximately 10%. Margins widened on the higher volume due to well controlled costs, productivity improvements and the divestiture of some lower margined businesses. Pretax income was 11% higher. After taxes at 38.4%, versus 38.5%, net income also advanced 11%, to $2.63 a share from $2.31.

Important Developments

Oct. '89— EMR said that it and Robert Bosch GmbH had executed a definitive joint venture agreement for their previously announced acquisition of Vermont American Corporation, a producer of cutting tools, power tool accessories, hand tools, and lawn and garden products. The agreement was subject to regulatory approval.

Next earnings report expected in mid-January.

Business Summary

Emerson Electric is a diversified manufacturer of a broad range of electrical and electronic products. Industry segment contributions in fiscal 1988 were:

	Sales	Profits
Commercial & industrial	70%	73%
Consumer	20%	24%
Government/defense	10%	3%

Foreign sales accounted for 22% of both revenues and operating income in fiscal 1988.

Commercial and industrial products include motors, drives, valves, switches, power supplies, power conditioning and distribution equipment, modular power systems, meters and control systems, as well as components and systems for refrigeration.

Consumer products include non-residential lighting fixtures, electrical products for residential markets, professional and hardware tools, portable electric tools, gas cutting and welding equipment, bench power tools, and other products.

Government and defense products include radar systems, electronic warfare systems, missile launching systems, communications systems, and guidance and control systems.

Dividend Data

Dividends have been paid since 1947. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Jan. 5'90	1989-90					
21⅞	23⅜-14⅛	9	[1]0.5939	[2]2.7%	NR	NA

Summary

This company is the largest producer of electricity in Spain. ELE supplies electricity to other Spanish utilities and its subsidiaries serve about 2.7 million customers. ELE is approximately 76%-owned by Instituto Nacional de Industria, a Spanish government agency which sold publicly 53 million ELE shares world-wide in May, 1988, of which 14 million American Depositary Shares were sold in the U.S. and immediately listed on the NYSE.

Business Summary

Empresa Nacional de Electricidad, S.A., with its subsidiaries (together the ENDESA Group), is the largest producer of electricity in Spain, accounting for approximately 30% of the country's total electric energy produced in 1988. ELE supplies electricity to other major utilities in Spain, which accounted for 57% of total revenues in 1987, and subsidiaries distribute electricity to about 2.7 million customers in northeastern Spain and in the Balearic and Canary Islands.

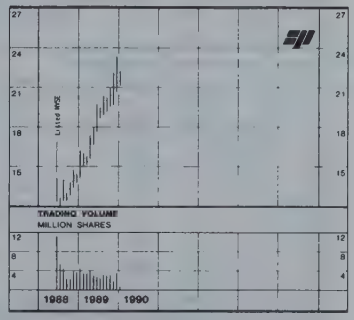
Contributions to retail sales by class of customer in recent years:

	1988	1987	1986	1985
Commercial and industrial	70%	71%	67%	69%
Residential	30%	29%	33%	31%

At December 31, 1988 ELE owned power plants with total installed electric capacity of 10,016 mw, representing 23% of Spain's total capacity. In 1988 approximately 52% of ELE's total production was generated by coal-fired facilities, 25% by nuclear facilities, 13% by hydro-electric plants, and 10% by fuel oil and gas facilities. ELE's coal mining operations produce a substantial portion of the coal required by its coal-fired power stations.

ELE supplies electricity to other utilities through a national high voltage transmission network which is approximately 50%-owned by ELE and its subsidiaries, with the remainder primarily owned by other Spanish utilities.

ELE owns 91.5% of Empresa Nacional Hidroeléctrica del Ribagorzana, S.A., which operates in Catalonia; 62.7% of Electricas Reunidas de Zaragoza, S.A., which serves Aragón; 99.6% of Unión Eléctrica de Canarias, S.A., serving the Canary Islands; and 55.3% of Gas y Electricidad, S.A., which operates in the Balearic Islands. Shares of these subsidiaries not owned by ELE are publicly held and traded on the Spanish stock exchanges.



Instituto Nacional de Industria (INI), a Spanish government agency which acts as an industrial holding company for the Kingdom of Spain, holds about 76% of ELE's outstanding shares.

Important Developments

Nov. '89— ELE said that Spain's nuclear regulatory commission had suspended the operating license of the Vandellos 1 nuclear power plant. ELE holds a 23% interest in HIFRENSA, owner and operator of the plant. An October 19 accident at the plant did not cause any release of radioactivity or injuries, according to a commission report, but "certain deficiencies" were found in safety devices and procedures. Management said that improvements to be made at the plant will cost about $85 million, which will be included in customer rates.

Next earnings report expected in February.

Finances

ELE estimated that capital expenditures for 1989 would be approximately Ptas 95.6 billion. For the period 1989 through 1993, expenditures were projected at Ptas 518.4 billion. ELE expects to finance such capital spending with internally generated funds.

On May 31, 1988 underwriters led by Goldman, Sachs & Co. and Morgan Stanley & Co. offered 14 million ELE American Depositary Shares in the U.S. at $12.29 each. Concurrently, 33 million ELE capital shares were offered in Spain at Ptas 1,400 per share and 6 million shares were offered outside of Spain and the U.S.

Dividend Data

ELE has paid cash dividends since 1949. Normally, directors declare an interim dividend in the fourth quarter of each year which is paid the following month. A final dividend is generally recommended by directors following the end of the year to which it relates and paid during the second quarter of each year. Payments on the ADS were initiated in 1988.

Engelhard Corp.

NYSE Symbol EC Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 28'89	1989					
21¼	25⅞–17¼	11	0.56	2.6%	B	0.86

Summary

Engelhard is a leading producer of catalysts (including petroleum cracking) and pigments and additives for paper, paint and plastics. It is also a major fabricator of engineered products made from precious and base metals and is engaged in precious metals dealing and management. EC intends to enhance its technological leadership through increased capital and R&D spending, while expanding its international businesses. Operating earnings should improve in 1990 after the decline expected for 1989.

Current Outlook

Share earnings for 1990 are projected at $1.60, versus 1989's estimated $1.90, which includes a onetime gain of $0.48.

Dividends at $0.14 quarterly are the minimum expected.

Operating earnings for 1990 should rise on continued gains in the pigments and additive business with healthy paper and coatings markets as well as better demand for chemical catalysts. Precious metals management should benefit from higher metal prices. However, soft construction markets will limit growth of the engineered material business, while continued pricing pressures in petroleum catalysts and soft domestic auto catalyst demand will also restrict earnings gains.

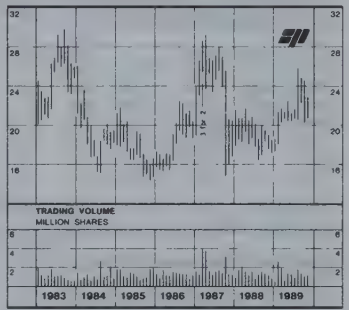
Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	587	511	538	526
Jun.	603	530	601	493
Sep.	586	614	612	568
Dec	---	695	728	702
	---	2,351	2,479	2,290

Sales for the first nine months of 1989 rose 7.3%, year to year, reflecting acquisitions. With increased pigments and engineered materials profits and a nonrecurring gain of $0.48 a share, and despite lower catalyst earnings and higher interest expense, net income advanced 54%, to $1.52 a share from $0.99.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar	0.32	0.30	0.60	0.28
Jun.	0.34	0.31	0.40	0.38
Sep.	0.87	0.38	0.33	0.30
Dec	E0.37	0.43	0.28	0.35
	E1.90	1.42	1.60	1.31



Important Developments

Oct. '89— Third-quarter earnings included a $16.9 million onetime gain ($0.48 a share) from the public sale of a portion of the EC's Japanese joint venture, while the 1988 quarter included an $0.08 a share gain from a petroleum refining contract settlement. The lower quarterly sales were due to reduced metal prices. Excluding the onetime gains, operating profits were slightly higher, year to year, led by gains in pigments and engineered materials. The decline in catalysts profits reflected the absence of the onetime gain, higher manufacturing costs, and competitive pricing for petroleum catalysts. Separately, EC agreed to purchase Process Minerals Inc. (PMI), a unit of Canadian Pacific, for $110 million. PMI produces wollastonite and tripoli based products. In September EC started up a new fluid cracking catalyst plant in The Netherlands.

Next earnings report expected in early February.

Business Summary

EC primarily produces specialty chemicals and engineered materials. Contribution by segments in 1988:

	Sales	Profits
Catalysts and Chemicals	17%	50%
Pigments and additives	14%	36%
Engineered materials & precious metals mgmt.	69%	14%

Foreign operations accounted for 33% of sales in 1988 and 30% of profits.

Catalysts and chemicals include catalysts used in the petroleum refining, chemical, petrochemical, pharmaceutical, food processing, and environmental protection industries, and the Asphalt Residual Treatment (ART) process to pretreat heavy crude oils prior to further processing.

Pigments and additives consists of kaolin-based coatings and extender pigments and additives used in papers, plastics, paints, inks and rubber compounds, color pigments, and adsorbents and gellants for industrial and consumer uses.

Engineered materials includes precious and base metal products for industrial, electronic, jewelry, coinage and investment markets; metal coating, finishing and plating chemicals; and crystals and radiation monitoring devices. EC also conducts secondary refining to recover precious metals and is a precious metals dealer.

Summary

This company operates the largest natural gas pipeline system in the U.S., and is also involved in oil and gas exploration and production, and liquid products extraction, marketing and transportation. Share earnings for the first nine months of 1989 benefited from higher profits at all business segments and lower preferred dividend payments. In October, 1989 the company sold a 16% interest in its oil and gas unit through a public offering.

Current Outlook

Share earnings for 1990 are projected at $2.50, up from an estimated $2.25 for 1989.

Dividends should continue at $0.62 quarterly, supported by a strong cash flow.

Gas pipeline profits for 1990 are expected to rise, reflecting an increase in gas throughput due to expansion of service and increased demand for gas. Exploration and production profits should be slightly higher on an increase in gas prices. Profits from liquid fuels operations should benefit from continued strong demand growth. Share earnings will benefit from lower interest charges and preferred dividend payments.

Operating Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	1.71	1.79	1.59	3.09
Jun.	1.46	1.27	1.42	1.69
Sep.	1.21	1.19	1.46	1.29
Dec.	---	1.46	1.44	1.53
	---	5.71	5.92	7.59

Revenues for the nine months ended September 30, 1989 rose 3.0%, year to year, reflecting strength at liquid fuels operations. Benefiting from higher profits at all operating segments, net income advanced 9.9%. After lower preferred dividends, share earnings were up 18%, to $1.88 from $1.59, which excludes a special charge of $0.39.

Important Developments

Dec. '89— The company signed a letter of intent with representatives of the Fuel-Energy Complex of the Council of Ministers of the USSR to pursue energy opportunities in the Soviet Union, including possibilities of a joint venture of oil and gas exploration, and the enhancement of gas pipeline and gas liquids operations.

Oct. '89— ENE sold 11.5 million common shares of Enron Oil & Gas Co. (EOG) in its initial public offering at $18.75 per share; ENE retained a 84% interest in EOG. Separately, ENE filed a registration statement with the SEC relating to the initial public offering of up to 6.93 million preference units of Enron NGL Partners L.P.; the units would represent an 80% interest in the partnership, and the indicated offering range was $19-$21 per unit.

Next earnings report expected in mid-February.

Business Summary

Enron (formerly InterNorth) is involved in the wholesale transmission of natural gas; exploration for and production of oil and gas; and the production, transportation and marketing of liquid hydrocarbons. Segment contributions in 1988 (profits in million $):

	Revs.	Profits
Natural gas	61%	$339.1
Liquid fuels	36%	33.2
Expl. & prod.	3%	-39.6

Following the July, 1985 $2.4 billion acquisition of Houston Natural Gas, the Natural Gas Group operates a 38,000 mile pipeline system which extends from the Canadian to the Mexican borders, and from the Florida Peninsula to California. Gas transported for others in 1989 totaled 1,447 Mcf, up from 1,038 Mcf in 1987. ENE's take-or-pay liability was estimated to be about $160 million at December 31, 1988.

Enron Liquid Fuels produces, buys, transports and sells natural gas liquids and helium. It also acquires, transports and markets crude oil, refined fuels and pipeline condensates.

Oil and gas exploration and production activities are conducted primarily in the U.S., Canada. At year-end 1988 proved reserves were estimated at 1.3 Tcf of gas equivalent, with about 88% of the reserves natural gas, and 12% crude oil and gas liquids.

Summary

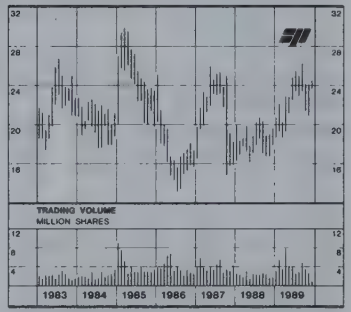
This diversified concern operates a large, primarily intrastate, natural gas utility and is also engaged in oil and gas exploration and production, oil field services, and engineering and construction services. Results in recent years have been hurt by low energy prices. In October, 1989 ENS exchanged ENS common shares and cash for units of Enserch Exploration Partners, Ltd.

Current Outlook

Share earnings from continuing operations for 1990 are projected at $1.15, up from an estimated $0.95 for 1989.

Dividends should continue at $0.20 quarterly, supported by cash flow.

Gas utility profits for 1990 should rise slightly on higher throughput, assuming normal weather conditions and customer additions. Exploration and production profits should improve slightly on higher natural gas prices. Engineering and construction services earnings should advance on higher revenues from construction projects by Ebasco Services



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	761	794	755	765

Sep.	633	646	642	665
Dec	---	712	741	695
	---	2,739	2,796	2,723

Revenues from continuing operations for the nine months ended September 30, 1989 fell 2.7%, year to year. Benefiting from the absence of a $29.2 million after-tax charge related to the engineering and construction segment and slightly higher exploration and production profits, net income advanced to $47.1 million from $3.8 million. After preferred dividends, share earnings were $0.62, versus a per-share loss of $0.13, which excludes a special credit of $0.47 and a loss from discontinued operations of $3.54.

Important Developments

Dec. '89— ENS said that directors had authorized capital expenditures for 1990 at approximately $140 million for exploration and production, $71 million for natural gas tranmission and distribution, and $20 million for engineering and construction activities and general corporate requirements; the company estimated expenditures for 1989 would total $198 million.

Oct. '89— ENS said about 12.0 million depository units of Enserch Exploration Partners Ltd. (EXP) were tendered to ENS in a offer to exchange 0.5 ENS common share and $1 in cash for each EXP unit tendered; following the exchange, ENS held 99% of EXP's units outstanding.

Apr. '89— ENS decided to defer the sale of its Pool Co. subsidiary until a reasonable market value could be obtained for the unit.

Next earnings report expected in late January.

Business Summary

ENSERCH is a diversified energy company. Business segment contributions in 1988 (operating profits in million $):

	Revs.	Profits
Gas utility	48%	$134.0
Eng. & constr. services	43%	-51.7
Exploration & production	9%	41.7

Lone Star Gas, the primary unit of ENS's gas utility division, transmits and distributes natural gas to about 1.2 million customers in Texas and Oklahoma. Total gas sales volume in 1988 was 325.1 Bcf, versus 340.0 Bcf the year before. Gas transported for others was 232.8 Bcf in 1988, compared with 189.0 in 1987.

Engineering and construction services are conducted primarily by Ebasco Services, which provides services to the energy, environmental and infrastructure markets, and H & G Engineering, which designs and constructs facilities for oil and gas production platforms.

Enserch Exploration (including Enserch Exploration Partners) produces oil, gas, and natural gas liquids. At 1988 year-end proved reserves were 1,009 Bcf of gas and 29.4 million barrels of oil and natural gas liquids.

Pool Company (discontinued in 1988) provides oil field services, including workover, maintenance, abandonment of existing oil and gas wells, development drilling, completion and solid control. Samson Ocean Systems, Inc. manufactures rope and floatation products.

Dividend Data

A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

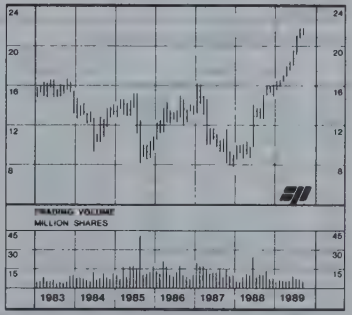
This major utility holding company (formerly Middle South Utilities) serves portions of Arkansas, Louisiana, Mississippi and Missouri. In June, 1988 the U.S. Supreme Court upheld the Federal allocation of costs for ETR's Grand Gulf nuclear plant. The High Court decision is expected to enable ETR's New Orleans subsidiary to recover its deferred Grand Gulf costs. The common dividend, resumed in September, 1988, was raised 25% in 1989's third quarter. Auditors noted in their report on the company's 1988 financial statements the existence of material uncertainties with ETR's nuclear construction program.

Current Outlook

Including a $4.15 a share write-off for the Grand Gulf 2 nuclear plant, a per share loss of $2.05 is likely for 1989, before a projected extraordinary gain of $0.36 a share for the Grand Gulf 1 unit. Share earnings for 1990 could reach $2.25.

The dividend was raised 25%, to $0.25 quarterly from $0.20, with the July, 1989 declaration. ETR is projected to maintain above-average dividend growth for the foreseeable future.

Results in 1989 will reflect the write-off of the Grand Gulf 2 plant. In 1989 ETR's New Orleans Public Service unit is projected to recover the $135 million of disallowed Grand Gulf 1 costs.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	837	787	770	805
Jun.	901	820	832	811
Sep.	---	1,095	1,075	1,073
Dec.	---	863	779	797
	---	3,565	3,455	3,486

Revenues for the six months ended June 30, 1989 rose 8.2%, year to year, reflecting increased rates and higher sales. After lower rate deferrals, operating income dropped 3.4%. Following lower interest charges, net income was up 5.9%. Share earnings were $0.94, versus $0.88.

Important Developments

Aug. '89— The electric rate dispute between ETR's New Orleans Public Service subsidiary and the city of New Orleans will be heard by the U.S. District Court of Louisiana. The case was remanded to the District Court following the June, 1989 U.S. Supreme Court ruling that Federal courts have jurisdictional authority over state courts in electric rate disputes. NOPSI is seeking to reverse a February, 1988 decision by the New Orleans City Council that disallowed some $135.0 million of deferred Grand Gulf 1 costs. NOPSI will introduce as evidence a June, 1988 U.S. Supreme Court ruling that upheld the authority of the Federal Energy Regulatory Commission to allocate interstate plant costs. The U.S. District Court may decide the case by year-end 1989.

Next earnings report expected in late October.

Business Summary

Entergy Corp. (formerly Middle South Utilities) is the holding company for Arkansas Power & Light, Louisiana Power & Light, Mississippi Power & Light and New Orleans Public Service. ETR also owns System Energy Resources, which operates the Grand Gulf nuclear plant. Revenues in 1988 were 97% electric and 3% gas. Electric revenues:

Electric Revs.	1988	1987	1986	1985
Residential	37%	36%	37%	36%
Commercial	25%	24%	24%	23%
Industrial	28%	27%	28%	32%
Other	10%	13%	11%	9%

Sources of internal generation in 1988 were nuclear 44%, oil and gas 33% and coal 23%. Peak demand in 1988 was 11,816 mw and system capability was 15,766 mw, including 306 mw of purchased power, for a capacity margin of 25%.

ETR's 90%-owned Grand Gulf 1 nuclear plant began commercial operation in July, 1985. The 34% completed Grand Gulf 2 nuclear plant was abandoned and in the 1989 third quarter the company took a write-off its investment in the plant, along with additional charges related to ETR's nuclear construction program. ETR reported earlier that the pretax charge would be $914.0 million ($850.0 net or $4.15 a share).

Dividend Data

Common dividends were resumed in September, 1988 after having been omitted in August, 1985. With the resumption of preferred dividends by ETR's New Orleans Public Service unit in November, 1988, preferred dividends of all ETR's units are current. A dividend reinvestment plan is not available.

Summary

This natural gas company provides gas distribution and transmission services to the Greater Pittsburgh area and portions of West Virginia and Kentucky, and explores for, develops and produces natural gas and oil and extracts natural gas liquids. Modest growth in utility profits in future years is expected to be enhanced by greater contributions from the energy resources segment. Earnings for the 1989 first half declined, reflecting warmer weather and lower energy resources profits.

Current Outlook

Share earnings for 1989 are estimated at $2.45, up from 1988's $2.27. An increase in earnings to $2.75 a share is projected for 1990.

Dividends are expected to continue at $0.32 quarterly.

Gas utility profits for 1989 should advance, assuming more normal weather conditions during the 1989 fourth quarter heating season and an increase in rates and throughput. Profits from the energy resources segment are expected to decline slightly, reflecting a small decline in average gas prices and higher production expenses. Earnings for 1990 should benefit from higher gas sales and gas prices.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	159.3	153.4	156.0	193.3
Jun.	84.8	71.6	76.8	86.8

Important Developments

Jul. '89— EQT said that it was involved in a pipeline construction project which would allow the company to serve Pittsburgh's rapidly growing northern suburbs. Separately, EQT filed a $3.9 million general rate increase with the West Virginia Public Service Commission.

Feb. '89— EQT said that authorized capital expenditures for 1989 were $104.4 million, up from expenditures of $100.8 million in 1988; planned expenditures for the energy resources segment in 1989 were $60 million, up from 1988's $57 million. The majority of the $60 million would be spent developing oil and gas in the Appalachian Basin. Separately, EQT filed with FERC a plan to direct bill its customers $179 million over a period not to exceed seven years for higher prices EQT should have received for gas production from 1979 to 1983.

Next earnings report expected early November.

Business Summary

Equitable Resources (formerly Equitable Gas) is divided into two segments-utility services (integrated natural gas utility and central heating and cooling service) and energy resources (eight different subsidiaries conducting a wide variety of energy-related activities). Revenues and operating income contributions (before income taxes) in 1988:

	Revs.	Profits
Utility services	69%	47%
Residential	38%	
Commercial	16%	
Industrial	4%	
Other	11%	
Energy resources	31%	53%

The utility serves more than 260,000 customers in southwestern Pennsylvania, northern West Virginia, and eastern Kentucky. Gas sales volume for 1988 amounted to 55.7 Bcf, up from 52.3 Bcf in 1987. During 1988, 46% of the utility's total supply was from production, 17% from Appalachian purchases, and 37% from Southwest pipeline purchases.

The energy resource segment consists of exploration, development, production, gathering, transportation and marketing of natural gas and oil in the Appalachian, Southwest and Rocky Mountain areas, extraction and sale of liquid hydrocarbons and contract drilling. Proved reserves at year-end 1988 were estimated at 609.2 Bcf of gas and 9.79 million bbls. of oil.

Dividend Data

Dividends have been paid since 1950. A dividend reinvestment plan is available.

Nov. 17'89	1989					
25⅝	29-21	14	0.60	2.3%	A+	1.21

Summary

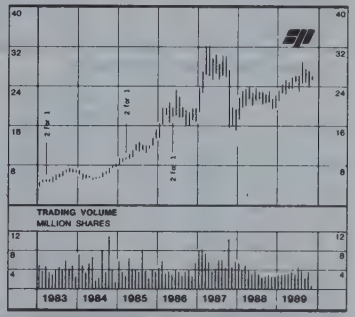
Ethyl makes petroleum and specialty industrial chemicals and owns First Colony Life Insurance, a rapidly growing insurance company. Despite the phase-out of lead antiknock gasoline additives (once the dominant product line) in the U.S., EY has been able to maintain earnings growth through acquisitions and increased R&D. EY completed a tax-free spin-off of its aluminum, plastics and energy businesses as Tredegar Industries in the 1989 third quarter.

Current Outlook

Share earnings for 1990 are projected at $2.00, versus the $1.80 from continuing operations expected for 1989.

The quarterly dividend was raised 25%, to $0.15 from $0.12, with the October, 1989 declaration. A special $1.50 dividend was also declared in October.

Profits in 1990 are expected to benefit from stronger worldwide demand and capacity expansions for most industrial and petroleum products, some easing of raw material costs, and a further reduction in the losses of the polysilicon electronic business. The pharmaceutical business should continue to post losses with heavy R&D expenses. First Colony Life operating profits should continue to post good gains with strong annuity sales.



Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	570	648	389	378

Sep.	614	688	440	405
Dec.	---	732	471	390
	---	2,718	1,720	1,579

Sales from continuing operations for first nine months of 1989 rose 18%, year to year, primarily reflecting increased insurance revenues. Pretax net gained 9%. After taxes at 33.4%, against 35.7%, net income advanced 12%, to $1.30 a share from $1.15, excluding income from discontinued operations of $0.10 versus $0.27.

Dec.	E0.50	0.49	0.44	0.36
	E1.80	1.91	1.57	1.40

Important Developments

Oct. '89— EY said that its third quarter results were on target with its expectations and it was particularly pleased with First Colony's strong performance. Chemicals results were mixed, but profits were up 7% with higher selling prices offsetting lower volumes. Insurance revenues rose 49%, reflecting increased immediate annuity premiums. EY increased the quarterly dividend 25% to relate more closely to earnings, and a special $1.50 dividend was intended to be a catch-up payment to reflect recent growth.

Jul. '89— EY completed the spin-off of the aluminum, plastics and energy groups as Tredegar Industries Inc. to shareholders of record July 10. EY received a favorable ruling from the IRS that the spin-off would be tax free. These groups had sales of $625 million and operating profit of $59 million in 1988. EY's remaining businesses consists of chemicals and insurance.

Next earnings report expected in late January.

Business Summary

Ethyl Corp. is a producer of specialty industrial and petroleum chemicals and has interests in insurance. In July, 1989 EY completed the spin-off of the plastics, aluminum and energy businesses to shareholders as Tredegar Industries. Pro forma segment contributions in 1988:

	Sales	Profits
Chemicals	66%	70%
Insurance	34%	30%

Foreign operations accounted for 16% of sales and 17% of profits in 1988.

Chemicals operations consists of industrial chemicals (intermediates and additives for detergents, plastics and rubber polymers); bromine chemicals (flame retardants, oil well drilling and completion fluids, and water purification chemicals); agricultural pesticide and pharmaceutical intermediates; electronic materials (polysilicon for use in electronic semiconductors); and fuel and petroleum lubricant additives. Ethyl is the largest producer of lead antiknock additives. Whitby Pharmaceuticals conducts pharmaceutical R&D and distributes generic drugs.

First Colony Life Insurance provides life insurance, individual annuity and employee benefit products.

At December 31, 1988 First Colony had $44.4 billion of life insurance in force and $3.6 billion in assets.

Dividend Data

Dividends have been paid since 1957. A "poison pill" stock purchase right was adopted in 1987.

Exxon Corp.

NYSE Symbol XON Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 1'89	1989					
45 3/4	46 7/8-40 1/2	15	2.40	5.2%	A	0.68

Summary

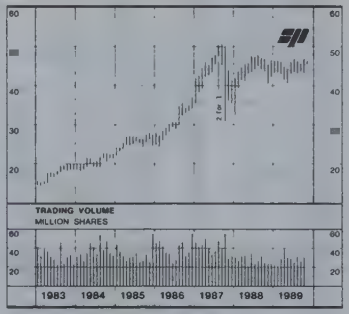
Exxon is generally regarded as the world's leading factor in the oil and petrochemical industry. Earnings in 1989 have been impaired by clean-up costs associated with the grounding of the Exxon Valdez in Alaska in March, 1989. Pending legal matters are not expected to alter the company's strong fundamental position. XON continues to augment its portfolio of oil and gas properties with high quality exploratory ventures and attractively priced acquisitions. The company remains a dominant factor in refining and distribution and XON is seeking to expand its market share of branded products.

Current Outlook

Share earnings for 1990 could reach $3.95, up from 1989's estimated $3.00, which includes a nonrecurring charge of about $0.70 related to the oil spill.

The quarterly dividend was raised 9.1%, to $0.60 from $0.55, with the September, 1989 payment.

Revenues in 1990 may show some modest improvement, reflecting higher natural gas and crude oil production and higher natural gas prices. Increased production should boost upstream profits. Potentially soft feedstock costs should aid downstream and chemical margins. The nonrecurring charges of 1989 will be absent. Per share earnings will be enhanced by the expected continuation of share repurchases.



Gross Oper. Revenues[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	22.0	21.6	19.1	21.7
Jun.	23.4	21.3	19.9	17.7
Sep.	---	21.6	21.7	17.0
Dec.	---	22.7	21.5	18.6
	---	87.3	82.1	75.0

Total revenues for the nine months ended September 30, 1989 rose 6.1%, year to year, reflecting higher crude oil prices and increased crude and natural gas production and greater refinery runs. As a result of weak downstream and chemical margins and nonrecurring charges, net income fell 35%, to $1.99 a share on 5.7% fewer shares from $2.89.

Capital Share Earnings ($)

Jun.	0.13	0.90	0.81	0.77
Sep.	0.87	0.93	0.75	0.73
Dec.	E1.01	1.06	1.12	1.03
	E3.00	3.95	3.43	3.71

Important Developments

Oct. '89— Through September 30 XON's worldwide exploration and production earnings rose 7.9%, year to year, as higher crude oil prices offset lower natural gas realizations, North Sea production outages, and higher taxes. Worldwide refining and marketing profits fell 41%, reflecting increasing feedstock costs. Earnings in the chemical segment declined slightly as margins in the commodity sector began to soften. Included in 1989 results was a $850 million ($0.69 a share) charge (in the second quarter) for actual and anticipated expenses, net of insurance, related to the grounding of the Exxon Valdez. The charge does not include potential litigation which has not yet been quantified. In 1989's first quarter XON took a $30 million ($0.02) charge for salvage expense and partial loss of cargo.

Next earnings report expected in late January.

Next dividend meeting: late Jan. '90.

Finances

During the first nine months of 1989 XON repurchased 38.6 million of its shares for approximately $1.7 billion. In 1988 XON bought back 94.4 million of its shares at a cost of about $4.2 billion; some 58.5 million shares were acquired for $2.6 billion in 1987. The share repurchases are an ongoing program contingent upon board approval.

Summary

FMC Gold, formerly a wholly-owned subsidiary of FMC Corp., is engaged in the exploration for gold and the mining and processing of gold and silver ore on properties located in Nevada. Despite higher sales volumes, earnings decreased in the first nine months of 1989, due to sharply lower gold and silver prices. FMC Corp. holds about 89% of the common stock.

Business Summary

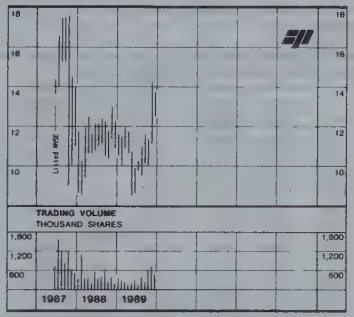
FMC Gold explores for gold and mines and processes gold and silver ore. It is the successor to the North American precious metals exploration, mining and processing business and assets of FMC Corp. FGL's two producing properties are Paradise Peak and Jerritt Canyon, both located in Nevada. In addition, the company has 26 properties totaling 356 square miles in its exploratory inventory. FGL is among the top five gold producers in the U.S.

The Paradise Peak mine, which was developed and is operated by FGL, began gold and silver production in April, 1986. The grades of ore processed in 1988 were 0.176 ounces of gold per ton and 4.221 ounces of silver per ton, versus 0.137 ounces of gold per ton and 3.019 ounces of silver per ton in 1987. The mill recovery rates for gold and silver held constant, year to year, at 94% and 75%, respectively. The average cash cost of production was reduced 17% during 1988 to $94 per gold equivalent ounce, making Paradise Peak one of the lowest cost mines in the world.

The Jerritt Canyon mine is operated pursuant to a joint-venture, in which FGL holds a 30% interest, with Freeport-McMoRan Gold Co. FGL's share of 1988 gold sales was 93,400 ounces, versus 94,800 ounces in 1987. Gold recovery rates were 92% for milled gold in both 1988 and 1987.

FGL also operates a third mine, the Austin property, pursuant to a joint-venture with WESTGOLD, in which FGL holds a 27.6% interest. Sales in 1988 were 9,300 ounces of gold, versus 10,200 ounces in 1987. FGL projected that this property would be shut down in December, 1989 due to uneconomical ore grades.

At December 31, 1988 FGL had estimated proven/probable reserves of 20,642,000 tons of ore containing about 1,963,000 ounces of gold and 33,897,000 ounces of silver, compared with 20,290,000 tons of ore containing 1,991,000 oz. of gold and 37,753,000 oz. of silver at year-end



1987. During 1988 FGL sold 331,800 oz. of gold (293,000 in 1987) and 4,312,200 oz. of silver (3,084,800) at average realized prices of $434.00 ($447.00) per oz. of gold and $6.52 ($7.09) per oz. of silver. Cash cost of production per gold equivalent ounce was $122.00 ($140.00).

FGL projected that it would produce approximately 335,000 ounces of gold and 5,000,000 oz. of silver in 1989.

Important Developments

Dec. '89— FGL estimated that gold production would total 300,000 oz., 275,000 oz. and 300,000 oz. for 1990, 1991 and 1992, respectively, while silver production was expected to approximate 6.5 million oz. in 1990 before declining to 4.5 million and 3.0 million in 1991 and 1992. FGL said that the estimates do not include any additional production that may result from the company's active exploration and acquisition program.

Next earnings report expected in late January.

		171.1	153.3	87

Revenues for the nine months ended September 30, 1989 fell 8.7%, year to year, as sharply lower gold and silver prices were only partially offset by higher sales volumes. Margins narrowed, and despite net interest income of $2.6 million, versus net interest expense of $887,000, pretax income declined 19%. After taxes at 21.7%, against 25.2%, net income decreased 15%, to $0.59 a share from $0.70.

Dividend Data

The company anticipates that cash dividends in the foreseeable future will be modest. FGL intends to retain appropriate levels of its earnings to support its mining, processing and exploration activities. The following annual dividend was paid in 1989:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.05	Nov. 29	Dec. 1	Dec. 7	Dec. 31'89

Finances

In May, 1989 FGL noted that voters in Nevada had approved new legislation increasing the net proceeds taxes paid by mining companies in Nevada. The company estimated that the impact would be about $2.6 million in additional taxes on an annual basis. FGL recorded total income taxes of $21.4 million for 1988.

In 1988 the company generated $51 million cash flow after capital improvements, enabling it to retire its debt to FMC Corp. FGL repaid all outstanding debt ($37.5 million) in July, 1988.

Capital spending during 1988 totaled $20.3 million, versus $6.2 million in 1987. Major capital expenditures for 1988 included enlargement of the Paradise Peak tailings dam, the development of the Burns Basin ore body at Jerritt Canyon, and the expansion of the Jerritt Canyon mill. In 1988 directors authorized spending for a major upgrade and expansion of the Jerritt Canyon extraction process. FGL's share of the estimated cost is about $20 million, of which $3.5 million was spent during 1988.

On June 25, 1987, in its initial public offering through underwriters led by Morgan Stanley & Co. and Dean Witter Reynolds Inc., FGL sold 7,484,395 common shares at $14 each, including 484,395 to cover overallotments. Of the $97,310,730 net proceeds to FGL, $85.5 million was used to repay a portion of the long-term debt owed to FMC. FGL acquired its assets from FMC in exchange for equity, long-term debt in the principal amount of $175 million, and elimination of the intercompany account. Any remaining net proceeds were to be used for general corporate purposes.

Dec. 1'89	1989					
33⅞	34⅝–29	10	2.28	6.7%	A	0.43

Summary

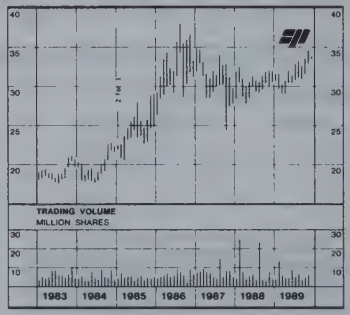
This diversified electric utility holding company serves Miami and much of Florida's commercial and residential economy. Nonutility operations consist primarily of the insurance and other financial services of Colonial Penn Group. In September, 1989 the FPSC held hearings regarding recoverability of replacement fuel costs due to outages from mid-1988 and the first half of 1989 at the Turkey Point nuclear units. The FPSC is scheduled to consider this issue in December, 1989.

Current Outlook

Share earnings for 1990 are projected at $3.15, unchanged from the $3.15 estimated for 1989.

The dividend is expected to continue at $0.57 quarterly.

Share earnings for 1990 are expected to be limited as scheduled outages at both of the St. Lucie nuclear units, and continued losses at the Colonial Penn insurance subsidiary, offset the benefit of increased kwh sales.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,366	1,345	968	943
Jun.	1,530	1,464	1,062	999
Sep.	1,813	1,653	1,308	1,170
Dec.	---	1,392	1,100	979
	---	5,854	4,439	4,092

Revenues for the nine months ended September 30, 1989 rose 5.5%, year to year, as higher kwh sales in all customer classes more than offset lower rates. However, after a substantial increase in depreciation of utility property, primarily due to higher accelerated depreciation relating to transmission lines, net income declined 6.0%. Share earnings were $2.59, versus $2.76.

Dec	E0.56	0.65	0.55	0.48
	E3.15	3.42	3.10	2.90

Important Developments

Oct. '89— FPL reported that for 1989's third quarter its utility unit contributed $1.26 to share earnings, versus $1.34 in the 1988 period. Total electric sales for the period were up 5.9%, owing mostly to a 6.7% increase in electric sales to residential customers and a 5.4% increase to commercial customers. Nonutility operations contributed losses of $0.06 and $0.01 a share, respectively, in the 1989 and 1988 third quarters. Nonutility losses were primarily due to adverse developments in Colonial Penn's property and casualty business, principally in the personal auto line. Separately, FPL said that in September, 1989 the FPSC held hearings on the recoverability of replacement fuel costs due to outages at the Turkey Point nuclear units. The FPSC is scheduled to consider this issue in December, 1989.

Next earnings report expected in late January.

Business Summary

FPL Group, formed in 1984, is the holding company for Florida Power & Light Co., its principal subsidiary. FPL also has substantial nonutility operations. FP&L provides electricity to a population of some 6 million along Florida's east coast and southcentral and southwest coasts. Electric revenues by class of customer in recent years:

Revenues	1988	1987	1986	1985
Residential	54%	54%	55%	53%
Commercial	37%	36%	36%	36%
Industrial	5%	6%	6%	6%
Other	4%	4%	3%	5%

Sources of power in 1988 were nuclear 30%, oil 26%, gas 17%, coal 2%, and purchased power 25%. Peak load in 1988 was 12,382 mw and capability was 16,110 mw for a capacity margin of 23%. Energy sales are projected to increase about 3.5% annually for the next 10 years. In order to meet demand, FPL will be purchasing power primarily from Southern Co. FPL also is planning to build a coal gasification unit.

FPL has diversified extensively into nonutility businesses. At year-end 1985 FPL acquired Colonial Penn Group, Inc., which markets property and liability, life and health insurance and financial services. Also, FPL engages in energy services, agriculture, real estate, equipment leasing, cable television and consulting. Nonutility operations accounted for 21% of revenues and 11% of operating profit in 1988.

Dividend Data

Dividends have been paid since 1944. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 8'89	1989					
10 3/4	14 1/8-10 1/8	14	0.36	3.3%	A-	1.02

Summary

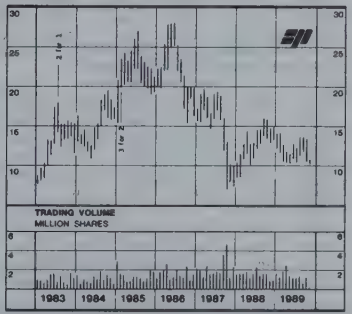
Family Dollar Stores operates a chain of nearly 1,600 retail discount stores, with most units located in communities having a population of less than 50,000. FDO provides a no-frills, low overhead, standardized approach to merchandising. Earnings in fiscal 1989 were hampered by costs related to the company's expansion program and poor inventory control; however, profits should improve in fiscal 1990, aided by sales gains at existing stores and slightly wider margins.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 are projected at $0.90 a share, up from the $0.78 of fiscal 1989.

An increase in the $0.09 quarterly dividend is likely in early 1990.

Sales for fiscal 1990 are expected to advance modestly, aided by the addition of new stores and contributions from an aggressive advertising program which should lead to a resumption of sales gains at existing stores. Profitability should be aided by slightly better gross margins, volume efficiencies and improved inventory control. The tax rate is expected to remain at about 38%. Share repurchases would benefit per-share earnings comparisons.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	171.8	146.5	126.3	109.1
Feb.	195.5	178.9	146.7	133.0
May	187.6	173.9	146.6	124.4
Aug.	202.0	170.2	140.8	121.2
	756.9	669.5	560.3	487.7

Sales for the fiscal year ended August 31, 1989 (preliminary) rose 13% from those of the prior year, reflecting a larger number of stores in operation. Margins narrowed on flat volume in existing stores, markdowns taken to clear merchandise bought in anticipation of higher sales levels, and expenses related to the store expansion program. Pretax income fell 21%. After taxes at 38.7%, versus 38.1%, net income also declined 21%, to $0.78 a share (on 1.0% fewer shares) from $0.98.

	0.78	0.98	0.86	1.06

Important Developments

Oct. '89— The company reported that it had opened 151 new stores during fiscal 1989, including the first stores in Iowa and the District of Columbia, bringing the number of units in operation at August 31 to 1,580. The company said that it plans to add about 100 new stores during fiscal 1990.

Next earnings report expected in late December.

Data as orig. reptd.

Business Summary

This company operates a chain of self-service retail discount stores under the Family Dollar name. As of August 31, 1989 there were 1,580 stores operating in 27 states, ranging as far north as Wisconsin, east to New York, south to Florida, and west to Texas. States with significant concentrations of stores include North Carolina, Georgia, South Carolina, Virginia, Tennessee, Alabama, Florida, Kentucky, Louisiana and Ohio.

Stores in operation at fiscal year-end (August 31):

1989	1,580	1986	1,107	1983	635
1988	1,429	1985	920	1982	529
1987	1,272	1984	765	1981	455

Each Family Dollar store has a wide variety of mostly first-quality merchandise, with some 45% of sales derived from soft goods, such as apparel, shoes, linen, blankets, bedspreads and curtains; the stores also carry hard goods, including automotive supplies, paints, toys, housewares, school supplies, candy and health and beauty aids.

Merchandise, the majority of which is priced at $17.99 or less, is purchased from about 1,150 suppliers. About 75% of the items carried are manufactured in the U.S.

Stores are located in both rural and urban areas, but most are in communities having a population of less than 50,000. The units are free-s tanding or located in shopping centers, with the typical store averaging about 6,000 to 8,000 sq. ft. of total area. Most of the stores are leased.

Dividend Data

Cash dividends were initiated in 1976.

Fedders Corp.

NYSE Symbol FJQ Options on NYSE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 28'89	1989					
13½	18⅜-11⅞	11	0.40	3.0%	B	0.90

Summary

Fedders manufactures a complete line of room air conditioners. Since 1985, FJQ has increased its market share from 10% to about 30% in 1989. Market share is expected to exceed 30% in 1990. Acquisitions, increased market share, and greater exports should continue to boost future earnings growth. About 55% of the voting control in election of directors under certain circumstances is held by the Giordano family.

Current Outlook

Earnings for 1990 are projected at $1.42 a share, up from the $1.20 estimated for 1989.

The $0.10 quarterly dividend should be increased in 1990.

Sales for 1990 should exceed $415 million, assuming normal weather conditions, reflecting increased market share in North America and higher export sales. Margins should widen slightly on the full integration of FJQ's most recent acquisitions, benefits from increased volume and economies of scale, and higher market penetration. Interest charges should be lower. There may be fewer shares outstanding, reflecting the October, 1989 share repurchase program.

Sales & Other Income (Million $)

Quarter:	1989	1988	1987	1986
Mar.	107.0	56.8	35.0	28.3
Jun.	125.7	63.0	41.1	27.8
Sep.	60.5	34.2	23.0	18.4
Dec.	---	67.2	29.6	19.9
	---	221.1	128.7	94.4

Revenues for the first nine months of 1989 rose 90%, year to year, reflecting increased market share due to acquisitions and greater exports. Margins narrowed, and net income rose 54%. After preferred dividends, share earnings were $0.94 ($0.90 fully diluted), versus $0.65 ($0.61), excluding special credits of $0.32 ($0.24) in 1988.

Dec.	E0.24	0.22	0.10	0.08
	E1.20	0.87	0.49	0.22

Important Developments

Oct. '89— FJQ projected its sales for 1989 at $370 million, up 67% from 1988's $221 million. Net income was expected to exceed $22 million, almost 50% greater than 1988's $14.9 million. FJQ added that its share of the North American room conditioner market should approximate 30% in 1989, versus 20% in 1988 and 15% in 1987. Market share was anticipated to exceed 30% in 1990. FJQ said that its 1990 sales may exceed $415 million, assuming normal summer weather and continuation of favorable economic trends. Profitability was also expected to improve, reflecting the integration of FJQ's most recent acquisitions. Separately, the company said it repaid $27.8 million of short- and long-term debt during the third quarter of 1989. Directors authorized the repurchase of up to $25 million of the company's common stock.

Next earnings report expected in early February.

Business Summary

Fedders is the largest domestic manufacturer of room air conditioners, including through-the-wall type of air conditioners principally for the residential market.

Air conditioners are manufactured in models ranging in capacity from 4,700 BTU per hour to 29,000 BTU. Products are sold under the brand names of Fedders, Airtemp, Climatrol, as well as private label. While each brand provides similar capacity, the differences are due to special features and appearance. FJQ is also the only high-volume producer in the world of portable, plastic-cabinet window air conditioners.

Air conditioners are sold through distributors and retail buying groups and retail chains. About 6.0% of sales in 1988 were foreign, versus 4.4% in 1987.

In September, 1988 FJQ acquired a producer of portable, plastic cabinet window air conditioners, and in December, 1988 acquired a Canadian assembler of room air conditioners. In June, 1989 FJQ acquired the Rotorex subsidiary of NYCOR; Rotorex produces rotary compressors. In January, 1987 FJQ spun off its NYCOR, Inc. subsidiary, a manufacturer of auto parts and rotary compressors, to shareholders.

Dividend Data

Quarterly dividends were resumed in 1985 after omission since 1974.

NYSE Symbol FDX Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 8'90	1989-90					
47 1/4	57 7/8-42 1/8	19	None	None	B	0.84

Summary

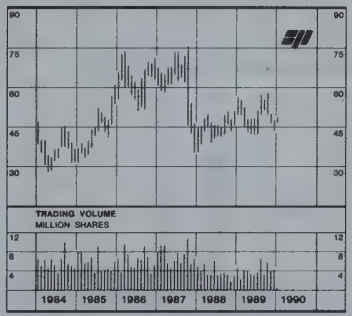
Through an integrated air-ground transportation system, this company provides overnight delivery of small packages and documents throughout the U.S. and Canada and parts of Europe and Asia. FDX is undertaking a major expansion in international markets, which thus far has produced large losses. In early 1989, it acquired Tiger International, parent of Flying Tiger Line. The acquisition of Tiger substantially expands international operations and gives FDX a strong position in large shipment air transport.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 are projected at $2.60 a share, down from the $3.18 of fiscal 1988-9.

Dividends on the common are unlikely soon.

Revenues for fiscal 1989-90 should rise at a strong rate, reflecting the inclusion of Tiger for a full year. Domestic operations should continue to improve through stricter control of discounting and productivity gains. Some pressure on margins should continue through the second fiscal half, reflecting costs of integrating Tiger. Interest expense will be higher, and the effective tax rate should continue above 50% because of non-deductible losses of foreign subsidiaries.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	1,647	1,078	909	726
Nov.	1,724	1,136	944	784
Feb.	---	1,284	977	799
May	---	1,669	1,053	870
	---	5,167	3,883	3,178

Revenues for the six months ended November 30, 1989 increased 52%, year to year. Margins narrowed, and with the tax rate higher, net income (excluding a tax adjustment credit) decreased 33%, to $1.27 a share from $1.93.

	E2.60	3.18	3.56	3.21

Important Developments

Jan. '90— As part of a five-carrier group, FDX received a $724-million, 33-month contract for military airlift transportation.

Oct. '89— Federal Express pilots rejected representation by the Airline Pilots Association in a National Mediation Board election.

Aug. '89— Federal Express integrated the routes of the Flying Tiger Line into its system as of August 7. Tiger had been operated as a separate subsidiary since acquisition of its parent, Tiger International, in February 1989 for $880 million. Flying Tiger, a leading all-cargo airline, adds extensive international routes to the FedEx system.

Next earnings report expected in late March.

Business Summary

Federal Express, following its 1989 acquisition of Tiger International, is the largest all-cargo airline. Through its traditional express service it operates an overnight and second day, door-to-door package and document delivery service covering most of the U.S. and Canada and to points in Europe and Asia. For this service maximum package weight is 150 pounds. Contributions, including Tiger from February 1, 1989, by geographical area for fiscal 1988-9 were (operating profits in million $):

	Revs.	Profits
Domestic	80%	$467
International	20%	-43

Addition of the operations of Flying Tiger extended service to all weights for second-day domestic delivery and added heavyweight service to ten nations in Asia and three in Latin America. For domestic express service, aircraft are operated over a "hub and spokes" pattern, with Memphis as the principal hub. Each weekday evening, most packages are gathered from cities on the system and brought to Memphis, where they are sorted and reloaded to be flown to the destination city. A significant amount of traffic by-passes Memphis to be handled in regional hubs at Newark, Oakland and Indianapolis.

As of August 7, 1989, the operating fleet consisted of 21 747s (including two for military passenger charters), 24 DC-10s, six DC-8s, 114 727s, 156 Cessna 208s and seven F-27s.

NYSE Symbol FMO Options on Pacific (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 30'89	1989					
20 1/8	29 1/2-18 5/8	13	0.92	4.6%	B+	1.10

Summary

This leading producer of heavy-duty parts for automobiles and trucks commenced a restructuring early in 1989 which included the sale of convertible preferred stock to a newly-established employee stock ownership plan, the purchase of two million shares of common stock on the open market, and the planned sale of its construction tool business. In October, 1989 FMO said that it repurchased 565,000 of its shares from Nortek, Inc. and entered into a 10-year standstill agreement with them.

Current Outlook

Earnings for 1990 may rise to about $1.60 a share from 1989's estimated $1.40.

The quarterly dividend is expected to continue at $0.23.

Sales in 1990 should rise modestly, reflecting increased aftermarket parts demand and price increases, partially offset by lower original equipment sales. Demand for aerospace fasteners should continue to rise. Improved manufacturing efficiency and reductions in interest expense should lead to higher earnings. Preferred stock dividend requirements will be greater but fewer shares will be outstanding.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	289	296	261	239
Jun.	295	317	277	252
Sep.	250	295	268	231
Dec.	---	268	269	221
	---	1,177	1,075	942

Sales for the nine months ended September 30, 1989 declined 8.3%, year to year, reflecting the absence of divested businesses. Following a $5.3 million ($0.23 a share) after-tax net gain from restructuring costs and the sale of businesses, net income declined 8.0%, to $1.22 a share (after preferred dividend requirements) from $1.36 (adjusted), which excludes a $0.07 special charge.

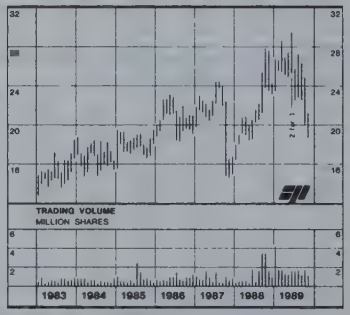
Dec.	E0.17	0.37	0.52	d0.89
	E1.40	1.74	1.62	0.20



Important Developments

Oct. '89— FMO repurchased 565,000 common shares from Nortek, Inc. for $23.50 each and entered into a 10-year agreement whereby Nortek agrees not to acquire any FMO securities and to refrain from taking any action to influence the affairs of the company. In early 1989 FMO began a restructuring that included the sale of its Target division (a noncore operation) and a 90% interest in a Brazilian bearing and bushing operation; the establishment of an employee stock ownership plan (ESOP), and the planned open market purchase of at least two million common shares. The ESOP purchased a new series of FMO 7 1/2% preferred stock convertible into two million common shares using funds obtained from a private placement guaranteed by FMO. So far, FMO has repurchased 2.9 million shares including those bought from Nortek at an average cost of $24.75 each.

Next earnings report expected in mid-February.

Business Summary

Federal Mogul is one of the largest producers or distributors of engine bearings and a major producer of oil seals and of antifriction bearings for vehicles other than passenger cars.

1988	Sales	Profits
Aftermarket	45%	64%
Auto & light truck components	21%	11%
Heavy truck, farm & construction equipment components	14%	5%
General industry	15%	20%
Aerospace	5%	Nil

Foreign activities, serving customers in 90 countries, accounted for 25% of total sales and 33% of operating profits in 1988. In 1988 engine and transmission products accounted for 28% of total sales, ball and roller bearings 20%, sealing devices 17%, fastening systems 10%, materials processing products 10%, fuel systems 6%, electrical and lighting products 4%, and Sinta Forge Parts 5%.

Products include tapered, cylindrical, engine and ball bearings, forged products, pistons, bushings, washers, oil seals, O-rings, fuel systems, signal lamps, switches, self-tensioning pulleys, fastening systems, and aerospace components.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Summary

"Fannie Mae," a U.S. Government-sponsored, publicly-held company, is the nation's largest mortgage lender. It uses mostly borrowed funds to buy a variety of mortgages, thereby creating a secondary market for mortgage lenders. Earnings have risen dramatically since the fourth quarter of 1987, aided by a wider investment spread, higher guaranty fee income, and reduced loss provision. The shares were split 3-for-1 in October, 1989.

Current Outlook

Earnings for 1990 are projected at $3.75 a share, up from the $3.05 likely for 1989, after giving effect to the 3-for-1 split.

Dividends, currently at $0.14 quarterly, are likely to be increased in 1990.

Net interest income for 1990 is expected to increase moderately, aided principally by the purchase of new mortgages at attractive yields due to shrinkage of the thrift industry, FNM's rollover of high cost debt, and the adjustment of variable rate mortgages held in the portfolio up to fully indexed levels. The investment spread should widen and possibly approach 1.0%. Attainment of a spread this high would be significant given that FNM is highly leveraged. Guaranty fee income is anticipated to continue to increase as the trend to securitize mortage debt continues. Further declines in the loss provision are likely, since the great majority of bad loans, (acquired before new underwriting standards were adopted in 1986) have been provided for. One worry for investors is whether lawmakers might decide to divert FNM's profits to help the troubled thrift deposit insurance fund.

	E3.05	2.14	1.55	0.83

Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 40%, year to year, reflecting a wider investment spread. Guaranty fee income rose 25%. After a $6.1 million gain on mortgage sales, versus $11.7 million, 1.0% higher miscellaneous income, a 16% reduction in the loss provision, and 14% higher administrative costs, pretax income was up 69%. After taxes at 26.6%, versus 22.8%, net income advanced 61%. Share earnings were $2.24, versus $1.50 (adjusted).

Important Developments

Oct. '89— Fannie Mae reported that its monthly average investment spread continued to climb in September, reaching 0.79%, up from 0.76% in August, 0.73% in July and 0.71% in June. The primary contributors to the widening of the spread were the refinancing of high cost debt and new mortgage purchases made at attractive yields.

Next earnings report expected in early February.

Business Summary

This company is a stockholder-owned corporation chartered by the U.S. Congress for the purpose of providing a secondary market for mortgage loans. Although converted to private status in 1970, it remains subject to certain Federal regulation: five of its directors are appointed by the President of the U.S.; its debt securities have the status of Federal agency securities.

FNM is one of the largest providers of residential mortgage funds in the U.S. The company buys and holds mortgages in its portfolio, financing these investments with equity and borrowed funds. FNM also earns commitment and guaranty fees from the purchase of mortgages which are then issued as Guaranteed Mortgage-Backed Securities and sold to investors. In 1988 FNM issued $54.9 billion of these securities ($63.2 billion in 1987), and at year-end 1988 $178.3 billion ($140.0 billion) were outstanding.

FNM purchased $23.1 billion of mortgages in 1988 ($20.5 billion in 1987) at an average yield of 9.40% (9.63%), and issued $64.3 billion of debt ($45.7 billion) at an average cost of 7.84% (7.49%). The spread between purchase yield and cost of debt in 1988 was 1.56% (2.14% in 1987).

Gross mortgages outstanding of $103 billion at year-end 1988 (up 6.5% from 1987) were divided: government insured 12%, conventional long-term 42%, intermediate fixed rate 17%, adjustable rate 20%, second mortgage 2%, and multifamily 3%. In 1988 average yield on assets was 9.78% (10.40% in 1987), and average cost of debt was 9.23% (9.76%), for a spread of 0.55% (0.64%).

Summary

This company manufactures solid bleached paperboard, pulp, recycled paperboard, folding cartons and wood products. While earnings will continue to be affected by the level of economic activity, long-term prospects are enhanced by expanded productive capacity and improved manufacturing efficiencies. Dividends were raised 25% with the July, 1989 payment.

Current Outlook

Earnings for 1990 are projected at $5.00 a share, compared with the $5.30 estimated for 1989.

Dividends were raised 25%, to $0.25 quarterly from $0.20, with the July, 1989 payment.

Sales for 1990 are expected to remain strong in the bleached paperboard, recycled paperboard and folding carton segments, given a continued healthy economy. Pulp prices could weaken somewhat due to industry capacity additions later in the year. Lumber sales and earnings should be strong. Improved operating efficiencies should bolster earnings.

	---	---	1,117	1,026

Sales for the 36 weeks ended September 9, 1989 rose 19%, year to year, reflecting increased volumes and higher prices for pulp and paperboard, and acquisitions. Margins widened on the higher prices, and pretax earnings increased 74%. After taxes at 39.3%, versus 39.0%, net income was up 73%. Following preferred dividends, share earnings were $3.59 on 2.5% more shares outstanding, compared with $2.07.

Important Developments

Oct. '89— The company completed the purchase of the Imperial Cup Corp., a paper cup manufacturer with facilities in Ohio, California, Georgia and Maryland, and annual sales of approximately $80 million. Terms were not announced.

May '89— The company acquired Thomas Tait & Sons, Ltd. of Scotland for an undisclosed sum. Tait is a major producer of white paper with 1988 revenues of about $93 million.

Feb. '89— FBO projected capital spending for 1989 at $425 million, of which about $280 million was earmarked for the Augusta, Ga. mill. FBO announced a further expansion, consisting of a fourth bleached paperboard machine for the Augusta mill, to start up in 1992.

Next earnings report expected in mid-January.

Business Summary

FBO produces forest products (paperboard, pulp and wood products), folding cartons, recycled paperboard and other items. Segment contributions:

1988	Sales	Profits
Bleached paperboard & pulp	66%	88%
Wood products	10%	3%
Recycled paperboard	5%	5%
Packaging & printing	19%	3%
Other	1%	1%

Exports accounted for about 14% of 1988 sales.

During 1988 FBO's mills produced 1,205,000 tons of softwood and hardwood pulp, of which some 59% was converted into bleached paperboard and the balance was sold to outside customers. About 72% of FBO's bleached paperboard production was used in packaging applications and 28% for printing. FBO operates five sawmills, with a total capacity of 448 million board feet per year. The company owns or leases some 688,000 acres of timberland in the vicinity of its Riegelwood and Augusta mills.

Recycled paperboard is produced at the Sprague, Conn. mill. FBO operates nine folding carton plants which produce specially designed packaging. Some 70% of the paperboard converted at these plants is produced by FBO.

Summary

This company is a manufacturer of specialty materials including coatings, plastics, chemicals, ceramics and colorants for the construction, appliance, furnishings, industrial and transportation markets. Foreign business has historically accounted for more than half of net income. Record earnings were achieved in recent years, reflecting strong worldwide demand and benefits of a restructuring program. The stock, which was split 3-for-2 in September 1989, has traded actively in recent months on takeover rumors.

Business Summary

Ferro is a worldwide producer of specialty materials for the construction, major appliance and industrial markets. Contributions by business segment in 1988:

	Rev.	Profits
Coatings & Colors	49%	76%
Plastics	31%	8%
Chemicals	13%	10%
Ceramics	7%	6%

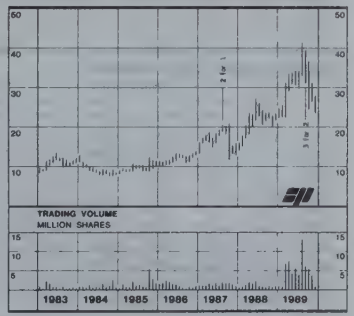
Foreign operations accounted for 55% of sales and 79% of net income in 1988.

Specialty coatings include porcelain enamel frit for appliances, architectural panels, and other uses; ceramic glaze frit; organic powder coatings; and engineering services. Specialty colors consists of inorganic color pigments for porcelain enamel and ceramic glaze coatings, plastics and paint; forehearth glass colorants; and enamels for glass decorating. Electronics materials include dielectric ceramics, thick film inks and sealing glasses, and enamel substrates. Ceramic polishing powders are also produced.

Plastics include compounded filled and reinforced thermoplastic materials, color and additive concentrates for plastics, gel coats for fiberglass reinforced plastic products, engineering plastics, and reinforced materials and composites.

Specialty chemicals include polymer additives such as heat and light stabilizers, antimicrobials, and antioxidants; flame retardants; lubricant and fuel additives and petroleum process chemicals; and intermediate and industrial chemicals.

Specialty ceramics include abrasion resistant linings, crucibles, retorts, kiln furniture, refractories and mold powders, cements, grinding media, road markings, and porous ceramics for industrial, foundry and steel markets.



Important Developments

Oct. '89— FOE reported some softening in its domestic businesses, compared with the strong gains in 1988, but it expected its international business to surpass 1988's outstanding performance. Competitive pricing pressures in coating markets have prevented price increases, while plastics were being affected by slower demand in key markets and a drop in polypropylene prices which provoked strong downward pricing pressure in compound products. Separately, directors authorized the repurchase of one million shares.

Apr. '89— FOE estabilised a $70.5 million ESOP, equal to a 10% interest in the company. Proceeds to FOE may be used to repurchase common stock. FOE also amended its shareholders rights plan. In March, 1989 Phillip Frost, chairman of IVAX Corp., filed notice with the FTC that he intended to acquire at least 15% of FOE's common stock.

Next earnings report expected in late January.

Dec.		261	233	188
		1,009	871	725

Sales for the nine months ended September 30, 1989 rose 8.7%, year to year, reflecting a 7% volume gain and 4% higher selling prices, partly offset by adverse currency exchange rates. All major geographic areas posted increased sales. Profits were penalized by competitive pricing pressures, weakness in some plastics and electronics markets, and high start-up costs for new facilities. Pretax income was down 4.8%. After taxes at 41.6%, against 47.7%, net income advanced 7.3%. After preferred dividends in 1989 only, share earnings were $1.69, versus $1.69 (adjusted).

Summary

This regional bank holding company, headquartered in Minneapolis-St. Paul, is the 28th largest in the U.S.; it owns 44 banks in the upper Midwest, Colorado and Washington, as well as several nonbank subsidiaries. FBS has been boosting efficiency by consolidating banks and benefiting from improving domestic loan quality. Rising interest rates led to a $507 million loss on its large bond portfolio in 1988. With a restructured balance sheet, FBS should return to profitability in 1989.

Current Outlook

Including tax credits, but excluding gains on the sale of assets, earnings for 1989 could reach $3.10 a share, against the loss of $5.25 in 1988. A further rise to $3.30 is projected for 1990.

Dividends should continue at $0.41 quarterly.

Loan growth could be modest this year and into 1990 in a slowing economy. While capital remains adequate following the 1988 loss, efforts to rebuild it to former levels should also limit growth. The net interest margin could improve considerably without hedging costs for the large, low-yielding bond portfolio sold in January, 1989. Interest rate risk should also be lower. Domestic loan quality has been improving and exposure to LDC countries is conservatively reserved for, allowing the provision for loan losses to remain low. Removal of major uncertainty surrounding FBS's bond portfolio could improve business opportunities, but continued cost reductions will be necessary for a full earnings recovery. Profitability at the Colorado bank could also improve with the regional economy. Reported earnings should benefit from about $40 million of tax loss carryforward credits and gains on sale of assets.

	E3.10	d5.25	0.73	3.42

Review of Operations

Net interest income for the six months ended June 30, 1989 advanced 26%, year to year, reflecting the acquisition of Central Bancorp., Colorado in December, 1988 and a wider net interest margin (3.64% versus 2.66%) following the sale of low-spread bonds. The provision for loan losses was 24% higher, at $43 million. Higher credit card fees led to a 24% gain in noninterest income, while noninterest expense increased 22%. Pretax income advanced 37%. After taxes at 4.5% (including $16.4 million, of tax credits), versus 9.8%, net income was up 45%. Share earnings were $1.54, compared with $1.14.

Important Developments

Jul. '89— FBS said first half earnings included a $37 million increase in noninterest income largely reflecting the Central Banks acquisition and improved levels of fee income. The company said it was successfully intergrating Central Banks into FBS and was encouraged by the future prospects for its Colorado businesses.

Next earnings report expected in mid-October.

Business Summary

First Bank System is a multistate bank holding company whose First Bank subsidiary, with 35 offices in the Minneapolis metropolitan area is the largest bank in Minnesota; it also owns 43 community banks and trust companies with 97 offices in Minnesota, Montana, North and South Dakota, Wisconsin, Washington and Colorado. Together, they provide banking services to consumers and businesses, including lending, corporate finance, trading and selling securities, discount brokerage and trust and investment management. Nonbank subsidiaries are engaged in commercial finance, insurance, and mortgage banking.

During 1988 average earning assets of $24.0 billion (down 6.8% from 1987) were divided: commercial loans 38%, real estate loans 11%, consumer loans 7%, investment securities 33%, temporary investments 9%. Average sources of funds were interest-free deposits 10%, savings deposits 13%, other time deposits 36% (total deposits were $15.2 billion, down 3.6% from 1987), short-term borrowings 26%, long-term debt 6%, equity 5% and other 4%.

At year-end 1988 nonperforming assets were $503 million (2.07% of loans), down from $633 million (2.36%) a year earlier. The reserve for loan losses was 2.82% of loans, versus 3.21%. Net chargeoffs in 1988 were 0.71% of average loans, versus 1.28%.

Dividend Data

Dividends have been paid since 1930. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Oct. 10'89	1989					
49	49⅝-29¼	6	1.80	3.7%	B	1.17

Summary

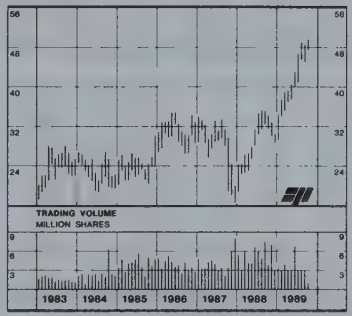
This bank holding company owns the 10th largest bank in the nation, First National Bank of Chicago, and 17 smaller banks. Operations are primarily geared to serve commercial customers, but highly profitable retail banking services, including substantial credit card operations, are being aggressively expanded. FNB has sharply reduced its LDC loan exposure and deemphasized certain unprofitable international and large corporate services. These moves, together with improved domestic loan quality, helped earnings recover in 1988 and should benefit profits in 1989 and 1990.

Current Outlook

Earnings for 1990 are projected at $7.50 a share, compared with 1989's estimated $8.00, which includes tax credits of about $0.45 and an estimated $0.60 gain from the sale of a unit.

Dividends should continue at $0.45 quarterly.

FNB is expanding the more profitable areas of lending to smaller corporations, credit card and other retail banking businesses, and investment banking-like businesses, while deemphasizing international lending. Thus, the drag of poor profitability in the Global Banking segment should diminish, and earnings are expected to benefit in 1990. However, a significant amount of the Global bank's earnings are derived from potentially riskier sources such as its large portfolio of investment in highly leveraged companies and bond and currency trading. FNB has reduced to its exposure to LDC loans from $3.1 billion at year-end 1987 to $1.9 billion at mid-1989, and plans to further cut LDC debt to $1.5 billion by year-end 1990. FNB is conservatively reserved at 67% of original outstanding LDC loans. Rapid growth of the credit card portfolio should result in rising loss provisions.



Review of Operations

Net interest income for the six months ended June 30, 1989 advanced 5.9%, year to year, as a 1.2% decline in earning assets was offset by benefits of rising interest rates and a higher yielding mix of assets. The provision for loan losses was 30% lower, at $110 million in the absence of provisions for LDC debts. Higher credit card fees and service charges and commissions offset lower foreign exchange trading profits and equity securities gains, and noninterest income rose 4.4%. With noninterest expense up 12%, pretax earnings increasede 9.3%. After taxes at 26.6%, versus 18.1%, net income was down 2.0%. Earnings were equal to $3.83 a share, compared with $4.40.

Important Developments

Sep. '89— FNB entered into an agreement in principle to sell First Chicago Investment Advisors, (FCIA) its institutional investment management subsidiary, for $70 million in cash, a $15 million subordinated note, and a 10% common stock ownership interest. FNB will also receive a $17 million dividend from FCIA. FNB said it expects to to recognize a pretax gain of $60 to $65 million from the sale.

Next earnings report expected in mid-October.

Business Summary

First Chicago Corp. is the parent of First National Bank of Chicago, the nation's 10th largest bank, American National Bank, and 16 smaller banks with 59 branches in the Chicago area. The Global Financial business provides traditional and specialized lending, financial management and capital markets trading services to large corporate and other clients. FNC also provides a variety of banking services to consumers, including credit cards (6 million cardholders), and financial services to smaller (middle-market) corporations. International operations accounted for 26% of assets in 1988. Contributions by line of business in 1988 were:

	Op. Inc.	Assets
Global	53%	73%
Consumer	33%	17%
Middle market	14%	10%

At year-end 1988 nonperforming assets were $876 million (3.1% of loans), including $502 million of LDC loans, against $1,080 million (3.9%) a year earlier. The reserve for loan losses was 4.72% of loans, versus 5.52%. Net chargeoffs during 1988 were 1.82% of average loans, against 1.51% in 1987.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available.

Summary

This holding company engages in the life insurance business through its wholly owned Executive Life Insurance Co. (California) and its 99%-owned Executive Life Insurance Co. of New York (ELNY). In 1988, I.C.H. Corp. purchased 6.3 million FEXC common shares through a tender offer, raising its FEXC stake to about 20%. In May 1989, FEXC signed a definitive agreement to sell ELNY for $400 million plus adjustments and other consideration. In October 1989, FEXC issued approximately 19.9 million preferred shares (convertible into common stock on a share for share basis) and warrants to purchase a like number of common shares through a rights offering which netted the company $284 million.

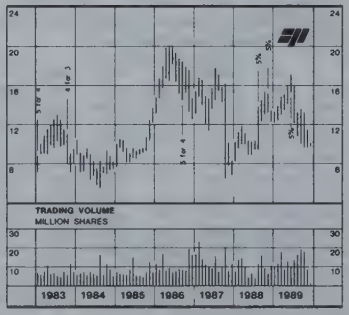
Business Summary

First Executive Corporation is a holding company engaged through its subsidiaries in the life insurance business. Its principal operating life insurance subsidiaries are Executive Life Insurance Company, and its 99%-owned Executive Life Insurance Company of New York. (In May 1989, FEXC agreed to sell this unit.) Life insurance policies and annuities are marketed through independent, nonexclusive general agents and insurance brokers and by registered representatives of securities brokerage firms.

Total revenues in 1988 were derived as follows: investment income 62%, life insurance premiums 23%, and annuity premiums 15%.

At year-end 1988, FEXC's Irreplaceable Life series of individual and group nonparticipating whole life insurance products accounted for a significant amount of sales of annual premium life insurance. These policies offer favorable interest rates which reflect available market investment yields as well as overall portfolio returns and mortality charges. Universal-life products represented about 17% of first year life premiums in 1988. Annuity products sold by the company consist of single premium deferred annuities and single premium immediate annuities. During 1988 FEXC reduced the volume written on certain products, primarily single premium life and annuity contracts, that create greater surplus strain on a statutory accounting basis.

Total investments at year-end 1988 amounted to $17.1 billion and were divided as follows: fixed maturities 87%, equity securities 4%, short-term investments 6%, and other 3%.



Important Developments

Oct. '89— FEXC said it issued 19,931,074 Depositary Preference Shares (convertible into common on a share for share basis) and warrants to purchase 19,931,074 common shares following completion of a rights offering. Net proceeds of $284 million were earmarked to expand insurance operations and bolster statutory capital and surplus. Also, FEXC warned that there was no assurance that the planned sale of its Executive Life Insurance Co. of New York (ELNY) unit would be completed. In May, FEXC agreed definitively to sell its 99% stake in ELNY to WW Acquisition Corp. for $400 million, increasing 15% annually from December 31, 1988 to the date of closing. FEXC would also receive a 10-year profit participation in an investment and merchant banking unit of WW, and warrants to purchase 19.9% of WW's fully-diluted common equity.

Next earnings report expected in February.

Review of Operations

Total revenues for the nine months ended September 30, 1989, rose 9.5%, year to year (1988 restated), attributable to a 25% increase in premiums and other considerations as well as growth in net investment income. Following a 16% rise in total benefits and expenses, including an expected $112 million loss on the sale of ELNY, pretax earnings were down 38%. After taxes at 96.4%, versus 33.3%, net income was 97%, to $4.2 million from $126 million. After preferred dividends, there was a per share loss of $0.17, versus a profit of $1.09. Results in the 1989 interim exclude a $0.57 a share special gain from a change in accounting for income taxes.

Summary

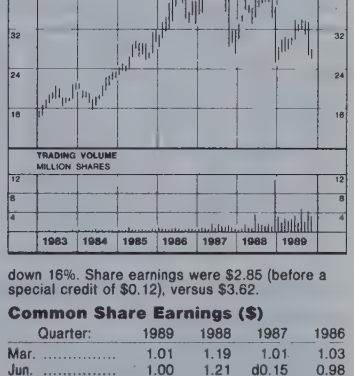
On February 29, 1988 First Fidelity merged with Fidelcor to form the 19th largest banking organization in the U.S. with 484 offices in New Jersey and eastern Pennsylvania. Loan quality problems found at the acquired bank led to a large fourth quarter loss in 1988, as well as to the resignation of certain top managers. While earnings for 1989 are expected to recover, a slowing regional economy could limit growth potential in 1990.

Current Outlook

Earnings for 1990 could reach $4.15 ($4.10 fully diluted), up from the $3.85 a share ($3.75) projected for 1989.

Dividends should continue at $0.50 quarterly.

Loan growth could pick up slightly in 1990 but is expected to be limited by a slowing regional economy, mainly in the real estate sector. Growth could also be restrained by tighter credit quality review procedures implemented to prevent a recurrence of the 1988 reserve boosting. FFB has sold off some low-yielding securities to conserve capital which will continue to restrict overall asset growth. Deteriorating real estate markets in FFB's region has led to a rise in problem loans; at September 30 these loans were about $430 million. With the allowance for credit losses covering 77% of nonperforming loans, the provision for credit losses could rise. LDC loan exposure is modest at about $127 million, with reserves covering 64%. FFB has grown rapidly via acquisitions in recent years but has not realized many of the potential efficiencies from those acquisitions. Recent management changes may also mean that any efficiencies will be realized more slowly than earlier expected. FFB's goal of zero-growth in noninterest expense in 1990 will aid profitability.



Review of Operations

Net interest income for the nine months ended September 30, 1989 fell 3.3%, year to year, mainly due to a 2.5% decline in earning assets as FFB reduced lower yielding assets, a more expensive funding mix, and a higher levels of nonperforming loans. The provision for loan losses was 62% higher at $88 million, due to the rise in nonperforming assets. Aided by a $29.8 million gain from the settlement of pension obligations, noninterest income rose 24%. With noninterest expenses up 5.9%, pretax earnings fell 17%. After taxes at 20.6%, versus 21.3%, net income was down 16%. Share earnings were $2.85 (before a special credit of $0.12), versus $3.62.

Dec.	E1.00	d3.33	d0.77	1.10
	E3.85	0.29	1.23	4.12

Important Developments

Oct. '89— FFB attributed the year-to-year decline in earnings to narrowing interest margins, lower levels of earning assets, slower growth in commercial and industrial loan activity, and the higher loan loss provision and operating expenses.

Next earnings report expected in mid-January.

Business Summary

First Fidelity Bancorporation, the 19th largest bank holding company in the nation, was formed in 1988 through the merger of First Fidelity, with four banks and one thrift and some 300 offices in New Jersey, and Fidelcor, with three banks and some 200 offices in the eastern part of Pennsylvania. Financial services for corporate clients are emphasized, though retail operations are also important. Nonbank subsidiaries include brokerage, insurance, mortgage banking, and commercial and trade finance. Trust operations include $10 billion of assets under management.

During 1988 average earning assets of $26.6 billion (up 11% from 1987) were divided: commercial loans 39%, consumer loans 14%, mortgages 14%, foreign loans 1%, investment securities 23%, money market assets 6%. Average sources of funds were demand deposits 15%, consumer deposits 32%, other deposits 25%, short-term borrowings 17%, long-term debt 2%, equity 6% and other 3%.

At December 31, 1988 nonperforming assets were 2.11% of loans and related assets, up from 1.63% a year earlier. The reserve for loan losses was 1.86%, versus 1.79%. Net chargeoffs during 1988 were 1.30% of average loans, against 0.76% during 1987.

Dividend Data

Dividends have been paid since 1812. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

Summary

First Interstate is the nation's eighth largest bank holding company, conducting multistate banking operations through 56 banks in 13 western states. The company is focusing on improving profitability; under a restructuring plan, it has divested about $5 billion of underperforming assets, and segregated problem loans and other assets to be sold to a separate management unit. In the 1989 third quarter the company boosted reserves at it's Arizona banking unit, reflecting that state's weak real estate market. An earnings recovery is possible in 1990.

Current Outlook

Earnings for 1990 could reach $7.50 a share, up from the $5.00 (before special credits) projected for 1989.

The dividend is expected to continue at $0.75 quarterly.

Mounting problem loans at the company's Arizona banking operations will likely restrain earnings in 1990. While reserves for these loans were boosted in 1989, future reserve building is anticipated. An increased focus on higher-return consumer and small corporate banking business should protect margins. The restrucuring program (about $5 billion in assets have been sold) is expected to lead to greater operating efficiencies. At Septemer 30, 1989 non-trade LDC loans amounted to $294 million, or 0.78% of total loans, and are reserved at 49%.

Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 8.4%, year to year, primarily reflecting higher loan volume and a wider net interest margin. The provision for loan losses was 60% higher, at $750 million, due to a sharp increase in reserves at the Arizona bank. Aided by gains on loan sales and a gain on the settlement of pension obligations, noninterest income rose 26%. With noninterest expense down 5.2%, pretax earnings rose 6.9-fold. After tax items, net income was $173.8 million ($3.27 a share), versus a loss of $14.6 million ($0.47), before a special credit of $0.99 a share in the 1989 period.

Important Developments

Oct. '89— The company strengthened the provision for loan losses at its Arizona banking operation by $350 million, reflecting the continuing weakness of real estate construction and commercial mortgage markets in Arizona. As a result, the bank reported a third quarter operating loss of $174 million. Included in the 1989 third quarter results was an $80 million pretax gain on sale of a non-relationship credit card portfolio and mortgage loans, a $37 million pretax gain from the settlement of a portion of its pension obligations, a reversal of $37 million of state tax accruals, and a $20 million gain for adjustment to accrued interest on a Federal tax audit agreement. In September the company sold its capital equipment financing unit for $190 million cash. No gain was recognized on the sale.

Next earnings report expected in mid-January.

Business Summary

First Interstate Bancorp is the nation's eighth largest banking organization, with 56 banks in 13 western states, including First Interstate Bank of California, the fifth largest bank in that state (30% of total assets). Combined retail banking operations are conducted through over 1,030 branches; lending to middle-market corporations and trust operations is also important. Nonbank subsidiaries include commercial and consumer finance (107 offices), leasing, mortgage banking (to be sold) and venture capital. First Interstate also has franchise agreements with 44 other banks (assets of $5.5 billion) in 11 states.

During 1988, average earning assets of $49.6 billion (up 12% from 1987) were divided: 33% commercial loans, 19% real estate loans, 19% consumer loans, 4% foreign loans, 15% securities and 10% other. Average sources of funds were 35% core deposits, 30% other consumer deposits, 10% other time deposits, 17% other borrowed funds, 4% equity and 4% other.

At December 31, 1988 the reserve for loan losses was 3.16% of loans, against 3.72% a year earlier. Nonperforming assets were $1,896 million (4.95% of related assets), up from $1,502 million (4.55%). Net chargeoffs during 1988 were 2.22% of average loans, against 1.71% in 1987.

Dividend Data

Dividends have been paid since 1958. A dividend reinvestment plan is available.

First Mississippi

NYSE Symbol FRM Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 5'89	1989					
15	20½–13⅛	23	0.30	2.0%	B	1.36

Summary

FRM has interests in industrial and specialty chemicals, nitrogen fertilizers, oil and gas exploration and development, coal and gold mining, and ventures in high technology businesses. The company plans to continue to upgrade its existing businesses while investing in new business ventures. Future restructuring actions may include acquisitions, stock repurchases or special dividends.

Current Outlook

Share earnings for the fiscal year ending June 30, 1990 are projected at about $1.20, versus the $0.81 of 1989.

Dividends are expected to continue at $0.07½ quarterly.

Profits in fiscal 1990 should benefit from the first full year output of a new gold mine and mill, while industrial chemicals should remain relatively strong; sluggish construction and automotive markets and higher raw material costs will limit earnings somewhat. The depressed fertilizer business may turn only modestly profitable as 1990 crop plantings are expected to increase. Further restructuring actions, including the possible public stock offering of the industrial chemicals business, acquisitions, and/or stock repurchases, would have a significant impact on reported earnings.

Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	102.5	81.9	79.1	55.2
Dec.	---	96.3	85.8	62.3

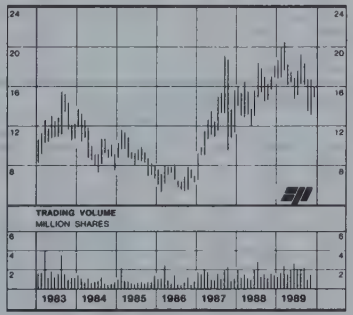
	E1.20	0.81	1.61	0.93



Important Developments

Oct. '89— FRM said that the short-term outlook was improving with fertilizer prices moving up. Gold production of the new mill should reach the design rate of 174,000 ounces of gold a year in fiscal 1990's second half. Industrial chemicals should remain strong but will reflect some near-term weakening in demand in construction and automotive markets. Directors increased to $20 million the funds authorized for the stock repurchase program. FRM acquired EKC Technology, a supplier of chemicals to the semiconductor industry.

Aug. '89— FRM agreed with Mobay Corp., a unit of Bayer of Germany, to provide technology and act as general constractor for the construction of a 250 million pound a year aniline plant at Mobay's Baytown, Texas facility. FRM will market all aniline not consumed by Mobay. Plant completion is scheduled for the first half of 1992.

Next earnings report expected in late January.

Business Summary

This diversified company has interests in chemicals, energy, gold and technology-based ventures. Segment contributions (profits in million $):

Fiscal 1989	Sales	Profits
Fertilizer	41%	-$7.2
Industrial chemicals	30%	34.1
Oil and gas	11%	4.3
Coal	8%	0.8
Minerals	5%	6.0
Other	5%	-5.4

About 18% of fiscal 1989 sales were exports.

Triad Chemical (50%-owned) operates at Donaldsonville, La. an ammonia plant (annual capacity of 420,000 tons) and an urea plant (520,000). AMPRO (100%-owned) operates an ammonia plant (446,000 tons) at Donaldsonville.

First Chemical, at Pascagoula, Miss., produces aniline, nitrobenzene, nitrotoluenes, toluidines, and other nitrated aromatic industrial chemicals, as well as specialty chemicals. A 23% interest is held in Melamine Chemicals, Inc.

Proved developed reserves at June 30, 1989 were 4,590,419 bbls. of oil and 41,560 MMcf of gas. FRM also operates an intrastate gas pipeline. Pyramid Mining mines coal in Kentucky, with reserves of 72 million tons. FirstMiss Gold Inc. (82%-owned) conducts gold heap leach operations at Getchell, Nevada. A gold mill and mine at Getchell started up in early 1989. The other segment includes thermal plasma energy systems, horizontal continuous casting systems, steel melting and casting, ceramic refractory fibers, and biopesticide research.

Dividend Data

Dividends have been paid since 1973. A dividend reinvestment plan is available. An amended "poison pill" stock purchase right was adopted in 1989.

Summary

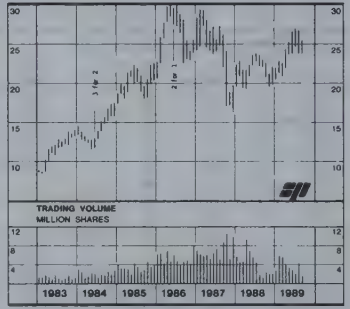
Since mid-1985, this North Carolina-based super-regional banking company (the third largest in the Southeast and the 22nd largest in the nation) has tripled in size through an aggressive program of acquisitions in Florida, Georgia and South Carolina. Pending regulatory approval, FTU wil acquire Florida National Banks of Florida Inc., a $7.5 billion-asset bank holding company, in the fourth quarter of 1989. While the acquisitions have been dilutive, superior loan quality and efficiencies from merging operations could lead to earnings growth in 1990 and beyond.

Current Outlook

Earnings for 1990 could reach $3.05 a share, up from the $2.80 estimated for 1989.

Dividends should continue at $0.25 quarterly.

Loan growth should remain robust in 1990 (through June, 1989 loan increased some 20%, year to year), reflecting the demands of a strong regional economy and the acquistion of Florida National Banks (expected to be completed by year-end 1989). However, as FTU has financed this growth through higher-cost purchased funds, it has seen its net interest margin trimmed. Earnings should continue to benefit from FTU's superior loan quality, which keeps loan loss provisions low. However, there may be an increase in loss reserves, given recent growth and the rise in problem loans (at the end of the June quarter coverage was 101% of problem assets). Efficiencies from completing the integration of acquired banks should begin to benefit earnings. While the proposed FNB acquisition presents opportunities to improve profitability, the acquisition should be minimally dilutive in 1990.



Review of Operations

Net interest income for the six months ended June 30, 1989 rose 2.6%, year to year, reflecting a 5.0% increase in earning assets, partially offset by rising funding costs. The net margin fell to 4.48% from 4.65%. The provision for loan losses was nominally higher, at $28.8 million. FTU realized a $9.6 million ($0.06 a share) gain on sale of mortgage servicing portfolio, but significantly lower pretax gains on the sale of securities ($748,000 versus $34.7 million) and lower mortgage banking fees led to an 8.9% decline in noninterest income. With noninterest expense up 1.0%, pretax net fell 5.9%. After taxes at 17.5%, versus 18.5%, net income was down 4.8%, to $1.37 a share from $1.41.

Important Developments

Jul. '89— Shareholders of Florida National Banks of Florida, Inc., a $7.5 billion bank holding company, approved FTU's proposed acquistion of FNB for $750 million. The acquisition was expected to be completed in late 1989. FTU said that following the acquisition it would be the 14th largest bank holding company in the U.S.

Next earnings report expected in mid-October.

Business Summary

First Union Corp. is an interstate bank holding company headquartered in North Carolina, where it conducts banking operations through 273 offices. Since 1985, it has acquired banks in Florida (220 offices), Georgia (137), Tennessee (2), and South Carolina (67). Mortgage banking operations are also significant ($11 billion of mortgages serviced), conducted through 64 offices nationwide. In addition, First Union has home equity lending (172 offices) and consumer finance (200) subsidiaries.

Average earning assets of $24.9 billion for 1988 (up 8.5% from 1987) were divided: commercial loans 28%, real estate loans 23%, consumer loans 17%, investment securities 28%, money market assets 4%. Average sources of funds were: interest-free deposits 13%, savings and money-market accounts 26%, time deposits 26% (average total deposits of $18.3 billion were up 9.8% from 1987), short-term borrowing 24%, long-term debt 2%, equity 7% and other 2%.

At year-end 1988, the reserve for loan losses was 1.33% of loans, against 1.71% a year earlier (restated). Nonperforming assets were $206 million (1.08% of loans), versus $200 million (1.29%). Net chargeoffs during 1988 were 0.57% of average loans, versus 0.43% in 1987.

First Virginia Banks

NYSE Symbol FVB

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 3'89	1989					
31⅞	35⅝-23¾	10	1.20	3.8%	A+	0.93

Summary

This bank holding company owns the fifth largest bank in Virginia, with a strong presence in the Washington, D.C. area. FVB has been expanding through acquisitions, and in 1988 it issued about 480,000 common shares to acquire a Tennessee-based bank with $86 million of assets. Earnings for the first nine months of 1989 were enhanced by growth in loans, a higher net interest margin, and a good control of noninterest expenses.

Business Summary

First Virginia Banks (formerly First Virginia Bankshares) is a bank holding company controlling 22 member banks with combined assets of approximately $4.9 billion at June 30, 1989. FVB conducts its operations through 255 offices statewide, plus 25 offices in Maryland and 16 in Tennessee. The greatest concentration of offices is in the suburbs of Washington, D.C. Other subsidiaries are engaged in mortgage banking and insurance activities.

The flagship bank is First Virginia Bank, the fifth largest in the state, with assets of $1.99 billion at 1988 year-end. Second largest is First Virginia Bank of Tidewater, with assets of $378 million, followed by First Virginia Bank Southwest, with assets of $296 million.

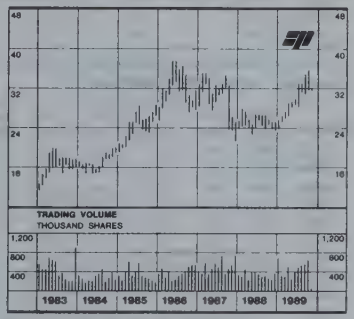
Average loans outstanding in recent years were divided as follows:

	1988	1987	1986	1985
Installment	65%	62%	60%	61%
Real estate	14%	16%	18%	19%
Other	21%	22%	22%	20%

In 1988 loans outstanding accounted for 71% of average earning assets, investment securities 26%, and Federal funds sold and resale agreements 3%.

Average sources of funds in 1988 were certificates of deposit 32%, demand deposits 16%, fixed rate transaction accounts 15%, money market accounts 13%, savings accounts 12%, shareholders' equity 8%, and short term debt and other 4%.

The allowance for loan losses was 1.26% of loans outstanding at year-end 1988, unchanged from a year earlier. Net charge-offs were 0.25% of average loans in 1988, versus 0.28% in 1987. At year-end 1988 nonperforming assets (consisting of nonaccruing and restructured loans and foreclosed real estate) were $17.6 million (0.55% of total loans), versus $14.2 million (0.50%) in 1987.



Several nonbanking subsidiaries generate and service first and second mortgage loans, and underwrite and sell an array of insurance products.

Important Developments

Oct. '89— Commenting on results for the first nine months, management noted that earnings benefited from a higher net interest margin and continued growth in loans, together with good control of noninterest expenses. Nonperforming assets at September 30, 1989 were equal to 0.56% of total loans, against 0.53% a year earlier, while the allowance for loan losses remained steady at 1.25% of loans.

Next earnings report expected in late January.

Review of Operations

Total interest income for the nine months ended September 30, 1989 increased 13%, year to year. With total interest expense up 15%, net interest income advanced 11%. The provision for loan losses expanded 7.9%, to $8.6 million from $8.0 million. Following a 3.4% rise in other income, and a 5.6% increase in other expenses, pretax earnings rose 17%. After taxes at 27.1%, versus 24.4%, net income advanced 13%, to $50.8 million from $45.2 million. After preferred stock dividends, share earnings were $2.41, versus $2.15.

Sep. 26'89	1989					
28¼	30⅞-24⅞	9	1.28	4.5%	A+	0.95

Summary

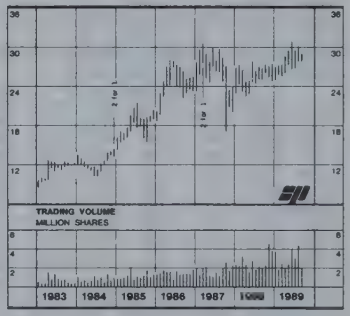
This superregional bank holding company, formed through the early 1988 merger of Fleet Financial Group and Norstar Bancorp, owns nine banks in Rhode Island, New York, Connecticut, Maine, New Hampshire and Massachusetts as well as subsidiaries engaged in mortgage banking, consumer and commercial finance, and discount brokerage. Despite an expected slowdown in lending activity, good credit quality and expense controls could enable earnings to reach new highs in 1989 and beyond.

Current Outlook

Earnings for 1989 could rise to $3.35 a share ($3.30 fully diluted) from the $3.07 ($3.01) reported for 1988. A further increase in earnings to $3.70 a share is projected for 1990.

A modest boost in the $0.32 quarterly dividend is likely.

Slower growing Northeastern and New England economies are expected to lead to a moderation in loan demand in 1990. Average loans are expected to increase about 9% in the aggregate. Loan quality is good, despite rising nonperforming loans in the commercial real estate portfolio, which constitutes a moderate 18% of total loans. Nonperforming assets have been rising, but are still only 1.34% of loans at June 30 (1.11% at year-end 1988). FNG has indicated that nonperforming assets will continue to rise, and the provision for loan losses could follow. FNG plans to cut its workforce by about 5% as part of a $50 million cost reduction program. That, plus consolidation of branches should boost banking profits. Consumer banking operations should remain highly profitable and the leasing and student loan servicing businesses should continue expanding, offsetting any weakness in the mortgage banking business due to low business volumes.



Review of Operations

Net interest income for the six months ended June 30, 1989 advanced 12%, year to year, reflecting 9.2% growth in average earning assets and a wider net interest margin (5.16% versus 5.03%). The provision for loan losses was 27% higher, at $63 million, as chargeoffs increased. Despite lower trading and brokerage income, noninterest income rose 5.7%, due to a significant increase in student loan processing fees. With noninterest expense up 6.1%, pretax earnings rose 16%. After taxes at 31.0%, versus 28.7%, net income was up 12%. Share earnings were $1.65 ($1.62 fully diluted), compared with $1.49 ($1.46).

	E3.35	3.07	1.85	2.58

Important Developments

Aug. '89— Fleet Credit Corp., FNG's asset-backed lending unit, acquired the Equipment Financing Division of Signal Capital Corp. The acquisition of Signal's $750 million equipment leasing portfolio increases Fleet Credit's assets to more than $2 billion. Separately, FNG said that it planned to reduce its workforce by about 1,000 jobs, or 5%, by year-end 1990.

Next earnings report expected in mid-October.

Business Summary

Fleet/Norstar, created through the January 1, 1988 merger of Fleet Financial Group and Norstar Bancorp, is the nation's 21st largest banking organization. Its nine subsidiary banks, located in Rhode Island, Maine, New York, Connecticut, New Hampshire and Massachusetts, operate through some 577 branches. Mortgage banking operations are the second largest in the nation (88 offices nationwide; $31 billion loans serviced); consumer finance (184 offices) is important, as are asset-based lending (commercial finance, leasing, factoring), discount brokerage, and venture capital investment. Contributions to operating income:

	1988	1987	1986
Commercial/consumer	62%	61%	65%
Mortgage banking and real estate	18%	19%	17%
Consumer finance	10%	11%	10%
Asset-based lending	7%	5%	5%
Trust	3%	2%	3%

At December 31, 1988 nonperforming assets were $220 million (1.11% of related assets), against $157 million (0.88%) a year earlier (restated). The reserve for loan losses was 1.60% of loans, down from 1.71%. Net charge-offs during 1988 were 0.52% of average loans, versus 0.67% in 1987.

Dec. 27'89	1989					
23⅞	30⅝-22	9	0.76	3.2%	B+	1.30

Summary

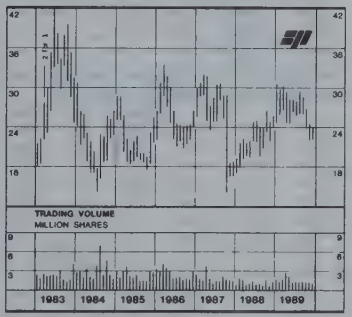
Fleetwood is the leading manufacturer of recreational vehicles and manufactured housing. Sales and earnings are extremely sensitive to cyclical economic fluctuations and especially to the level of interest rates. The long-term outlook is enhanced by FLE's growing market share in both of its major product groups and its strong financial position.

Current Outlook

Earnings for the fiscal year ending April 30, 1990 are estimated at $2.30 a share, compared with fiscal 1988-9's $3.06.

The quarterly dividend was raised 19%, to $0.19 from $0.16, with the August, 1989 payment.

Recreational vehicle sales should slow in fiscal 1989-90, reflecting consumers' worries about the economy. Manufactured housing sales should slip as well, but FLE should continue to gain market share. Margins should narrow on the sluggish sales.



[1]Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	395	427	362	314

Apr.	E0.65	0.77	0.65	0.53
	E2.30	3.06	2.08	1.70

Important Developments

Nov. '89— The company said that fiscal 1989-90 second quarter manufactured housing sales were $136.6 million, down 2.0% from $139.4 million a year before. Unit shipments of manufactured housing declined 6.3%. Recreational vehicle sales were $228.2 million, down 16% from $273 million a year earlier. The company said that it continued to outperform the industry, despite lower year-to-year sales comparisons, and predicted it would emerge from the current slowdown with a better market share position.

May '89— FLE announced a stock repurchase program of up to 1.2 million shares of common stock.

May '89— Fleetwood said that its share of the manufactured housing market had risen to 15.8% in 1988, from 14.8% the year before.

Next earnings report expected in late February.

Business Summary

Fleetwood Enterprises designs, manufactures and sells recreational vehicles (motor homes and travel trailers) and manufactured housing. The company is the nation's largest producer of recreational vehicles and manufactured housing. Industry segment contributions in fiscal 1988-9:

	Sales	Profits
Recreational vehicles	65%	73%
Manufactured housing	33%	20%
Other	2%	7%

Recreational vehicles (RVs) are primarily self-contained units designed and equipped to provide comfortable temporary living quarters. Motor homes (priced from $32,000 to over $100,000) are self-propelled vehicles built on a truck chassis, while travel trailers ($6,000 to $45,000) are designed to be towed. As of September, 1989 the company was operating 26 manufactured housing plants, and 20 recreational vehicle plants.

FLE's manufactured housing products are built in sizes ranging from 560 to 1,960 sq. ft. and retail from about $10,000 to $50,000, although most are designed to sell for less than $25,000. Assembly line techniques are used to manufacture the homes, primarily from components made by others.

Dividend Data

Dividends have been paid since 1965. A "poison pill" stock purchase right was adopted in 1988.

Summary

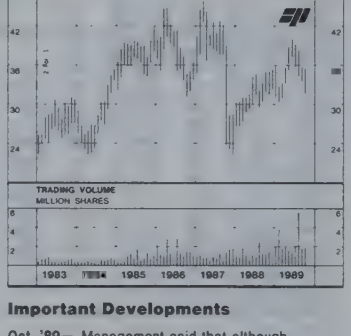
This company became the largest wholesale distributor of food and related products to retail food stores through the $600 million acquisition of Malone & Hyde in July, 1988. Fleming also provides support services to its customers and operates its own retail food stores as does Malone & Hyde. Increased purchasing power and expansion into new markets bode well for longer-term growth.

Current Outlook

Earnings for 1990 are projected to rise to about $3.00 a share from the $2.60 estimated for 1989.

The $0.25 quarterly dividend is the minimum expected.

Sales for 1990 should increase moderately as new stores come on stream. Margins should improve, reflecting the integration of Malone & Hyde with its wider margins. Reduction in overhead costs and improved computerization should also benefit margins. Interest expense should decline.



Net Sales (Billion $)

Period:	1989	1988	1987	1986
16 Wks. Apr.	3.66	2.65	2.61	2.27
12 Wks. Jul.	2.74	2.04	1.96	1.71
12 Wks. Oct.	2.77	2.67	1.97	1.79
12 Wks. Dec. ...	---	3.11	2.07	1.89
	---	10.47	8.61	7.65

Sales for the 40 weeks ended October 7, 1989 rose 25%, year to year, reflecting the Malone & Hyde acquisition. Gross margins improved outweighing increased selling and adminstrative expenses. Following much higher interest expense, pretax income advanced 38%. After taxes at 43.3%, versus 41.5%, net income rose 34%. Share earnings were $1.87 on 9% more shares, compared with $1.66.

Important Developments

Oct. '89— Management said that although conditions continued to be quite competitive, overhead costs are being reduced and expansion plans are moving ahead of schedule. Performance of the Philadelphia division improved in the latter part of the third quarter. The company raised its bad debt reserves by $6 million to provide for an increase in credit exposure in the third quarter and also recorded a pretax gain of $8.3 million on the disposition of the preferred stock of WS Holdings Corp., the parent of a former subsidiary. FLM is in the process of enlarging three distribution centers, which will add more than 500,000 sq. ft. to operations when completed next year. In June, 1989 FLM sold $150 million of 6½% convertible subordinated notes due in 1996; proceeds were used to reduce commercial paper outstanding.

Next earnings report expected in late January.

Business Summary

Fleming Companies primarily distributes on a wholesale basis food and related products to retail food stores. Other operations include the providing of support services to retailer-customers, the operation of retail food stores, and the wholesale distribution of institutional foodservice products.

As of year-end 1988 the company was operating 32 grocery distribution centers serving over 5,200 retail food stores in 36 states with a wide variety of inventory, including groceries, meats, produce, frozen foods, dairy products, and general merchandise.

Support services to retailer-customers include field counseling; merchandising, advertising and promotional assistance; consumer information programs; and computer systems.

The Dixieland Foods Stores subsidiary operates 46 retail food stores (as of year-end 1988) in Alabama, Mississippi, Georgia, and Florida.

Malone & Hyde (acquired July, 1988) operated six megamarket super warehouses all located in Wisconsin. Godfrey Co. (acquired November, 1987) operates 35 Sentry supermarkets and four Sun super warehouse markets in Wisconsin.

The company also operates 24 cash and carry warehouses which serve smaller grocers and institutions who come directly to the warehouse and eight Food 4 Less retail food stores in Florida, Georgia, Kansas and Missouri.

Dividend Data

Dividends have been paid since 1927. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 24'89	1989					
1⅝	3¾-1⅜	NM	None	None	C	1.68

Summary

This company manufactures minisupercomputers and array processors for scientific and engineering applications. The company's prospects are heavily dependent on customer acceptance of its new line of Unix supercomputer products. FLP's net loss in the first nine months of 1989 led to a violation of bank loan covenants; although the covenants were subsequently amended, continued losses could result in the bank demanding immediate repayment of a $12 million loan and terminating a $5 million line of credit.

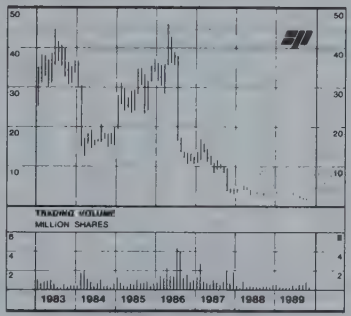
Business Summary

Floating Point Systems, operating under the name FPS Computing, sells attached processors, minisupercomputers, and array processors which perform complex mathematical calculations at rates far exceeding those of general purpose computers. Applications include aircraft and auto design, medical imaging, meteorology, structural design and analysis, computational physics and chemistry, simulation, and electronic circuit design. Foreign operations provided 35% of revenues in fiscal 1988. Contributions in recent fiscal years:

	1988	1987	1986
Attached processors	40%	39%	40%
Array processors	36%	27%	36%
Supercomputers	3%	11%	3%
Service	21%	23%	21%

In September, 1988 FLP acquired Celerity Computing for common stock valued at $1.25 million. The acquired assets included the technology used to develop FLP's new stand-alone, UNIX-based minisupercomputer, the FPS Model 500, introduced in October, 1988. The 500, with up to four processors, offers performance of up to 133 millions of instructions per second (MIPS) and 167 million floating point operations per second (MFLOPS) for $250,000 to $1 million. FLP also announced it would market Stellar Computer's UNIX-based superworkstations, as its Model 300 and 350.

The M64 series of attached processors operate at 6 to 341 MFLOPS. Prices range from $70,000 to over $1 million. The systems are used with host computers, primarily those manufactured by Digital Equipment. The FPS-5000 and MP32 series of array processors are attached to other computers to increase their speed. The processors range from 8 to 72 MFLOPS, and sell for $45,000 to $120,000.



In 1986 FLP introduced its T series supercomputers based on massively parallel processing, a technology that is not widely accepted. Nine systems were installed. In April, 1988 development of the T Series was stopped.

Important Developments

Jul. '89— During the third quarter of fiscal 1989, additional restructuring steps were taken by the company, resulting in a $6.1 million charge. The components of this charge included $0.9 million from personnel reductions, $3.7 million from the expected loss on the disposition of certain facilities that are now in excess to FLP's needs, and a $1.5 million inventory writedown of certain products which are being phased out of production.

Next earnings report expected early December.

Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	15.8	19.2	24.3	26.5
Apr.	14.7	17.7	23.5	21.3
Jul.	14.4	17.1	18.3	20.8
Oct.		16.8	18.2	20.0
		70.8	84.3	88.6

Revenues for the nine months ended July 31, 1989 declined 17%, year to year, as product sales were down 20% and service revenues fell 8.0%. Gross margins improved substantially on reduced overhead levels resulting from staff reductions and idling of equipment. After restructuring expenses in the fiscal 1989 third quarter totaling $6.1 million, the pretax loss narrowed to $13.1 million from $15.9 million. After a tax credit of $740,000, versus taxes of $545,000, the net loss was $12.3 million ($1.29 a share, on 7.6% more shares) compared with $16.5 million ($1.86).

Dividend Data

No dividends have ever been paid. A "poison pill" stock purchase right was adopted in 1988.

Finances

FLP's net loss in the first nine months of 1989 resulted in violation of the financial ratios and covenants contained in a bank loan agreement. Although the bank agreed to waive these covenants, continued losses could cause FLP to be in violation of amended covenants and, in such an event, the bank could demand immediate repayment of a $12 million term loan and terminate a $5 million operating line of credit. If the credit line is terminated, FLP might not be able to finance its business from operations and would need to seek alternative sources of funding.

Auditors issued a qualified opinion on FLP's fiscal 1988 financial statements, citing litigation concerning FLP'S alleged violation of securities laws

Summary

This company's principal unit operates a 442-mile railroad extending from Jacksonville to Miami. Following adoption in 1984 of a holding company structure, FLA has embarked upon an ambitious development program for its important real estate holdings. Profit comparisons in 1989 are benefiting from increased property sales and rental income and gains from the sale of securities.

Business Summary

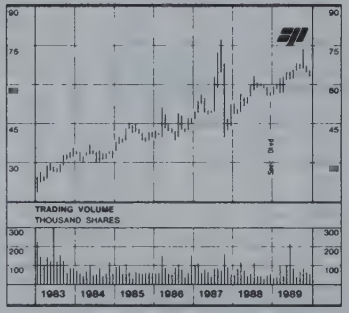
Florida East Coast Industries is the parent of the 442-mile Florida East Coast Railway Co. and Gran Central Corp., a rapdily growing real estate developer. Contributions to operating profits (in million $) by business segment in recent years:

	1988	1987
Transportation	$48.2	$35.5
Real estate	-0.2	1.2
Other	8.1	9.1

The Florida East Coast Railway operates over 351 miles of main track and 91 miles of branch lines extending from Miami to Jacksonville. Some 372,171 cars were handled in 1988 generating 17.2 million tons of freight, versus 361,909 cars handling 15.7 million tons in 1987. About 70% FLA's carloads originate on its system, with the balance received from CSX Corp. or Norfolk Southern Corp. Intermodal shipments (trailers or containers moved via rail flatcar) accounted for 54% of total carloads in 1988. Another important traffic source is crushed stone, gravel and sand, which generated 29% of total loads in 1988. In 1988 average revenues per ton-mile was 3.11 cents, compared with 3.37 cents in 1987.

FLA's equipment fleet at 1988 year-end consisted of 75 locomotives, 2,689 railcars and 1,277 tractors and trailers.

Real estate activities are conducted through Gran Central Corp., which owns 23,719 acres of properties in 13 counties in Florida and manages 1,220 acres owned by the Florida East Coast Railway. During 1988 Gran Central completed the construction of three multi-purpose buildings in Jacksonville and Melbourne, bringing total holdings to more than 600,000 sq. ft. of offices, warehouses and distribution facilities. Other activities include the management of a trailer park in Miami and the manufacture of concrete crossties and grade crossings primarily for the firm's railroad.



Important Developments

Oct. '89— FLA said that construction of the proposed Gran Central tower in downtown Miami could begin in early 1990, once the project is formally cleared by local authorities. The 34-story structure would contain about 550,000 sq. ft. of office space. During 1990 FLA also expects to complete infrastructure development for the first phase of a 90-acre office/industrial park complex at Stuart, Fla. Among other property development projects being managed by FLA, an 82,000 sq. ft. multipurpose building at the Gran Park in Miami is expected to be completed in the 1989 fourth quarter. A rail-served warehouse and a multipurpose building at the 900-acre Gran Park in Medley, Fla. were completed in 1989's second quarter.

Dec. '88— FLA posted a $9.6 million pretax gain on the sale of 21 miles of track to Florida's Department of Transportation for $35.5 million.

Next earnings report expected in late January.

Sep.	35.7	33.5	34.1	29.2
Dec.		41.7	37.0	37.1
		150.9	140.7	130.2

Operating revenues for the nine months ended September 30, 1989 rose 2.6%, year to year, primarily reflecting increased carloads and slightly higher rail rates. Aided by greater rental income and land sales and gains from the sale of Trailer Train stock, pretax income advanced 30%. After taxes at 37.0%, versus 36.1%, net income was up 28%. Share earnings were $2.68, versus $2.09.

Finances

In October, 1989 the Alfred I. duPont estate reported that it planned to sell the 450,224 FLA common shares (4.9%) it holds "over an extended time period".

At December 31, 1988 FLA had outstanding $14.3 million of 5% collateral trust bonds maturing in 2001. For financial reporting purposes, these bonds have been removed from FLA's books since FLA has set aside U.S. Government securities with offsetting matching cash flows.

Dividend Data

Cash dividends were initiated in 1980.

Florida Progress

NYSE Symbol FPC

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 29 '89	1989					
38¼	39¼-33¼	10	2.64	6.9%	A	0.46

Summary

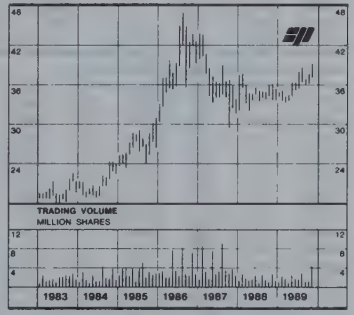
Florida Progress is the holding company for Florida Power, which provides electric utility services to a growing territory in central and Gulf Coast Florida. Other units are involved in coal mining and transportation, technology development, building products, real estate, and financial services. Modestly higher profits are expected for 1990, reflecting continued gains in electric kwh sales due to FPC's expanding service territory.

Current Outlook

Earnings for 1990 are estimated at $3.75 a share, up from the $3.65 likely for 1989.

In November, 1989 directors boosted the dividend 3.1%, to $0.66 quarterly from $0.64.

Modestly higher net income is anticipated for 1990, primarily on the basis of expected continued growth in the company's service territory in line with historical rates. The company serves one of the fastest growing regions in the nation. The contribution from the nonutility segment should decline slighty due to the absence of 1989's gain on the sale of a unit, although on an operational level nonutility businesses are expected to show modest improvement.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	473	490	437	430

Sep.	607	560	564	532
Dec.	---	473	481	427
	---	2,002	1,958	1,875

Operating revenues for the nine months ended September 30, 1989 rose 4.9%, year to year, reflecting customer growth, higher recoverable fuel revenues, and an increase in rates. Operating income was up 9.4%. After higher interest expense and other income, pretax net advanced 11%. After taxes at 32.5%, versus 30.8%, net income increased 8.6%, to $3.09 a share from $2.85.

Dec.	E0.56	0.58	0.58	0.63
	E3.65	3.52	3.74	3.71

Important Developments

Nov. '89— The company reported that for the three months ended September 30, residential revenues increased 15%, year to year, commercial revenues 11%, industrial revenues 10%, and other 9.6%, while other retail and wholesale revenues declined 25% and 5.9%, respectively. Third quarter net income included a gain of $0.12 a share from the sale of the Better Business Forms Inc. subsidiary, recognition of a tax benefit on a capital loss carryforward of $0.05 related to the Better Business sale, and a $0.10 charge stemming from a regulatory disallowance of certain fuel costs. Nonutility earnings for the third quarter and first nine months of 1989 were $0.18 and $0.38 a share, respectively, and were $0.22 and $0.25 higher than in the 1988 periods. The improved showing reflected the sale of Better Business Forms in the 1989 third quarter and establishment of an $0.08 a share reserve for an offshore drilling rig lease in default in the 1988 period.

Next earnings report expected in mid-February.

Business Summary

This holding company owns Florida Power Corp., which provides electric service to about 1,060,000 customers located in 32 of Florida's 67 counties. In 1988 Florida Power accounted for 64% of total revenues and 91% of pretax operating income. Nonutility businesses include coal mining, building products distribution, real estate, technology development, and financial services. Electric revenues were divided in recent years:

	1988	1987	1986	1985
Residential	51%	52%	53%	51%
Commercial	23%	23%	23%	22%
Industrial	10%	9%	10%	10%
Other	16%	16%	14%	17%

The fuel mix in 1988 was 57% coal, 20% oil, 22% nuclear and 1% gas. Peak load in 1988 was 6,188 mw, and system capability (including purchased power sources) was 6,086mw, for a capacity margin of -1.7%.

Crystal River Unit 5, a 717 mw coal-fired plant, began commercial operation in October, 1984 and completes, along with Crystal River Unit 4, FPC's major base load construction program through the mid-1990's.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available.

Summary

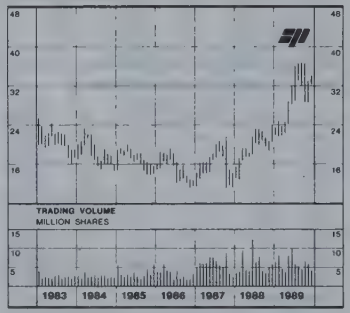
Fluor is one of the world's largest international engineering, construction, and related services companies, and has investments in coal and lead. Following three consecutive years of losses and the completion of a major restructuring in fiscal 1987, FLR returned to profitability in fiscal 1988. Earnings for fiscal 1989 benefited from higher revenues, improved margins, realization of interest income, and a cash settlement with the National Iranian Oil Co. Earnings should continue to rise in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending October 31, 1990 are projected at $1.90 a share, versus the $1.35 reported for fiscal 1989.

The dividend was raised 50%, to $0.06 quarterly from $0.04, with the January, 1990 declaration.

Revenues for fiscal 1990 may increase less rapidly than in fiscal 1989, reflecting a smaller contribution from the coal unit and the possible sale of FLR's 57.5% interest in Doe Run Co. The continuing increase in backlogs and order rates will boost sales in the engineering and construction unit. Margins should continue to expand, reflecting the emergence of a seller's market in engineering and construction services. Aided further by increased interest income, earnings should rise.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	---	1,039	903	1,182

Oct.	1,667	1,606	1,214	1,066
	6,228	5,132	3,924	4,660

Based on a brief report, revenues for the fiscal year ended October 31, 1989 (preliminary) rose 22% from those of fiscal 1988, primarily reflecting gains in the engineering and construction segment. Margins widened, and net income advanced 92%. Share earnings were $1.35, versus $0.71.

Important Developments

Nov. '89— FLR annouced that its engineering and construction unit and Williams Brothers Engineering Co. had signed a letter of intent pertaining to the potential purchase of Williams Brothers. FLR said that its interest in Williams Brothers was the expertise Williams offered in the pipelines and production facilities markets. Subject to various conditions, the transaction could be consummated as early as February 1, 1990.

Mar. '89— FLR said that while it was not actively pursuing the sale of its 57.5% investment in the Doe Run lead company, it had retained two investment bankers to help respond to expressions of interest and coordinate activity. FLR said that no decision had been made regarding the immediate future of Doe Run but it expected to make a decision later in the year.

Next earnings report expected in mid-March.

Business Summary

Fluor provides engineering, construction, and other services to a wide range of clients worldwide. FLR also mines coal and lead. Domestic zinc and gold operations were sold in fiscal 1987. Business segment contributions in fiscal 1988:

	Revs.	Profits
Engineering & Construction	82%	39%
Coal	15%	39%
Lead	3%	22%

In fiscal 1988 foreign operations represented 13% of revenues and produced operating profit of $10.1 million.

The Fluor Daniel group provides engineering, construction, and related services on a worldwide basis to clients in five business sectors: process, power, industrial, hydrocarbon and government. The types of services provided include feasibility studies, conceptual design, engineering and procurement, project and construction management, construction, operation, maintenance and plant operations, technical services, quality control, site evaluation environmental and project financing services.

Coal operations are conducted through the Massey Companies which produce, process and sell bituminous coal of steam and metallurgical grades from 15 mining complexes. Massey is among the 10 largest coal producers in the U.S.

Lead operations are conducted through the Doe Run Co. (57.5%-owned by FLR), which is the largest integrated producer of lead in North America.

Dividend Data

Common dividends were resumed in September, 1988 after omission since early 1987. A "poison pill" stock purchase right was adopted in 1987.

Summary

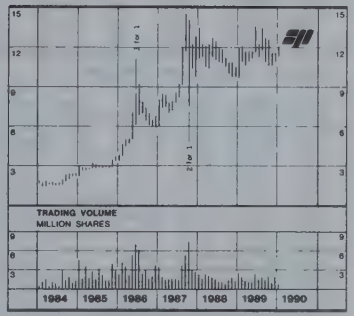
This North Carolina-based supermarket chain continues to achieve rapid sales and earnings growth through an aggressive expansion program. The company planned to add 100 new stores in 1989 and to grow to more than 800 stores by the end of 1990. Some 50% of Food Lion's voting shares are held by Etablissements Delhaize Frères et Cie "Le Lion" S.A.

Current Outlook

Earnings for 1990 are projected at $0.54 a share, up from the estimated $0.42 of 1989.

The quarterly Class B common dividend was raised 32%, to $0.03⅓ a share, in early 1990.

Revenues should continue to rise in 1990, reflecting new-store growth and solid increases in comparable-store sales. Margins should benefit from efficiencies on the greater volume. Per-share results could reflect fewer shares outstanding.



Net Sales (Million $)

Weeks:	1989	1988	1987	1986
12 Mar	1,011	781	619	497
12 Jun.	1,069	867	668	545

Important Developments

Sep. '89— At the end of 1989's third quarter, the company had 622 stores; twenty-six new stores were opened in the third quarter. Food Lion's Clinton, Tenn., distribution center began operations in the second quarter of 1989 and will allow the company to expand westward. In addition, Food Lion planned to build a 735,000-sq.-ft. distribution center in Greencastle, Pa. The company continues its "ink blot" expansion approach in order to increase warehouse and transportation efficiencies. By the end of 1990, more than 800 stores should be in operation.

May '89— Stockholders approved a proposal authorizing the repurchase of up to about 16.2 million shares of Class A common stock and up to nearly 16 million shares of Class B common.

Next earnings report expected in late January.

Business Summary

Food Lion, Inc. operated a chain of 567 retail supermarkets in the southeastern U.S. at January 2, 1989, of which 266 were in North Carolina, 140 in Virginia, 76 in South Carolina, 33 in Tennessee, 25 in Georgia, 24 in Florida, two in Delaware and one in Maryland. Food Lion continually evaluates potential new-store sites within or adjacent to its market area and plans to maintain its more than 20% annual compound growth rate.

The company offers nationally and regionally advertised brandname groceries and merchandise, as well as products manufactured and packaged under the private label of "Food Lion." All of the supermarkets, which range in size from 13,200 sq. ft. to 35,330 sq. ft., are self-service, cash-and-carry stores that have off-street parking facilities. Food Lion does not offer trading stamps in any of its supermarkets and follows the marketing policy of selling merchandise at a low gross profit margin in order to increase volume without a proportionate increase in expenses.

The company keeps expanding the chain in its existing market area. The hub of expansion is its distribution network. As store numbers grow, the company adds new distribution centers whose radiuses overlap the existing distribution territory. This minimizes warehouse and transportation costs. Food Lion's headquarters and largest warehouse facilities are in Salisbury, N.C.

Summary

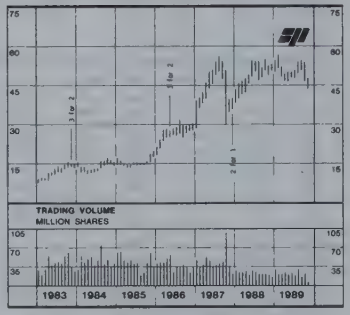
The world's second largest producer of automobiles and trucks, Ford has increased its share of the U.S. car market considerably in recent years and has steadily increased its worldwide vehicle sales. Although net income may decline in 1990, share earnings will be supported by an active share repurchase program. In October, 1989 Ford acquired the Associates First Capital Corp. consumer and commercial finance unit of Paramount Communications for $3.35 billion. In November Ford agreed to acquire Jaguar PLC for some $2.5 billion. The company is also negotiating the sale of Rouge Steel.

Current Outlook

Earnings for 1990 may decline to about $8.25 a share from the $9.50 estimated for 1989, which is before possible charges related to the sale of Rouge Steel.

The $0.75 quarterly dividend should continue.

Industrywide car and truck sales in 1990 are expected to decline moderately, and Ford's market share is expected to remain stable at about that (22.4% cars, 30.1% trucks) captured in the first 10 months of 1989. Automotive earnings should decline as strong pricing competition in the U.S. offsets continued strength in foreign operations. The acquisition of Jaguar PLC could adversely affect automotive income. Contributions by financial services should increase with the Associates acquisition. A share repurchase program will continue to boost share earnings.



Revenues[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar	25.87	23.20	18.14	14.79
Jun.	25.89	24.96	19.50	17.30

Dec.	---	23.91	18.76	16.26
	---	92.45	71.64	62.72

Revenues (including financial services) for the nine months ended September 30, 1989 rose 5.1%, year to year. Automotive sales advanced 2.5% on a 0.8% rise in factory vehicle sales. Automotive pretax income was down 12%, to $4.93 billion. Financial services pretax income fell 32%, to $648 million. Total pretax income declined 15%. After taxes at 35.9% against 36.5%, and larger minority interest, net income dropped 15%. Share earnings were $7.51 on 3.5% fewer shares, against $8.53. In the U.S. net income from automotive operations fell 36% to $1.22 billion; outside the U.S. it advanced 14% to $1.80 billion.

Important Developments

Nov. '89— Ford agreed to acquire Jaguar PLC, the British luxury car maker, for some $2.5 billion in cash. In October Ford bought the Associates First Capital consumer and commercial finance unit of Paramount Communications for $3.35 billion. Ford sold a 25% interest in Ford Holdings, which owns Associates and several other Ford financial units, for $800 million. A charge of some $500 million for the sale of Rouge Steel is possible in the fourth quarter of 1989.

Next earnings report expected in mid-February.

Business Summary

Ford is the world's second largest motor vehicle manufacturer. It produces cars, trucks and tractors and many of the vehicles' plastic, glass, steel and electronic components, and replacement parts. Ford Aerospace produces communications satellites and military communications and defense systems. Financial services includes Ford Motor Credit (financing and insurance), First Nationwide Financial (savings and loan holding company), and ICA Mortgage Corp. (mortgage banking). Ford Holdings (75% owned) owns The Associates Corp., U.S. Leasing International, Ford Leasing Development, American Road Insurance and Ford Motor Land Development. Ford also has a majority interest in Hertz Corp. (car rental).

In 1988 Ford's automotive net income of $4.61 billion was derived 54% in the U.S., 32% in Europe, 4% in Canada, 10% elsewhere (primarily Asia-Pacific and Latin America). Financial services contributed $691 million to net income in 1988.

Various Ford, Mercury and Lincoln models accounted for 21.5% of new domestic registrations (including foreign-built cars) in 1988, compared with 20.1% in 1987 and 18.2% in 1986. Comparable figures for trucks were 29.6%, 29.6% and 28.1%. Sales of tractors in 1988 were 76,514 units. Vehicle factory sales totaled 6,517,186 cars, trucks and tractors in 1988, of which 3,936,778 were in the U.S.

Dividend Data

Dividends have been paid since 1947 except for six quarterly omissions in 1982-3. A dividend reinvestment plan is available.

Summary

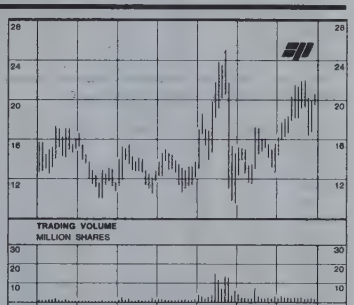
This international engineering, manufacturing and construction firm is involved in the production of steam generating equipment, process plants, and fired heaters for electric utilities, petroleum refiners and chemical producers. Earnings for the first nine months of 1989 benefited substantially from a decrease in the tax rate. Revenues and earnings should rise in 1990.

Current Outlook

Earnings for 1990 are projected at $1.10 a share, versus earnings of $0.90 estimated for 1989.

Dividends should remain at $0.11 quarterly.

Operating revenues for 1990 are expected to rise, mostly reflecting forecasted solid gains in all but the real estate unit. An improved mix of business in construction and engineering, smaller losses in energy equipment and continued margin expansion in the industrial and facilities segments should result in higher earnings in 1990. Longer-term sales and earnings growth prospects are enhanced by expansion into resource recovery and hazardous waste disposal markets.



Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	252	239	273	286
Jun.	362	263	322	332
Sep.	304	247	296	294
Dec.	---	305	328	346
	---	1,054	1,219	1,258

Operating revenues for the nine months ended September 30, 1989 rose 23%, year to year, primarily reflecting gains in the engineering and construction and energy equipment units. However, margins narrowed, and pretax income declined 6.7%. After taxes at 21.0%, versus 34.5%, and minority interest, net income advanced 14%. Share earnings were $0.68, versus $0.60.

Important Developments

Nov. '89— FWC announced that its 600 ton-per-day waste-to-energy plant at Charleston, S.C. achieved full scale commercial operation after successfully completing all of its acceptance tests. FWC noted that the plant had achieved start-up two months ahead of schedule in spite of damage caused by Hurricane Hugo.

Mar. '89— FWC sold its Forney Engineering Co. unit, thereby completing the planned divestiture of underperforming companies. Earlier, in October, 1988 FWC outlined its plan to sell underperforming units and underproducing real estate assets and use the proceeds to strengthen its core businesses, expand its presence into the resource recovery market and seek acquisitions of companies in the environmental and infrastructure areas. FWC said that the sale of assets would yield about $98-$100 million net cash after-tax.

Next earnings report expected in late January.

Business Summary

Foster Wheeler offers design, engineering and construction services through its 23 worldwide subsidiaries to the chemical, petroleum refining, power generating, and shipbuilding industries. Products include chemical plants, industrial and petrochemical process equipment, steam generating equipment, nuclear power components, and petroleum refineries. Revenues and operating income (in million $) in 1988 were divided:

	Revs.	Profits
Engineering & construction	46%	$17.6
Energy equipment	20%	-15.2
Industrial	24%	14.2
Facilities investment/oper.	5%	7.7
Real estate development	4%	24.7
Other	1%	-5.8

Foreign operations accounted for 50% of 1988 revenues and 73% of operating profits.

The engineering and construction group consists primarily of the design, engineering and construction of process plants and fired heaters for oil refineries, synthetic fuels, and chemical producers.

The energy equipment division consists mainly of design and fabrication of steam generators and condensers.

The industrial segment supplies pressure vessels and internals, electrical copper products, and welding accessories.

The facilities group is engaged in the owning/leasing for third parties of solid waste-to-energy and cogeneration plants.

The real estate group develops, sells and rents real properties.

Dividend Data

Dividends have been paid since 1960. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

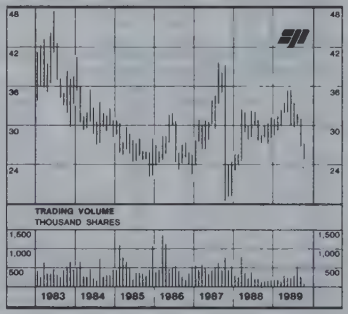
Foxboro manufactures and markets products for the intelligent automation of the industrial process, as well as related services. An increase in industrial capital spending, a positive reception to a new product line, and the absence of a $62.7 million restructuring charge led to a return to profitability in 1988. Aided by continuing strength in industrial capital spending and a nonrecurring gain, further earnings progress is likely in 1989 despite pressure on margins. Additional progress is projected for 1990.

Current Outlook

Earnings for 1990 should approximate $2.50 a share, up from the $1.50 projected for 1989.

Dividends should continue at $0.10 quarterly.

Sales for 1990 are expected to rise approximately 10%, assuming continued moderate economic growth. It is anticipated that capital spending by the industrial sector of the economy will increase further after 1989's gain. Sales should also be boosted by a substantial increase in orders of the intelligent automation series product, which encountered production problems that limited shipments of the product in 1989. The product was introduced in 1987. Margins should benefit from the higher volume, well controlled costs and more efficient production of the intelligent automation series product. Partially offsetting will be the absence of a nonrecurring gain. Long-term prospects should be aided by a revival of the process control industry following a prolonged period of depressed demand, especially from the oil and gas and chemical industries.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	137.9	133.9	117.1	126.9
Jun.	158.9	135.3	120.1	138.2
Sep.	---	127.6	141.5	136.6
Dec.	---	143.1	125.7	142.3
	---	539.9	504.4	544.0

Sales for the six months ended June 30, 1989 increased 10%, year to year. Due primarily to the higher sales and an improved gross profit margin, overall margins widened, and pretax income increased 66%. After taxes at 33.9%, versus 49.9%, net income advanced 119%, to $0.57 a share from $0.26.

Important Developments

Sep. '89— FOX said that its operating margins would remian under pressure in the third and fourth quarter due to accumulated costs resulting from delayed shipments of the intelligent automation series product and unabsorbed overhead expenses resulting from inventory reduction. It added that orders in the third quarter were approximating the year-earlier level.

Next earnings report expected in late October.

Business Summary

Foxboro is a leading manufacturer and distributor of instrumentation and control systems used for measuring, indicating, recording and controlling manufacturing process variables such as flow, pressure, temperature, liquid level, humidity, conductivity, density, and acidity and alkalinity, by means of electronic, pneumatic and mechanical devices. Foxboro also provides related engineering and design services.

Foxboro's orders by user industries in 1988 were chemical 28%, original equipment manufacturers, contractors and other 19%, general industries 18%, oil and gas 17%, pulp and paper 12%, and power and municipal and semiconductor 6%.

Sales by product catagory in 1988 were distributed as follows: electronic systems 34%, other electronics 23%, parts/accessories 18%, pneumatic 14% and services 11%.

Foreign sales accounted for 40% of revenues and 38% of operating income in 1988. In addition, exports from the U.S. represented 11% of the total.

Finances

The company's total worldwide credit lines at the end of 1988 were $291 million. At June 30, 1989 approximately $46.7 million was borrowed against these facilities.

Research and development spending totaled $37.2 million in 1988, down from 1987's $50.3 milllion. The decline reflected less development spending on the intelligent automation series since its introduction.

Dividend Data

Regular quarterly dividends, omitted in 1985 after being initiated in 1916, were resumed in 1988. A year-end payment of $0.25 a share was also paid December 31, 1986. A "poison pill" stock purchase right was adopted in 1988.

Summary

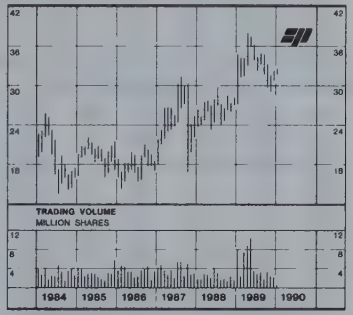
In November, 1989 FTX announced a restructuring plan to focus on the phosphate fertilizer business, the oil and gas business and the copper/gold business in Indonesia. Under the plan, FTX would sell non-core assets valued at $1.2-$1.5 billion, proceeds of which would be used to develop a major sulphur discovery, offshore Louisiana, and a major copper/gold discovery in Indonesia.

Current Outlook

Earnings for 1990 are projected at $1.85 a share, down from 1989's estimated $2.00.

FTX' dividend policy calls for payment of a regular cash dividend of $0.37½ quarterly, with special dividends of $0.25 quarterly through the third quarter of 1990 (at which time the amount of the special dividend would be reviewed).

Agriminerals profits in 1990 are likely to fall substantially, reflecting a continued weak fertilizer market and absence of nitrogen fertilizer sales. Copper earnings will probably decrease moderately, as expected lower prices outweigh heavier output. However, oil and gas income may rise moderately. In the absence of profitable U.S. gold and geothermal operations, share earnings should decline slightly, despite reduced administrative and interest expenses and fewer shares.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	471	437	277	160
Jun.	519	491	434	166
Sep.	491	458	347	132
Dec.	---	559	457	172
	---	1,945	1,514	630

Sales for the first nine months of 1989 rose 6.9%, year to year. On lower unusual pretax gains ($28 million, versus $181 million), net income was down 51%, to $1.75 a share (on 11% fewer shares) from $3.35.

Important Developments

Nov. '89— FTX announced a restructuring plan to sell assets valued at $1.2-$1.5 billion including its 61%-owned FTX Gold Co.; FTX Resource Partners' nitrogen fertilizer facilities in Oklahoma and Arkansas; its producing geothermal assets to a joint venture with an investor group led by Calpine Corp. for $254 million cash and a 55% interest in the venture; FTX Energy Partner's sale or agreement to sell less strategic oil and gas assets for $86 million; its 95%-owned Voyager Energy to be sold with the other owner's 5% to Trical Resources for C$157 million cash and C$90 million in notes; and its interests in Australian mining concerns sold for $60 million. Proceeds would be used to develop major sulphur and copper/gold discoveries and to lower debt.

May '89— FTX bought some 15.6 million of its common shares under a "Dutch auction" tender offer at $38 a share.

Next earnings report expected in late January.

Business Summary

FTX is a diversified natural resources company. Contributions (profits in million $):

1988	Revs.	Profits
Agricultural minerals	58%	$200
Oil & gas	14%	39
Uranium oxide	3%	30
Geothermal	2%	9
Copper	17%	201
Gold	5%	39
Other	1%	-20

Freeport-McMoRan Resource Partners (62%-owned) holds the largest U.S. phosphate fertilizer producer and the second largest U.S. Frasch sulphur producer. In March, 1989 as operator of a 58.3%-owned exploration venture, it discovered the largest proven Frasch sulphur reserve now in existence in North America. Drilling had delineated proved recoverable sulphur reserves of 67 million long tons at Main Pass Block 299, offshore Louisiana. Another unit recovers uranium oxide.

Oil and gas operations in the U.S. are run by 79%-owned Freeport-McMoRan Energy Partners (FMP) and its operating unit. Reserves at 1988 year-end were 741.1 Bcf of gas and 67.1 million bbls. of oil. In November, 1989 FTX announced a restructuring which would convert FMP from a master limited partnership to a corporation.

Freeport-McMoRan Copper (77%-owned) holds an Indonesian unit, which mines copper and gold. In November, 1989 it obtained $550 million in financing to fund the expansion of its unit's mining and milling capacity from 20,000 metric tons of ore a day to 52,000 mt/d.

Dividend Data

Freeport Minerals paid cash dividends since 1927. A dividend reinvestment plan is available. Special dividends of $0.25 quarterly would be paid through the third quarter of 1990 (at which time the amount of the special dividend would be reviewed).

Summary

Technological experience in the photosensitized materials field has enabled Fuji, Japan's leading producer of photographic films, to expand into nonphotographic areas such as magnetic tape, floppy disks and office automation products. Earnings for fiscal 1988 benefited from new product introductions, aggressive sales promotions and a significant increase in equity earnings. A 10% stock dividend was recently declared.

Business Summary

Fuji Photo Film Co., Ltd. is Japan's largest producer of photosensitized materials, with a major share of the domestic market for film and paper, and is expanding rapidly in nonphotographic markets.

Sales by market segment in recent fiscal years were:

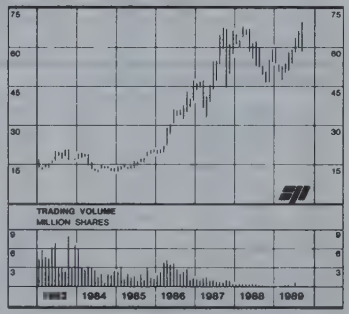
	1988	1987
Consumer photographic products	48.5%	50.0%
Magnetic products	11.1%	11.3%
Commercial products	40.4%	38.7%

During fiscal 1988, export sales accounted for 34.8% of net sales, compared with 35.5% in the preceding year.

The company, originally focusing its growth on the manufacture of photographic film, paper, chemicals and equipment, has broadened its corporate scope to include the development of imaging and information systems incorporating new technologies for use in a wide variety of applications.

The consumer photographic products group includes film, photographic paper, cameras and electronic imaging equipment. Recent introductions in this area have included the FZ-500 Zoom multifocus compact camera and the FUJIX ES-20 Still Video Camera, which offers high-resolution images with an audio after-recording capability. In addition, Fuji has expanded its Quicksnap series of disposable 35mm cameras, introduced in 1988. In the area of color film, the company recently began to ship Reala film, which is targeted at advanced amateur photographers.

The magnetic products group includes videotape, audio tape, memory tape and floppy disks. To accommodate growing European demand, Fuji set up a manufacturing and distribution facility in West Germany that began operations in 1988.



Commercial products consist of graphic arts, medical, microfilm and office automation products, as well as motion picture film. In fiscal 1988, the company introduced the Fuji PS Stablon System, which is used in the graphic arts field for processing printing plates. Also, Fuji began construction of its first U.S. production facility (see Finances).

Investments in unconsolidated subsidiaries and affiliated companies (including a 50% interest in Fuji Xerox Co., Ltd.) are carried on an equity basis and, at October 20, 1988, accounted for 8.3% of consolidated total assets.

Important Developments

Sep. '89— Fuji Xerox Co. said it expects to sell 500 units of two Sun Microsystems workstation models in the next year.

Aug. '89— De la Rue Co., a British specialty printing firm, approved the sale of its Crosfield Group printing division to Fuji Photo and E.I. du Pont de Nemours & Co. for $389 million.

Review of Operations

For the fiscal year ended October 30, 1988, net sales advanced 7.6% from those of fiscal 1987, benefiting from new product introductions and aggressive sales promotions. Sales increased in all market segments, both domestically and internationally. Operating margins were less favorable and, despite higher levels of other income, the gain in pretax earnings was trimmed to 4.9%. After taxes at 56.1%, against 42.2%, and a significant increase in equity earnings, net income was up 14%, to ¥82,027,000,000 ($3.44 per ADR; $3.38 fully diluted), from ¥71,977,000,000 ($3.05; $2.97).

Note: Per-ADR amounts were translated at the October 20, 1988, exchange rate of ¥127=U.S. $1.

Dividend Data

Semiannual cash dividends have been paid regularly since 1950. A 10% stock dividend will be paid on December 19, 1989, to holders of record October 13. Recent declarations per ADR (net after 15% Japanese withholding tax to U.S. residents) were:

† Amt. later.

Finances

In September 1989, Fuji Photo and BASF Corp. began production of 3½-inch micro floppy disks for the North American market through Bedford, Mass.-based B&F Microdisks. The joint venture expected monthly output of 7,000,000 units initially.

In May 1989, the company acquired the worldwide photographic chemicals business of Olin Corp. for about $75 million.

In April 1989, Fuji Photo announced that it was establishing a presence in Italy through a venture with Onceas S.p.A., an importer of Fuji film, cameras and video cameras.

In fiscal 1988, the company began construction of a $60 million plant in South Carolina (its first U.S. manufacturing operation) to make presensitized plates and related products used in offset printing.

Jan. 10'90	1989-90					
23½	33⅜-23½	NM	0.32	1.4%	B+	1.20

Summary

This diversified company's businesses include lawn and garden equipment, sporting goods, and a sizable photofinishing operation, in which FQA and Eastman Kodak are partners. In May, 1989 FQA sold its Georgia Federal Bank business. With some $355 million of cash and securities on hand, the company was continuing to seek an acquisition in late 1989. Triton Group Ltd. owns about 19% of FQA's common shares.

Current Outlook

Earnings for 1990 (for FQA as now constituted) are estimated at $1.00 a share, versus the $0.25 expected for 1989.

Dividends at $0.08 quarterly are the minimum expected.

Improved profitability for FQA's lawn and garden business is expected to boost 1990 earnings. Further profit growth from FQA's photofinishing joint venture is expected, but a change in the way the business's earnings are allocated to the two partners will limit FQA's potential benefit from this. A portion of the $355 million in cash and marketable securities that FQA had at September 30, 1989 may be used for an acquisition.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	247	191	193	187
Jun.	232	273	192	174
Sep.	234	247	194	169
Dec.	---	223	194	171
	---	934	772	701

Sales for the nine months ended June 30, 1989 rose 0.3%, year to year. Net income declined 92%, to $0.42 a share (no dilution) from $4.27 ($4.04 fully diluted), largely due to the absence of a $3.18 a share ($2.93) onetime gain in 1988. Results exclude a loss from from discontinued operations of $0.04 a share in the 1989 period, versus income of $0.47 ($0.44).

Important Developments

Nov. '89— FQA's directors had authorized the repurchase of up 2,000,000 FQA common shares (about 9.3% of those outstanding). FQA said that the buyback program was being effected because its directors believed that the company's stock was "significantly undervalued." Also, FQA said that it continuing to seek an acquisition to expand its operations. At September 30, 1989, following the May, 1989 sale of its Georgia Federal Bank business, FQA had cash and marketable securities totaling about $355 million. Meanwhile, in 1989's third quarter, a decline in earnings from FQA's lawn and garden business more than offset a higher profit from photofinishing operations. Following an inventory build-up at the dealer level in connection with 1988's drought, FQA's Snapper lawn mower business had reduced levels of production and shipments.

Next earnings report expected in mid-February.

Business Summary

Fuqua Industries is a diversified manufacturing, distribution, and service company. Major operations include lawn and garden equipment, photofinishing, and sporting goods. In May, 1989 FQA sold its Georgia Federal Bank (unconsolidated) business, and in August, 1988 FQA sold its largest sporting goods company, Ajay Enterprises Corp., whose results are not included below. Segment contributions in 1988:

	Revs.	Profits
Lawn and garden	26%	50%
Photofinishing	63%	42%
Sporting goods	11%	8%

The lawn and garden products group includes the Snapper Power Equipment Division, which manufactures lawn mowers, garden tractors, garden tillers, snowthrowers and related accessories.

FQA's photofinishing business has historically consisted of Colorcraft Corp., a large wholesale photofinisher. In March 1988, FQA and Eastman Kodak combined their U.S. photofinishing operations into a joint venture, called Qualex Inc., which is 51% owned by FQA. Qualex, which is the U.S. leader in photofinishing, processes film for thousands of retail outlets.

FQA's sporting goods business manufactures, imports and distributes equipment, clothing and accessories for a variety of outdoor and team sport activities. Its brands include American Camper, Hutch and Reach.

Oct. 25'89	1989					
61¼	75⅜-53½	10	2.00	3.3%	B	0.86

Summary

This company is an important lessor of transportation equipment, offers tank terminal services, and operates a shipping line on the Great Lakes. Profits should continue to advance in 1990, reflecting high utilization rates for railcars and growing income from aircraft leasing. In September, 1989 GMT acquired Associated Unit Companies, the nation's largest warehousing concern, for $173 million.

Current Outlook

Fully diluted earnings per share for 1990 are estimated at $7.00 (on some 9% more shares), versus the $6.50 anticipated for 1989.

Dividends, presently at $0.50 quarterly, should be lifted moderately during 1990.

Railcar leasing profits should continue to advance in 1990 as fleet utilization remains high and renewal rates improve. Aiding comparisons will be reduce maintenance and repair expenses. Terminal profits may flatten as softer oil prices discourages inventory building. Contributions from recently acquired warehousing operations will be more than offset by accompanying higher interest expense. Financial services will benefit from an expanding aircraft lease fleet, a larger real estate loan portfolio, and larger gains from asset dispositions. Shipping profits should be flat.

Important Developments

Sep. '89— GMT acquired Associated Unit Companies, the nation's largest warehousing concern, for $173 million. Associated, which generated revenues of $63 million in the fiscal year ended March 31, 1989, also provides distribution, transportation, handling, packaging and inventory control services.

Sep. '89— GMT redeemed $75.9 million face amount of 11.5% notes maturing in 1996 using proceeds from the sale of 3,310,000 cumulative preferred stock in August. The preferred issue, which is convertible into 1.9 million GMT common shares, raised $165.5 million in capital.

Jun. '89— GMT's 50% joint venture with Credit Lyonnais, GATX-CL Air, signed a 10-year lease with Air Inter, a French carrier, for two Airbus A320-200 aircraft valued at $37 million. Delivery is expected in late 1990.

Next earnings report expected in late January.

Business Summary

Contributions (million $) by business segment to operating profits in recent years:

	1988	1987	1986	1985
Railcar leasing	$42.4	$36.1	$26.4	$28.8
Financial services	21.8	14.3	9.1	-25.4
Tank terminals	19.2	16.9	12.0	11.1
Shipping	5.3	2.4	2.3	0.3

General American Transportation Corp. is one of the largest full-service railcar lessors, managing a fleet of 51,000 tank and covered hopper cars at 1988 year-end. The chemical industry generated 50% of railcar lease revenues in 1988 and the petroleum and food processing industries 33%. The financial services group writes full payout leases for commercial jet aircraft (43% of the lease portfolio at 1988 year-end), rail equipment (13%), manufacturing equipment (7%) with helicopters, marine and other equipment (19%). About 18% of the lease and loan portfolio is accounted for by investments in participating mortgages. GATX Terminals Corp. provides storage and distributions services for the petroleum and chemical industries at 13 domestic and nine international terminals. Throughput in 1988 was 529 million bbls., versus 453 million bbls. in 1987. Terminal activities also include 60%-owned WYCO Pipe Line Co., which operates a 677-mile refined petroleum products pipeline in three states, Calnev Pipe Line, a 250 mile-line extending from Los Angeles to Las Vegas and a small pipeline connecting Tampa with Orlando. American Steamship Co., serving the Great Lakes, transported 26.2 million tons in 1988 (of which iron ore and coal generated 71%), versus 28.2 million tons in 1987.

Dividend Data

Dividends have been paid since 1919. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

GEICO Corp.

NYSE Symbol GEC

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 6'89	1989					
146½	156-122¾	14	1.80	1.2%	A-	0.75

Summary

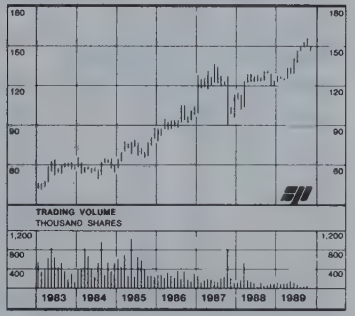
This holding company's principal subsidiary is Government Employees Insurance Co., whose primary business is writing preferred risk private passenger auto insurance and homeowners insurance. GEC has compiled an impressive underwriting record in recent years. Other subsidiaries offer life and health insurance, reinsurance, and diversified financial services. In June, 1989 the company agreed to sell its reinsurance unit.

Current Outlook

Net income for 1990 (excluding realized capital gains or losses and "fresh start" tax benefits) is estimated at $9.70 a share, compared with the $8.60 a share anticipated for 1989.

The $0.45 quarterly dividend is the minimum expectation.

Despite only modest premium rate increases and unit growth, earnings are expected to rise in coming periods. GEC will continue to emphasize rigid underwriting standards, low-cost production and controlled growth, versus market share. The conversion to six-month premiums will restrain premiums and boost expenses near-term, but the pricing flexibility which is gained is a longer-term positive. However, the growing consumer movement in a number of states to lower auto insurance rates strikes at the heart of GEC's business, and tempers the outlook for the company. Share buybacks would benefit per-share comparisons.



Review of Operations

Total revenues for the nine months ended September 30, 1989 advanced 4.0%, year to year (1988 restated), as a 4.9% increase in premiums and a 4.4% rise in net investment income offset a 12% decline in pretax realized capital gains. Impaired by higher catastrophe losses and a provision to cover a possible rate rollback in California, net income fell 11%. Share earnings were $8.58 (including $2.27 in realized capital gains) on 2.5% fewer shares, compared with $9.38 ($2.47).

Common Share Earnings[1] ($)

Quarter:	1989	1988	1987	1986

Sep.	2.83	2.65	2.67	2.03
Dec.		1.55	2.33	1.98
		8.48	9.01	6.91

Important Developments

Nov. '89— GEC noted that higher catastrophe losses, including those associated with Hurricane Hugo, and a provision to cover costs of a possible rate rollback in California, offset improved reinsurance operations and impaired earnings growth during the first nine months of 1989. Pretax earnings were reduced by $14.3 million because of a provision taken to cover a possible mandated rate rollback in one of GEC's primary markets. Despite this, underwriting results were profitable. The combined ratio was 96.8%, versus 96.2%.

Jun. '89— GEC agreed to sell its Resolute Reinsurance Co. (RR) to a subsidiary of KCP Holding Co. Terms were not disclosed. GEC said the RR contributed about $200,000 to its first quarter profits of $45.5 million. In 1988 reinsurance operations reduced GEC's earnings by $1.00 a share.

Next earnings report expected early February.

Business Summary

GEICO Corp. is an insurance and financial services company whose principal subsidiary, Government Employees Insurance Co. (GEICO), is a multiple line property and casualty insurer engaged in direct response writing of preferred risk private passenger auto insurance. GEICO also offers homeowners, fire and extended coverage, personal umbrella liability, excess business liability, and boatowners insurance. Wholly-owned GEICO Indemnity Co., which emphasizes marketing to military personnel, writes standard and nonstandard private passenger auto insurance. Other wholly-owned subsidiaries include Government Employees Financial Corp., which provides consumer credit and industrial banking services; and GEICO Investment Services, a registered investment adviser and broker dealer. In 1987 GEC temporarily suspended writing new and renewal reinsurance at Resolute Group, a p-c reinsurer. In June, 1989 GEC agreed to sell the subsidiary. Life insurance operations are conducted through wholly-owned Garden State Life Ins. Co. and GEICO Annuity and Insurance Co.

GEICO is one of the largest writers of private passenger auto insurance, which accounts for about 90% of its business. The company operates in the District of Columbia and all states except Massachusetts (where it is licensed to write nonautomobile lines) and New Jersey.

GEC has a 34% interest in Avemco Corp., and aviation insurer, and a 20% stake in Bond Investors Group Inc., a municipal bond guarantee insurer.

Dividend Data

Omitted in 1976, cash payments were resumed the following year.

GTE Corp.

NYSE Symbol GTE Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 18'89	1989					
65 3/8	67 3/8-42 7/8	16	2.92	4.5%	A-	0.70

Summary

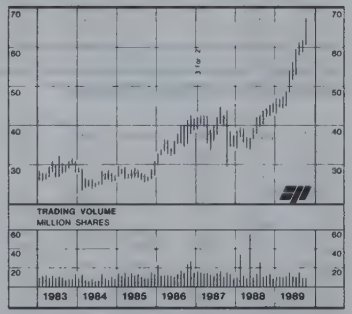
GTE controls one of the nation's largest telephone systems and has substantial operations in manufacturing communications and electrical products, and in nonregulated communications services. In January, 1989 GTE sold an additional 30.1% interest in US Sprint to United Telecommunications for $585 million, making UT the majority owner with 80.1% and leaving GTE with 19.9%.

Current Outlook

Earnings for 1990 are projected to reach $4.50 a share, versus the $4.10 estimated for 1989.

The quarterly dividend was raised 9.0%, to $0.73 from $0.67, with the October, 1989 payment.

Telephone revenues for 1990 should advance moderately, reflecting continued growth in access lines and increased calling volumes, offset partly by rate cuts. Revenues from cellular, information systems and directories are expected to experience further rapid growth. Telephone operating margins are likely to be constrained by the rate cuts. Contributions from unregulated operations should improve.



Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	4.12	3.94	3.69	3.56
Jun.	4.32	4.21	3.85	3.78
Sep.	4.35	4.00	3.81	3.78
Dec.	---	4.31	4.07	3.99
	---	16.50	15.42	15.11

Revenues for the nine months ended September 30, 1989 increased 5.3%, year to year, reflecting a 6.3% rise in revenues from telephone operations and a 7.2% rise from telecommunications products and services, offset partly by a 2.5% decrease from electrical products. Margins narrowed as operating income from telephone units rose 1.4%; electrical products were up 13%; and telecom products and services decreased 22%. Total operating income advanced 1.3%. Interest expense fell 2.5%, and with equity in the pretax loss of US Sprint of $125.1 million in the 1988 period only, pretax income rose 9.7%. After taxes at 32.7%, versus 35.3%, net income increased 14%, to $3.01 a share from $2.62.

Common Share Earnings ($)

Business Summary

GTE (formerly General Telephone & Electronics) comprises one of the largest telephone systems in the U.S. Other units are in less regulated telecommunications businesses. Segment contributions in 1988 were:

	Sales	Profits
Telephone operations	71%	89%
Electrical products	14%	7%
Telecommunications products	16%	4%

Telephone operations include telephone companies serving some 7,500 communities in portions of 31 states. Also served are British Columbia and Quebec in Canada and the Dominican Republic. This unit also markets, leases and sells telecommunications products and services; and supplies voice and data systems. As of December 31, 1988, GTE's telephone companies were serving some 14.4 million access lines, up 5.4% from a year earlier.

The Electrical Products group manufactures Sylvania lamps and other lighting products, and has a unit which manufactures precision-engineered materials. Telecommunications products includes communications systems equipment for telephone companies, businesses, government and consumers. Also included in this group are telephone directory publications and cellular mobile telephone service.

GTE holds a 19.9% interest in US Sprint, the nation's third largest long distance carrier. United Telecommunications holds the rest.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

Primarily in the insurance brokerage business, this company also provides risk-management and other insurance-related services to clients worldwide. Operations have expanded under an ongoing acquisition program begun in mid-1986. The company is combating highly competitive business conditions with expense control, intensified new business efforts and a focus on the retention of existing clients.

Business Summary

Arthur J. Gallagher & Co. provides insurance brokerage, risk-management and related services in the U.S. and abroad. Its two major sources of operating revenues are commissions from brokerage and risk-management operations and service fees from risk-management operations.

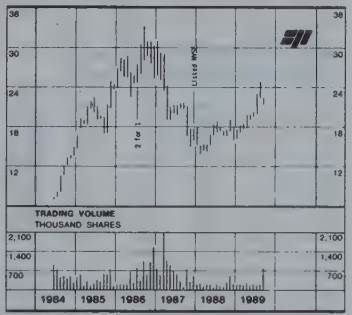
Total revenues in recent years were derived from:

	1988	1987	1986
Commissions	57.5%	57.0%	58.8%
Fees	33.9%	34.3%	31.9%
Investment	8.6%	8.7%	9.3%

The company's principal activity is the negotiation and placement of insurance for its clients. Gallagher places insurance for and services commercial, industrial, institutional, governmental, religious and personal accounts throughout the U.S. and abroad. It acts as an agent in soliciting, negotiating and effecting contracts of insurance through insurance companies worldwide and also as a broker in procuring contracts of insurance on behalf of insureds. Specific coverages include all types of casualty and property, marine, employee benefits, pension and life insurance products.

Gallagher provides various professional counseling services to assist clients in analyzing risks and in determining whether proper protection is best obtained through the purchase of insurance or through retention of all or a portion of those risks and the adoption of risk-management policies and cost-effective loss control and prevention programs. These services are provided by Gallagher Bassett Services, Inc. (wholly owned) through a network of 77 offices throughout the U.S. In most instances, the company's risk-management services are performed for its brokerage clients.

In connection with its risk-management services, Gallagher provides self-insurance programs for large institutions, as well as large commercial and industrial customers. It also has an on-line risk management information system and support service, known as RISX-FACS.



International operations include a Lloyd's broker and affiliated companies in London, and facilities in Bermuda. Arthur J. Gallagher International, Inc., located in Rhode Island, provides brokerage services to and arranges overseas risk management and engineering services for multinational organizations. These operations provided 10% of revenues (excluding investment income) and an operating loss of $452,000 in 1988, compared with 12% of revenues and 3% of profits in 1987.

Important Developments

Aug. '89— AJG completed a merger with C.A. McLin & Co. Insurance Services, Inc., which has joined forces with AJG's Orange, Calif. office. The company said that it is continuing efforts to open new marketing areas throughout the U.S.

Next earnings report expected in mid-November.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	40.5	38.3	32.4	28.9
Jun.	38.5	35.3	30.0	26.7
Sep.		44.3	39.7	33.8
Dec.		38.2	32.5	29.4
		156.0	134.7	118.9

Total revenues for the six months ended June 30, 1989 advanced 7.3%, year to year, reflecting new business and increased fee revenue generated by Gallagher Bassett Services, Inc. Following increases in business insurance costs, office facility expenses for rent, telephone and electricity and other direct expenses resulting from the company's higher sales volume, pretax income fell 3.1%. After taxes at 37.0%, against 38.7%, net income declined 0.4%. Share earnings were $0.49 on 2.9% fewer shares, versus $0.48.

Finances

In July, 1989 AJG announced a continuation of its plan, originally adopted in May, 1988, to repurchase common shares for reissuance in connection with its stock option plans. The plan authorizes the repurchase of an additional 600,000 shares through June 30, 1990, at such times and prices as the company may deem advantageous.

In the third quarter of 1988 the company added to its branch network with the acquisition of The Boston Insurance Center, Inc. for 450,000 common shares and of Houston-based Braniff & Braniff, Inc. for 525,000 shares.

In August, 1987 Gallagher acquired substantially all the assets of Joseph Bobba Co., Inc., an insurance brokerage located in Dublin, Calif., for 241,990 common shares.

In June, 1987 the company acquired E&S Intermediaries Inc., a reinsurance brokerage and services firm.

Heffernan, Keiler & Doble, a San Francisco-based insurance brokerage and risk-management services firm, was acquired in September, 1986 for 770,448 common shares.

In August, 1986 the company acquired, for 1,045,617 common shares, John Plumer & Co. Ltd., a London-based insurance broker that negotiates and places insurance and reinsurance with Lloyd's underwriters and insurance companies worldwide.

Oct. 3'89	1989					
45⅛	49⅞-34½	19	1.08	2.4%	A+	1.17

Summary

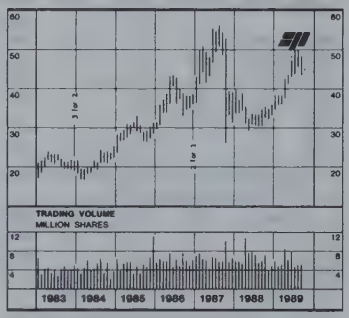
Gannett is a leading newspaper publisher (83 daily and 35 nondaily newspapers), owns USA TODAY, has interests in broadcasting (10 television stations and 16 radio stations) and is the nation's largest outdoor advertising company. In May, 1989 the U. S. Supreme Court agreed to hear arguments in the case involving a joint operating agreement for GCI's and Knight-Ridder's Detroit newspapers, thereby postponing for at least a year a final resolution to the situation.

Current Outlook

Earnings for 1990 are tentatively projected at $3.00 a share, up nearly 18% from the $2.55 estimated for 1989.

The $0.27 quarterly dividend is likely to be raised to $0.30 in the very near future.

Revenue gains for 1990 should reflect modest improvements in each major business segment, with somewhat stronger growth from outdoor advertising. Operating efficiencies, lower newsprint prices, and a full year of profitability at USA TODAY will boost operating earnings. Interest expenses are likely to be little changed.



Operating Revenues (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	818	758	703	615
Jun.	904	847	790	716
Sep.	---	804	751	689
Dec.	---	905	835	782
	---	3,314	3,079	2,801

Operating revenues for the 1989 first half rose 7.3%, year to year. Operating income advanced 18%, boosted by an acquisition, lower newsprint prices and improved profitability at USA TODAY. In the absence of a large capital gain, and after taxes at 40.2% in both years, the gain in net income was held to 9.0%. Share earnings were $1.16, versus $1.06.

Dec.	E0.85	0.73	0.66	0.55
	E2.55	2.26	1.98	1.71

Important Developments

Aug. '89— Gannett sold El Diario-La Prensa, its daily Spanish-language newspaper in New York City. Terms were not disclosed.

May '89— The U.S. Supreme Court agreed to hear arguments in the case for GCI's The Detroit News and Knight-Ridders's Detroit Free Press to implement a joint operating agreement (JOA). The court is expected to take 12 to 18 months to reach a decision. The latest development is a setback for the JOA in that a Federal appeals court had cleared the way for the JOA in February.

Mar. '89— John J. Curley, president and chief executive officer, added the title of chairman on March 31, 1989, when former chairman Allen H. Neuharth retired.

Next earnings report expected in late October.

Business Summary

Contributions to operating revenues and operating income by business segment in 1988:

	Revs.	Income
Newspaper publishing	81%	80%
Broadcasting	12%	15%
Outdoor advertising	7%	5%

Newspaper operations consist of 83 dailies in 35 states and Guam and the Virgin Islands, and 35 nondailies in nine states and Washington, D.C. At year-end 1988 average daily circulation was over 6.36 million, including USA TODAY, which is the nation's second largest newspaper. GCI also publishes USA WE EKEND, a newspaper magazine. Other operations include solicitation of national and major local advertisers principally for GCI's newspapers and provision of news services. Ten TV stations (including nine network affiliates) and 16 radio stations are owned in 20 major U.S. markets. The TV stations include WXIA-TV Atlanta; KVUE-TV, Austin; WLVI-TV, Boston; KUSA-TV, Denver; KARE-TV, Minneapolis/St. Paul; KOCO-TV, Oklahoma City; KPNX-TV, Phoenix; W-USA-TV, Washington; WFMY-TV, Greensboro/Winston-Salem/High Point; and WTLV-TV, Jacksonville.

The outdoor advertising group is the largest in North America, with operations in 10 states and Canada. Other operations include research, marketing, printing, news and broadcast program production activities.

Dividend Data

Dividends have been paid since 1929. A dividend reinvestment plan is available.

Summary

This specialty apparel retailer operates The Gap Stores, a nationwide chain selling moderately priced casual and activewear for men and women and children, and also operates Banana Republic, a specialty retailer of travel and safari clothing and accessories. Strong consumer acceptance of new merchandise at the Gap stores and GapKids should lead to improved earnings over the near term.

Current Outlook

Share earnings for the fiscal year ending January 31, 1990 are projected at $2.75, versus the $2.05 of fiscal 1988-9. Earnings could rise to $3.25 a share in fiscal 1990-1.

The quarterly dividend was raised 2.7%, to $0.19 from $0.15, with the September, 1989 payment.

Moderate store expansion and improved consumer acceptance of fashions should aid revenue growth in fiscal 1989-90. Margins should widen on higher volume and improved product mix, but interest expense will increase. Per-share earnings will reflect fewer shares outstanding. A new merchandising strategy at Banana Republic could aid long-term growth.

Net Sales (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7

Important Developments

Aug. '89— Comparable store sales increased 13% in the second quarter of fiscal 1989-90 and 16% in the first half. Gap stores and GapKids achieved strong comparable sales, while Banana Republic's continued to be negative. Management had said that it expected 1989 to be a transitional year for Banana Republic. GPS set goals of 15% to 20% compounded annual sales and earnings growth and comparable store sales increases of 7% to 8%. GPS planned to open 135-150 new stores a year, including 50-60 domestic Gap stores, 35-50 GapKids stores, 15-20 Banana Republic stores and 15-25 Gap stores in international markets (including Canada). In addition, 150-175 locations averaging 4,500 sq. ft. could be expanded over the next five years. In 1988-9 the company repurchased 2,004,464 shares under a 3 million share buyback program.

Next earnings report expected in mid-November.

Business Summary

The Gap (formerly The Gap Stores) is a specialty retailer whose major division is The Gap Stores. On April 1, 1989 the company was operating a total of 915 stores, which included 715 Gap Stores (20 of which had GapKids departments), 82 freestanding GapKids, 109 Banana Republics, and nine Hemisphere stores.

Gap Stores feature fashion tops, shorts, sweaters, jackets and accessories with a more updated look, and basic jeans and sweaters geared to the 20 to 45-year old. Gap Stores continues to refine and to expand its merchandise mix. Under 10% of the merchandise sold by the company during fiscal 1988-9 was made by Levi Strauss. The balance was obtained from over 500 other domestic suppliers or directly imported from overseas.

During 1987 the GapKids concept was expanded, opening both freestanding stores and departments within existing Gap locations, both of which offer the same fashionable, functional Gap merchandise in scaled down sizes for 2-12 year olds.

Banana Republic (acquired 1983) is a specialty retailer of travel and safari clothing and accessories. Management is refining the store merchandise mix to offer an expanded line of fabrics which are suitable for week-end wear, yet versatile enough to wear in the office or for travel; major changes, if made, would occur in 1990. The catalog was discontinued in 1988.

Introduced in 1987, Hemisphere stores offer sophisticated sportswear for men and women.

GenCorp Inc.

NYSE Symbol GY Options on CBOE (Mar-Jun-Sep-Dec)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 1'89	1989					
12¼	19⅛-11⅝	14	0.60	4.9%	B	1.08

Summary

GenCorp is now engaged in aerospace and defense work, automotive products, and polymer products, following the 1987 sale of General Tire and soft drink bottling operations and the discontinuation of its entertainment business. Earnings from continuing operations for fiscal 1990 are expected to recover from fiscal 1989's depressed level. GY is continuing to restructure operations and is liquidating its entertainment properties.

Current Outlook

Earnings for the fiscal year ending November 30, 1990 may rise to about $1.40 a share from fiscal 1989's estimated $0.80 from continuing operations.

The quarterly dividend should continue at $0.15.

Sales in the aerospace and automotive segments should rise in fiscal 1990 as new programs reach higher levels of production. Margins should widen as start-up costs on new automotive programs decline. Interest expense may increase and net income should rise. Charges for restructuring of the vinyl coated automotive fabrics business and several other items are likely in fiscal 1989 or 1990.

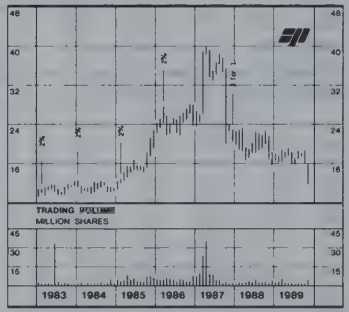
Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	453	400	302	614
May	528	487	450	755
Aug.	425	473	416	807
Nov.	---	531	451	923
	---	1,891	1,619	3,099

Sales for the nine months ended August 31, 1989 rose 3.4%, year to year. Hurt by start-up expenses and higher materials and interest costs, net income from continuing operations was down 54%, to $0.72 a share from $1.56, before income related to discontinued operations of $6.58, versus $0.15, and a special credit of $0.10 a share in the 1988 interim.

Common Share Earnings ($)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	0.24	0.38	0.16	0.28
May	0.28	0.65	d0.42	0.56
Aug.	0.20	0.53	0.51	0.57
Nov.	E0.08	0.16	0.50	0.53
	E0.80	1.72	0.38	1.94



Important Developments

Nov. '89— GY expected sharply lower operating earnings in the fourth quarter of fiscal 1989 due to management's failure to reduce overhead costs in the Aerojet Ordnance unit, delivery delays in principal contracts and inventory problems. Lower automotive earnings reflect reduced vehicle assemblies and higher costs related to the integration of acquired assets. Charges are expected for a number of unquantified items, including the restructuring of the vinyl coated automotive fabrics business, re-evaluation of environmental reserves, and potential settlements of long-standing disputes.

Aug. '89— GY sold New York City radio station WOR-AM and agreed to sell WAXY-FM, Ft. Lauderdale. Earlier in the year, GY sold radio stations KRTH-AM and KRTH-FM, Los Angeles, WFYR-FM, Chicago, and WRKS-FM, New York.

Next earnings report expected in mid-January.

Business Summary

Giving effect to the sale of General Tire and the bottling business and classification to discontinued operations of the entertainment and other segment of the business, GenCorp's sales and operating profits in the fiscal year ended November 30, 1988 were divided:

	Sales	Profits
Aerospace & defense	58%	58%
Automotive	19%	18%
Polymer products	25%	24%

Aerojet General is in the aerospace and defense business, selling principally to the U.S. Government and prime contractors. Within that market, Aerojet has a diverse product mix in propulsion, defense electronics and ordnance. At the end of fiscal 1988 Aerojet's contract backlog of about $2.0 billion and funded backlog of more than $1.2 billion were record year-end levels.

GenCorp Automotive is a major supplier of sealing systems, suspension components, reinforced plastic panels for vehicle bodies and other fiber-reinforced plastic components, and vinyl coated fabrics for cars and trucks.

Polymer-based product lines include fabricated plastics, latex, wallcovering, tennis balls, and racquetballs.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.15	Jan. 18	Jan. 31	Feb. 6	Feb. 28'89
0.15	Mar. 29	Apr. 25	May 1	May 31'89
0.15	Jul. 19	Jul. 26	Aug. 1	Aug. 31'89
0.15	Oct. 18	Oct. 26	Nov. 1	Nov. 30'89

Next dividend meeting: mid-Jan.'90.

Finances

Auditors noted in their opinion on GY's fiscal 1988 financial statements that uncertainties exist regarding the eventual liabilities of Aerojet relating to environmental litigation arising from discharges of chemicals.

Summary

This leading biotechnology concern focuses on the development, manufacture and sale of pharmaceuticals produced by recombinant-DNA technology. Products sales are derived from Activase, a t-PA blood clot dissolving drug for the treatment of heart attacks; and Protropin, a human growth hormone. Research and development efforts are being directed at creating new therapies to treat blood clotting problems, blood disorders, cancer, AIDS, and other conditions.

Current Outlook

Earnings for 1990 may reach about $0.70 a share, up from the $0.50 estimated for 1989.

Initiation of cash dividends is not expected.

Total revenues for 1990 should show further progress, primarily reflecting higher product sales. Sales of Activase (t-PA) are expected to be importantly affected by results of the GISSI-2 test study comparing t-PA with much lower-priced streptokinase which is to be released in March, 1990. Initial sales are also possible from gamma interferon for certain indications, assuming FDA approval. Margins should benefit from the better volume and productivity improvements.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	91.1	74.4	38.6	29.0
Jun.	97.9	89.3	47.5	32.7
Sep.	100.0	81.6	48.0	35.6
Dec.	---	89.5	96.5	36.7
	---	334.8	230.5	134.0

Total revenues for the nine months ended September 30, 1989 rose 18%, year to year, aided by higher product sales and contract revenues. Costs and expenses, however, were sharply higher, and net income declined 21%. Share earnings were $0.33, versus $0.42.

Important Developments

Sep. '89— The company was awarded a patent for recombinant DNA-technology related to the manufacture of its gamma interferon, a compound being studied as a anti-infective. GNE also began clinical trials of its insulin-like growth factor for nutritional and growth disorders and tissue repair.

Aug. '89— Scientists at the National Cancer Institute started human testing of GNE's rCD4-IgG anti-AIDS drug. The company raised $72.5 million through a research and development partnership to fund the development and clinical trials of rCD4 and rCD4-IgG potential AIDS therapeutics. In June, GNE began clinical trials on Argatroban, an agent being studied for its ability to inhibit blood clots.

Next earnings report expected in late January.

Business Summary

Genentech, generally recognized as the leading recombinant-DNA technology company, develops, manufactures and markets human pharmaceutical products based on such technology. Product sales accounted for 78% of the company's total revenues in 1988, contract revenues for 18%, and interest for 4%. Product sales in 1988 were derived from Activase and Protropin. Revenues derived from foreign customers accounted for about 9% of total revenues in 1988.

Activase or tissue plasminogen activator (t-PA) is a genetically-engineered form of an enzyme naturally produced by the body to dissolve blood clots. Cleared for marketing by the FDA in November, 1987 Activase is used to dissolve blood clots in coronary arteries that cause heart attacks. In February, 1989, the FDA approved an added claim that t-PA saves lives. Activase had sales of $151.4 million in 1988, up from $55.8 million in 1987. Protropin is a human growth hormone used to stimulate growth in children with pituitary problems. Sales of this product were $111.1 million in 1988 and $85.6 million in 1987.

Product sales are made in Canada through a joint venture with an affiliate of Boehringer Ingelheim and sales in other foreign areas are made through licensing agreements with Boehringer and others.

Royalties are also received on product sales of Humulin (recombinant human insulin) and Roferon-A (alpha interferon) made by and trademarks of Eli Lilly and Hoffmann-La Roche, respectively. One major customer accounted for 21% of GNE's total revenues in 1988.

Other human health care products in various stages of development include gamma interferon for the treatment of cancers and viral infections; CD4, a potential new treatment for AIDS; tumor necrosis factor (TNF), an anticancer agent; Relaxin, a hormone to aid in childbirth; insulin-like growth factor-1, which appears effective in stimulating growth and regenerating tissue; TGF-Beta, a wound healing drug; a lung surfactant for infant respiratory distress syndrome; and Tissue Factor, a blood clotting agent for hemophiliacs.

Dividend Data

No cash dividends have ever been paid. A "poison pill" stock purchase right was adopted in 1988.

NYSE Symbol GCN Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 5'90	1989-90					
25⅝	28½-23⅛	18	0.44	1.7%	A	1.31

Summary

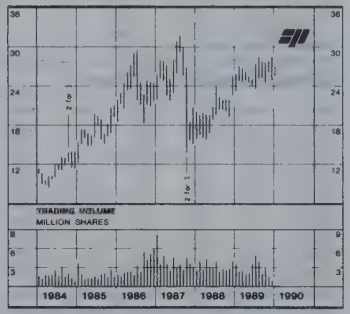
This company now has more than $1 billion in cash and investments, following the March, 1989 sale of soft drink bottling assets to PepsiCo. Despite its name, GCN's primary operating business interest is a 59.9% equity interest in The Neiman Marcus Group, a major retailer. GCN also has a sizable movie theater business, but this contributes a relatively small portion of consolidated revenues and profits. GCN also has sizable equity interest in Cadbury Schweppes plc, a British firm.

Current Outlook

Assuming that GCN's large cash position is not used for an acquisition(s), share earnings for the fiscal year ending October 31, 1990 are estimated at roughly $0.95, versus fiscal 1989's 1.43, which included about $0.70 from gains on securities.

The dividend was raised 10%, to $0.11 quarterly from $0.10, with the October, 1989 payment.

In fiscal 1990, operating profit from GCN's Neiman Marcus Group (NMG) business is expected to rise, but overall NMG earnings will be limited by higher interest expense. A key to GCN's future is what use it makes of the more than $1 billion in net proceeds it will have from the 1989 sale of most of its soft drink bottling business.



Revenues (Million $)

Important Developments

Dec. '89— After paying taxes in January, 1990 on its $1.77 billion sale of soft drink bottling assets to PepsiCo, GCN expected to have an investment portfolio of about $1.1 billion. Meanwhile, in the October quarter of 59.9%-owned Neiman Marcus Group (NMG), the retailer's operating profit rose 27%, and net income before preferred dividends payable to GCN was up 20%. NMG's results are consolidated with those of GCN with a three-month lag. In fiscal 1989 NMG accounted for $84 million of GCN's $92 million in operating profit (including depreciation expense), and 77% of GCN's consolidated revenues. Also, in fiscal 1989 GCN's interest and dividend income, plus securities sale gains, totaled about $207 million, exceeding GCN's interest expense of $89 million.

Next earnings report expected early March.

Business Summary

General Cinema is a large operator of motion picture theaters, and has a 59.9% equity interest in The Neiman-Marcus Group, a publicly owned retail company, whose financial statements are consolidated with those of GCN. GCN's soft drink bottling business was largely sold to PepsiCo, Inc. in March, 1989 for $1.77 billion. In fiscal 1988 the bottling business had revenues of $721 million and operating profit (after depreciation and amortization) of $94.1 million.

As of October 31, 1989 GCN operated 1,452 motion picture screens at 317 locations. Theater revenues in fiscal 1989 totaled $446.3 million, and operating profit was $9.2 million.

The Neiman-Marcus Group (NMG), in which GCN has a 59.9% equity interest (44% voting power), includes the Neiman-Marcus and Contempo Casuals retail chains and the Bergdorf Goodman store in New York City. For the fiscal year ended July 29, 1989, NMG had revenues of $1.47 billion and net income (after preferred stock dividends to GCN) of $0.9 million. Operating results of NMG are consolidated with those of GCN, with a three-month lag.

Also, as of late 1989, GCN owned about 17% of the ordinary shares of Cadbury Schweppes plc, a British soft drink and confectionery products company.

Dividend Data

Summary

This company manufactures, installs and services data communications equipment and networks which transmit data (principally via telephone lines) between computers and terminals or other data processing equipment. In November, 1989 GDC said that factors such as the successful market acceptance of its MEGAMUX TMS multiplexer and dramatic changes in the cost of information transmission led it to expect a profitable year in fiscal 1990.

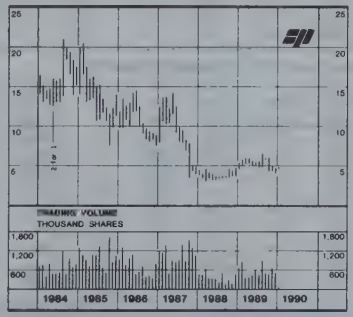
Business Summary

General DataComm makes and services advanced systems and products used to build and manage communications networks that transmit data, voice and video over private and public telecommunications facilities. The transmission products offered by the company include multiplexers, data sets, and network control and diagnostic devices.

The company markets its products to a wide range of domestic and international customers including small and large corporations, government agencies, multinationals, Bell operating companies, and other major common carriers worldwide. International sales in fiscal 1988 accounted for 23% of total revenues (22% in fiscal 1987) and provided operating profits of $0.9 million ($2.5 million).

Data communications equipment and networks enable computers to communicate with other computers, terminals and other data processing equipment at different locations over telephone facilities including telephone lines, satellites, fiber optics and other communications links. GDC offers a complete, integrated family of equipment which allows customers, on a building block basis, to construct data communications networks. Network products include multiplexers, which concentrate and combine many individual signals from multiple lines and transmit them over one line; network control and diagnostic equipment, which is used to monitor many remote data transmission sites from a central computer facility; and data sets, which are electronic devices used to convert signals into a form acceptable for transmission over telecommunications facilities.

In addition to offering its products on an individual basis, GDC designs and engineers complete data communications networks involving total responsibility for installation, service and operation, with the exception of leased telecommunication facilities.



Important Developments

Nov. '89— GDC was encouraged by an increase in fiscal 1989 fourth quarter revenues over the previous quarter, and the realization of $18,000 in operating profit (before a $5.3 million restructuring charge). The restructuring charge consisted largely of additional reserves for a facility which remained vacant due to the depressed real estate market in the Northeast. During fiscal 1989, GDC's Canadian operations had a record year for orders and sales; the domestic telephone business was strong; and GDC's international distributor business concluded its best year for orders and sales. Based on that momentum, successful market acceptance of its MEGAMUX TMS product, and dramatic changes in the cost of information transmission which favors GDC's digital data sets, the company anticipated that it would have a profitable year in fiscal 1990.

Next earnings report expected in early February.

Dec. 8'89	1989					
44⅝	60½-42½	6	1.00	2.2%	B+	1.08

Summary

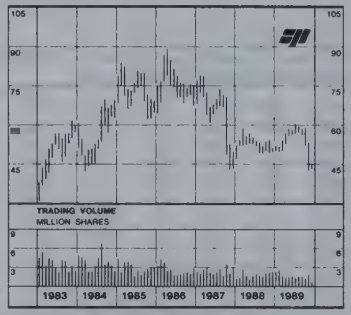
General Dynamics is a leading defense contractor with important positions in military aircraft, submarines, missiles, gun systems and tanks. GD is also involved in commercial businesses, including production of aircraft through Cessna, building products and coal mining. Many of its defense programs should be funded at relatively high rates in the near term, but future earnings growth will depend on development of newer programs, the funding of which which is uncertain at this time.

Current Outlook

Earnings for 1990 are projected at $8.25 a share, versus the $7.00 estimated for 1989.

Dividends should continue at the current $0.25 quarterly rate.

Revenues for 1990 should be moderately above 1989's level. Sales totals of most segments will contribute to the gain. Overall margins should improve assuming that additional writeoffs on submarine operations ($50 million in 1989) will be absent, although segment margins will continue to narrow. Gradual improvement in aircraft margins is likely. Further improvement in general aviation (Cessna) operations is likely. Interest expense probably will continue to rise.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	2,361	2,418	2,250
Jun.	---	2,530	2,357	2,412
Sep.	---	2,517	2,285	2,280
Dec.	---	---	2,490	2,403
	---	---	9,551	9,344

Sales for the first nine months of 1989 increased 4.9%, year to year. Net income was up 0.7%, to $5.03 a share from $4.97, which was restated to reflect adoption of FAS No. 96.

Common Share Earnings ($)

Important Developments

Nov. '89— GD contracted for launches of two communications satellites, bringing to 22 the total of firm orders for commercial launches by its Atlas launch vehicle.

Oct. '89— The funded backlog at September 30, 1989 was $16.8 billion, up 5% from a year earlier. The total backlog of $28.3 billion was up 23%, year to year.

Apr. '89— Through application of FAS No. 96 (accounting for income taxes), GD restated share earnings for 1988, 1987 and 1986 to $7.00, $9.47 and $0.28, respectively. On a consecutive quarterly basis, share earnings for 1988 were $2.04, $1.11, $1.82 and $2.03.

Next earnings report expected in late January.

Business Summary

General Dynamics is a leading, diversified defense contractor, and has commercial interests. Business segment contributions (profits in million $):

1988	Sales	Profits
Military aircraft	36%	$318
Missiles/space/electronics	26%	143
Submarines	16%	36
Land systems	11%	39
Material service/resources	4%	-6
General aviation	5%	25
Other	2%	-33

GD is prime contractor for the Trident ballistic missile submarine, and produces the SSN 688-class fast-attack submarine. GD produces the F-16 Multi-Role Fighter aircraft. U.S. and foreign air forces plan to purchase a total of 4,440; 2,267 had been delivered through 1988. The Land Systems division makes the M-1 tank. Other programs include the sea-launched cruise missile, the Standard air defense missile, the Sparrow and Stinger missiles and the Phalanx gun system. The space division makes the Atlas/Centaur launch vehicle.

Cessna Aircraft, acquired in 1985, is the largest maker of general aviation aircraft, including Citation business jets.

The company mines coal and makes building materials. Other work includes production of commercial aircraft subassemblies.

General Electric

NYSE Symbol GE Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
59⅝	60-43½	14	1.88	3.2%	A+	1.19

Summary

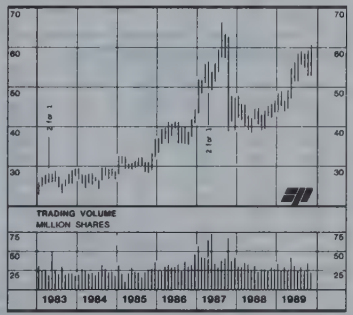
A broadly diversified company, General Electric's major businesses include aerospace, medical systems, financial services, broadcasting, appliances and lighting. An active program of acquisitions and divestitures is being pursued primarily to boost its market share in various operations. A second consecutive year of higher earnings is likely in 1989, led by financial services, plastics and medical systems. Additional growth is likely in 1990. The company recently increased the dividend 15% and announced that it would repurchase $10 billion of its common stock over the next five years.

Current Outlook

Earnings for 1990 should approximate $4.85 a share, up from the $4.35 estimated for 1988.

The quarterly dividend has been raised 15%, to $0.47 from $0.41, with the January, 1990 payment.

Revenues in 1990 are expected to increase approximately 7%, assuming modest economic growth. The gain should be led by plastics, financial services, aircraft engines and medical systems. Most other operations should also experience higher revenues. Margins should expand due to the higher volume, productivity improvements, and well contained costs. A possible repurchase of common stock could aid share earnings. Long-term prospects should benefit from GE's strong management, its leading market positions, and an ongoing restructuring of operations. Its extremely strong financial condition should also continue to give the company operating flexibility.



Total Revenues[1] (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	11.90	10.53	8.32	5.88
Jun.	13.53	11.71	9.56	7.79
Sep.	12.98	12.02	9.40	9.28
Dec.	---	15.83	12.04	12.27
	---	50.09	39.32	35.21

Revenues for the nine months ended September 30, 1989 increased 11%, year to year, led by materials, financial services, industrial and medical operations. Margins widened on the higher volume, and pretax income was up 18%. After taxes at 31.3%, versus 30.2%, net income advanced 16%, to $3.06 a share from $2.63.

Important Developments

Nov. '89— GE said that its board of directors had authorized the repurchase of up to $10 billion of its common stock over the next five years. The company added that shares are to be acquired in the open market with funds from a combination of borrowings and free cash flow.

Next earnings report expected in mid-January.

Business Summary

General Electric is a diversified company with interest in services, technology and manufacturing. Industry segment contributions in 1988 were:

	Revs.	Profits
Aerospace	10%	11%
Aircraft engines	13%	17%
Broadcasting	7%	9%
Industrial	14%	14%
Major appliances	10%	1%
Materials	7%	12%
Power systems	9%	8%
Technical products and services	9%	8%
Other	2%	3%
Financial services	19%	17%

Foreign operations accounted for 11% of sales and 17% of operating income in 1988.

Technology businesses include aircraft engines, aerospace (electronic systems), medical systems and factory automation.

The company's three service businesses are G.E. Financial Services (including General Electric Credit Corp., Employers Reinsurance Corp. and 80%-owned Kidder Peabody), the National Broadcasting Company, and Communications and Services (provides communications equipment and services, information services, and installation and maintenance).

Manufacturing businesses include major appliances, lighting, power systems, construction equipment, transportation systems, and motors.

39⅜	40¾-25¼	13	0.50	1.3%	B	1.37

Summary

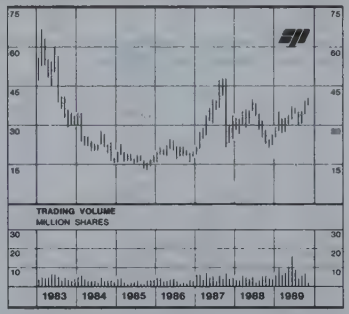
This company holds leading positions in cable television electronics, coaxial cable and satellite encryption systems. It also produces lottery systems, wagering equipment, semiconductors and electrical products. A strong gain in earnings from continuing operations is likely for the third consecutive year in fiscal 1989-90, led by higher cable television equipment and defense profits. Those factors should lead to an increase in earnings in fiscal 1990-91 as well. In July, 1989 GRL used part of its cash to repurchase 20% of its outstanding stock in a "Dutch auction" at $35.50 a share.

Current Outlook

Earnings for the fiscal year ending February 28, 1991 should reach $3.30 a share, up from the $2.90 projected from continuing operations for fiscal 1989-90.

An increase in the $0.12½ quarterly dividend is likely in fiscal 1990-91.

Sales for fiscal 1990-91 should rise about 10%, aided by continued healthy growth of cable television equipment. A projected slowing of component product sales and only moderately higher wagering and lottery revenues is likely to be restraining. Margins should be well maintained due to cost controls and a return to profitability of wagering operations. Fewer shares outstanding due to the July, 1989 stock repurchase should further aid share earnings. Long-term prospects are enhanced by a high level of capital spending by the cable television industry and a program of acquisitions and divestitures.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
May	346	313	280	156
Aug.	340	304	285	166
Nov.	---	359	298	225
Feb.	---	329	292	241
	---	1,305	1,155	788

Revenues for the 26 weeks ended August 27, 1989 rose 11%, year to year. Margins narrowed due to lower components earnings, and pretax income advanced 4.0%. After taxes at 38.4%, versus 39.1%, income from continuing operations rose 5.1%, to $1.38 a share from $1.29. Results for the fiscal 1989-90 interim exclude income from discontinued operations of $0.31.

Feb.	E0.77	0.61	0.58	0.21
	E2.90	2.55	2.01	0.57

Important Developments

Sep. '89— GRL said that second-quarter earnings reflected continued growth in the cable television equipment market and a solid performance in its VideoCipher business. In addition, results of the data systems segment substantially improved over the year-earlier period. The components segment reported lower earnings.

Next earnings report expected in mid-December.

Business Summary

General Instrument Corp. is a diversified manufacturer of electronic components and systems and related services. Business segment contributions in fiscal 1988-9 were:

	Sales	Profits
Broadband communications..	60%	65%
Data systems	17%	1%
Component products	23%	34%

Foreign operations accounted for 12% of sales and 15% of operating income in fiscal 1988-9.

Broadband Communications manufactures and installs electronic equipment and systems for CATV systems, as well as being a leading supplier of coaxial cable for CATV systems. Its VideoCipher Division produces satellite encryption systems used by television broadcasters.

The Data Systems group produces and services systems for on-track and off-track wagering and on-line lottery systems. Defense operations include electronic products used in the radar warning, targeting and surveillance and countermeasure systems, as well as sonar mapping products.

Component products include the Power Semiconductor Division, which is a leading supplier of rectifiers. Its Computer Products Division manufactures electronic products and systems for automotive, computer, military and commercial aerospace applications.

Dividend Data

Dividends were resumed in 1977. A "poison pill" stock purchase right was adopted in 1989.

General Mills

NYSE Symbol GIS Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 8'90	1989-90					
71½	76⅞-50⅜	17	2.20	3.1%	A	0.82

Summary

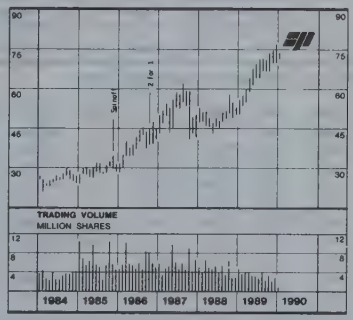
This company is a leading producer of consumer foods, and owns the Red Lobster and Olive Garden restaurant chains. Divestiture of low growth businesses has helped spur earnings growth in recent years. GIS bought back some 3.5 million common shares in fiscal 1988-9, leaving some 4.9 million shares for repurchase under previous authorizations. Strength in ready-to-eat cereals and restaurant business should sustain superior earnings momentum in fiscal 1989-90.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 should rise to $4.45 a share from fiscal 1988-9's $3.85, which excludes income from discontinued operations of $2.06 and a special charge of $0.85.

The quarterly dividend, which was raised 17% with the August, 1989 payment, should remain at $0.55.

Sales for fiscal 1989-90 should remain in a healthy uptrend, given continued strength in demand for oat-based cereals. Higher prices combined with lower ingredient costs, a reduction in trade promotions, and volume-based efficiencies along with tight controls on administrative costs should boost profitability. Expansion of Red Lobster and Olive Garden restaurant chains will also be an important growth factor. A joint venture with Nestle to expand in cereal markets abroad should enhance the future.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	1,502	1,379	1,274	1,193
Nov.	1,627	1,416	1,335	1,335

Important Developments

Dec. '89— GIS and Nestle S.A. announced plans to jointly develop a major breakfast cereal business in Europe, which later would be expanded into other worldwide breakfast cereal markets outside the U.S. and Canada. The companies have entered into a long-term mutual standstill agreement providing that neither party will seek control of the other.

Next earnings report expected mid-March.

Business Summary

Following a restructuring program begun in late 1985 which included the spin-off of toy and fashion units and disposal of its apparel and nonapparel specialty retailing business, General Mills is a leading producer of consumer foods and operates chain restaurants. Contributions from continuing operations in fiscal 1988-9:

	Sales	Profits
Consumer foods	71%	78%
Restaurants	29%	22%

Consumer foods operations include Big G ready-to-eat cereals, Betty Crocker desserts, main meals and side dishes, Yoplait yogurt, Bisquick baking mixes, Gold Medal flour, Pop Secret microwave popcorn, Gorton's frozen seafood, and commercial foods. The company also makes and sells food products in Canada and Europe, Japan, Korea and Latin America. Products are distributed to retail food chains, co-ops and wholesalers.

The Restaurants segment is comprised of the Red Lobster seafood chain (490 units in the U.S. and 32 in Japan at fiscal 1988-9 year-end), and The Olive Garden Italian cafe-style concept (145).

The company operates 10 major consumer food plants having a combined annual caapacity of 1.55 billion pounds annually and leases some 5.4 million square feet of warehouse space.

Dividend Data

Dividends have been paid since 1898. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Nov. 3'89	1989					
44⅜	50½-39⅛	6	3.00	6.8%	B	1.12

Summary

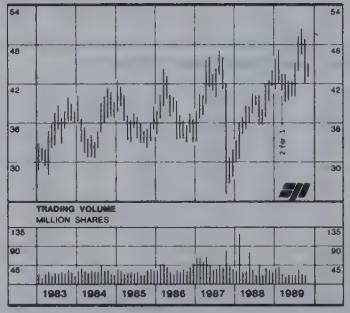
The largest automobile manufacturer in the world, GM has struggled in recent years to regain control of its manufacturing operations. The company is in the third year of a four-year plan to permanently reduce costs by at least $12.5 billion annually; annual cost reductions to date total $11.0 billion. GM's goal is to profitably boost its sagging U.S. automobile market share. Its share of the U.S. truck market has increased considerably over the past year. Aided by strong demand for vehicles in Europe, net income rose 9.0% in the first nine months of 1989.

Current Outlook

Earnings for 1990 may advance to $7.00 a share from the $6.85 estimated for 1989.

The dividend should continue at $0.75 quarterly.

Industrywide U.S. car and truck sales are expected to decline moderately in 1990. However, GM's market share should strengthen somewhat with the introduction of numerous new models for the 1990 model year. Continuing strong contributions by foreign operations and non-automotive subsidiaries, along with strenuous cost-cutting efforts, should lead to higher earnings.



Revenues[1] (Billion $)

Dec.	---	32.4	26.4	25.5
	---	123.6	101.8	102.8

Consolidated revenues (including GMAC) for the nine months ended September 30, 1989 rose 4.8%, year to year. Manufacturing revenues were up 4.0% on a slight decline in factory sales of vehicles. Pretax income advanced 26%. After taxes at 36.6%, against 27.0%, net income increased 9.0%, to $5.32 a share from $4.70 (adjusted), before a special credit of $0.35 a share in the 1988 period.

Important Developments

Nov. '89— GM's U.S. retail car sales declined 7.1% in the first 10 months of 1989, to 3,003,705 from 3,232,304 in the 1988 period. Retail truck sales were up 1.1%, to 1,432,685 from 1,417,725. GM's share of the U.S. car market was 35.2% in the first 10 months of 1989, compared with 36.4% in the 1988 period.

Oct. '89— GM's worldwide factory vehicle sales declined slightly in the first nine months of 1989, to 5,996,000 vehicles from 6,000,000 in the 1988 period. Cost savings approximated $2.5 billion in the first nine months of 1989, bringing permanent annual cost reductions since 1987 under a four year plant to about $11.0 billion. GM's goal is to reduce costs by $12.5 - $13.0 billion by the end of 1990. GM may close four or five assembly plants in the next few years.

Next earnings report expected in late January.

Business Summary

This giant car and truck producer derived its revenues and operating profits as follows in 1988:

	Sales	Profits
Automotive products	81%	74%
Financing and insurance	9%	24%
Other products	10%	2%

In 1988 the U.S. accounted for 36% of net income, Europe 37%, Latin America 12%, Canada 8%, and all other 7%.

Various models of the Chevrolet, Buick, Cadillac Oldsmobile, and Pontiac divisions accounted for 35.9% of total new U.S. car registrations (including foreign-built cars) in 1988, versus 36.2% and 38.6% in 1987 and 1986, respectively. Comparable figures for Chevrolet and GMC trucks were 33.8%, 31.5% and 33.0%, respectively. Worldwide factory sales were 8,108,000 cars and trucks in 1988, versus 7,765,000 in 1987.

Other products includes computer services (Electronic Data Systems); defense electronics and weapons systems (GM Hughes Electronics); locomotives; drilling, marine and stationary engines; commercial satellites; and automated production and test equipment. Financing and insurance includes GMAC, GM's vehicle financing subsidiary.

Oct. 26'89	1989					
43¼	44-36¼	9	2.20	5.1%	B	0.57

Summary

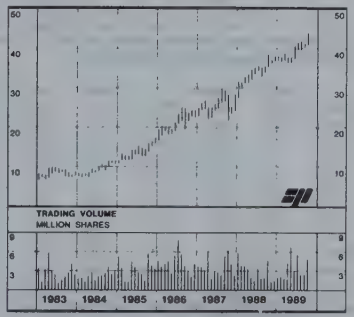
This utility holding company serves the commercial and industrial economy of New Jersey and Pennsylvania. Near-term prospects are benefiting from an increased number of residential and commercial customers, cost reduction efforts, and a completed construction program. Included in GPU's capacity is the Three Mile Island 1 nuclear unit. Unit 2 is being dismantled following an accident in 1979. TMI-2 clean up is expected to be completed in 1990. The company's longer-term outlook is enhanced by strong cash flow and supportive regulation.

Current Outlook

Share earnings for 1990 are projected at $5.00, up from the $4.94 estimated for 1989.

The dividend was raised to $0.55 quarterly, from $0.45, with the July, 1989 declaration. GPU's rate of dividend growth is expected to lessen in the near future although future increases should exceed the industry average.

Share earnings for 1990 will continue to benefit from an increased number of residential and commercial customers, cost reduction efforts, and a share repurchase program. Longer-term prospects are strengthened by the company's purchase power strategy, excellent cash flow, and a supportive regulatory environment.



Operating Revenues (Million $)

	E4.94	4.75	4.12	3.26

Important Developments

Oct. '89— Profitability in 1989's first nine months was limited by the outage at the Oyster Creek nuclear plant. The unit had been down from late September, 1988 through mid-July, 1989 for equipment modification work. As a result of the outage, the company incurred higher replacement power costs and increased operating-maintenance expenditures in the 1989 first half. The plant has been operating at 100% of capacity since late September and is expected to run through 1990. Separately, GPU's Three Mile Island 1 nuclear plant has been operating at virtually full capacity since December, 1988. The unit has a scheduled outage for refueling in January, 1990 which is expected to take about three months. Total Kwh sales in 1989's first nine months declined 0.4%, as the effects of a cooler summer offset an increase in the number of residential and commercial customers.

Next earnings report expected in early February.

Business Summary

General Public Utilities is an electric utility holding company whose subsidiaries serve some 4.2 million people in New Jersey and Pennsylvania. Contributions by customer class:

Revenues	1988	1987	1986	1985
Residential	41%	41%	40%	33%
Commercial	30%	30%	29%	27%
Industrial	25%	25%	26%	35%
Other	4%	4%	5%	5%

Power requirements in 1988 were derived from coal 43%, nuclear 21%, other 8%, and purchased 28%. Purchased power will represent a greater share of capability in the future. System capability in 1988 was 9,475 mw and peak demand was 7,987 mw for a capacity margin of 16%.

A serious accident which shut down the 880 mw Three Mile Island No. 2 (TMI-2) nuclear unit in March, 1979 caused GPU significant financial difficulties. Regulators removed both TMI-1 and TMI-2 from the rate base. In October, 1985 TMI-1 resumed operation and in November, 1985 TMI-1 was returned to rate base. GPU's recoverable investment in TMI-2 was $275 million. Clean up of TMI-2, which is estimated to cost about $973.0 million, is expected to be completed in 1990. A $0.19 a share write-off taken in 1988 for TMI-2 clean up costs is unrecoverable. Auditors noted in their report on GPU's 1988 financial statements the existence of uncertainties associated with the TMI-2 accident.

Dividend Data

Common dividends were resumed in April, 1987 after having been omitted since 1980. Dividends were maintained on subsidiaries' preferred stock. A dividend reinvestment is proposed to begin with the first 1990 payment.

Summary

General Re is the parent company of General Reinsurance, the largest property-casualty reinsurer in the country. Other subsidiaries are engaged in property-casualty reinsurance overseas and related services. In November, 1988 GRN sold General Reassurance Corp., its life reinsurance unit, for $315 million. Since 1987, GRN has repurchased about 13.1 million common shares. In August, 1989 GRN committed another $150 million to its share repurchase program.

Current Outlook

Excluding realized capital gains or losses, operating earnings for 1989 are estimated at $6.00 a share, up from 1988's $5.44. Share earnings for 1990 could reach $6.65.

The $0.34 quarterly dividend is the minimum expectation.

Despite declining premiums, a strong underwriting performance and an aggressive share repurchase program are expected to lead to higher share earnings in 1989. Since 1987, primary insurers have been retaining a larger portion of their risks, and this higher retention has led to a decline in premiums for GRN. However, the effects of Hurricane Hugo and the California earthquake and an expected easing in p-c pricing pressures (probably in 1990) may increase the demand for reinsurance in 1990. Underwriting performance is not expected to erode, as business written is estimated to be at profitable prices. Cash flow may decline slightly, but should only modestly restrain growth in investment income. GRN has repurchased about 13.1 million shares since mid-1987, and in August, 1989 directors authorized another $150 million repurchase program, the amount coinciding with proceeds from the sale of convertible preferred stock to a company ESOP in July

Review of Operations

Total revenues for the six months ended June 30, 1989 fell 1.7%, year to year (1988 restated), as an 11% drop in earned premiums was somewhat offset by an 18% rise in investment income, and realized investment gains of $48.0 million versus $2.5 million. With a 9.9% decline in total expenses, pretax earnings advanced 32%. After taxes at 19.4% versus 10.6%, and minority interests, net income rose 18%. Share earnings were $3.26 (including $0.28 in realized capital gains) on 4.6% fewer shares, compared with $2.64 ($0.01) before a loss from discontinued operations $0.38 a share in the 1988 period.

Dec.		1.46	1.37	0.98
		5.44	4.79	2.74

Important Developments

Aug. '89— GRN said that despite a challenging market in which the demand for reinsurance has been declining, it wrote more business in the second quarter of 1989 than in the first quarter, although 4.6% less than in the second quarter of 1988. Also, as of August 3, 1.9 million shares had been repurchased in 1989. An additional $150 million has been allocated for further repurchases.

Next earnings report expected in early November.

Business Summary

General Re Corp. (formerly General Reinsurance) is the parent company of the General Reinsurance Group, the nation's largest reinsurance organization. Operations are conducted in the U.S., Canada and 30 foreign countries. Segment contributions to pretax operating income (in million $) in recent years:

	1988	1987	1986
Domestic	$538.0	$479.5	$298.5
Overseas	32.6	26.4	23.5

Most of the company's business is written on an excess of loss basis, which means that its liability arises only after the loss incurred by the primary insurer exceeds a specified sum.

Domestic p-c operations are conducted through General Reinsurance Corp., of which North Star Reinsurance Corp. is the largest unit. The group provides all lines of property-casualty reinsurance and excess covers, with business accepted directly from insurance companies, and from reinsurance intermediaries through North Star. Domestic operations accounted for about 94% of net premiums written in 1988. Of the $1.78 billion in domestic net premiums written in 1988 property and multi-peril lines accounted for 32%, other liability 42%, auto 12%, workers compensation 8%, bonding 3% and other 3%.

In November, 1988 the company sold its life reinsurance subsidiary, General Reassurance Corp., for $315 million in cash.

Dividend Data

Except for 1933, dividends have been paid steadily since 1926. A dividend reinvestment plan is available.

Oct. 26'89	1989					
51¼	57⅞-47	14	1.80	3.5%	B	1.13

Summary

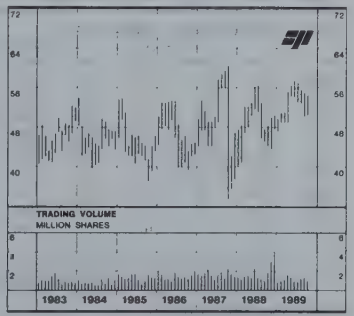
This company is a leader in instrumentation and control technology for semiconductor production, telecommunications, industrial automation, energy management, and rail transportation. Approximately 80% of its business is tied to capital spending. The absence of nonrecurring charges, operating improvements and fewer shares outstanding should lead to substantially higher profits in 1989 despite higher interest expense caused by the buyback last December of about one-third of GSX common shares. Further gains are anticipated for 1990.

Current Outlook

Earnings for 1990 may approximate $5.10 a share, up from the $4.15 projected for 1989.

Dividends are likely to remain at $0.45 quarterly.

Sales for 1990 should rise by approximately 10%, led by substantial growth of transportation controls due to sharply higher orders from the railroad industry. Process controls is expected to benefit from higher capital spending by the industrial sector, although at somewhat slower rate than in 1989. However, cautious spending by customers and foreign competition should restrict growth of the technologies industries. Electrical controls should experience continued modest growth. Operating margins should benefit from the higher volume and cost controls. Interest expense should decline meaningfully as debt is reduced.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	478	417	385	405
Jun.	489	436	397	412
Sep.	473	444	399	391
Dec.	---	464	422	374
	---	1,760	1,603	1,583

Sales for the nine months ended September 30, 1989 rose 11%, year to year, reflecting gains in all segments. In the absence of a $29.8 million ($2.35 a share) net nonrecurring charge and with substantial improvement in operating margins, pretax income advanced 211% despite net interest expense of $30.9 million, in contrast to net interest income of $1.4 million, due to greater borrowings for the repurchase of common stock. After taxes at 29.9%, versus 82.5%, net income rose to $2.96 a share (on 32% fewer shares) from $0.16.

Dec.	E1.19	0.77	0.76	0.62
	E4.15	0.91	2.46	2.60

Important Developments

Oct. '89— GSX said that its business remained generally healthy with process controls and electrical controls exceeding budget. However, demand from the semiconductor and transportation industries was sluggish. It added that cost reductions were proceeding on schedule.

Next earnings report expected in late January.

Business Summary

General Signal is a broadly diversified manufacturer. Business segment contributions in 1988 (profits in million $):

	Sales	Profits
Process controls	37%	$61.0
Technology industries	26%	-6.2
Electrical controls	22%	34.7
Transportation controls	15%	4.3

Foreign operations accounted for 17% of sales and 26% of operating income in 1988.

Process controls products include pumps, control systems and electronic instrumentation, supervisory control and data acquisition systems, heat processing equipment, waste-treatment systems, aerators and scales.

Technologies industries provide semiconductor production equipment, test instruments, microwave radios, multiplexers, models, and data network diagnostic/management systems, as well as products for the broadcast and defense industries.

Electrical control products include power conditioning equipment, fire protection systems, transformers, electric motors and power distribution equipment.

Transportation controls consists of systems and controls, braking systems and related controls. Fare boxes, transmissions, power systems and cold-forged components are also sold.

Dividend Data

Dividends have been paid since 1940. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

Genesco retails and manufactures footwear, and also produces men's tailored clothing. In 1987 GCO essentially completed a divestiture program designed to alleviate a serious liquidity problem. In addition, GCO has issued during the past two years more than 7 million new common shares in exchange for some of its outstanding serial preferred stock in order to reduce dividend and redemption arrearages. After a sharp recovery for fiscal 1988-9, profits continued to advance during 1989-90, reflecting strength in footwear wholesale & manufacturing and men's clothing.

Business Summary

Genesco manufactures and sells footwear at wholesale and through its own retail stores, and also manufactures and sells tailored clothing at wholesale. Business segment contributions for the fiscal year ended January 31, 1989:

	Sales	Profits
Footwear:		
Wholesale & mfg.	29%	24%
Retail	44%	33%
Men's tailored clothing	27%	44%

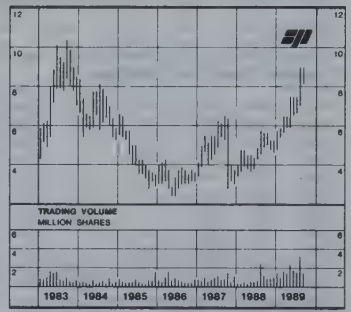
Footwear wholesale & manufacturing includes the manufacturing of men's (81% of fiscal 1988-9 shoe manufacturing sales), women's (18%), and children's (1%) shoes. About 70% of company manufactured shoes are sold at wholesale, and the balance sold to GCO's retail outlets. Wholesale brand names include Johnston & Murphy and Jarman men's shoes; Laredo and Code West boots for the family; Charm Step and Easy Street shoes for women; and Mitre cleated athletic shoes.

Footwear retail consists of the operation of retail outlets selling footwear for men and women, with 635 stores and leased departments in operation at year-end 1988-9. Total stores and leased departments in operation (as originally reported) at year end (January 31):

	1989	1988	1987	1986
Retail stores	524	545	588	951
Leased depts.	111	113	110	101
Total units	635	658	698	1,052

The stores are operated under various names: Jarman/Flagg, Hardy, Johnston & Murphy, Journeys, and Factory-to-You. Roughly one-third of merchandise sold is manufactured by Genesco.

Men's tailored clothing operations, doing business as The Greif Companies, produce men's suits, sport coats, and slacks. Branded lines include Kilgour, French & Stanbury; Lanvin of Paris; Chaps by Ralph Lauren; Perry Ellis; Phoenix; and Greif.



Important Developments

Aug. '89— Directors declared a dividend of $33.925 per subordinated serial preferred share series 1 and a dividend of $54.195 per series 2 share. Directors also authorized sinking fund payments to redeem all outstanding series 2 shares. These actions eliminated arrearages on both series of shares. Dividends had not been paid on the shares since 1975. The dividends and redemptions were payable October 31. GCO said it was now current on all dividends and redemption arrearages except for its subordinated serial perferred stock, series 3, 4 and 5.

Next earnings report expected in mid-November.

Dividend Data

Dividend and redemption arrearages totaled $20.3 million at year-end 1988-9 (see Important Developments).

Finances

In the fiscal 1988-9 Annual Report GCO said that it planned to spend $6.4 million in 1989-90 for the opening of 39 new retail stores and the renovation of over 80 existing stores, and $7 million for manufacturing equipment and other items. GCO also said it expected cash needs for 1989-90 to exceed cash flow from operations, with the difference to be made up by cash on hand and available credit.

During the fiscal 1988-9 third quarter GCO issued 5.5 million new common shares in exchange for 321,872 shares of serial preferred stock.

Capitalization

Long Term Debt: $56,964,000, incl. about $10 million of capital lease obligations.

GenRad, Inc.

NYSE Symbol GEN Options on Phila (Mar-Jun-Sep-Dec)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 9'89	1989					
5½	8¾-5½	NM	None	None	C	2.01

Summary

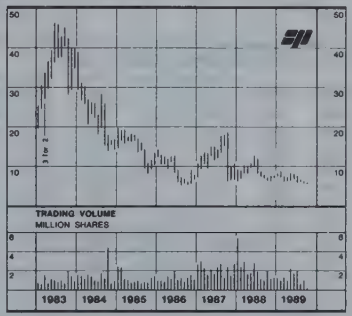
GenRad is a leading manufacturer of computer-controlled automatic test equipment sold to electronics companies. Despite higher sales, the company incurred its third deficit in the past four years in 1988 due to costs related to the relocation of certain manufacturing operations. The absence of further non-recurring charges should allow profitability to be restored in 1989 despite sluggish ordering by customers. Aided by an aggressive new product introduction program and recent cost reductions, significantly higher earnings are likely in 1990.

Current Outlook

Earnings for 1990 should reach $0.50 a share, up from the $0.20 projected for 1989.

Early resumption of dividends is not expected.

Sales for 1990 should rise approximately 10%, aided by new product introductions and a shift in the industry to a new generation of electronic products requiring more advanced test equipment. The impact from a substantial slowing of growth in the electronics industry should be limited due to conservative ordering during the recent upturn and the relatively strong finances of GEN's customers. Operating margins should widen due to the higher volume, productivity improvements and continuing cost reductions. Net interest expense is also expected to be substantially lower. Long-term prospects appear bright due to secular growth in electronics capital spending and the company's aggressive new product introduction program.



Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	49.3	49.2	48.3	49.0
Jun.	48.0	52.3	46.6	48.9
Sep.	---	50.1	48.2	45.0
Dec.	---	54.2	50.7	61.5
	---	205.9	193.8	204.3

Revenues for the six months ended July 1, 1989 declined 4.2%, year to year, reflecting weakness in the U.S. computer and defense industries. Margins narrowed on the lower volume, and pretax income declined 43%. After taxes at 17.2%, versus 15.0%, net income decreased 44%, to $0.06 a share from $0.10.

Business Summary

GenRad is a leading manufacturer of computer-controlled test and development systems for electronic equipment manufacturers, mechanical equipment manufacturers, and semiconductor manufacturers and users.

Users of GenRad's electronic manufacturing test and design equipment (mainly electronics and communications equipment industries) perform tests of their products at various stages in the design, manufacturing and service cycles to assist in development and to identify faulty components, manufacturing defects and damage from mishandling or exposure to adverse conditions.

Component-test instruments, which test the quality, reliability, conformance to standards, and performance of electronic components are another important product area.

Field service test products include a tester designed for field service depot applications, and a tester used as an on-site diagnostic tool. GenRad also offers a line of functional printed circuit board test systems specifically designed for field-service test depot applications.

The company discontinued its semiconductor test operations in 1987.

Foreign sales, which were solely to Europe, accounted for 31% of revenues and a $1.1 million in 1988. Sales to the U.S. Government represented 8% of total sales.

Dividend Data

Dividends had been paid since 1979 prior to omission in early 1986. The most recent semiannual payment was $0.05 in October, 1985. A "poison pill" stock purchase right was adopted in 1988.

Finances

The company has $21.5 million line of credit under a revolving credit agreement, $9 million for domestic borrowing and $12.5 million for international borrowing. The company also had lines of credit of $15.5 million with a number of banks. At July 1, 1989 notes payable totaled $8.3 million.

Capitalization

Long Term Debt: $56,929,000, incl. $55.8 million of debs. conv. into com. at $14.375 a sh.

Common Stock: 16,754,000 shs. ($1 par). Institutions hold approximately 58%. Shareholders of record: 4,927.

Dec. 13'89	1989					
40⅜	43½–34⅞	16	1.20	3.0%	A+	1.01

Summary

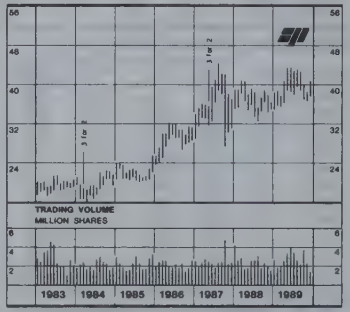
Earnings of this wholesale distributor of automotive replacement parts and other products have risen in every year since 1951 with the exception of 1960 and 1982. This record reflects the steady growth in the number of motor vehicles in use, their growing complexity, expansion of the company's distribution warehouses and jobbing stores, and acquisitions. Earnings gains in 1989 were led by strong improvement in industrial parts and office products, while automotive aftermarket demand was sluggish. The shares characteristically sell at an above-average multiple of earnings.

Current Outlook

Earnings for 1990 may rise to about $2.70 a share from the $2.55 estimated for 1989.

The $0.30 quarterly dividend is the minimum expected.

Prospects for GPC's replacement parts business are enhanced by the rising number and complexity of aging motor vehicles in the prime repair years, additional distribution centers, and the likelihood of further growth in domestic vehicle miles traveled. Contributions by the UAP-NAPA Canadian joint venture are expected to increase and recent years' strong growth in nonautomotive lines should continue.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	771	700	609	566

Dec.	E0.67	0.64	0.52	0.40
	E2.55	2.35	1.88	1.52

Important Developments

Oct. '89— Automotive parts sales rose only 4% in the first nine months of 1989, reflecting general softness in the U.S. market.

Jan. '89— GPC transferred its Western Canadian automotive distribution operations to a new partnership formed with UAP, Inc. UAP, one of Canada's largest automotive distributors, contributed its Western Canadian operations to the partnership. UAP owns slightly more than 50% of the partnership and will be the day-to-day operator of the unit, which will operate under the name UAP-NAPA. GPC owns the balance of the partnership and purchased 20% of UAP's common shares for some $25 million.

Next earnings report expected in late January.

Business Summary

Genuine Parts is an independent distributor of automotive replacement parts, operating 63 NAPA warehouse-distribution centers as of January 1, 1989 in the U.S., 550 owned jobbing stores, and six plants which rebuild small automotive parts. In January, 1989 GPC bought 20% of UAP Inc. GPC and UAP contributed their Canadian automotive operations to a partnership they formed. Contributions by industry segment in 1988 were:

	Sales	Profits
Automotive parts & supplies	66%	76%
Industrial parts & supplies	19%	12%
Office products	15%	12%

About 5,550 independent automotive parts jobbers are served, which in turn sell to garages, service stations, car and truck dealers, fleet operators, leasing companies, bus and truck lines, etc. Approximately 100,000 different replacement items are stocked.

The industrial parts and supplies segment distributes a wide variety of industrial bearings, mechanical and fluid power transmission equipment, including hydraulic and pneumatic products, material handling components, agricultural equipment, and related parts and supplies.

S. P. Richards distributes information processing supplies and office furniture, machines and supplies to office supply dealers, from 30 centers located in 21 states.

Dividend Data

Dividends have been paid since 1948. A "poison pill" stock purchase right was adopted in 1989.

51⅝	62-36⅝	7	1.60	3.1%	B+	1.26

Summary

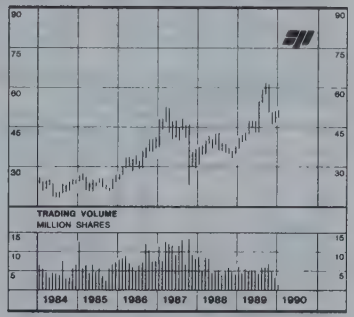
The largest domestic producer of softwood plywood, this leading forest products company also has major interests in pulp, paper, chemicals and gypsum. In October, 1989 GP commenced a $3.3 billion takeover bid for Great Northern Nekoosa. If the acquisition is successful, the merger of the two companies would create the world's largest forest products company.

Current Outlook

Earnings for 1990 (for the company as now constituted) are projected at $7.00 a share, compared with the $7.50 estimated for 1989.

The quarterly dividend was raised 14.3%, to $0.40 from $0.35, with the December, 1989 payment.

Building products sales are expected to rise somewhat in 1990 despite lower new homebuilding activity as GP continues to gain market share. The repair and remodeling market should remain strong. Pulp and paper prices should hold firm as long as the general economy continues to expand.



Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	2,447	2,115	1,855
Jun.	---	2,640	2,418	2,095
Sep.	---	2,646	2,409	2,424
Dec.	---	---	2,567	2,229
	---	---	9,509	8,603

Sales for the nine months ended September 30, 1989 rose 11%, year to year, reflecting a 27% increase in the pulp and paper segment. Building products sales were up 3.0%. Margins in pulp and paper widened dramatically, and pretax income advanced 46%. After taxes at 39.0%, versus 40.3%, net income was up 49%. Share earnings were $5.58 on 8.9% fewer shares outstanding, compared with $3.41.

	E7.00	E7.50	4.76	4.23

Important Developments

Dec. '89— GP continued to pursue its attempt to take over Great Northern Nekoosa. As of December 22, 73% of GNN's common stock had been tendered to GP under its $63-a-share cash offer. GNN management refused to withdraw its preferred stock purchase rights "poison pill" and continued to contest the merger in the courts. GP has received sufficient bank financing for the offer, and the Federal Trade Commission has not contested the merger on antitrust grounds.

Jul. '89— The company adopted a preferred stock purchase rights plan in a move designed to guard against partial tender offers and other abusive tactics.

Feb. '89— The company announced that it would rebuild a bleached paperboard machine at its Crosett, Ark. pulp and paper mill. The project will add 10,000 tons per year of capacity and will be completed in the second half of 1990.

Next earnings report expected in mid-January.

Business Summary

Georgia Pacific is the largest domestic producer of plywood, with major interests in the lumber, paper, and gypsum fields. GP operates more than 390 plants, mills and distribution centers in the U.S., plus operations in Canada and Brazil. Industry segment contributions in 1988:

	Sales	Profits
Building products	63%	41%
Pulp & paper	36%	58%
Other	1%	1%

Building products include softwood plywood and specialties (particleboard, insulation board, hardboard and panelboard), lumber, and gypsum products, which are sold through some 152 distribution centers in 47 states.

GP operates 28 primary pulp and paper plants with an aggregate capacity of about 4,366,000 tons, as well as 42 converting plants. Products include bags and sacks, tissues, paperboard and corrugated containers.

GP sold its commodity chemicals business in 1984, but retained its resin and specialty chemicals operations. The company sold its Exchange Oil and Gas subsidiary in September 1985.

As of December 31, 1988 GP owned about 5.48 million acres of timberland in North America, with cutting rights on another 1.01 million acres. GP also owns 874,000 acres in Brazil. GP obtains some 50% of its net fiber needs from its own holdings.

Dividend Data

Dividends have been paid since 1927. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1989.

45½	52¼-28⅞	19	0.96	2.1%	B+	1.11

Summary

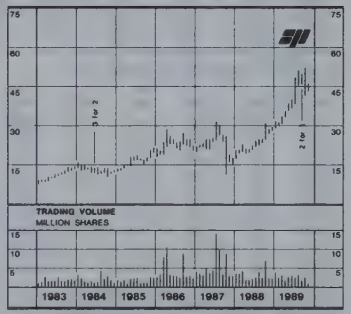
This company is the world's largest maker of baby foods. Other operations include infant and children's apparel, childcare products, and life insurance. GEB began marketing Bristol-Myers' infant formula in September, 1989. New product successes, rising unit volume and growing market share in baby foods augur well for fiscal 1989-90 earnings. Directors authorized a 5% share buyback program in mid-1989. In September the stock was split 2-for-1 and the dividend was raised 20%.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 are estimated at $2.70 a share, up from the $2.17 of fiscal 1988-9, as adjusted for the September, 1989 2-for-1 split.

Dividends were raised 20%, to $0.24 quarterly from $0.20 (both adjusted), with the September, 1989 payment.

Sales for fiscal 1989-90 should remain in a solid uptrend, reflecting growing volume from successful new products and rollouts of additional line extension. Expanding market share should enhance volume gains as well, and with higher average price increases, allow margins to expand substantially. Reorganization of apparel divisions may also boost profits, along with improved contributions from insurance operations. Entry into infant formula markets will require large initial marketing outlays, but should contribute modestly to fiscal 1989-90 profits and add significantly to future growth. Share repurchases should also enhance share earnings.



Net Sales & Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	273	248	200	195

Dec.	---	247	227	219
Mar.	---	290	259	261
	---	1,068	943	917

Sales for the six months ended September 30, 1989 rose 8.1%, year to year (1988 restated to reflect consolidation of insurance operations). With increased volume and improved contributions from the Gerber products division, pretax income was up 27%. After taxes, net income from continuing operations rose 26%, to $1.42 a share from $1.08 (both adjusted), before a loss from discontinued operations of $0.01, versus $0.06.

Important Developments

Oct. '89— GEB announced plans to divest its Gerber Children's Centers, Inc. subsidiary (revenues of $30 million in fiscal 1988-9), which operates 115 facilities in 12 states and manages two centers for other employers. GEB began marketing Enfamil, the second largest infant formula in the U.S., under the Gerber brand name as of September, 1989.

Next earnings report expected in late January.

Business Summary

Gerber Products is the largest producer of baby foods in the world, and is also engaged in a variety of other activities. Contributions to sales and operating profits by major industry segment:

Fiscal 1988-89	Sales	Profits
Gerber products division	56%	76%
Apparel group	33%	17%
Other	11%	7%

Gerber products consists primarily of baby food, including mainly Gerber strained, junior and chunky foods, First Foods fruits and vegetables, and Gerber cereals and bakery items. GEB holds about a 70% share of U.S. markets. The segment also includes portable vaporizers and humidifiers (Hankscraft), nursers, and infant care items.

Apparel consists of children's playwear, outerwear, underwear, and sleepwear sold under the Buster Brown, Weather Tamer, Bates and private labels; and infant clothing, bedding, and cloth diapers sold under the Curity label.

Other activities include the operation of day care centers, printing operations, life insurance, export sales and licensing agreements.

In 1988 GEB discontinued CWT, Inc. (trucking), Atlanta Novelty (plush toys), Cornucopia Farms, and Furniture Group operations.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

16⅞	21-15⅞	12	0.20	1.2%	A-	1.29

Summary

This company manufactures and services high technology computer-aided design and computer-aided manufacturing systems designed to automate the design and production processes in a broad range of industries. Earnings for the first quarter of fiscal 1989-90 benefited from particular strength in laser photoplotters for the electronics industry and computer-controlled flexible material cutting systems for the apparel industry, a lower tax rate and fewer shares outstanding, which outweighed the adverse effects of narrower margins.

Business Summary

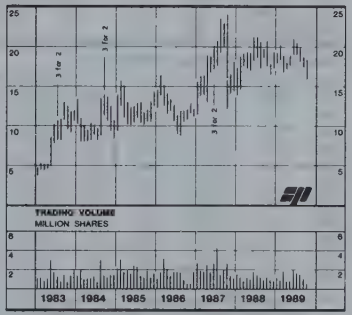
Gerber Scientific and its subsidiaries manufacture and service high technology computer-aided design and computer-aided manufacturing (CAD/CAM) systems. Contributions to sales by product line in recent fiscal years:

	1988-9	1987-8
Interactive production, drafting, and photoplotting systems	16%	16%
Cutting, nesting, & material handling systems	42%	45%
Interactive mechanical design & manufacturing systems	4%	5%
Microprocessor-controlled production systems	38%	34%

Export sales accounted for about 42% of total sales in fiscal 1988-9.

Interactive production systems are task-oriented, computer-based systems that automate the production of artwork, tooling, and documentation for printed circuit boards, and the preparation of film masks and paste-up mechanicals in the graphic arts industry, and the preparation of printing plates in the newspaper industry.

Computer-controlled cutting systems (GERBER-cutters) cut precise parts out of layers of flexible materials. Computer-aided pattern-making and nesting systems automate the sizing and arrangement of nested pieces to improve efficiency in material usage. The above systems are used by the apparel, aerospace, automotive and other industries. The GERBERmover delivers sequentially fabricated apparel parts between operators.



Interactive design and data management systems are used in the design and manufacture of aerospace, automotive and industrial machinery components, tools, dies, molds and assorted parts.

Microprocessor-controlled production systems are used to meet the graphic design needs of commercial sign shops, art and graphics departments, advertising agencies and other groups.

Important Developments

Aug. '89— The company reported that new orders received during the three months ended July 31, totaled $66.4 million, down 4.2% from $69.3 million for the comparable year-earlier period. The backlog of orders at July 31 totaled $74.6 million, versus $82.6 million a year earlier.

Next earnings report expected in late November.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	74.7	69.5	61.8	54.4
Oct.		71.6	64.4	56.3
Jan.		78.4	68.8	53.4
Apr.		79.9	68.9	59.8
		299.3	264.0	223.9

Sales for the three months ended July 31, 1989 rose 7.5%, year to year, reflecting particular strength in laser photoplotters for the electronics industry and computer-controlled flexible material cutting systems for the apparel industry, which outweighed weakness in microprocessor-controlled production systems for the signmaking and graphic arts industries and lower service revenues.
Margins narrowed on a less favorable product mix, increased R&D expenses and higher marketing costs, and the gain in pretax income was limited to 0.3%. After taxes at 34.7%, versus 35.6%, net income was up 1.7%, to $0.32 a share (on 3.6% fewer shares outstanding) from $0.30.

Summary

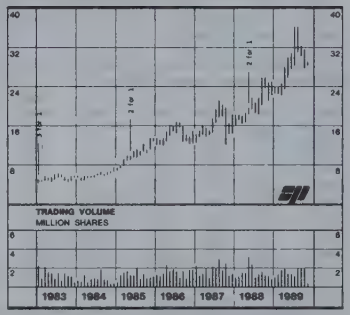
This rapidly growing regional supermarket operator is the leading chain in the highly competitive metropolitan Washington, D.C. market. Earnings should continue to benefit from aggressive promotions and merchandising as well as additional openings of larger food-drug combination stores.

Current Outlook

Earnings for the fiscal year ending in February 1990 are projected to increase to $1.90 a share from the $1.63 of 1988-9. Earnings could approximate $2.20 in 1990-1.

The quarterly dividend was raised 25%, to $0.12½ from $0.10, with the June 1989 payment.

Sales in 1989-90 should reflect increased same-store volume, aided by remodelings, new store openings and continued strong emphasis on promotions. Margins should benefit from the increased volume, the addition of new combination food-drug stores and stringent cost controls. Interest expense will remain about level.



Net Sales (Million $)

		2,987	2,721	2,528

Sales for the 24 weeks ended August 12, 1989, rose 9.2%, year to year, benefiting from increased same-store sales and volume produced by new stores. Costs and expenses were well controlled, and pretax income climbed 19%. After taxes at 38.5% in each period, net income also increased 19%, to $48.7 million ($0.81 a share), from $40.8 million ($0.68).

Important Developments

Oct. '89— Giant said its long-term goal is to maintain net return on sales of over 3%. The company noted that last month it had signed a three-year union contract providing for an initial wage increase of $1 an hour, and said it plans to examine all areas of selling, general and administrative expense for possible savings so as to minimize price increases passed on to the consumer. Giant added that it currently has locations for 19 new supermarkets, including 18 food-drug stores; 14 of the stores should be open within the next 36 months.

Jun. '89— The company said its manufacturing, processing, wholesaling and distribution operations had benefited substantially from increased volume at retail stores; about 1% of net income was derived from these activities in 1988-9.

Next earnings report expected in late November.

Business Summary

At February 25, 1989, Giant Food operated a chain of 145 supermarkets (one of which is a gourmet store), including 100 in the Washington, D. C., metropolitan area and 37 in or near Baltimore. The company also operates one freestanding drug-store.

The majority of the company's stores are located in shopping centers, with the average food and food/pharmacy combination unit generating an annual sales volume of about $20.7 million. Of the retail stores, 92 have pharmacy units, 133 have full service delicatessens and a number have flower departments. In 1988-9, 25% of sales were accounted for by meat, deli and dairy, 66% came from groceries and non-food items, and 9% from fresh produce.

Giant owns and operates three distribution facilities, with about 1,100,000 square feet, in Landover, Maryland, and also operates a dry grocery warehouse, a frozen foods distribution center and an ice cream manufacturing facility. The company produces for sale in its stores bakery products and dairy products, ice cream, soft drinks and ice cubes. Giant also provides services such as check cashing, issuance of money orders (through a joint venture), automatic teller machines, photographic film development, rental of home care appliances and catering.

Through its GFS Realty Inc. subsidiary, Giant owns 10 shopping centers and two freestanding stores.

Dec. 6'89	1989					
48 3/8	49 3/4-33	18	0.96	2.0%	A	1.17

Summary

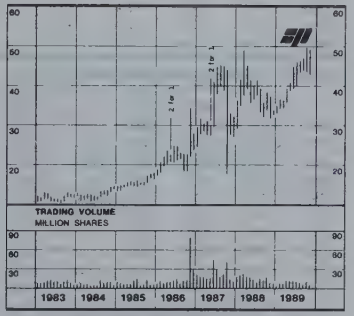
Gillette is the leading factor in the razor and blades field and has important participations in hair care, toiletries, writing instruments, and small appliances. A substantial portion of sales and earnings is derived from foreign operations. In July, 1989 the company sold $600 million of convertible preferred stock to Berkshire Hathaway Inc. GS introduced a new shaving system under the Sensor brand name in October.

Current Outlook

Earnings for 1990 are expected to reach $3.25 a share, up from the $2.70 estimated for 1988.

An increase in the $0.24 quarterly dividend is likely in early 1990.

Sales for 1990 should post a healthy gain, aided by initial sales of the company's new Sensor shaving system, as well as growth in most established hair care, Braun, stationery and dental product lines. Profits should benefit from the better volume and cost efficiencies.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	941	903	762	655
Jun.	904	865	762	679
Sep.	922	846	777	694
Dec.	---	968	866	791
	---	3,581	3,167	2,818

Sales for the nine months ended September 30, 1989 rose 5.9%, year to year. However, profitability was hurt by increased net interest expense and higher foreign exchange losses. Net income declined fractionally (0.8%). Following preferred dividends in the 1989 period, share profits rose to $2.02 based on 15% fewer average shares outstanding, from $1.82.

Dec.	E0.68	0.63	0.51	d0.97
	E2.70	2.45	2.00	0.13

Important Developments

Oct. '89— The company introduced a new permanent, cartridge-type razor product under the Sensor name. GS said that the new shaving system, which features twin spring-mounted blades that move independently, provides a closer, safer and more comfortable shave than any other product now on the market. The launch will be supported by a $175 million sales and marketing campaign.

Jul. '89— Gillette sold 600,000 shares of a new 8 3/4% Series B convertible preferred stock at $1,000 per share to Berkshire Hathaway Inc. The preferred is convertible into an 11% interest in GS. Proceeds were used to reduce debt. Berkshire's chairman, Warren E. Buffett, was added to Gillette's board of directors.

Next earnings report expected in late February.

Business Summary

Contributions for Gillette by business segment in 1988 were as follows:

	Sales	Profits
Blades and razors	32%	61%
Toiletries & cosmetics	28%	14%
Braun products	23%	13%
Stationery products	11%	9%
Oral-B dental items	6%	3%

Foreign operations (including Canada) accounted for about 65% of sales and 64% of profits in 1988.

Items in the blade and razor area include the Trac II, Atra and Sensor twin bladed razor and cartridge systems; Super Stainless Steel and Platinum Plus double edged blades; and the Daisy, Good News and Micro Trac disposable razors.

Toiletries and cosmetics include deodorants such as Right Guard, Dry Idea and Soft & Dri; shampoos, sprays and other hair care products sold under the White Rain, Silkience, Toni and other names; and various skin care and shaving cream products.

Braun AG is the leading producer of electric shavers in Germany and also makes a number of household and personal care appliances.

Stationery products include Paper Mate, Flair, Eraser Mate and Waterman writing instruments and Liquid Paper and other correction fluids. Oral-B dental products include toothbrushes, toothpastes, rinses and related items.

Dividend Data

Dividends have been paid since 1906. A "poison pill" stock purchase right was adopted in 1986. A dividend reinvestment plan is available.

Nov. 28'89	1989					
23½	25½-18½	16	[1]0.64	[1]2.7%	NR	1.21

Summary

This British holding company is the world's second largest producer of ethical pharmaceuticals, with about half of its sales derived from Zantac, an antiulcer drug. Sales and earnings have increased steadily in recent years, aided by strong growth in Zantac and other new drug products, and expansion in the North American market. Sales and earnings are often importantly affected by foreign exchange currency fluctuations.

Current Outlook

Earnings for the fiscal year to end June 30, 1990 are projected at about $1.60 per ADS, up from the $1.43 of fiscal 1989, assuming a constant dollar-to-£ sterling exchange rate.

A final dividend from fiscal 1989 earnings of $0.447 per ADS (after 15% British tax to U.S. residents) was paid November 20, 1989. An interim dividend of $0.189 per ADS was paid in May, 1989.

Sales for fiscal 1990 should post another healthy increase, aided by double-digit growth in Zantac, as well as higher sales of respiratory and anti-infective pharmaceuticals. Despite another large increase in R & D costs, profits should benefit from the better volume, cost efficiencies and a lower tax rate.

Sales (in British pounds) for the fiscal year ended June 30, 1989 advanced 25%, year to year, reflecting strong growth in sales of Zantac, respiratory drugs and systemic antibiotics. Income before taxes rose 21%. After taxes at 31.4% against 30.8%, and minority interests, net income was up 20%. Earnings per ADS were $1.43, versus $1.32 (based on year-end exchange rates).

Important Developments

Oct '89— Glaxo projected R & D expenditures for fiscal 1990 at about £440 million, up from £323 million in fiscal 1989. The company said that it had nine new compounds in 11 full development programs, as well as a substantial number of additional compounds in exploratory development. In April, 1989 GLX made product license applications for ondansetron (GR 38032), a treatment for emesis induced by cancer chemotherapy and radiotherapy. During calendar 1989 and 1990 Glaxo plans to file product license applications for fluticasone propionate (CCI 18781), an anti-inflammatory steroid; lacidipine (GR 43659), a calcium channel blocker antihypertensive agent; sumatriptan (GR 43175) for migraine; and salmeterol hydroxynaphthoate, a bronchodilator.

Next earnings report expected in mid-March.

Business Summary

Glaxo Holdings is a British holding company which, through some 70 subsidiaries and associated companies worldwide, produces a broad range of ethical pharmaceuticals. Sales by product category in recent fiscal years:

	1989	1988
Anti-ulcerants	50%	48%
Respiratory products	23%	22%
Systemic antibiotics	15%	15%
Dermatologicals	4%	5%
Cardiovascular products	2%	2%
Other	6%	8%

Sales by geographic markets in fiscal 1989 were divided as follows: North America 45% (40% in fiscal 1988); Europe (excluding the U.K.) 30% (32%); U.K. 12% (13%); Southeast Asia and the Far East 6% (6%); Africa and the Middle East 2% (4%); Australasia 3% (3%); and Central and South America 2% (2%).

Principal products include Zantac (ranitidine), an anti-peptic ulcerant which accounts for roughly 43% of the worldwide anti-peptic ulcerant market; respiratory products such as Ventolin, a bronchodilator for the treatment of asthma, and Becotide/Beclovent, an inhaled anti-inflammatory to treat asthma; systemic antibiotics, which include Fortum/Fortaz injectable cephalosporins and an oral cephalosporin, cefuroxime axetil, sold under the Ceftin, Oracef and Zinnat names. Other products include cardiovascular and dermatological drugs, commodity antibiotics, and fine chemicals.

Dividend Data

Dividends have been paid on the ordinary shares since 1948. From each fiscal year's earnings an interim dividend is paid in May and a larger final dividend in November after the end of the fiscal year. Payments on the ADS in the past 12 months:

Summary

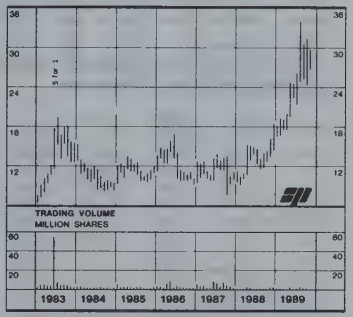
This gaming company, which operates a casino/hotel in downtown Las Vegas and a casino in Laughlin, Nev., is about to open a major, new casino/hotel on the Las Vegas Strip. This new facility, called the Mirage, is expected to produce the bulk of GNG's revenues and operating profit in 1990. Since October 1987, GNG has spent approximately $267 million to repurchase about 19.8 million common shares.

Current Outlook

Earnings for 1990 are estimated at $0.25 a share, versus a loss of roughly $1.20 expected for 1989.

Dividends are unlikely over the near term.

GNG's new Mirage casino/hotel is expected to boost operating profit substantially in 1990. However, projected interest expense of more than $100 million and competitive conditions in the Las Vegas casino market are expected to limit net income to not much more than breakeven levels. Several other major casino/hotel operators have recently expanded, and Circus Circus Enterprises is expected to open a large new Las Vegas facility in 1990.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	49.9	42.6	78.8	87.2
Jun.	65.3	40.3	38.4	98.6

Important Developments

Nov. '89— The Mirage, GNG's large new casino/hotel on the Las Vegas Strip, was expected to open in late November. Including related expenses, the facility was expected to cost about $625 million. It was expected to have about 3,056 hotel rooms and suites, and about 95,500 square feet of casino space, which would make it one of the largest casino/hotels in the U.S. Also, in October, GNG's directors authorized the repurchase of up to 3.0 million common shares. Repurchase of about 0.3 million additional shares was still possible under a previous authorization. Since October 1987, GNG has purchased about 20 million of its common shares. At June 30, 1989 GNG had long-term debt of about $902 million, and cash equivalents and marketable securities totaling about $239 million.

Next earnings report expected in March.

Business Summary

Golden Nugget owns and operates a casino/hotel in downtown Las Vegas, a casino in Laughlin, Nev., and is constructing a major new facility on the Las Vegas Strip. In March 1987, GNG sold its Atlantic City casino/hotel and related assets to Bally Manufacturing for about $141 million, plus assumption of debt. GNG continued to own about 14½ acres of property in the marina area of Atlantic City.

GNG's downtown Las Vegas facility has about 1,907 hotel rooms and about 38,000 square feet of casino space. As of March 1, 1989, it included 60 table games, about 1,100 slot machines and other coin-operated devices, a keno lounge, and a race and sports book.

In October 1988, GNG acquired the Nevada Club casino (now named Golden Nugget-Laughlin) in Laughlin, Nev., and a nearby motel for about $40 million. An expansion of the GNG facility in Laughlin is expected.

Also, GNG is building a large, new casino/hotel, called The Mirage, on the Las Vegas Strip. Expected to open in late 1989, it would be the first major, new casino/hotel to open on the Strip since late 1973. The Mirage is expected to have about 3,056 hotel rooms and approximately 95,500 sq. ft. of casino space. In addition, GNG is developing a world-class golf course, about five miles north of the downtown Las Vegas area.

Dividend Data

The only cash dividend since 1972 was $0.016 (adjusted) in July 1978.

Finances

Between October 1987 and February 1989, GNG repurchased about 19.8 million of its common shares at an aggregate cost of about $266.7 million.

Between March and September 1988, GNG completed private placement and public debt offerings which produced total net proceeds of about $510 million, which were largely expected to be used for expenses related to its new casino/hotel on the Las Vegas Strip. Also, in April, 1989 GNG completed a notes sale, and the net proceeds of about $145 million may be used for general corporate purposes.

Capitalization

Summary

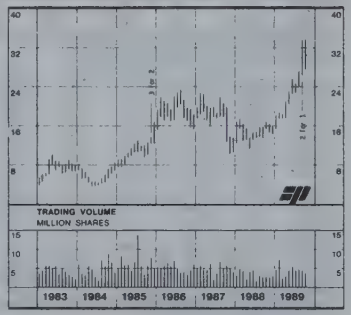
This holding company owns World Savings and Loan Association, one of the nation's 10 largest savings and loans, with over 190 offices in California, Colorado, Kansas and Texas. The company has restructured its balance sheet over the past several years to make itself substantially less vulnerable to fluctuations in interest rates. An extremely low expense ratio coupled with excellent credit quality has enabled GDW to consistently post higher returns than its peers. The shares were recently split 2-for-1.

Current Outlook

Earnings for 1990 are estimated at $3.40 a share, up from the $2.65 expected for 1989.

In July, 1989, in conjunction with a 2-for-1 stock split, directors boosted the quarterly dividend to $0.04 from $0.03½ (adjusted).

Mortgage lending volume is expected to be flat in 1990, assuming a continuation of an active California housing market, which affords the company a chance to add earning assets in concert with management's intent on maintaining conservative capital ratios. Based on a projected decline in interest rates, funding costs should fall faster than loan yields, resulting in wider spreads. Credit quality is excellent and is expected to remain so. Noninterest income should increase slightly. Noninterest expense, quite low compared with other major thrifts, will continue to increase. Golden West consistently posts the highest ROA and ROE of any large healthy public thrift.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 12%, year to year, reflecting growth in the level of earning assets. The provision for possible loan losses was raised to $4.7 million from a very low $1.1 million. Noninterest income increased 25%, mainly due to higher other income, and noninterest expenses increased 12%. Pretax income rose 14%. After taxes at 35.4%, versus 36.0%, net income was up 15%, to $1.86 a share from $1.62 (adjusted).

Dec	E0.79	0.58	0.46	0.73
	E2.65	2.21	2.42	2.95

Important Developments

Oct. '89— In its third quarter earnings release, Golden West attributed its higher profits, in part, to the significant volume of loans added to its portfolio in the past 12 months, leading to a substantially larger earning asset base. More recently,, however, GDW said that the slowdown in home sales in the past few months had caused mortgage demand to slacken compared with the prior year's exceptional pace. Despite this slowdown, third quarter loan originations topped $1 billion, a substantial volume.

Jun. '89— Golden West announced that it had filed a shelf registration statement covering up to 2,000,000 preferred shares to be offered on a delayed or continuous basis.

Next earnings report expected in early February.

Business Summary

Golden West Financial is the holding company for World Savings and Loan Association, one of the ten largest S&Ls based on assets at December 31, 1988, with 193 offices located in California (114), Colorado (63), Kansas (10) and Texas (6). GDW also originates mortgages in Arizona, Connecticut, Florida and eight other states.

Of total loans receivable outstanding at December 31, 1988 of $14.3 billion, 68% were rate sensitive loans, 17% fixed-rate loans, and 15% mortgage backed securities. The amount of liabilities that would reprice before assets (the "gap") within one year was 4.2% of assets, down from 10.5% a year before. During 1988 GDW made $4.7 billion of new loans with an average interest rate of 9.98%, compared with $2.7 billion (9.61%) in 1987. The yield on the loan portfolio at December 31, 1988 was 10.18% (10.21% in 1987), and the yield on investments 8.82% (7.86%).

Of the $10.5 billion of total deposits at December 31, 1988, checking, passbook and money market accounts represented 16%, time deposits maturing within one year 47%, and deposits maturing over one year, jumbo CD's and other 37%. At 1988 year-end the average cost of deposits was 7.49% (7.22% a year earlier), and the cost of borrowing was 8.56% (7.71%).

The yield on earning assets at 1988 year-end was 10.06% (versus 10.04% a year earlier), the cost of funds was 7.84% (7.36%), and the spread was 2.22% (2.68%). Non-performing assets amounted to 0.48% of total loans at year-end 1988, down from 0.75% a year earlier.

Dividend Data

Dividends, which had been paid since 1977 prior to omission in 1982, were resumed in 1983.

42¾	69-42	6	2.00	4.7%	B	1.67

Summary

This company is the largest North American producer of PVC resins and compounds, and also produces specialty chemicals and aerospace products. In 1988 GR completed a restructuring in which it divested its automobile and aircraft tire businesses and industrial products business. GR intends to focus on its chemicals (about 85% of sales) and aerospace businesses. Earnings in recent periods have been penalized a softer PVC business, and unfavorable conditions are expected to continue in 1990.

Current Outlook

Share earnings for 1990 are projected at about $6.00, down from the $6.60 expected for 1989.

Dividends at $0.50 quarterly are the minimum expected.

Earnings for 1990 are expected to decline with the cyclical downturn in the PVC industry due to lower demand growth and reduced selling prices caused by increased industry capacity and resulting lower operating rates. Specialty chemicals and aerospace should post continued gains with strong demand and acquisitions, despite heavy project development costs. The tax rate will increase sharply due to the absence of tax credits.

Net Sales (Million $)

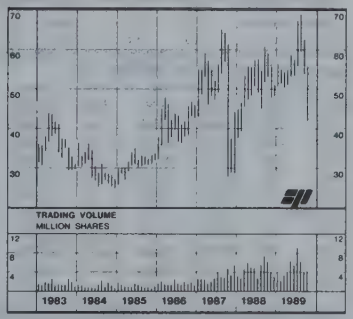
	E6.60	7.99	3.17	0.46



Important Developments

Oct. '89— GR said that it was experiencing reduced profits margins for PVC as a result of increased industry capacity. Selling prices for PVC resins dropped over 15% since December, 1988. GR said that while overall demand for PVC was still good, it may be some time before the supply-demand balance allows higher industry operating rates. The aerospace business continued to grow at a rapid rate in the third quarter, but specialty chemicals profits were slowed by manufacturing problems and raw material shortages.

Feb. '89— In 1988 GR sold its 50% interest in the Uniroyal Goodrich Tire Co. for $225 million. GR received $251 million when the joint venture was formed in 1986. GR also sold its aircraft tire operations to Michelin, its rubber products unit, and most of its industrial products segment.

Next earnings report expected in mid-February.

Business Summary

The company is a diversified producer of PVC resins and compounds, specialty chemicals, and aerospace products. Contributions by segment in 1988:

	Sales	Profits
PVC & intermediates	54%	67%
Specialty chemicals	32%	21%
Aerospace products	14%	12%

Foreign operations accounted for 28% of sales and 23% of operating income in 1988.

GR is the largest North American producer of polyvinyl chloride (PVC) resins and compounds and also producers feedstock and intermediate precursors (vinyl chloride monomer, chlorine, and ethylene).

Specialty chemicals include polymers and chemicals (polyurethanes, hydrophiles, specialty plastics, polymers, additives, and latex products), and the Tremco division (adhesives, sealants, coatings, membranes, roofing materials, and rustproofing products for the construction and industrial markets).

Aerospace products include aircraft wheels and brakes, evacuation and deicing systems, instruments and avionics equipment, sonar domes, industrial fasteners, composites, off highway braking systems, specialty molded products, and provides aircraft maintenance, repair, and overhaul services.

Dividend Data

Dividends have been paid since 1939. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Goodyear Tire & Rubber

NYSE Symbol GT Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 8'89	1989					
47 1/2	59 3/4-42 1/4	11	1.80	3.8%	B+	1.13

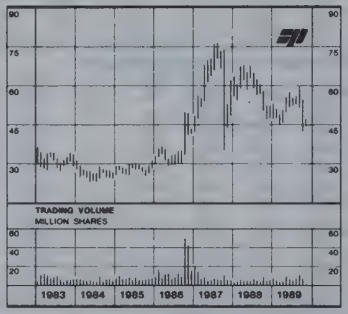
Summary

Goodyear is the largest supplier of tires to the U.S. original equipment and replacement markets. Earnings in the first nine months of 1989 were restricted by increased costs for raw materials and employee benefits, higher taxes on foreign earnings, and soft tire demand. Nonrecurring charges for the sale of South African operations and pipeline assets also impacted net income. Management has effected price increases and cost reductions are being implemented which should lead to an earnings recovery in 1990.

Current Outlook

Earnings for 1990 may rebound to about $5.50 a share from the reduced $4.50 estimated for 1989. The quarterly dividend should continue at $0.45.

Sales for 1990 should advance, as GT benefits from increased original equipment business and a recovery in demand for radial and high performance tires. Profits should be helped by tire price increases, improved raw materials prices and further cost reductions, but margins may remain under pressure from higher employee benefit expenses and lower foreign earnings. Nonrecurring charges of $1.65 a share for the South African operations and the All-American Pipeline will be absent.



Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.64	2.53	2.27	2.06
Jun.	2.81	2.79	2.53	2.36
Sep.	2.68	2.66	2.48	2.32
Dec.	---	2.83	2.62	2.37
	---	10.81	9.91	9.10

Sales for the nine months ended September 30, 1989 rose 1.9%, year to year. Hurt by nonrecurring charges of $91.3 million ($95 million or $1.65 a share after taxes) related to the sale of the South African operations and certain pipeline assets, pretax income declined 12%. After taxes at 54.9%, against 39.5%, net income was down 35%, to $3.33 a share from $5.13.

Dec.	E1.17	0.98	2.09	d1.04
	E4.50	6.11	8.49	0.94

Important Developments

Oct. '89— GT said that third quarter 1989 earnings reflected improved performance in the U.S. tire replacement market, changes in pricing and product mix and improved raw materials costs. Worldwide tire unit sales were down 1.4% in the third quarter from the year-earlier period, on a 1.9% decline in U.S. tire sales and a 1% drop in foreign tire sales.

Jul. '89— In the second quarter of 1989 GT recognized a $43 million ($0.75 a share) after-tax charge for the sale of 435 miles of 30-inch pipe that had been earmarked for use on the eastern leg of the All-American Pipeline for $70 million, and a $52 million ($0.90 a share) after-tax charge for the sale of its South African tire and general products manufacturing facilities.

Next earnings report expected in mid-February.

Business Summary

Goodyear is the world's largest rubber fabricator. Contributions to sales and operating profit by industry segment in 1988:

	Sales	Profits
Tires & related products	86%	76%
Industrial rubber/chemical/plastic products	13%	21%
Other products & services	1%	3%

Foreign operations accounted for 41% of sales and 56% of operating income in 1988.

Transportation-related products include new tires and inner tubes, retreads, repair materials, automotive belts and hose, molded parts and foam cushioning, auto repairs and services, and other accessories. Sales of new tires alone contributed 73% of total sales in 1988. Replacement volume is significantly higher than sales to the original equipment market.

Celeron is engaged in testing a new 1,750-mile, 30-inch crude oil pipeline from offshore California wells to Texas refineries. Celeron is the last remaining business to be sold under the company's restructuring program.

Other lines include industrial belts, hosing, tank and pipe lining, noise abatement materials, air springs, rubber railroad crossings, tank tracks, molded and extruded products, organic chemicals, polyester resins, packaging films, shoe products, graphic products, and elastomer membrane roofing materials and systems.

Dividend Data

Dividends have been paid since 1937. A dividend reinvestment plan is available.

Grace (W.R.)

NYSE Symbol GRA Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 1'89	1989					
30¼	39⅛–25⅛	11	1.40	4.6%	B	1.30

Summary

GRA is a leading producer of specialty chemicals; distributes books, videocassettes and software; and makes specialty textiles and cocoa products. It also has interests in oil and gas exploration and production, energy services and coal. Over the past three years GRA completed a restructuring program that included the sale of its restaurant, retail and fertilizer businesses. In September, 1989 GRA completed a public offering of its energy business. A modest gain in operating earnings is expected for 1990.

Current Outlook

Share earnings for 1990 are projected at about $2.60, versus 1989's estimated $2.90, which includes a large onetime gain.

Dividends should continue at $0.35 quarterly.

Operating earnings for 1990 should rise with gains in the specialty chemicals business from strong worldwide demand for many products lines, including packaging, organics, graphic arts, water treatment, and silica products, and as well as lower plastic costs. However, the stronger U.S. dollar and weak catalyst and automotive markets will restrict the increase. The specialty businesses unit and National Medical Care should also perform well. Interest expense is expected to be lower.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,397	1,297	963	843
Jun.	1,511	1,447	1,147	921

Dec.	---	1,652	1,305	1,058
	---	5,786	4,515	3,726

Sales for the first nine months of 1989 rose 6.3%, year to year. With higher earnings in most segments and a $0.73 a share nonrecurring gain, net income advanced 27%, to $2.03 a share from $1.61. Results exclude a loss from discontinued operations of $0.02, versus income of $0.12, and a special credit of $0.06 in 1988.

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.36	0.33	0.14	0.08

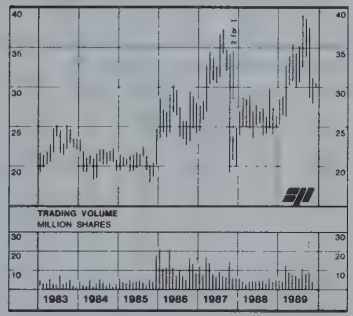
Dec.	E0.87	0.65	0.63	d4.79
	E2.90	2.26	1.67	d4.47



Important Developments

Oct. '89— Third quarter earnings included a $114 million pretax gain from the restructuring of the energy business, including the sale of the equipment rental company for $305 million, and the public offering of a 16.6% interest in Grace Energy Corp. Gross proceeds were about $400 million and would be used to reduced debt and finance capital expenditures. The sale of a minority interest in Specialty Businesses is also possible. Excluding these unusual items, earnings for the third quarter were unchanged, year to year. Chemical profits were up slightly, but excluding a 1988 insurance adjustment, profits rose 7.0%. However, the strong U.S. dollar and continued weakness in cracking catalysts and the automotive industry limited profit gains. GRA projected R&D spending for 1990 at $144 million, versus some $130 million in 1989.

Next earnings report expected in late January.

Business Summary

This company is a diversified producer of chemicals, natural resources and selected consumer services. Contributions by segments in 1988:

	Sales	Profits
Specialty chemicals	54%	65%
Specialty businesses	28%	13%
Natural resources	8%	6%
Health care	10%	16%

Foreign operations accounted for 37% of sales and 47% of profits in 1988.

Specialty chemicals include plastic packaging products, catalysts, molecular sieves, membranes, battery separators, construction materials, graphic arts materials, water treatment and process chemicals, electronics adhesives, coatings and encapsulants, and chemical intermediates.

Specialty businesses include book, videocassette and computer software distribution, cocoa products, specialty textiles, cattle breeding and animal feed products.

Grace Energy Corp. (83% owned) includes 182 onshore drilling rigs and drilling services and equipment and produces natural gas, oil and coal.

Proved reserves were 6.4 million bbls. of oil and 179,126 MMcf of natural gas at 1988 year-end.

National Medical Care, Inc. (97.5%-owned) provides kidney dialysis services and infusion therapy products.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Grainger (W.W.)

NYSE Symbol GWW In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 5'89	1989					
59⅞	66¼-52½	14	1.04	1.7%	A	1.07

Summary

Grainger is a leading distributor of electric motors and related products through a nationwide network of over 300 branches. An extensive catalog is GWW's main selling tool. An aggressive branch expansion program that included the opening of 55 branches in 1988 is being slowed somewhat due to delays in training personnel. Significant earnings growth is likely for the fourth consecutive year in 1989, despite costs related to the opening of a third distribution center. Further growth is projected for 1990.

Current Outlook

Earnings for 1990 are expected to approximate $5.10 a share, up from the $4.40 projected for 1989.

A modest increase in the $0.26 quarterly dividend is likely in 1990.

Revenues are anticipated to increase approximately 10% in 1990, primarily reflecting expansion of the distribution network and the addition of new products. An estimated 20 branches are planned to be opened, down from the 25 expected to be opened in 1989. A projected slowing in economic growth is likely to be somewhat restraining. Margins should widen on the higher volume, the absence of 1989 costs related to the opening of the company's third distribution facility, and the increased profitability of branches opened over the past several years which initially were not fully utilized. The tax rate should be essentially unchanged. Long-term prospects appear favorable.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	393	347	287	261
Jun.	447	396	345	299
Sep.	---	408	351	305
Dec.	---	385	338	295
	---	1,535	1,321	1,160

Sales for the six months ended June 30, 1989 increased 13%, year to year. Despite a higher gross profit margin, operating margins narrowed, limiting the gain in operating income to 4.9%. However, following a 851% increase in other income due to a nonrecurring gain, pretax income advanced 8.7%. After taxes at 39.2%, versus 39.3%, net income rose 8.9%, to $2.13 a share from $1.91.

Dec.	E1.07	0.94	0.85	0.73
	E4.40	3.92	3.14	2.57

Important Developments

Oct. '89— GWW said that it had decided to reduce the number of new branches it planned to open in 1989 to approximately 25 from the 35-40 expected earlier in the year. The reduction reflects difficulties the company has had in training personnel to operate new branches. At the end of the third quarter GWW had 302 branches.

Next earnings report expected in mid-October.

Business Summary

W.W. Grainger is a leading distributor of electrical, mechanical, and other products to the industrial and commercial markets.

The company is a nationwide distributor of electric motors and motor controls, gearmotors, fans, blowers, liquid pumps, air compressors, air tools and paint spraying equipment, hydraulic equipment, power transmission components, heating equipment and controls, air conditioning and refrigeration equipment and components, tools, office equipment, computer supplies and lawn and garden equipment, as well as other items shown in its Wholesale Price Catalog (often referred to as the MotorBook) that lists more than 20,600 items. Approximately 52% of 1988 sales consisted of items bearing the company's registered trademarks.

Products are distributed through a network of branches (286 at December 31, 1988). Sales in 1988 were made by more than 803 full-time sales representatives to some 921,000 customers, principally consisting of distributors, dealers, contractors, service shops, industrial and commercial maintenance departments, and original equipment manufacturers. During 1988 approximately 12,400,000 transactions averaging $124 each were completed.

Dividend Data

Dividends have been paid since 1965. A "poison pill" stock purchase right was adopted in 1989.

Summary

This major grocery chain has grown rapidly in recent years through acquisitions of regional food chains and an aggressive store renewal program. Margins have improved dramatically, reflecting labor concessions, larger stores, and increased sales of specialty products. In January, 1989 the company completed the acquisition of Borman's, Inc., a Detroit-based supermarket chain, for about $76 million. The Tengelmann Group of West Germany owns about 52% of GAP shares.

Current Outlook

Earnings for the fiscal year ending February 28, 1990 are projected at $3.95 a share, up from the $3.34 of fiscal 1988-9. Earnings could rise to $4.35 in fiscal 1990-1.

The dividend was raised 17%, to $0.17½ quarterly from $0.15, with the August, 1989 payment.

Revenues gains in fiscal 1989-90 should mainly reflect the Borman's acquisition. Margins should benefit from improved sales volume in Canada and metropolitan New York regions, as well as overall increased sales of higher-margined products. Interest expense will increase. The longer-term outlook is enhanced by GAP's aggressive capital plan and possible further acquisitions.

Important Developments

Sep. '89— GAP said that overall results for the first half of fiscal 1989-90 were essentially on target. The consolidation of Farmer Jack operations (acquired in the Borman's acquisition) was proceeding according to plan. Separately, in an attempt to purchase Gateway Corp. PLC, the U.K.'s largest food retailer, GAP and Wasserstein Perella & Co. formed Newgateway PLC. In August, Newgateway announced a definitive agreement with Isosceles PLC under which Newgateway and Isosceles will combine their ownership interest in Gateway and act together in developing its business. GAP said the agreement would allow it to acquire a substantial equity investment in a major British retailer for a total of $125 million. The cost of financing the investment will be $0.05 per share per quarter.

Next earnings report expected in early January.

Business Summary

Great Atlantic & Pacific sells food and general merchandise through 1,241 stores in 25 states, the District of Columbia and Canada (193) as of February 25, 1989. Operations included 1,048 retail stores in the U.S. under the names A&P, Super Fresh, Family Mart, Kohl's, Waldbaum's, Shopwell, Food Emporium, Food Mart, Sav-A-Center, Sun, Futurestores, Farmer Jack, Dominion and Compass.

GAP has expanded and geographically diversified through the acquisition of other supermarket chains, while closing over 2,000 underperforming stores since 1974-5. The company has also developed new store prototypes. In January, 1989 GAP acquired all the outstanding shares of Borman's, Inc. ($1 billion in 1987-8 revenues) for about $78 million in cash. Borman's operated 81 Farmer Jack retail supermarkets in the Detroit area. In fiscal 1986-7 GAP acquired the 53-store Shopwell chain ($464 million in 1985 sales) and the 140-unit Waldbaum chain ($1.8 billion).

Retail square footage totaled 36,407,000 as of fiscal 1988-9 year-end. The average store size was 29,000 sq. ft., but stores built more recently are larger. About 6% of the stores are owned, the remainder leased.

GAP operates three coffee roasting plants, three bakeries and two delicatessen food kitchens. In addition, it maintains warehouses which service its retail stores. The company also sells its coffee and ice cream products to other retailers. Since 1974, the company has closed more than 2,000 underperforming stores in an effort to restore its operations to profitability.

Dividend Data

Omitted since 1978, quarterly dividends were resumed in early 1986.

Nov. 1'89	1989					
61½	63⅜-35⅝	10	2---	2---	B+	1.47

Summary

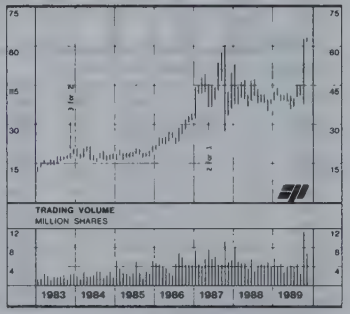
On October 31, 1989 Georgia-Pacific Corp. launched a tender offer for all of the outstanding common stock of Great Northern Nekoosa at $58 a share in cash. The offer, which was scheduled to expire November 29 (unless extended), was subject to the tender of at least 75% of the outstanding shares of GNN, the receipt of sufficient financing, and certain other conditions. Commenting on the proposed merger, GNN said that its directors would review the offer in due course.

Current Outlook

Earnings for 1990 (for the company as now constituted) are projected at $5.80 a share, down from the $6.35 estimated for 1989.

The quarterly dividend was raised 18%, to $0.33 from $0.28, with the June, 1989 payment.

Sales for 1990 should show modest growth, assuming no major slowdown in the general economy. Some weakening in market pulp prices could occur later in the year as new industry capacity comes on stream. Profits may decline slightly, year to year, but should remain at very high historical levels.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	986	844	567

Cash Tender Offer

Oct. 31'89— Georgia-Pacific Corp. launched a $3.3 billion unsolicited tender offer for all of the outstanding common shares of GNN at $58 a share in cash. The offer, scheduled to expire November 29, 1989 (unless extended), was subject to various conditions, including the tender of at least 75% of GNN's approximately 54,941,000 outstanding common shares, the receipt of sufficient financing, the redemption or nullification of GNN's preferred stock purchase rights, the resolution of any possible antitrust problems that may arise from the merger of these two large forest products companies, and the waiver of certain restrictions on business combinations in the state of Maine. GNN said that its board of directors would consider the offer in due course.

Next earnings report expected in mid-January.

Business Summary

GNN is a leader in the production of newsprint, business papers, and containerboard. Contributions by business segment in 1988 were:

	Sales	Profits
Paper & market pulp	38%	47%
Containerboard & packaging	31%	44%
Distribution & envelope	28%	7%
Other	4%	2%

In 1988 GNN produced 1,604,000 tons of paper, 537,000 tons of market pulp, and 2,132,000 tons of containerboard. Business papers include business communications papers, stationery and office equipment papers; GNN is a leading producer of office copier paper. Coated and uncoated groundwood papers are used for paperback books, mail order catalogs, periodicals and directories. Newsprint is sold primarily in the New England and Middle Atlantic states. Containerboard is sold principally to independent corrugated box makers in the U.S. and abroad.

Paper merchant activities are carried out through Butler Paper, which operates distribution centers in 84 locations. Mail-Well Envelope is one of the largest domestic makers of envelopes. Other operations include the producton of lumber and plywood, and two small railroads.

GNN owns about 3,447,000 acres of timberland (in Maine and Wisconsin) and leases additional acreage. Coal deposits are owned in Alabama.

Dividend Data

Dividends have been paid since 1910. A dividend reinvestment plan is available. A new "poison pill" stock purchase right was adopted in 1988.

Summary

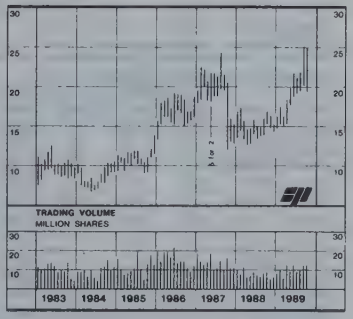
This holding company owns Great Western Bank, the nation's third largest thrift based on assets of $36 billion at September 30, 1989. Most of GWF's retail banking and real estate lending operations are conducted through about 212 offices in California and 49 offices in Florida. The company also engages in consumer finance, discount brokerage, and mortgage banking activities. With good loan growth and wider spreads projected, GWF's earnings for 1990 are expected to increase over 25% to a new record.

Current Outlook

Earnings for 1990 are estimated at $2.50 a share, up from the $1.95 anticipated for 1989.

Directors could raise the $0.20 quarterly dividend in 1990.

Total lending volume is expected to increase moderately in 1990, primarily reflecting a still active housing market in California and GWF's efforts to increase market share, especially outside California. Spreads could widen on the basis of projected lower interest rates at least through mid-year. Credit quality on loans in California is excellent and should remain so, although loan loss provisions may increase due to the company's involvement with riskier construction lending as well as further declines in already weak real estate markets, notably Texas and the Sunbelt, where GWF has some exposure. Gains on loan sales are likely to be higher with a decline in interest rates and the upward adjustment of the cost of funds index. Tax rates should be similar to rates in 1989.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 12%, year to year, primarily reflecting strong loan growth over the past year. The provision for loan losses increased 17%, to $73.8 million. Noninterest income declined 21%, mainly due to smaller gains on loan sales ($14.9 million against $60.9 million), while noninterest expense increased 8.7%. Pretax income was down 6.0%. After taxes at 39.0% in both periods, net income also fell 6.0%, to $1.37 a share from $1.48.

Important Developments

Oct. '89— GWF said that it was the best capitalized major thrift in the nation and that thus far this year it had surpassed its competitors as the largest U. S. mortgage lender. Total new loans for the year-to-date amounted to $9.78 billion, versus $9.40 billion in the comparable period in 1988.

Oct. '89— In its third quarter earnings release, Great Western noted that its quarterly provision for loan losses was increased to $27.9 million for the third 1989 quarter, compared with $21.8 million for the same period a year earlier. This was primarily the result of continued weakness in various commercial and multifamily real estate markets outside California which GWF entered during their boom periods in the early and mid-1980s.

Next earnings report expected in mid-February.

Business Summary

This company is the parent of Great Western Bank (formerly Great Western Savings), the nation's third largest thrift. Bank operations, conducted through GWF's 282 branch offices in California, Florida, Washington, Arizona and New York, accounted for 86% of 1988 pretax earnings. Consumer finance operations, conducted in 25 states through 466 Blazer Financial and City Finance offices, accounted for 14% of earnings. Insurance operations were sold in 1987.

Of total interest earning assets of $28.4 billion at 1988 year-end (up 13% from 1987), 4% were investment securities, 90% real estate loans, and 6% consumer and other loans. New loans originated in 1988 totaled $13.2 billion, up 16% from $11.4 billion in 1987. At 1988 year-end ARMs were 87% of the real estate loan portfolio. The one-year gap (excess of liabilities that would reprice in one year before assets as a percentage of assets) was a positive 0.1%. Non-performing assets at 1988 year-end equaled 1.85% of assets, down from 2.06% a year earlier.

Of total deposits of $22.21 billion at 1988 year-end, 25% were transaction accounts, 30% term accounts up to six months, 35% term accounts over six months and deferred compensation, and 10% were wholesale accounts.

The average yield on earning assets in 1988 was 10.59% (10.16% in 1987), and the average cost of funds was 7.78% (7.30%), for a spread of 2.81% (2.86%).

Greyhound Corp.

NYSE Symbol G Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 7'89	1989					
30⅜	37¾-14¼	11	1.32	4.3%	B+	1.06

Summary

Following a three-year restructuring that included the 1987 sale of Greyhound bus lines for $350 million, this company makes branded consumer household and food products and transit buses, operates commercial and institutional foodservice outlets, and provides offers varied consumer and commercial services. Acquisitions, including Carson Pirie Scott's airline and airport foodservice businesses and General Motors bus manufacturing operations in 1987, and asset sales should aid 1990 earnings progress.

Current Outlook

Earnings for 1990 should advance to $2.90 a share from $2.65 estimated for 1989.

The quarterly dividend should remain at $0.33.

Earnings from continuing operations for 1990 should benefit from successful new consumer products from Dial, growth in service operations and continued improvement in bus manufacturing productivity. Acquisitions should enhance contributions from airline catering business, but meaningful recovery in the financial group is not expected. Cost cutting efforts will be important to the anticipated earnings gain, along with the continued sale of underperforming assets.

Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	842	756	493	580
Jun.	925	854	558	685
Sep.	906	857	570	710
Dec.	---	838	653	673
	---	3,305	2,274	2,647

Revenues for the nine months ended September 30, 1989 rose 8.4%, year to year, led by transportation manufacturing and financial services. Operations benefited from substantially improved profitability for those two segments, and pretax income advanced 18%. After taxes at 41.1%, versus 40.1%, net income was up 16%, to $2.05 a share from $1.81.

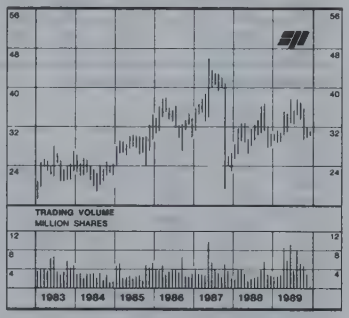
Dec.	E0.60	0.61	0.49	2.30
	E2.65	2.42	2.10	2.08



Important Developments

Nov. '89— G attributed an 18% rise in the financial group's 1989 nine months earnings to $19.4 million from $16.5 million to higher gains on asset sales. Income included $16 million in insurance proceeds, outweighed by a charge to increase reserves for nonearning Latin American loans. Strong demand for coaches and improved contributions from bus production increased transportation segment earnings 24%.

Jun.'89— G sold 1.14 million treasury shares to its Employee Stock Ownership Plan for $35.125per share. The ESOP funded the purchase with a $40 million loan, which was recorded on the balance sheet as an increase in long-term debt and a reduction of shareholder's equity.

May '89— The company's Travelers Express Co. subsidiary acquired Republic Money Orders, Inc.

Next earnings report expected in late January.

Business Summary

Greyhound Corp. is a diversified holding company which provides varied products and services for consumers and businesses. Bus operations were discontinued in 1987 with the sale of Greyhound Lines. Segment contributions from continuing segments in 1988:

	Revs.	Profits
Consumer products	29%	27%
Services	50%	48%
Transportation manufacturing	13%	16%
Financial	8%	9%

Consumer products include Dial, Tone and other soaps; Armour Star and Treet canned meats; Lunch Bucket microwave meals; Dial antiperspirants; Purex and Borax brands laundry products; Parsons Ammonia; and Brillo soap pads.

Transportation manufacturing includes buses, coaches and replacement parts made for city and intercity operators. In mid-1987 Greyhound acquired General Motors transit bus business.

Services include airline inflight catering and airport coffee and gift shops. The company also operates Premier Cruise Lines Ltd., Travelers Express (money orders and QUANTUM electonic funds transfer systems); commercial contract food services; truck stop services; convention exhibit services and bus lines in Canada.

Dividend Data

Dividends have been paid since 1936. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Dec. 11'89	1989					
16⅛	23-16	7	1.00	6.2%	B	0.75

Summary

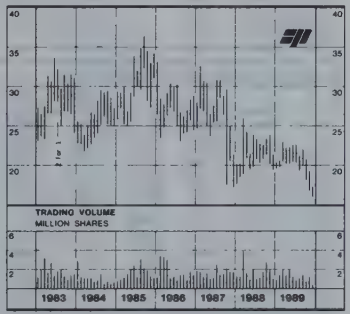
Grumman makes a variety of military aircraft, most of which is supplied to the U.S. Navy, and has an increasing amount of defense electronics and information processing business. Moderate improvement in earnings is likely in 1990 following 1989's decline. Possible eventual termination of F-14 procurement threatens GQ's long-term position in aircraft production.

Current Outlook

Earnings for 1990 are projected at $2.50 a share, up from $2.20 estimated for 1989.

Dividends should continue at $0.25 quarterly.

Sales for 1990 could be slightly below estimated 1989 levels. Aerospace revenues should be lower, reflecting fewer deliveries of F-14s and A-6s, partially offset by higher space and subcontracting activities. Margins could be improved. Electronics sales and profits should be moderately improved, and vehicle sales about unchanged with margins maintained. Information systems results could be somewhat higher. Interest expense should level off after a sharp climb in 1989. Higher profits should result from lower interest expense.



Sales & Other Income (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	905	908	852
Jun.	---	881	874	804
Sep.	---	905	832	772
Dec.	---	---	1,036	947
	---	---	3,649	3,375

Sales for the first nine months of 1989 rose 3.0%, year to year. Margins narrowed, and with interest expense up 30%, net income fell 15.8%. Share earnings were $1.50, versus $1.80.

Important Developments

Nov. '89— Congress approved funding for 18 F-14Ds to be built in 1992-4, following which production would be ended. Older F-14s would be upgraded to the D model configuration.

Aug. '89— The company announced that it would close its Tachonics subsidiary, maker of gallium arsenide components for the electronics industry, by the end of 1989.

Aug. '89— Grumman successfully completed the first test of the air to ground link of the JSTARS radar system. The program remains nine months behind schedule, however.

Dec. '88— Grumman reported that it would reduce total employment by 3,100 persons (nearly 10%) during 1989, citing cancellation of the A-6G development program.

Next earnings report expected in early February.

Business Summary

Grumman Corp. designs and manufactures military aircraft and space systems and a diversified line of commercial products. Business segment contributions in 1988:

	Sales	Profits
Aerospace	65%	64%
Information & other serv.	13%	27%
Electronics systems	13%	4%
Special purposes vehicles	9%	5%

About 90% of sales in 1988 were to the U.S. Government.

Military aircraft and space systems activities include production of the Navy F-14 fighter, the A-6E attack aircraft, the EA-6B tactical jamming aircraft, the E-2C early warning aircraft and the C-2A cargo plane.

Information and other services include electronic data processing services, financing services and real estate and insurance services.

Electronics systems include electronics for aircraft, computerized test equipment, airborne surveillance systems and other defense products.

Special purpose vehicles include fabrication and sale of aluminum truck bodies, fire trucks, and aluminum boats.

Gulf States Utilities

NYSE Symbol GSU

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
11⅝	14⅜-7⅝	NM	None	None	C	0.80

Summary

This electric utility, serving the petrochemical industry of Texas and Louisiana, owns the River Bend nuclear plant. On October 11, 1989 a Louisiana district court upheld the LPSC's finding that GSU was imprudent to have restarted construction of the River Bend nuclear plant, affirming the LPSC disallowance of approximately $677 million from the rate base. GSU was evaluating the order and expected to appeal it. Auditors noted in their report on the company's 1988 financial statements that significant legal proceedings, rate issues and operational contingencies raised substantial doubts about the company's ability to continue as a going concern.

Current Outlook

Share earnings for 1990 could reach $0.50, up from the $0.02 projected for 1989, both years excluding charges for River Bend and other extraordinary items.

The common dividend (omitted in 1986) is not expected to be restored in the near future.

Share earnings for 1990 should benefit from higher rates and a small increase in kwh sales. River Bend rate issues may be completed by late 1990.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	366	354	303	375
Jun.	393	363	364	359
Sep.	467	437	429	406
Dec.	---	367	336	338
	---	1,520	1,433	1,478

Revenues for the nine months ended September 30, 1989 rose 6.2%, year to year. However, following substantially lower rate deferrals, operating income was off 27%. After a $19.2 million charge for abandonment of subsidiary lignite leases, versus a charge of $46.3 million for reduction of deferred River Bend costs in the year-earlier period, net income fell 75%, to $27.8 million from $109.9 million. After preferred dividend accruals, the per share loss was $0.18, compared with income of $0.58. Results exclude a $0.34 a share charge for discontinuation of regulatory accounting principles in 1989, and the write-off of River Bend 2 costs of $0.14 a share versus $0.13.

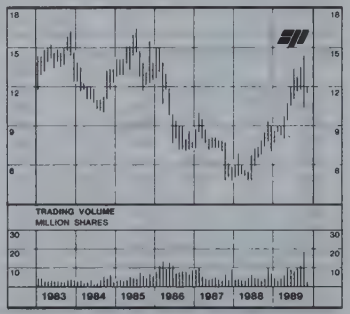
	E0.02	0.50	1.66	1.71



Important Developments

Nov. '89— GSU reported that on October 11, 1989 a Louisiana district court upheld the LPSC's finding that GSU was imprudent to have restarted construction of the River Bend nuclear plant and affirmed the LPSC disallowance of certain construction costs from the rate base, approximately $677 million on a Louisiana jurisdictional basis. The district court also affirmed the LPSC finding that $1.6 billion of River Bend costs were prudent, and confirmed the court approved rate phase-in plan based on such findings, subject to LPSC review. GSU stated that it was evaluating the order and expected to appeal it. Separately, the Texas Supreme Court ordered the Texas PUC to stay hearings on River Bend cost issues while the court considers an "emergency relief" request by certain parties.

Next earnings report expected in early February.

Business Summary

Gulf States Utilities supplies electricity to some 558,000 customers located in southeast Texas and south Louisiana. Electric revenues by customer class in recent years:

Revenues	1988	1987	1986
Residential	32%	32%	31%
Commercial	23%	23%	23%
Industrial	36%	36%	37%
Other	9%	9%	9%

Sources of generation in 1988 were gas 58%, nuclear 18%, coal 11%, and purchased power 13%. Peak demand in 1988 was 4,910 mw and capability totaled 6,805 mw for a capacity margin of 28%.

GSU's 70%-owned, River Bend nuclear plant (936 mw) entered commercial operation in 1986. The River Bend 2 plant was cancelled in 1984. GSU's net investment in River Bend 2 was about $80.0 million. In 1989's first quarter, GSU wrote off some $14.9 million, net allocated to Louisiana and in 1988's first quarter, the company wrote off about $14.4 million, net allocated to Texas and the Federal jurisdiction.

GSU is appealing a March, 1988 decision by the Federal Energy Regulatory Commission that upheld the validity of a purchased power contract with Southern Co. GSU's potential liability is estimated at about $1.2 billion. In June, 1989 Cajun Electric Power Cooperative, Inc., which is a 30% co-owner in the River Bend plant, filed a suit against GSU seeking to recover its $1.6 billion investment in the plant plus damages and fees.

Auditors noted in their report on the company's 1988 financial statements that material uncertainties concerning the River Bend nuclear plant, and other shareholder, rate and legal matters, raised substantial doubt about the company's ability to continue as a going concern.

Dividend Data

Common dividends were omitted in August, 1986. Preferred and preference dividends were omitted in February, 1987.

Summary

This firm is a leading provider of information systems to the healthcare industry. In the absence of a large gain on the sale of land, net income was slightly lower in 1988, but share earnings improved on 28% fewer shares outstanding. The majority of a recently instituted 2,000,000 share repurchase plan is expected to be completed by year end.

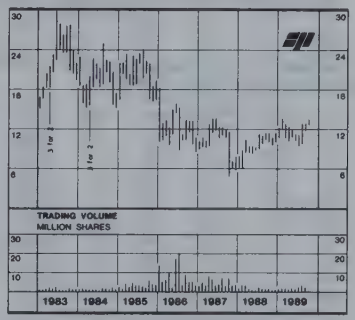
Business Summary

HBO & Company designs, sells and services information systems and software packages for a variety of applications within healthcare organizations (utilizing both minicomputers and mainframes, depending on the needs of customers). The company also provides data processing services under contract management agreements whereby it staffs, manages and operates a client's data processing facility. Equipment maintenance services also are provided. The primary market for the company's products and services consists of about 3,000 hospitals in the U.S. having more than 100 beds.

HBO's patient information systems, designed to provide transaction data during a patient's stay in the hospital, include data collection such as order entry and nurse station communication, hospital information such as departmental interface and nurse staffing, medical information such as results reporting and nurse care planning and patient accounting-related information that responds directly to governmental changes in reimbursement methods. Departmental information systems are designed to meet the particular requirements of each of the major ancillary departments of a hospital, which currently include laboratory, radiology and pharmacy. Financial information systems provide applications in patient billing and accounting, payroll/personnel, inventory, accounts payable, general ledger and financial reporting. HBO's decision support systems assist clients in preparing DRG analysis, annual business plans, financial modeling, reimbursement enhancement and regulatory reporting.

Medical Systems Support Inc. (MSSI), formed in 1985, primarily provides on-site maintenance of data processing and other information systems equipment to hospitals throughout the U.S. In addition, MSSI provides maintenance services for diagnostic imaging and x-ray equipment in hospitals.

On February 28, 1985, the company acquired Amherst Associates Inc., a provider of computer and consulting services to the healthcare industry, and Mediflex Systems Corp., a provider of data processing products and services to the healthcare industry. These transactions were effected by the exchange of 7.4 million HBO common shares for all of the stock of Amherst and Mediflex. In July 1986, HBO sold Amherst's consulting business to Amherst's management.



Important Developments

Sep. '89— A group led by Heinz Prechter said it reduced its stake in the company to 4.9% of the outstanding common shares, from 6.9%.

Aug. '89— HBO authorized the repurchase of an additional 1,000,000 of its common shares after instituting a similar buyback plan in May. Most of the 2,000,000 share repurchase program, of which some 450,000 have been bought, is expected to be completed before year end.

Next earnings report expected in late October.

Dec.		51.59	49.13	40.10
		187.41	175.23	154.82

For the six months ended June 30, 1989, revenues edged up 2.7%, year to year, as gains in hardware sales and software maintenance revenue outweighed lower software license fees and decision support timesharing services. Costs and expenses were well controlled, and net income rose 3.1%, to $3,797,000 ($0.24 a share, on 3.7% more shares), from $3,684,000 ($0.24).

In July 1989, HBO said it expected to derive most of its revenue and profit in the second half of 1989.

Halliburton Co.

NYSE Symbol HAL Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 10'89	1989					
37	41⅜-27½	40	1.00	2.7%	B	1.18

Summary

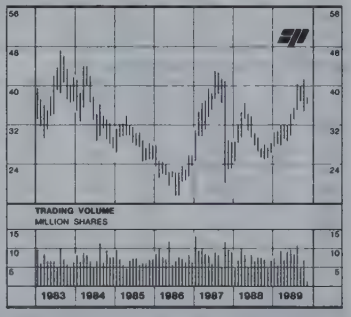
Halliburton is one of the world's largest oil field services and engineering and construction companies. The company also engages in property and casualty insurance. HAL's global presence is being strengthened by its 1988 acquisition of Gearhart Industries, a provider of wireline services, and its purchase of Geophysical Service, a major seismic services business. An improved outlook for industry drilling and the company's expanding product lines are expected to enhance its competitive position.

Current Outlook

Share earnings for 1990 are estimated at $1.40, up from $1.20 projected for 1989.

The dividend should remain at $0.25 quarterly.

Revenues for 1990 are expected to benefit from increased international activity, primarily in the Middle East. The U.S. market for both the oil field segment and the engineering business appears to be bottoming out and should enhance profits. The insurance sector is projected to add to earnings slightly, reflecting improved pricing.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,197	1,048	700	1,005
Jun.	1,371	1,192	777	855
Sep.	1,468	1,224	897	841
Dec.	---	1,375	994	808
	---	4,839	3,368	3,509

Revenues for the nine months ended September 30, 1989 rose 17%, year to year, reflecting primarily gains in the engineering and construction services group. Strong performance in the oil field services group in 1989's third quarter and improvement in the insurance business earlier in 1989, in addition to lower overhead charges, resulted in an 18% increase in net income. Share earnings were $0.81, versus $0.70, before a special credit of $0.01, versus $0.08.

Dec.	E0.39	0.11	0.32	0.05
	E1.20	0.81	0.45	d4.85

Important Developments

Oct. '89— Share earnings in 1989's third quarter of $0.40, compared with $0.24 a year earlier, benefited primarily from improved performance in the oil field services business. Increased demand for services and products in the U.S. led to higher capacity utilization. Included in the oil field services earnings was an approximate $8 million gain in the third quarter from the sale of certain service vessels. Excluding this gain, operating income for the oil field services group was up 27% from a year earlier. In September, 1989 the company announced that it increased its capital budget 14%, owing to the strength of the oil field services business. HAL said that the engineering and construction group reported a 3% decline in earnings for the third quarter while the insurance services group reported nominal income.

Next earnings report expected in late January.

Business Summary

Halliburton is the largest factor in oil field well cementing, completion and stimulation and, through its Brown & Root subsidiary, is a major factor in industrial and marine engineering/construction. Contributions by business segment in 1988:

	Revs.	Profits
Oil field services & prods.	45%	56%
Indus. engin./constr.	45%	27%
Marine construction	10%	17%

In 1988 some 31% of revenues were derived from operations outside the U.S.

The company provides a wide variety of oil field equipment and services, including well cementing, completion and stimulation services, drilling muds, pressure control and production testing services, and wireline services. In February, 1988 HAL acquired 60% of Geophysical Service, Inc., a leading seismic services contractor, and in November, 1988 an additional 20.28% of GSI. In September, 1988 HAL acquired 100% of Gearhart Industries, Inc. ($300 million in revenues), a major wireline logging company; its Geosource unit is a leading geophysical servies company.

Brown & Root engages in a wide range of design and construction activities, including power plants, refineries, and petrochemical facilities. B&R's marine construction activities include the laying and burying of marine pipelines and the fabrication and erection of offshore production platforms for the petroleum industry.

HAL also offers specialty services and products, largely related to its basic businesses, and has an insurance affiliate which provides casualty, property, surety, and marine insurance. In June, 1989 HAL sold its Life Insurance Co. of the Southwest subsidiary.

Dividend Data

Dividends have been paid since 1947. A "poison pill" stock purchase right was adopted in 1986.

NYSE Symbol HDL In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
20¼	24-13¾	15	0.40	2.0%	A	1.44

Summary

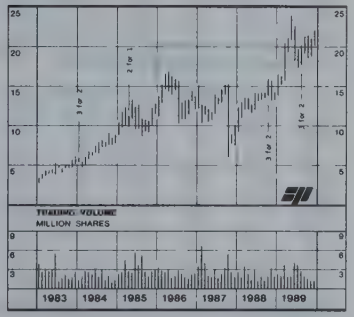
This leading distributor of home entertainment products has been experiencing strong growth in the sales of prerecorded videocassettes. However, sales of recorded music have been sluggish. K mart Corp. accounted for about 43% of HDL's total sales in fiscal 1988-9. The stock was split 3-for-2 in July, 1989.

Current Outlook

Earnings for the fiscal year ending April 1991 are estimated at $1.62 a share, up from the $1.45 expected for fiscal 1989-90.

The dividend was raised 7.1%, to $0.10 quarterly from $0.09⅓ (adjusted), with the October, 1989 payment.

Video products are expected to remain an important part of HDL's growth. HDL supplies videos which are aimed at purchase, rather than rental, by consumers. Also, HDL is expected to become increasingly involved in the manufacturing of low-priced videos, whose distribution rights are either in the public domain or have been acquired by HDL. In addition, compact discs should continue to bolster HDL's recorded music sales, and the growth of HDL's book business is expected to benefit from expansion on the West Coast.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	127.3	121.1	96.9	88.8

Important Developments

Dec. '89— HDL is selling lower-priced video products to stores in one of the U.S.'s largest specialty video chains, West Coast/National Video. Over the near term, HDL's video sales are likely to remain heavily weighted toward mass merchandisers, but as consumers increasingly buy, rather than rent, tapes, HDL's revenue mix may increasingly include sales to video specialty outlets. Also, HDL signed a letter of intent to acquire GES, The Interstate Group, a distributor of home entertainment software and books; this business had annual sales of about $20 million. In fiscal 1989-90's second quarter, sales of video products were up 37%, year to year, and accounted for 46% of HDL's total. However, music sales, which also were 46% of HDL's total, declined 2%. Compact discs accounted for 18% of HDL's music sales in the quarter.

Next earnings report expected in late February.

Business Summary

Handleman Co. is one of North America's largest independent distributors of prerecorded music, prerecorded videocassettes, books, and home computer software to retail chains throughout the U.S. and Canada. Much of HDL's sales growth in recent years has come from prerecorded videocassettes and compact discs. At November 1, 1989, HDL's service base included about 5,400 full-service music departments, 5,600 video outlets, 1,500 software locations, and 2,100 book outlets, and additional limited-service music/video customers. Also, HDL owns master recordings of a number of public domain movies.

Net Sales	1988-9	1987-8
Prerecorded music	57.8%	64.0%
Prerecorded video	32.8%	25.7%
Books	6.6%	7.1%
Software	2.7%	3.2%

Of fiscal 1988-9's net sales, the U.S. accounted for about 92% and Canada 8%. In fiscal 1988-9 K mart Corp. accounted for about 43% of HDL's sales, and Wal-Mart accounted for about 14%.

Competitors to HDL include some manufacturers who distribute their products directly, record and book clubs, and independent distributors and wholesale merchandisers.

Dividend Data

Dividends have been paid since 1963. A dividend reinvestment plan is available.

Summary

This insurer writes a variety of property-liability coverage in all 50 states and certain foreign countries. Earnings for the first nine months of 1989 were hurt by increases in weather-related damage payouts, including $7.5 million associated with Hurricane Hugo. State Mutual Life Assurance Co. and its affiliates control more than 50% of the shares.

Business Summary

The Hanover Insurance Company, which dates from 1852, conducts a diversified property-liability insurance business throughout the U.S. and in most of Canada. The broad line of insurance products offered includes virtually all types except life insurance, annuity contracts and title insurance.

Net premiums written in recent years were derived from:

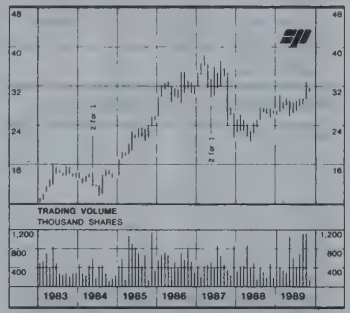
	1988	1987
Automobile	50.4%	50.5%
Fire & allied lines	29.7%	29.1%
General casualty	16.5%	16.8%
Marine & aircraft	2.7%	2.9%
Fidelity & surety	0.7%	0.7%

The average loss ratio for all lines was 70.4% in 1988 (72.0% in 1987). Individual product line ratios were: automobile 76.0% (79.6%), fire and allied lines 53.9% (51.5%), general casualty 87.8% (88.5%), marine and aircraft 52.0% (52.3%) and fidelity and surety 7.3% (35.0%).

Wholly owned Massachusetts Bay Insurance Co. (all of whose business is automatically assumed by Hanover), 100%-owned Citizens Insurance Co. of America (acquired in 1974), 98%-owned Beacon Insurance Co. of America, (acquired in 1981), and Hanover Lloyd's Insurance Co. are subsidiaries. During 1988, the company realized a pretax gain of $1.5 million on the sale of its interest in California Compensation & Fire Co.

The company's insurance subsidiaries are represented by approximately 2,605 agents, with the major share of premiums produced by commissioned agents who in most instances also represent other insurance companies.

Hanover is a member of various associations formed for the purpose of underwriting risks collectively. During 1988, about 8.9% of total net premiums written were derived in that manner.



The company also owns AMGRO, Inc., whose principal business is the financing of property and liability insurance premiums; and Citizen's Man, Inc., which offers various insurance related services. In 1988, the company began accounting for AMGRO and Citizen's Man on a consolidated basis (see Finances).

Total investments amounting to $1.92 billion at 1988 year-end were divided: fixed maturities 78.2%, equity securities 9.9%, other long-term investments 1.1% and short-term investments 10.8%.

Important Developments

Sep. '89— Hanover said that it liquidated about 50% of its equity portfolio in order to limit exposure to a potential correction in the stock market. As a result, the company realized a $21.6 million gain in the third quarter of 1989.

Next earnings report expected in early February.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	378	378	326	258
Jun.	390	385	344	285
Sep.	434	411	363	300
Dec.		406	378	319
		1,580	1,411	1,162

Total revenues for the nine months ended September 30, 1989, rose 1.9%, year to year (1988 restated), as a 4.2-fold increase in gains on the sale of equity securities (see Important Developments) outweighed a 1.4% decline in premiums earned (due in part to the December 1988 sale of California Compensation & Fire Co.). Profitability was hurt by continuing expenses associated with weather-related catastrophes, and pretax income fell 29%. After taxes at 13.3% against 17.4%, and minority interests, net income was down 26%, to $73,310,000 ($3.55 a share), from $98,780,000 ($4.79).

Summary

Hanson PLC is a British industrial management company whose subsidiaries are engaged in a wide range of activities principally in the U.K. and the U.S. HAN continually evaluates its existing operations and explores internally and with third parties possible acquisitions and sales of businesses. HAN announced in August, 1989 that it owned or had tender offers for over 90% of Consolidated Gold Fields.

Business Summary

Hanson PLC (formerly Hanson Trust) is a British industrial management company with consumer, building products, industrial, and food operations, primarily in the U.K. and the U.S. Contributions by segment in fiscal 1988:

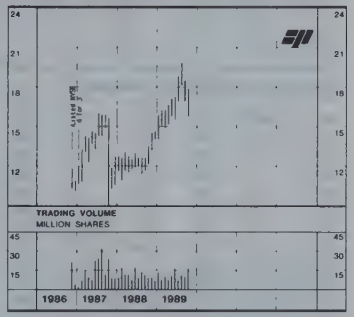
	Sales	Profits
Consumer	54%	37%
Industrial	25%	36%
Building products	13%	22%
Food	8%	5%

In fiscal 1988 the U.K. accounted for 57% of sales and 57% of operating profits and the U.S. 43% and 43%, respectively.

Holdings in the U.K. include Allders Ltd., which operates retail department stores and duty and tax-free shops; Imperial Tobacco Ltd., a manufacturer of cigarettes and tobacco products; and British Every Ready, producer of dry cell batteries.

In the U.S., operations include (51% owned) Smith Corona Corp., maker of portable typewriters and word processors; Endicott Johnson Corp., a producer of footwear; SCM Chemicals Inc., a leading producer of white pigment for use in the manufacture of paint, paper, plastic and rubber products; Hygrade Food Products Corp., a producer of processed meats; Ground Round Inc., a chain of family restaurants; Carisbrook Industries Inc., manufacturer of yarns, fabrics, apparel and textile finishing machinery; and Kaiser Cement Corp., producer of cement and aggregate products. Other product lines include Jacuzzi whirlpool and spa products, Tucker houseware and Farberware cookware

HAN continually evaluates its existing and newly-acquired operations and explores internally and with third parties possible acquisitions and dispositions of businesses.



Important Developments

Oct. '89— HAN agreed to sell its Ground Round Inc. unit to International Proteins Corp. (ASE: PRO) for $49 million and 2,850,000 PRO shares, raising HAN's PRO stake to 49.5% from 9%. In August HAN said that it owned or had tender offers for over 90% of Consolidated Gold Fields PLC's (CGF) shares under its £3.5 billion offer (£143 in cash plus 11 HAN warrants for every 10 CGF shares). Earlier, when already controlled by HAN, CGF sold a 30% stake in Gold Fields of South Africa for £368 million. In July HAN's Smith Corona Corp unit sold publicly 14,750,000 (48.8%) common shares at $21 each, for net proceeds of about $293.5 million. Separately, HAN sold its 8.8% stake in Cummins Engine Co. for $72 million. In April HAN conditionally agreed to sell Allden Department Stores Ltd. and Allden Int'l Ltd. to a management group for $381 million. HAN would have a 5% stake in the new firm.

Next earnings report expected in late November.

Finances

In May, 1989 HAN sold its Barbour Campbell (BC) industrial thread and yarn business to a management group for $31.8 million in cash plus BC's cash balance of $9.6 million. In April, HAN sold its Elizabeth Shaw confectionary unit to a management group for $42 million. In March, HAN sold its Hygrade Food Products Corp. unit to Sara Lee Corp. for $140 million in cash and the assumption of debt. In January, HAN sold Kidde Credit Corp. operations in the U.S. and Canada for $70.3 million. In December, 1988 HAN sold Durkee Industrial Foods Corp. to Unilever U.S. Inc. for $185 million. In November, HAN sold KFPG, a fire detection and suppression service unit of Walter Kidde, to Pilgrim House Group PLC for $253.8 million.

In July, 1988 HAN sold HP Foods Ltd. and Lea & Perrins Inc. for $338.5 million. HAN's Kidde Inc. subsidiary also sold its Globe Security Systems unit for $46.5 million. In April, HAN sold its Ross Youngs frozen and chilled food business for $620 million. Also in April, HAN sold Kaiser Cement's Lucerne Valley plant for $185 million in cash and $8 million in inventory. In November, 1987 HAN acquired through an exchange offer of Kidde, Inc., a manufacturer of consumer, recreational, and security products, for $1.46 billion in cash and about 24.3 million warrants each to buy one ADS of HAN at $18 through September, 1994. In March, 1987 HAN acquired Kaiser Cement Corp. for about $250 million in cash.

5	18⅝-3¾	NM	None	None	NR	1.72

Summary

The publisher and insurance underwriter/broker completed the sale of its theme parks and all of its land holdings in November, 1989 for $1.1 billion as a means of partially reducing an onerous debt obligation. While cash flow from publishing and insurance operations are sufficient for ongoing debt service, the company will probably have to sell additional assets in order to meet interest obligations on nearly $600 million of debt beginning in 1992.

Current Outlook

A loss from continuing operations of about $1.85 a share is projected for 1990, versus 1989's estimated loss of $5.80, which excludes about $7.55 of capital gains.

Cash dividends on the common stock will not be paid before 1996.

Revenues from continuing operations in 1990 should rise, largely due to improved educational book sales. Profits should benefit from the absence of certain nonrecurring charges, from the improved sales, cost controls, and reduced capital outlays. Debt service, although reduced, and preferred dividends will continue to negatively impact net income and per share results.

Sales & Revenues[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	307	174	158

Sep.	470	633	444	335
Dec.	---	393	222	245
	---	1,782	1,098	969

Sales and revenues from continuing operations for the nine months ended September 30, 1989 rose 7.5%, year to year. Results were hurt by a 98% plunge in publishing profits, a 50% drop in insurance income and a 20% rise in interest expense. Including $0.70 a share of preferred dividends (currently being paid in additional preferred stock), the net loss from continuing operations was $4.29 a share, versus a loss of $1.57 (restated).

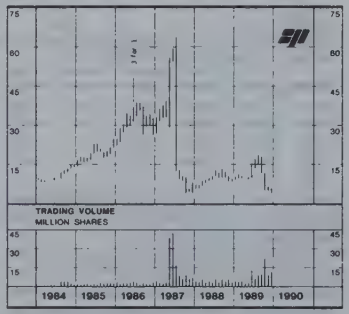
	Ed5.80	d2.04	d2.00	1.91



Important Developments

Nov. '89— HBJ completed the sale of its six theme parks and related land holdings to a unit of Anheuser-Busch for $1.1 billion. Proceeds were largely used to reduce by about $875 million the nearly $2.6 billion in term debt outstanding prior to the sale. HBJ's cash flow from publishing and insurance operations will be sufficient to pay cash interest obligations on its remaining debt for the foreseeable future, but the outlook for 1992 and beyond is clouded by the requirement to begin paying interest on nearly $600 million of zero-coupon and pay-in-kind debentures. Because it remains highly leveraged, the company will need to make further reductions in its outstanding debt in order to remain a growing and viable concern in the future. Thus, further asset sales may be forthcoming.

Next earnings report expected in late January.

Business Summary

Harcourt Brace Jovanovich is largely engaged in publishing and insurance. In November, 1989 the company sold Sea World Enterprises, operator of four marine parks, a botanical gardens park and a recreational and baseball theme park, and some 2,500 acres of largely undeveloped land in order to partially reduce outstanding debt. Business segment contributions in 1988:

	Revs.	Profits
Publishing	49%	57%
Insurance	29%	19%
Parks	22%	24%

The elementary and secondary education division publishes textbooks and instructional materials (including software); and publishes and scores achievement and aptitude tests. The university and professional education division publishes textbooks and instructional materials for higher education, scientific and medical books and journals, and general books; publishes books and conducts courses and seminars for law, accounting, and business; and publishes multi-media materials for community colleges. The company said that it will publish about 5,000 new books and about 240 scholarly journals in 1989.

HBJ Insurance, which includes the Federal Cos., Harvest Cos. and the Riehle Cos., is an underwriter of life and health insurance and an agent and broker of property and casualty insurance. It also publishes 10 state farm magazines, which provide a medium for certain insurance sales.

Dividend Data

In a July, 1987 recapitalization, common shareholders received $40 in cash and one share of a new $1.62 preferred stock for each share held. In March 1989 HBJ said that cash dividends on preferred stock would not be paid before 1996. Dividends on the preferred are being paid in additional preferred shares.

Capitalization

Long Term Debt: About $1,762,155,000. (11/89)

$1.62 Preferred Stock: 47,949,115 shs. ($13.50 liquid. pref.); divd. payable in cash or pfd. stk. thru Jun. 1993.

23⅝	25-19½	16	0.68	2.9%	A	0.96

Summary

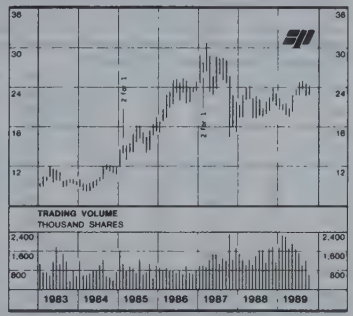
This printer of bank checks and related forms accounts for about 20% of the personal check volume printed in the U.S. JH has recorded sales increases for 39 consecutive years, and earnings and dividend gains for 35 years; return on equity has exceeded 20% for 15 years. Profitability is currently benefiting from conversion to offset printing technology.

Current Outlook

Earnings for 1990 are projected at $1.85 a share, up nearly 15% from the $1.60 estimated for 1989.

The $0.17 quarterly dividend is likely to be raised to $0.20 in the near term.

Sales for 1990 will be boosted by continued rapid gains in Scantron's business, growing check usage, and new and expanded lines of personal and business checking items. Margins should continue to improve, reflecting the volume gains and operating efficiencies, aided by continuing conversion to offset printing capability. Longer-term prospects are favorable.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	83.8	80.8	72.0	64.9
Jun.	89.3	85.7	70.7	65.6
Sep.	---	83.6	73.3	67.6
Dec.	---	83.2	71.7	68.0
	---	333.3	287.7	266.1

Sales for the 1989 first half rose 3.9% from the year-earlier level, as restated to include Scantron on a pooling-of-interests basis. Aided by improvements in efficiency and the absence of nonrecurring costs, pretax earnings advanced 17%. After taxes at 36.5%, versus 34.4%, net income was up 14%, to $0.77 a share from $0.68.

Important Developments

Aug. '89— The company broke ground for a new check printing plant ion Wilkes-Barre, Pennsylvania, its 43rd facility nationwide. When completed during the first quarter of 1990, the plant will serve financial institutions in northeast Pennsylvania.

Jul. '89— JH said that productivity was up 3.5% for the first half, aided by conversion to offset printing technology. Advanced technology now represents the majority of total check production, which has a direct impact on market share.

Jan. '89— The company said that the check will remain the firm's primary product in the coming years as it also looks for additional markets through compatible acquisitions and internal development.

Next earnings report expected in late October.

Business Summary

John H. Harland is a financial stationer, primarily engaged in printing checks and related items. Harland is among the three largest printers of magnetic ink character recognition (MICR) encoded personalized checks in the U.S., accounting for some 20% of all personal checks written.

The company's principal products are MICR encoded checks designed to be processed on automatic sorting and posting equipment, deposit tickets, and related forms for financial institutions and their customers. The company also produces customer-designed printed, lithographed and engraved business forms and other stationery items for banks and other accounts

JH's direct mail division, J. William Company, makes office supply forms for small businesses and sells them through catalogs. The National Safe division manufactures bank equipment, including vault doors, safe deposit boxes, drive-up teller windows, remote teller units and alarm systems.

Scantron Corp., acquired in June 19E8, designs, develops, and produces optical mark reading equipment and scannable forms used to score tests and tabulate data.

Dividend Data

Cash dividends have been paid since 1932, and increased each year since 1953. A "poison pill" stock purchase right was adopted in 1989.

Summary

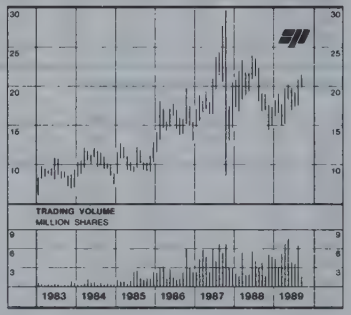
This company produces heavy capital goods equipment, including power cranes, electric shovels, material handling equipment, paper making machinery and develops defense-related software. Benefiting from higher sales and improved margins, earnings more than doubled in fiscal 1988. Earnings for the first nine months of fiscal 1989 benefited from higher sales and profits in the papermaking machinery and mining equipment units and a turnaround in the material handling equipment segment. Sales and earnings should continue to rise in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending October 31, 1990 are projected at $1.90 a share, versus the $1.55 estimated for fiscal 1989.

Dividends should remain at $0.05 quarterly.

Sales for fiscal 1990 are expected to rise, reflecting higher order bookings and backlog. Volume gains in the integrated materials handling unit along with increased parts sales should lift margins. Aided further by the realization of interest income and the abatement of share dilution, share earnings should rise in fiscal 1990.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Jan.	317	257	191	105

Jul.	377	315	240	226
Oct.	---	312	277	232
	---	1,187	958	714

Sales for the nine months ended July 31, 1989 rose 20%, year to year, reflecting gains in the mining and papermaking machinery units. Margins widened, and benefiting further from the absence of interest expense (net), pretax income advanced 65%. After taxes at 35.0%, versus 31.9%, and higher minority interest, net income rose 63%. Share earnings were $1.13 (before a special credit of $0.38) on 21% more shares, versus $0.85.

Important Developments

Aug. '89— HPH reported share earnings of $1.13 on a 20% gain in sales for fiscal 1989's first nine months, versus $0.85 a share in the year-earlier period. HPH attributed the higher earnings to the strong performance of its papermaking and mining equipment units. HPH also noted that its material handling equipment unit reported a $2.2 million profit in the first nine months of fiscal 1989, versus a $3.5 million loss a year-earlier. Orders booked for the first nine months totaled $1.42 billion, up 19%, year to year; the backlog at July 31, 1989 was $1.77 billion, up 27%.

Jul. '88— HPH sold publicly through underwriters 6,325,000 common shares (including overallotments) at $21.875 a share. Net proceeds of some $132.5 million were used for debt reduction

Next earnings report expected in early December.

Business Summary

Harnischfeger Industries makes heavy capital goods equipment and provides related replacement, credit, and other services. Contributions in fiscal 1988 (profits in million $):

	Sales	Profits
Harnischfeger Engineers	8%	$4.5
Material handling equip.	7%	-5.2
Mining equipment	13%	10.9
Papermaking machinery	59%	63.5
Computers for defense	13%	16.4

Harnischfeger Engineers designs, engineers and integrates automated material handling systems for manufacturing, distribution and warehouse applications.

The Material Handling Equipment segment makes overhead cranes, electric wire rope and chain hoists, monorail systems and components.

Mining equipment makes electric mining shovels, electric and diesel-electric draglines, and hydraulic mining excavators.

Through Beloit Corp. (80% owned), HPH manufactures papermaking machinery systems and related products.

Syscon Corp. develops and manages computer software systems and hardware/software products primarily for the U.S. defense industry.

Dividend Data

Common dividends were resumed as follows in 1988 since omission in mid-1982. A "poision pill" stock purchase right was adopted in 1989.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Oct. 10'89	1989					
39	39-26⅜	13	0.96	2.5%	B	1.21

Summary

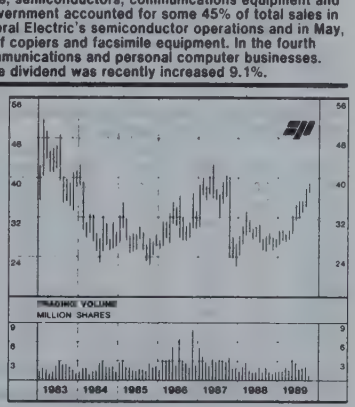
This company produces advanced electronic systems, semiconductors, communications equipment and systems, and office equipment. Sales to the U.S. Government accounted for some 45% of total sales in fiscal 1989. In November, 1988 Harris acquired General Electric's semiconductor operations and in May, 1989 it purchased the remaining 50% of a supplier of copiers and facsimile equipment. In the fourth quarter of fiscal 1989 HRS discontinued its data communications and personal computer businesses. Earnings in fiscal 1990 should improve modestly. The dividend was recently increased 9.1%.

Current Outlook

Earnings from continuing operations for the fiscal year ending June 30, 1990 are estimated at $3.25 a share, versus fiscal 1989's $3.00.

The dividend was increased 9.1%, to $0.24 quarterly from $0.22, with the September, 1989 payment.

Sales for fiscal 1990 will benefit from the inclusion of Harris/3M as a wholly-owned subsidiary. HRS's government business is expected to post high single digit growth, aided by the revitalization of NASA and healthy demand from state and local governments; however, margins are likely to remain under pressure. Meanwhile, HRS's other traditional business segments should post modest growth rates. Profitability should benefit from improved margins in HRS's semiconductor segment and Lanier's international business.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Sep.	430	507	469	560
Dec.	491	493	525	562

Jun.	768	538	562	577
	2,214	2,063	2,079	2,217

Sales for the fiscal year ended June 30, 1989 rose 23%, year to year, benefiting from the inclusion of GE Solid State since November 30, 1988 and Harris/3M as a wholly-owned subsidiary in the fourth quarter. Excluding these acquisitions, sales were unchanged. Expenses were well controlled, and despite a substantial increase in interest expense, net income was up 31%. Share earnings increased 36%, to $3.00 on fewer shares from $2.20 Results exclude losses from discontinued operations of $2.43 and $0.57 a share, respectively, and a special credit of $0.87 in fiscal 1988.

Important Developments

Aug. '89— As part of a major business restructuring, HRS decided to exit a significant portion of its data communications and personal computer-based office systems businesses. As a result, it reported a fourth-quarter fiscal 1989 charge of $85 million in connection with the potential sales of these businesses.

Next earnings report expected in late October.

Business Summary

Harris is focused on four major core businesses—advanced electronic systems, semiconductors, communications, and an office-equipment distribution network. Sales to the U.S. government were 45% of total sales in fiscal 1989. Segment contributions in fiscal 1989:

	Sales	Profits
Electronic Systems	41%	29%
Semiconductor	25%	23%
Communications	20%	16%
Lanier Worldwide	14%	32%

The Electronic Systems segment is engaged in research, development, design, and production of a broad range of high-technology systems for government and commercial organizations in the U.S. and overseas. Applications include avionics and space systems; support equipment; command, control, communications and intelligence; energy management; newspaper composition; real-time and relational database computing; and design-automation.

The Semiconductor sector is a leading manufacturer of standard, semicustom, and custom integrated circuits and discrete devices based on complementary metal oxide semiconductor (CMOS), bipolar, dielectric isolation, gallium arsenide and radiation hardening technologies.

The Communications sector produces a comprehensive line of communications equipment and systems, including microwave, lightwave, two-way radio, broadcast radio and television systems, digital telephone switches, satellite systems, auxiliary telecommunication products and turnkey communication systems.

Lanier Worldwide, Inc., formerly Harris/3M Document Products, Inc., is a wholly-owned subsidiary of Harris which markets, sells and services office equipment and business communication products.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

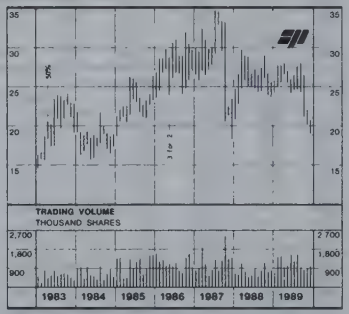
This company is a leading manufacturer and retailer of men's and women's apparel under such well-known names as Hart Schaffner & Marx, Henry Grethel and Hickey-Freeman. Earnings in fiscal 1989 have been hurt by soft retail sales, higher wool prices and increased interest charges, but profits should rebound in fiscal 1990. Continued expansion through acquisitions and store openings, the addition of new lines, and continued efforts to control costs enhance the long-term outlook.

Current Outlook

Earnings for the fiscal year ending November 30, 1990 are estimated at $1.90 a share, up from the $1.20 likely for fiscal 1989.

The quarterly dividend should remain at $0.30.

Sales for fiscal 1990 should advance moderately, reflecting higher prices, new store openings, and higher same store sales from increased volume. Cost efficiencies, benefits from centralized retail operations, and increased volume should offset continued higher priced raw materials, costs associated with opening new stores, and programs to stimulate retail sales. Interest charges should be about the same.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	327	302	283	290

Next earnings report expected in early January.

Important Developments

Nov.'89— HMX said that excluding acquisitions, sales for the first nine months of fiscal 1989 would have risen only 3%, reflecting the sluggish retail environment for menswear as a result higher prices from substantially higher wool prices. While sales at the popularly priced Kuppenheimer's men's stores rose 6% in comparable locations, menswear sales in HMX's specialty stores fell 4.5%. HMX said actions to stimulate sales in the specialty stores group had included lower price points, more selections, and increased marketing efforts. Meanwhile, the planned sale of Country Miss was not completed. HMX added that the sluggish retail trend had continued into the fourth quarter, and that orders for menswear for the spring 1990 were below last year's level. However, HMX was expecting improved results for the entire year.

Business Summary

Hartmarx is a leading diversified manufacturer and retailer of men's and women's apparel. Contributions (profits in million $) by major segments in fiscal 1988.

	Sales	Profits
Retailing	53%	22%
Manufacturing	47%	78%

Hartmarx Men's Apparel Group manufactures 30 well-known, prestigious brands of all types of men's apparel. Some major brand names include Henry Grethel, Hart Schaffner & Marx, Hickey Freeman, Gieves & Hawkes, Intercontinental Branded Apparel, Austin Reed, Society Brand, Christian Dior, Jack Nicklaus, Sansabelt, Sterling & Hunt, Bobby Jones, Gleneagles, Nino Cerruti, Allyn St. George, Johnny Carson, and Pierre Cardin.

The company operates approximately 468 apparel stores in the U.S. which include 233 Hartmarx specialty stores; 108 Kuppenheimer stores, which sell popular priced men's tailored clothing; 87 Old Mill stores, which sell women's apparel primarily manufactured by HMX; 25 Graham and Gunn Stores; and 15 Sansabelt stores.

HMX designs, manufactures and sells moderately priced women's sportswear and separates, mainly through the Country Miss division. Approximately 55% of Country Miss's clothing is sold through the 87 Old Mill Stores.

HMX also owns a 37.33% interest in Robert's, a Mexican manufacturer and retailer of men's quality clothing.

Summary

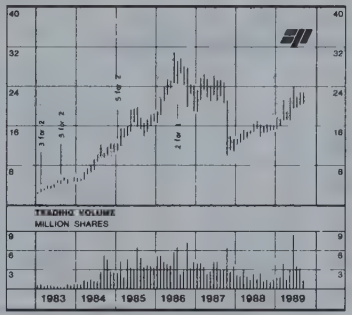
One of the largest toy companies in the world, Hasbro has a broadly diversified line consisting of promotional toys, Milton Bradley board games and Playskool pre-school toys and infant products. Coleco Industries, which filed for bankruptcy in July 1988, was recently acquired. Although only modest sales growth is expected, well controlled costs and the absence of a nonrecurring charge should lead to a second consecutive year of higher earnings in 1989. A possible peaking of the video game fad and an expanded number of new product introductions should allow for significantly improved results in 1990.

Current Outlook

Earnings for 1990 should reach $1.80 a share, up from the $1.55 projected for 1989.

A modest increase in the $0.04 quarterly dividend is likely in 1990.

Revenues for 1989 should increase 15%, aided by the inclusion of Coleco for a full year and assuming that competing video game sales decline. A possible economic slowdown should not have a major impact on results, since toy sales are not very sensitive to overall economic activity. Sales of the company's Milton Bradley board games and G.I. Joe line should benefit from a projected waning of the video game fad, which has negatively impacted these sales. In addition, lessening interest in video games may create a more favorable environment for the company's new product introduction program, which is being expanded in 1990. Margins should benefit from higher volume and well controlled costs. Longer term prospects are enhanced by the company's well known brand names and strong management.



Net Revenues (Million $)

Important Developments

Jul. '89— The company acquired substantially all of the non-cash assets of Coleco Industries, Inc. for approximately $85 million in cash, plus warrants to purchase 1,000,000 Hasbro common shares. Coleco, which filed for bankruptcy in July 1988, incurred a $266.6 million loss on sales of $185.2 million in 1988; it produces the Cabbage Patch Kids, Scrabble and Parcheesi.

Next earnings report expected in late October.

Business Summary

Hasbro Inc. is one of the world's largest manufacturer and marketer of toys.

Major continuing product lines sold under the Hasbro brand name include G.I. Joe, My Little Pony, Transformers, COPS male action figures, the Maxi fashion doll, Fazz jewelry and makeup and Pogo Bal. Besides a wide variety of new items in existing lines, new toys for 1989 include the Record Breakers super fast cars, the 17½" My Beautiful dolls, Sweetie Pups and Sweetie Kitties, Topsy Turtles stuffed animals, the Make-Me-Up Darlings dolls, the Flying Fighters handheld jets with sound effects, Nintendo video game software and Nintendo trophy figures.

Milton Bradley is the nation's largest board game manufacturer. Its line includes staples such as The Game of Life, Stratego, Candy Land and Yahtzee and jigsaw puzzles. Major new product introductions in 1989 include Shark Attack!, Heartthrob, Spider Wars and Trump: The Game.

A wide variety of pre-school toys are sold under the Playskool name, as well as a line of bibs, infant care products and infant and toddler clothes. The Playskool line is being aggressively expanded for the second consecutive year in 1989.

Foreign operations accounted for 32% of sales and 46% of operating income in 1988.

Summary

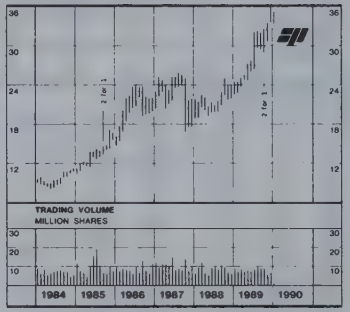
Heinz is a major factor in the food industry worldwide, with strong positions in ketchup, tuna fish, pet food, and frozen potatoes and dinners. Acquisitions have added to earnings progress over the past decade; expansion of pet food, Weight-Watchers and foreign businesses along with growing efficiencies enhance the future.

Current Outlook

Earnings for the fiscal year ending April 30, 1990 are estimated at $1.87 a share, up 12% from fiscal 1988-9's $1.67 (as adjusted for the October, 1989 2-for-1 stock split).

The quarterly dividend, which was raised 17% in October, 1989, should remain at $0.21.

Sales for fiscal 1989-90 are expected to remain in a good uptrend, with strength in Weight Watchers products, acquisitions, and growth in markets abroad augmenting gains in traditional domestic branded products. Cost cutting programs at U.S. and foreign operations should continue to widen margins, as would reduced borrowing costs. A 10 million (adjusted) share repurchase program initiated in September, 1988 should also add to share earnings growth. Participation in food service supply markets bodes well for future progress.



Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	1,452	1,379	1,247	1,084
Oct.	1,531	1,425	1,275	1,157

Apr.	---	1,630	1,469	1,313
	---	5,801	5,244	4,639

Sales for the six months ended November 1, 1989 rose 6.4%, year to year, reflecting 5.2% higher volume primarily from tuna, foodservice, ketchup and frozen potatoes. Higher prices and lower operating and other expenses helped widen margins, and despite sharply higher interest expense, pretax income was up 12%. After taxes at 38.9%, versus 40.1%, net income was up 15%. Share earnings were $0.95, versus $0.84 (adjusted).

Important Developments

Dec. '89— HNZ repurchased 4.8 million common shares during the fiscal 1989-90 first half for a total of 8.9 million under a 10-million-share program (adjusted) begun in November, 1988. In November, 1989 an additional 10 million share repurchase plan was authorized. In September HNZ bought 1,577,908 shares at $31.69 each to fund an employee stock ownership plan.

Next earnings report expected in mid-March.

Business Summary

H.J. Heinz manufactures an extensive line of convenience foods. Foreign operations accounted for 40% of sales and 42% of operating income in fiscal 1988-9. Foreign markets include the U.K., Canada, Western Europe, Australia, Venezuela and Japan.

Heinz U.S.A. is the leading producer of ketchup (more than 50% of the U.S. market), and also holds important positions in sauces, baby food, beans, vinegar, pickles and private label soups. The Star-Kist division is a major producer of canned tuna (with a 36% share) and also produces 9-Lives cat food.

Ore-Ida leads the branded retail frozen potato market with some 48% of the market. Gagliardi Brothers makes frozen specialty meat products.

Weight Watchers International (holding a 50% share) operates and franchises weight-control classes and licenses its diet foods to other manufacturers. Hubinger Co. makes high fructose and regular corn syrups.

Acquisitions have included Cardio-Fitness Corp. in 1985 (develops and operates cardio-vascular fitness facilities) and in 1988 two pet food businesses (California Home Brands Holdings, Inc. and Champion Valley Farms), Mavar Shrimp & Oyster Co. and S. Orlando S.A.(tomato-based condiments).

Nov. 24'89	1989					
28½	30⅞-20⅜	30	0.44	1.5%	B-	0.79

Summary

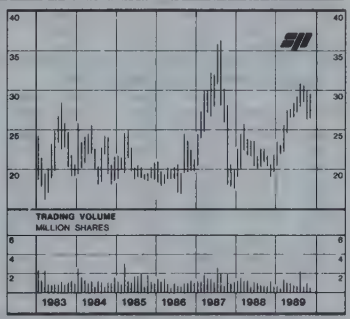
Helmerich & Payne is a diversified energy company engaged in contract drilling, oil and gas exploration and production, chemicals manufacturing, and real estate. It also has large equity investments in publicly-owned companies. An improved fundamental outlook for the natural gas industry is expected to stabilize the company's contract drilling business and HP's exploration and production activities.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 should approach $1.10 a share, versus the $0.94 reported for fiscal 1989.

The quarterly dividend was raised 4.8%, to $0.11 from $0.10½, with the December, 1989 payament.

Operating revenues in fiscal 1990 should benefit from firmer contract drilling day rates and greater utilization rates, reflecting improved natural gas fundamentals. Exploration and production operations should benefit from the improved gas outlook. A stronger gas drilling climate is expected to strengthen margins. HP will continue to augment earnings with the sale of securities.



Sales & Oper. Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	36.1	33.8	27.4	41.3
Mar.	39.5	36.8	29.7	37.7

Sep.	36.0	33.7	29.3	20.9
	150.4	139.0	114.5	126.0

Revenues for the fiscal year ended September 30, 1989 (preliminary) rose 8.2%, year to year, reflecting a greater contribution from foreign contract drilling and the oil and gas business. Despite weakness in the chemicals segment and the real estate business, net income adavanced 13%. Share earnings were $0.94, versus $0.83.

Sep.	0.27	0.17	0.11	d0.11
	0.94	0.83	0.91	0.28

Important Developments

Nov. '89— HP reported earnings in the oil and gas exploration segment in fiscal 1989 benefited from higher prices and increased production. The average price for crude oil in fiscal 1989 was $16.34 a barrel, compared with $15.54 a barrel in fiscal 1988. Natural gas prices were $1.48 per Mcf in the current year, versus $1.44 per Mcf in fiscal 1988. In fiscal 1989 HP produced 2,486 barrels of crude a day, versus 2,463 barrels a day a year earlier; while natural gas production was 57,490 Mcf per day, up from 45,480 Mcf per day in fiscal 1988. HP reported the contract drilling segment posted an increase in profits reflecting higher rig utilization rates. Foreign utilization increased to 46% in fiscal 1989, compared with 30% in fiscal 1988; domestic rates in the current fiscal year were about unchanged from fiscal 1988's 44% rate.

Next earnings report expected in late January.

Business Summary

HP is a diversified company involved in contract drilling, oil and gas exploration and production, chemicals manufacturing and real estate development. HP also has equity investments in other publicly-held firms. Contributions to revenues and pretax income in fiscal 1988:

	Revs.	Profits
Contract drilling	48%	7%
Oil/gas prod. & expl.	26%	48%
Chemical manufacturing	7%	13%
Real estate	5%	18%
Dividend income & other	14%	13%

Foreign drilling operations (11% of fiscal 1988 revenues) generated pretax earnings of $919,000.

HP's contract drilling segment has a domestic fleet of 48 rigs, with drilling capabilities from 14,000 ft. to 30,000 ft. The foreign fleet of 18 rigs is located mostly in Venezuela.

Oil and gas exploration is concentrated in the Anadarko Basin of Oklahoma and Texas. At September 30, 1988 HP owned working interests in 424 net oil wells and 197 net gas wells, with reserves of 6.3 million bbls. of oil and 279.6 billion cubic feet of gas. HP realized an average price of $15.54 for the 2,463 bbls. of oil produced daily in fiscal 1988, and $1.44 per Mcf for the 45,480 Mcf of gas per day.

The chemical division produces over 30 variations of odorant used as warning agents in natural gas. It also sells mercaptans, which are used as feedstocks in the manufacture of chemicals. HP owns, leases and manages retail, office and industrial properties exclusively in Tulsa, Okla.

Dividend Data

Dividends have been paid since 1959. A "poison pill" stock purchase right was adopted in 1986.

Nov. 14'89	1989					
42½	52¼-41	14	2.24	5.3%	B+	1.08

Summary

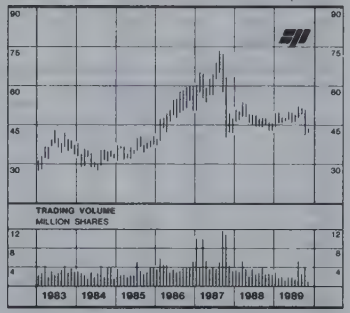
This company has interests in specialty chemicals, aerospace and defense related goods, and polypropylene film and fiber products. In 1987 HPC completed a 10-year program to eliminate its exposure to petrochemicals. Earnings over the past several years were impacted by heavy development costs for new business and missile programs, and some improvement is expected in 1990.

Current Outlook

Share earnings for 1990 are projected to approximate the $3.50 estimated for 1989.

Dividends at $0.56 quarterly are the minimum expected.

Earnings for 1990 are expected to benefit from continued gains in the chemicals businesss with strong demand for several major products. Further improvement is expected in the aerospace segment as the Titan, Trident and Delta rocket programs begin to move into the production stages and with the sale of an underperforming business. The film and fiber businesses should benefit from the decline in polypropylene costs but the loss of a major film customer will limit results. Interest expense will likely remain high. Planned asset sales may impact reported earnings.



Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	739	662	667	645

	E3.50	2.55	14.74	4.02

Important Developments

Oct. '89— HPC said that third-quarter earnings included a nonrecurring gain of $0.28 a share. HPC said that despite the apparent strength of the earnings, it was disappointed in a number of business unit operating results and income from equity companies. Resins profitability was impacted by continuing difficulties in the start-up of a new wood resin extraction facility. While aerospace profits doubled from the 1988 level, it continued to be affected by development costs related to several missile contracts and the impact of a plant fire. Engineered polymers profits were affected by the loss of an important portion of the film business. Disappointing equity income reflected lower income from a Mexican affiliate. HPC planned to divest its electronic and printing products business (annual sales in excess of $80 million), and was assessing the future of its aircraft and electronic products segment ($275 million).

Next earnings report expected in late January.

Business Summary

Hercules is primarily a producer of a diversified line of chemicals and allied products. Industry segment contributions (profits in million $) in 1988:

	Sales	Profits
Specialty chemicals	46%	$113
Aerospace	38%	62
Engineered polymers	14%	14
Other	2%	-34

Foreign operations contributed 23% of sales and 65% of profits in 1988.

Specialty chemicals include resins, rosin esters, paper chemicals, electronic chemicals, photoresists, coupling agents, peroxides, flavors, food ingredients, fragrances, nitrocellulose, pectin, and fatty acids used in adhesives and sealants, automotive, construction, electrical, lubricants, printing, rubber, household products, food, textile, perfume and personal care, paint, ink, graphic arts, and furniture.

The Aerospace segment includes solid propellant rocket motors and components, graphite fibers, composite structures, electromechanical and electronic equipment, and smokeless powders for the defense, aerospace, and sport markets.

Engineered polymers include polypropylene films, fibers and containers, synthetic pulp, and Metton reaction molding systems for the food packaging, textiles, upholstery, carpeting, disposable personal hygiene products, recreational, medical, automotive, and pharmaceuticals markets.

Dividend Data

Dividends have been paid since 1913. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Hershey Foods

NYSE Symbol HSY Options on ASE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 21'89	1989					
34⅞	36⅛-24¾	19	0.78	2.2%	A+	1.11

Summary

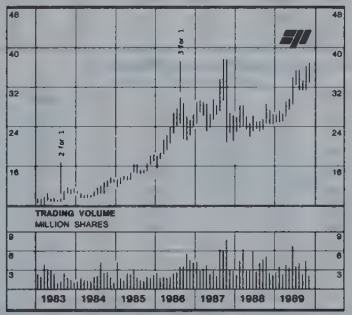
Hershey is the nation's leading producer of chocolate and confectionery products, and the second largest pasta maker. Earnings from continuing operations should remain in a solid uptrend in 1990 on improved contributions from the RJR Nabisco and Cadbury confectionery acquisitions. The proposed buyout of General Foods' Ronzoni pasta business, which is pending Justice Department approval, would raise HSY's 18% share of U.S. pasta markets to 27%.

Current Outlook

Earnings for 1990 are expected to rise 20%, to $2.35 a share from 1989's anticipated $1.95.

The dividend, which was raised 11% with the September, 1989 payment, should remain at $0.19½ quarterly.

Profits from the chocolate and confectionery segment for 1990 should again trend higher, reflecting successful rollout of the new Symphony chocolate bar. Volume-based increases in plant efficiency and improved contributions from the RJR Canadian candy and nut and Cadbury Schweppes' U.S. candy businesses should also aid earnings growth, along with stable cocoa, flour and packaging costs. An increase in cash flow from operations augurs well for debt reduction and a high degree of financial flexibility.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	572	495	590
Jun.	---	485	403	498
Sep.	---	682	598	680
Dec.	---	---	672	666
	---	---	2,168	2,434

Sales for the nine months ended October 1, 1989 increased 16%, year to year, reflecting strong unit volume gains from the Cadbury acquisition, and from established brands. Gross margins widened on lower commodity costs, but higher acquisition-related selling and marketing costs limited the gain in operating income to 14%. With interest expense substantially lower, however, net income from continuing operations advanced 19%. Earnings per share were $1.30, compared with $1.09, which excludes income related to discontinued operations of $0.77.

Dec.	E0.80	E0.65	0.51	0.45
	E2.35	E1.95	1.60	1.64

Important Developments

Nov. '89— HSY said that it was negotiating a definitive agreement with General Foods Corp. for purchase of Ronzoni Foods' dry pasta, pasta sauce and cheese businesses, which had annual sales of some $80 million in 1988. The transaction was under review by the Department of Justice. HSY holds an 18% share of U.S. pasta markets, Ronzoni a 9% share.

Next earnings report expected in late January.

Business Summary

Hershey is a leading producer of chocolate and confectionery products and makes pasta. The company acquired RJR Nabisco's Canadian confectionery business in 1987 for $163 million. In 1988 Hershey bought Peter Paul/Cadbury's U. S. confectionery operations for $270 million and sold the Friendly Ice Cream restaurant chain for $375 million.

The company manufactures chocolate and confectionery products. Principal brands include Hershey's almond bars, chocolate chips, milk chocolate bars, cocoa and syrup; Hershey's Kisses chocolates; Hershey's Miniatures bars; Kit Kat wafer bars; Mr. Goodbar chocolate bars; Reese's Pieces candies; Rolo caramels in milk chocolate; Skor toffee bars; Y&S Twizzlers licorice; and Whatchamacallit bars. Hershey's chocolate milk is produced and sold under license by independent dairies.

HSY also makes pasta products, including San Giorgio, Skinner, Delmonico, Light 'n Fluffy and American Beauty, and owns Petybon, a Brazilian maker of pasta, biscuit and margarine products.

Dividend Data

Dividends have been paid since 1930. A dividend reinvestment plan is available.

Hewlett-Packard

NYSE Symbol HWP Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 5'89	1989					
50	61½-48	14	0.42	0.8%	A+	1.35

Summary

Hewlett-Packard manufactures a broad array of electronic instruments and computer systems. In May, 1989 HWP acquired Apollo Computer for about $470 million, effectively raising its share of the rapidly growing workstation market to about 30%. Earnings for fiscal 1989 should show only a small gain with dilution from the acquisition and pressure on margin due to a shift in distribution channels, but a healthy increase in earnings is expected in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending October 31, 1990 are projected to rise to $4.00 a share from the $3.48 estimated for fiscal 1989.

The dividend was increased 23.5%, to $0.10½ quarterly from $0.08½, with the October, 1989 payment.

Revenues for fiscal 1990 are projected to rise about 15% with increased production of the Precision Architecture computer systems, continued strong demand for industry standard personal computers, workstations, printers and networking products, and the acquisition of Apollo. Margins are likely to remain under pressure, reflecting the product mix shift toward personal computers and peripherals, the shift to sales through dealers, and sluggish demand for high-end minicomputers. The acquisition of Apollo should dilute earnings by about 5%. Interest expense will be significantly higher and some $350 million of goodwill associated with the Apollo acquisiton will be amortized over 10 years.

Oct.	---	2,709	2,279	1,933
	---	9,831	8,090	7,102

Revenues for the nine months ended July 31, 1989 advanced 20%, year to year, led by a 28% sales gain in peripherals and network products, a 20% advance in MDIM revenues, and a 15% increase in revenues from service for equipment, systems and peripherals. Gross margins narrowed sharply, but other expenses were well controlled. However, interest income fell substantially while interest expense increased, and pretax income dropped 0.2%. After taxes at 28.0%, versus 29.4%, net income was up 1.7%. Share earnings were $2.48 on 4.5% fewer shares, against $2.33.

Important Developments

Oct. '89— HWP reduced prices on its HP 9000 model 855S computer by 29% and the HP 9000 model 850S computer by 20%. HWP said the action reflected its intention to be the leader in the UNIX system minicomputer market.

Sep. '89— HWP announced a four-page-per-minute LaserJet IIP printer priced at $1,495.

Next earnings report expected in late November.

Business Summary

Hewlett-Packard produces a broad range of electronic instruments and systems for measurement, analysis and computation. Foreign operations provided 52% of revenues in fiscal 1988.

HWP's measurement, design, information and manufacturing (MDIM) equipment (39% of fiscal 1988 revenues) includes test and measurement instruments, small to medium-scale computers and handheld calculators. Computers include the HP 1000, designed for factory automation and high-speed data acquisition; the HP 3000, which runs the proprietary MPE operating system and is sold for business applications; and the 9000 line of UNIX-based technical computers, including workstations. Both the 3000 and 9000 families are based on HWP's Precision Architecture reduced instruction set computing (RISC) design. HWP also sells VECTRA IBM-compatible personal computers and a portable computer. In May, 1989 HWP acquired Apollo Computer, a vendor of UNIX workstations, for $470 million. Apollo had revenues of $554 million in 1988.

Peripherals and network products (29%) include video displays; a variety of line, desktop and workstation printers, including the Thinkjet and Laserjet; plotters; magnetic disc and tape drives and network products. HWP also services its equipment, systems, and peripherals (19%).

Medical electronic equipment and service (7%) products perform patient monitoring, diagnostic, therapeutic and data-management functions.

Analytical instrumentation and service (5%) includes gas and liquid chromatographs, mass spectrometers, and spectrophotometers.

Electronic components (3%) include microwave semiconductor and optoelectronic devices sold primarily to original equipment manufacturers.

Hilton Hotels

NYSE Symbol HLT Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 20'89	1989					
98	115½-48⅜	40	1.00	1.0%	A-	0.75

Summary

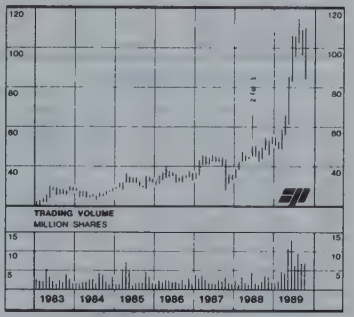
Hilton Hotels owns, manages and franchises more than 260 hotels in the U.S., and derives a sizable amount of revenues and earnings from its gaming business, which includes three casino/hotels in Nevada. HLT's board of directors recently authorized retention of financial advisors, which could lead to at least a portion of the company being sold.

Current Outlook

For the company as currently constituted, earnings for 1990 are estimated at $3.10 a share, up from the $2.45 expected for 1989.

A dividend of $0.25 quarterly is the minimum expected.

For the company as currently constituted, future revenue growth is expected to be fueled, in part, by a major investment HLT is making in Nevada gaming facilities, including a new casino/hotel expected to open in 1990; an increased international hotel presence; and development of two new hotel brands in the U.S. In recent years HLT has made a sizable investment in hotel restorations. A major restructuring of the company appears possible.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	225.1	214.2	201.2	162.4
Jun.	265.0	248.9	224.0	194.3

Important Developments

Oct. '89— HLT's stock fell sharply on October 13, as takeover-related stocks were particularly hard hit in the stock market's plunge that day. However, HLT's shares subsequently recovered a portion of their lost value. The perception of HLT as a takeover or restructuring candidate has been reinforced by HLT's board of directors having authorized a committee to retain financial advisors, who would assist the board in evaluating strategies to maximize shareholder value. It appears that at least a portion of HLT may be sold. The board's authorization followed a distribution of 13.6 million HLT shares (see Finances), which resulted in HLT Chairman Barron Hilton now controlling about 25% of HLT's shares. Meanwhile, HLT is constructing a new casino/hotel in Laughlin, Nev.

Next earnings report expected mid-January.

Business Summary

Hilton Hotels owns and manages hotels throughout the U.S., and franchises the Hilton name to other hotel operators. HLT is expanding its international presence with its Conrad International unit, and has a sizable gaming segment.

As of February, 1989 HLT operated 14 hotels (including three gaming facilities) which it fully owned or leased, and managed 34 hotels which were partly or wholly owned by others. Another 222 hotels were operated under the Hilton name by franchisees. HLT's 270 properties, including two outside the U.S., had a total of about 95,000 rooms. Fully owned non-casino hotels included the Waldorf-Astoria in New York City and Palmer House in Chicago. In 1988, HLT's non-casino hotel business had operating profit of $115.1 million. HLT is developing two new hotel brands—Hilton Suites and CrestHil by Hilton.

HLT gaming properties include three wholly owned casino/hotels in Nevada and a partly owned facility which HLT manages in Australia. In 1988, HLT had operating profit of $128.6 million from its gaming segment. Expansion plans included a new casino/hotel in Laughlin, Nev., and expansion of the Flamingo Hilton (Las Vegas) and Reno Hilton. Also, HLT was refurbishing the Las Vegas Hilton.

Finances

In approximately May 1989, 13.6 million HLT shares previously held by the estate of Conrad N. Hilton were distributed to several entities. Of the total, 4.05 million were distributed to Chairman Barron Hilton, 5.51 million to the Conrad N. Hilton Foundation, and 6.0 million to Barron Hilton as trustee of a charitable remainder trust.

HLT was expecting to spend more than $300 million in 1989-90 on an expansion of its gaming segment, including construction of a new casino/hotel and expansion or refurbishment of several others. HLT has recently made sizable capital investments in its non-casino hotel business.

Summary

This large Japanese company manufactures a wide range of products, including electrical and electronic equipment, industrial machinery and consumer appliances. Sales outside Japan accounted for 23% of sales in fiscal 1988-9. In response to pressures resulting from the strength of the yen, HIT has directed efforts toward reducing costs, raising productivity, and increasing overseas production of products that have a high dependency on exports.

Business Summary

Hitachi is Japan's largest diversified manufacturer of electronic and electrical products. Sales by product line in the past two fiscal years:

	1988-9	1987-8
Power systems & equipment	14%	15%
Consumer products	16%	17%
Information & communication systems, and electronic devices	32%	33%
Industrial machinery and plants	16%	17%
Wire & cable, metals, chemicals, and other	22%	18%

Sales outside Japan accounted for 23% of sales in fiscal 1988-9, versus 25% the year before.

Power systems and equipment include nuclear, hydroelectric, and thermal power plants; water, steam, and gas turbines; generators, boilers, transformers, circuit breakers, motors, control equipment, switchboards and automobile parts.

Consumer products include TV sets, hi-fi audio equipment, radios, cassette tape recorders, video tape recorders and cameras, room air conditioners, refrigerators, washing machines, microwave ovens, space heating and warming appliances, vacuum cleaners, kitchen appliances, lighting fixtures, dry batteries and audio and video tapes.

Information and communication systems and electronic devices include computers, related terminals and peripherals, magnetic disks, Japanese word processors, telephone exchanges, facsimile, broadcasting and medical electronics equipment, picture tubes, CRT and liquid crystal displays, test and measurement equipment, analytical instruments, integrated circuits, and semiconductors.

Industrial machinery and plants include compressors, pumps, blowers, rolling mill equipment, chemical plants, tonnage oxygen plants, construction machinery, cranes, elevators, escalators, industrial robots, refrigeration and environmental control equipment and locomotives.

Wire and cable, rolled copper products, optical fiber cable, special steels, ceramic materials and rollers for rolling mills are also produced.

Important Developments

Nov. '89— The company said that it expected net sales for fiscal 1989-90 to approximate 7.0 trillion yen (US$51.6 billion) and believed net income would be about 210.0 billion yen (US$1.6 billion).

Next earnings report expected mid-June.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
73	89-26⅜	22	None	None	B+	1.54

Summary

The sale of this major hotel and gaming company's Holiday Inn business to Bass plc for about $2 billion (net) is expected to be completed in January 1990. HIA shareholders are expected to receive a special dividend of about $35 a share, an equity interest in Bass, and an equity interest in HIA's remaining businesses, which are to be spun off under the name Promus Corp.

Current Outlook

Assuming completion of pending transactions, earnings for 1990 of a spun-off successor company to HIA are estimated at roughly $2.00 a share. Earnings for 1989, for HIA as currently constituted, may total about $3.60 a share.

A special dividend of about $35 a share is expected in connection with HIA's pending sale of its Holiday Inn business.

In 1990, a successor company to HIA is expected to derive the bulk of its profit from gaming. The company's three non-gaming lodging chains offer long-term growth opportunities, but represent a relatively small part of HIA's historic profit from lodging. Although the pending sale of the Holiday Inn unit will enable existing debt to be largely eliminated, the expected payment of a special dividend may result in the successor company having more than $900 million in debt.

Important Developments

Oct. '89— HIA said that British company Bass plc's acquisition of the Holiday Inn lodging chain was expected to be completed in January 1990. Essentially, Bass is buying HIA's Holiday Inn business for about $2 billion (net), and the remaining assets of HIA are to be spun off into a new, publicly traded company called Promus Corp., which will contain HIA's gaming operations, plus the Embassy Suites, Hampton Inn and Homewood Suites lodging businesses. HIA shareholders are expected to receive stock in Promus, plus a special dividend of about $35 a share and an equity interest in Bass which would be worth about $4.65 per HIA share. Meanwhile, in 1989's first three quarters, HIA's gaming profit was up 6.5%, year to year, while hotel profit (before asset sales) was down less than 1%, as the number of hotels owned by HIA has declined.

Next earnings report expected in mid-February.

Business Summary

Holiday Corp. (formerly Holiday Inns) and its licensees constitute one of the world's largest lodging businesses. HIA's is also a major gaming company, with hotel/casinos in Atlantic City, Las Vegas, Lake Tahoe and Reno. Business segment contributions (excluding gains on property sales) in 1988:

	Revs.	Profits
Hotel	50%	48%
Gaming	49%	51%
Other	1%	1%

HIA's lodging concepts include Holiday Inns, of which there were 1,592 properties (mostly franchises) in operation at December 30, 1988. HIA sold a portion of its Holiday Inn business to Bass plc for about $450 million in May 1988, and, as of September 1989, was planning to sell the remainder to Bass for a net price of about $2 billion. Also, HIA's Embassy Suites lodging brand (94 properties open as of August 1989) is the leader in the all-suite hotel segment, and HIA's Hampton Inn brand (198 properties) is a fast-growing limited-service hotel chain. In 1988, the Embassy Suites and Hampton Inns chains had total systemwide revenue of about $663 million. Also, HIA is reentering the extended-stay lodging segment with the Homewood Suites brand, under which five hotels are expected to be open by year-end 1989. HIA's revenues from the Embassy Suites, Hampton Inns and Homewood Suites chains in 1988 totaled $80.6 million.

HIA is one of the largest U.S. gaming companies. Its Harrah's business has four casino/hotels and a fifth casino in Nevada and one casino/hotel in Atlantic City. HIA's newest gaming facility opened in Laughlin, Nev., in August 1988. Sizable expansions of this facility and HIA's Las Vegas casino/hotel have been undertaken. In 1990, HIA is expected to be facing competition from major new casino/hotels in Las Vegas and Atlantic City.

Dividend Data

As part of a recapitalization plan, HIA paid a special dividend of $65 a share on April 22, 1987 Under a plan announced in August 1989, a special dividend of $35 a share is expected in the near future. Regular quarterly dividends were discontinued in December 1986.

Summary

This holding company's principal subsidiary sells life insurance and accident and health insurance in six Middle Atlantic states and the District of Columbia. An aggressive stock buyback program continued in the first quarter of 1989, with the repurchase of 396,800 Class B common shares for $11.8 million.

Business Summary

Home Beneficial Corporation was incorporated in 1970 as the holding company for Home Beneficial Life Insurance Co., through which it sells life and accident and health insurance in six Middle Atlantic states and the District of Columbia.

Contributions to total revenues in recent years were:

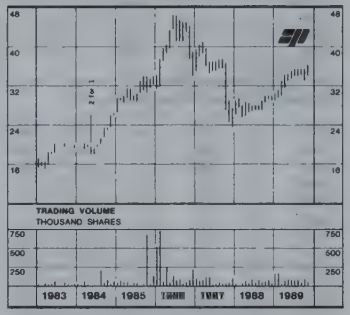
	1988	1987	1986
Premium income	55%	56%	55%
Net investment income	45%	44%	45%

The life company sells group life insurance and substantially all forms of ordinary insurance, including universal life, whole life, term, endowment, annuities and retirement income, together with accidental death and disability riders. Prior to 1980, the company also sold weekly premium industrial life insurance. Policies are sold through 1,350 full-time agents.

New insurance written in 1988 amounted to $779.8 million, down 22% from $994.1 million in 1987, and was divided: 95% ordinary individual (78% permanent and 17% term) and 5% group.

Of the $6.43 billion of life insurance in force at 1988 year-end, 54% was ordinary individual (45% permanent and 9% term), 7% was industrial individual and 39% was group. Life insurance and annuities accounted for 94% of premium income in 1988, while accident and health insurance contributed the remaining 6%.

The company's investment portfolio totaled $960 million as of December 31, 1988, and consisted of 43% fixed income, 44% mortgage loans, 5% policy loans, 6% short-term investments and 2% equity securities. The return on invested assets before income taxes was 9.18% in 1988 (9.12% in 1987).



The life company reinsures several group life programs and assumes reinsurance on a facultative basis from two other life companies.

Important Developments

Nov. '89— The company said that results for the first quarter of 1990 will be affected by adoption of FAS 96, which will result in a charge of $8.5 million ($0.82 a share), because of an increase in deferred income tax expense, and by the pending sale of its 50% interest in a Richmond, Va., shopping center, which will result in an after-tax gain of some $32 million ($3.09).

Nov. '89— The company adopted FAS 97, as required, which had the effect of decreasing income for the first nine months of 1989 and 1988 by $237,878 ($0.02 a share) and $510,010 ($0.05), respectively, and resulted in a cumulative reduction of $15,436,225 ($1.49) in retained earnings at December 31, 1988.

Next earnings report expected in mid-February.

Summary

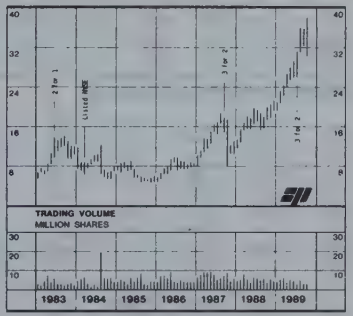
This company operates a chain of retail warehouse-type stores in the Sunbelt, selling a wide variety of building materials and home improvement products for the do-it-yourself and home remodeling markets. Earnings are expected to advance sharply through fiscal 1990-91, aided by a strong home improvement market, more stores in operation and wider margins. The stock was split 3-for-2 in June, 1989.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $1.70 a share, up from the $1.35 estimated for fiscal 1989-90.

Dividends should remain at $0.03 quarterly.

Aided by a strong do-it-yourself (DIY) home improvement market, revenues should continue to advance sharply through fiscal 1990-91, reflecting on-going store expansion and gains in comparable store sales. Margins are expected to widen as volume efficiencies and a more favorable product mix outweigh higher other operating costs. Profits will be penalized by increased interest expense. In the event of an economic downturn or housing slump, the DIY market, while not recession resistant, should be bolstered by certain counter-cyclical behavior by cost-conscious consumers who save money by maintaining and repairing their own homes.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	642	447	334	223
Jul.	704	518	381	263
Oct.	---	510	364	252
Jan.	---	525	375	274
	---	2,000	1,454	1,011

Sales for the six months ended July 30, 1989 rose 39%, year to year, reflecting a comparable store sales gain of 11% and more stores in operation. Gross margins widened, owing to a better product mix and the stabilizing of pricing related to HD's conversion to an everyday low pricing policy, but profits were penalized by higher selling and store operating costs, and larger interest expense. Pretax income was up 39%. After taxes at 39.1%, versus 39.0%, net income also rose 39%, to $0.72 a share from $0.53 (adjusted).

	E1.35	1.00	0.75	0.40

Important Developments

Aug. '89— In line with its goal of expanding the number of stores by approximately 25% per year, HD said that it had opened six units in the first half of fiscal 1989-90, bringing to 102 the number of stores in operation at July 31. The company expects to open about 18 new stores during the remainder of fiscal 1989-90 and plans to open some 30 stores during fiscal 1990-91.

Next earnings report expected in late November.

Business Summary

Home Depot operates retail warehouse-type stores selling a wide assortment of building materials and home improvement products primarily to the do-it-yourself and home remodeling markets. As of January 29, 1989 HD was operating 96 stores in about 24 metropolitan areas in 11 Southeastern, Southwestern, West Coast and Northeastern states.

Sales by product group in fiscal 1988-9 were plumbing, heating, and electrical supplies 29%; building materials, lumber, floor, and wall coverings 31%; hardware and tools 12%; seasonal and specialty items 15%; and paint and furniture 13%.

Plumbing, heating, and electrical supplies includes rough plumbing supplies, sinks, vanities, kitchen cabinets, water heaters, basic electrical supplies, wiring, light fixtures, kitchen range hoods, bath fans, and decorative ceiling fans.

Building materials, lumber, and floor coverings include dimensional lumber, plywood, particle board, insulation, windows, doors, storm windows and doors, roofing, paneling, vinyl flooring, hardwood floors, shelving, and ceiling tile.

Hardware and tools includes hand tools, power tools, nuts and bolts, and other hardware.

Seasonal and specialty items includes garden supplies and tools, plants, lawn mowers, fireplaces, and fireplace equipment.

Paint and furniture includes paint, painting supplies, wallpaper, shutters, unfinished furniture, and storage shelving.

Dividend Data

Cash dividends were initiated in 1987.

Nov. 6'89	1989					
32⅛	47½-24½	6	0.20	0.6%	NR	1.10

Summary

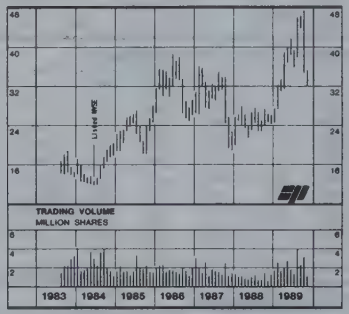
HomeFed Corp. is the holding company (formed December 30, 1988) for Home Federal Savings and Loan (San Diego), one of the largest S&Ls in the U.S., with total assets of almost $18 billion at September 30, 1989. HFD does business through a network of over 200 retail banking offices throughout California and lending offices in Florida, Georgia and Virginia. Profits for 1990 are expected to benefit from a wider spread, partially offset by a slightly reduced contribution from real estate development.

Current Outlook

Earnings for 1990 are estimated at $5.75 a share, up from the $5.10 expected for 1989.

Dividends at $0.05 quarterly are the minimum expectation.

Residential mortgage lending activity is expected to decline modestly in 1990, primarily reflecting HFD's goal of restraining asset growth to bolster its capital ratios and the thin margins available in mortgage lending. Spreads (2.67% at September 30, 1989) should widen through the third quarter, based on projections calling for interest rates to bottom just before mid-1990. Real estate profits, a consistent contributor in past years, may decline slightly with a weaker California real estate market. Credit quality is beneath peer group averages, but no major deterioration is anticipated. General and administrative expenses should increase in line with inflation. Gains on loan and securities sales will probably be lower, as HFD will probably retain its production to grow future interest income.



Review of Operations

Net interest income for the nine months ended September 30, 1989 rose 1.6%, year to year, aided by growth in earning assets. The provision for loan losses was 30% higher, at $39 million. Fees were up 64% and other operating income rose 38%. General and administrative expenses rose 15%. Gains on loan and security sales fell sharply ($9.7 million, versus $22.2 million), while the contribution from real estate operations improved to $56.4 million from $29.7 million. Pretax income fell 7.7%. After taxes at 40.0%, versus 41.6%, net income increased 4.4%. Share earnings were $3.82, against $3.71.

	E5.10	5.22	4.69	4.87

Important Developments

Oct. '89— The company announced that its principal subsidiary, Home Federal Savings and Loan, had converted from a federal S&L to a federal savings bank and changed its name to HomeFed Bank. The move was made in an attempt by HFD to distance itself in the eyes of consumers from the well-publicized problems of the savings and loan industry. HFD has a definitive agreement to buy Antelope Valley Savings and Loan (assets of $279 million) for about $7 million. Earlier, HFD said that it would purchase eight offices from another thrift.

Sep. '89— In HFD's internal newspaper, president Robert Adelizzi responded as follows to the question: Are we vulnerable to a takeover now that the thrift bailout legislation has become law?: "My point is that we should take speculation like this with a big grain of salt."

Next earnings report expected in early February.

Business Summary

HomeFed Corp is the parent of Home Federal Savings and Loan Association, one of the largest savings and loan associations in the U.S., with assets of $17 billion at December 31, 1988. HFD operates through a network of 194 branch offices, including 56 offices in San Diego County and 138 additional offices throughout California and loan production offices in Virginia, Georgia and Florida. Through HomeCapital Corp. Inc., the company is significantly involved in real estate development activities.

Gross loans receivable amounted to $12.82 billion at year-end 1988, against $10.82 billion a year ago, and were divided as follows:

	1988	1987
Residential:		
One family	51%	48%
Two-to-four units	4%	3%
Over four units	18%	24%
Commercial & industrial	22%	20%
Land loans/developed lots	5%	5%

The one-year gap (excess of liabilities that would reprice before assets in one year) was -4.49% of assets at year-end 1988. Nonearning assets and real estate owned was 2.12% of total assets, down from 2.30% in 1987.

Deposits totaled $12.21 billion at 1988 year-end and were apportioned as follows: checking and limited access 22%, term accounts six months to a year 25%, term accounts one year to two years 13%, jumbo CD's 16%, and 24% other.

The yield on earning assets in 1988 was 10.58% (10.03% in 1987) and the cost of funds was 7.87% (7.42%), for a spread of 2.71% (2.61%).

Dividend Data

Dividends were initiated in 1986.

Summary

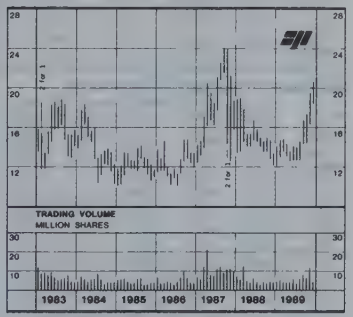
Homestake is a leading U.S.-based gold producer with interests in North America, Australia and Chile. HM also mines lead, zinc and copper in Missouri. Gold activities now provide most of operating profits, but base metals operations also have a significant impact on earnings. Based on expansion plans and acquisitions in Australia and Canada, HM may raise its annual gold output to 1.17 million ounces in 1990 from 1989's estimated 1.02 million.

Current Outlook

Assuming gold prices increase moderately, earnings for 1990 are projected at $0.45-$0.55 a share, up sharply from 1989's estimated $0.20 from operations.

Dividends should continue at $0.05 quarterly.

Revenues for 1990 may advance significantly, reflecting anticipated dramatically greater Australian gold production, a full year's gold output from Wood Gulch and Mineral Hill, initial production at Golden Bear, and expected higher gold prices (versus 1989's estimated average of $380 an ounce). Gold profits will probably rise sharply as a result of the greater gold receipts and a lower-cost mix of output. Depressed uranium activities are likely to sustain smaller losses on the December, 1989 suspension of conventional mining. However, earnings from base metals will probably decrease substantially on expected lower quotes.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	98.6	96.8	75.3	79.0
Jun.	114.2	106.6	104.2	89.0
Sep.	110.4	103.6	87.1	81.7
Dec.	---	125.7	249.7	97.9
	---	432.6	516.2	347.7

Revenues for the first nine months of 1989 rose 5.7%, year to year (1988 restated), mainly on increased gold output (716,400 ounces versus 575,100). However, gold profits fell sharply, reflecting lower quotes ($378 an ounce versus $445), and pretax income was down 69%, despite moderately higher base metals earnings. After taxes at 40.5% versus 26.6%, and lower minority interest ($100,000 against $954,000), income from continuing operations declined 74%, to $0.13 a share from $0.51, before income from discontinued lines of $0.18 versus a loss of $0.02, and a special credit of $0.03 in 1988.

	E0.20	0.65	1.51	0.23

Important Developments

Oct. '89— HM's Felmont Oil unit agreed to sell substantially all of its oil and gas business for some $100 million. HM would retain a 25% interest in the Round Mountain mine, acquired in the acquisition of Felmont, and Felmont's 16.7% of a recently discovered 67 million ton sulphur deposit. In April Homestake Gold of Australia closed an agreement with Gold Mines of Kalgoorlie which would lead to development of Australia's largest open-pit gold mine (the Super Pit).

Next earnings report expected in late February.

Business Summary

HM is a leading U.S.-based gold producer and also produces other natural resources. Business segment contributions (income in million $) in 1988:

1988	Revs.	Op. Inc.
Gold	79%	$90.2
Base metals	8%	29.8
Oil & gas	11%	1.3
Uranium	2%	-5.7

HM's share of 1988 gold output was 781,500 ozs., versus 1987's 677,700. Homestake mine (S.D.) produced 390,162 ozs. in 1988. Starting in 1989, a $25 million oxide circuit at McLaughlin mine (Cal.) should boost output 50,000 ozs. for at least five years; 1988's production was 203,827. HM's 25% share of output from Round Mountain mine (Nev.), which was 58,594 ozs. in 1988, should rise to 85,000 in 1989 on completion of expansion. In April, 1989 80%-owned Homestake Gold of Australia (HGA) became 50% owner of Kalgoorlie Consolidated Gold Mines, which combined various operations in the Kalgoorlie gold district. By the early 1990s, this deal may allow HM's share of HGA's output to increase to over 300,000 ozs., versus 1988's 94,227. In 1988 HM bought a 10-year lease on El Hueso mine (Chile), which produced 34,600 ozs. for HM's account, and was expected to contribute 72,000 in 1989. Construction of Wood Gulch mine (Nev.) was completed in late 1988 and 1989 output was estimated at 14,000 ozs. HM's 50%-owned Mineral Hill mine (Mont.) was completed in mid-1989 and was expected to contribute 21,000 ozs./year. In 1988 HM acquired 73% of North American Metals, owner of 50% of the Golden Bear mine (B.C.), which was expected to begin production at year-end 1989 at a rate of 65,000 ozs./year.

The Doe Run Co. (42.5% owned) is the largest integrated lead producer in North America. HM's share of 1988 output was 100,000 tons of refined lead products, and 20,000 tons of zinc and 36,000 tons of copper concentrates. In December, 1989 HM suspended conventional uranium mining and placed the mill at its Grants, N.M. site on standby.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Honda Motor

NYSE Symbol HMC Options on Phila (Jan-Apr-Jul-Oct)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 7'89	1989					
25	35-24½	20	[1]0.167	[1]0.7%	NR	0.59

Summary

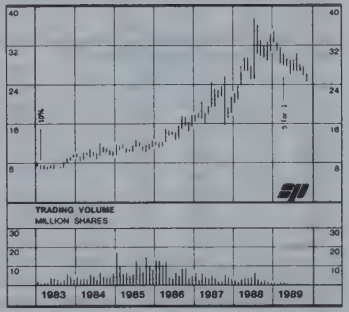
Honda Motor is the third largest Japanese automobile manufacturer and the world's largest producer of motorcycles. Honda is expanding its production of vehicles in the U.S. and reducing production costs in Japan to offset the effects of fluctuations in the value of the yen against the dollar and other currencies. Following a 5-for-1 split of the American Depositary Shares only, each ADS represents two Honda common shares instead of 10.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 may approximate $1.25 per ADS, versus the $1.49 (adjusted) of fiscal 1988-9.

Dividends declared in the past 12 months totaled approximately $0.167 (adjusted) per ADS.

Worldwide automobile sales should rise in fiscal 1989-90, reflecting higher cars sales in Japan following a reduction of the Japanese commodity tax on cars as of April, 1989. Sales of motorcycles and power products should continue to decline. Despite a more favorable product mix as demand for higher-margin luxury cars continues to increase in the U.S. and Japan, and cost reductions underway to offset the effect of the strong yen, higher interest expense should result in lower earnings.



[2]Oper. Revenues (Billion $)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	6.39	6.48	[3]6.97	4.04
6 Mos. Sep.	12.93	12.49	[3]12.10	9.34
9 Mos. Dec.		19.93	---	12.96
12 Mos. Mar. ...		26.43	[3]27.24	18.75

Sales (in yen) for the six months ended September 30, 1989 were up 4.4%, year to year, reflecting increased automobile sales partially offset by lower motorcycle and power products sales. Following price increases in major overseas markets and cost cutting efforts, operating income rose 11%. Following sharply higher net interest expense, pretax income declined 26%. After taxes at 52.2%, against 47.6%, net income was down 33%. Earnings per ADS were $0.48, versus $0.70 (adjusted), both based on the September 29, 1989 exchange rate of ¥140 = $1.

[2]Earnings Per ADS ($)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	0.22	0.40	[3]0.38	0.33
6 Mos. Sep.	0.48	0.73	[3]0.69	0.61
9 Mos. Dec.		1.17	---	0.80
12 Mos. Mar. ...		1.49	[3]1.73	1.12

Important Developments

Nov. '89— In the first half of fiscal 1989-90 worldwide sales of automobiles rose 4.0% to 966,000 from 929,000 a year earlier, while motorcycle sales fell 2.7% to 1,490,000 from 1,532,000. Motorcycle sales were adversely affected by a new sales tax on scooters in Japan, while car sales were boosted by lower luxury car taxes.

Next earnings report expected in mid-February.

Business Summary

Honda is the third largest Japanese manufacturer of automobiles and the world's leading producer of motorcycles. Sales contributions by product lines in recent years (1987-8 adjusted):

	1988-9	1987-8
Automobiles	71%	69%
Motorcycles	10%	11%
Parts and other revenues	16%	16%
Power products	3%	4%

Honda products are manufactured and assembled at plants in Japan, the U.S., Canada, and Belgium. In fiscal 1988-9 Honda sold 1,903,000 automobiles (628,000 domestic and 1,275,000 overseas); 3,032,000 motorcycles (924,000 domestic and 2,108,000 overseas); and 1,543,000 power products (116,000 domestic and 1,427,000 overseas).

Honda markets cars under the Honda and Acura names. Acura is a line of up-scale luxury sedans which carry higher margins. The Honda line consists of smmall cars, Minitrucks and vans also are produced. Honda is building a second U.S. car manufacturing facility in Ohio. The plant's capacity will be 150,000 vehicles per year, with 70,000 units initially slated for export to the Far East.

Honda is the world's leading motorcycle manufacturer, with a market share estimated at more than a quarter of the free world total. Honda produces a broad line of motorcycle and scooter models and continues to develop new models.

Nonautomotive products include portable generators, powered agricultural machines, general purpose engines, and outboard motors.

Summary

Honeywell is a major manufacturer of automation and control systems for homes, buildings, industry and aerospace, and supplies munitions and defense electronics to the U.S. Government. As part of a restructuring program begun in late 1989, it plans to reduce its weapons businesses and sell part of its interest in a Japanese affiliate, using proceeds to repurchase 10 million shares. To improve margins, significant cost-cutting moves are under way. The dividend was recently raised 31%.

Current Outlook

Earnings for 1990 are projected at $7.75 a share, versus 1989's estimated $6.75, which excludes capital gains.

Dividends were raised 31%, to $0.68¾ quarterly from $0.52½, with the October, 1989 declaration.

Moderate growth in sales from continuing operations is expected for 1990. The home and building controls group should improve on a probable modest pickup in construction activity. Slight gains are also likely for industrial automation as systems sales offset softness in components. Commercial avionics should continue to boom, while slow gains for military programs develop. The major cost reduction programs now underway should benefit overall corporate margins. Interest expense should be lower. Shares outstanding should be reduced substantially.

Sales[1] (Million $)

Quarter:	1989	1988	1987	1986
Mar	1,663	1,738	1,483	1,151
Jun.	1,784	1,752	1,575	1,326

Important Developments

Oct. '89— HON completed the sale of 16% of the shares of Yamatake-Honeywell for about $280 million. Proceeds will be used for stock repurchases. A second sale of Yamatake-Honeywell stock was being negotiated.

Jul. '89— HON announced a program to enhance shareholder value and focus on the core controls business. Steps include: (1) reduction in dependence on the weapons business; (2) sale of a substantial portion of the 50% interest in Yamatake-Honeywell (see above), (3) open-market repurchase of up to 10 million shares; (4) improvement of $150 million in operating profit over 18 months through staff reductions of 4,000 and other measures; and (5) a 31% increase in the dividend (see Dividend Data).

Next earnings report expected in late January.

Business Summary

Honeywell is a major manufacturer of automation and control systems for the home, commercial building, industrial, aerospace, and defense markets. Contributions (profits in million $) in 1988:

	Revs.	Profits
Home & bldg automation/control	28%	$216
Industrial automation/control	20%	119
Space & aviation	26%	-142
Defense & marine	20%	84
Other	6%	-53

Foreign operations contributed 23% of revenues and 63% of operating profits in 1988. Government contracts and subcontracts represented 30% of total revenues.

The home and building automation and control segment makes and installs energy management systems, thermostats, fire and security controls, and other automatic environmental controls.

The industrial automation and control unit provides computerized-based systems and various products (instruments, programmable controllers, sensors) for industrial processing and manufacturing automation.

The space and aviation systems group provides control and guidance systems for commercial and military aircraft and space and satellite applications.

Defense and marine systems produce precision weapons, munitions and lightweight torpedos.

Other activities include marketing computers to the U.S. Government and design of integrated circuits.

Dividend Data

Dividends have been paid since 1928. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986

Summary

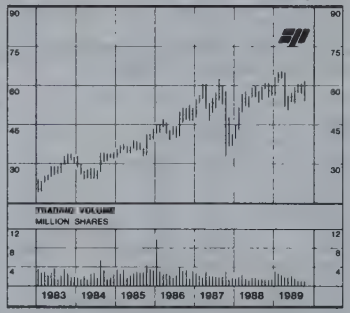
This holding company owns Household Finance, which makes personal and home equity loans to middle-income consumers for home improvement, education, debt consolidation, travel and leisure. It also provides insurance and commercial financial services. In April, 1989 HI shareholders received stock in three formerly wholly-owned manufacturing subsidiaries on the basis of one share of each subsidiary for every five HI shares held. Favorable earnings comparisons are expected for 1990.

Current Outlook

Earnings for 1990 are estimated at $6.60 a share, up from the $5.85 from continuing operations likely for 1989.

The $0.53½ quarterly dividend is the minimum expectation.

Revenues for 1990 are expected to rise strongly, reflecting an expanded range of consumer finance products, aggressive marketing, and acquisitions in the consumer banking area. Consumer finance receivables are expected to increase 12%-17%. Margins should narrow slightly with HI's emphasis on revolving real estate secured loans, which typically carry a lower yield, although credit quality should improve. Longer term, margins stand to benefit from HI's establishment of regional processing centers to automate the loan review and documentation process. Other income will be helped by the securitization of home equity loans. The divestiture of three manufacturing units may improve operating efficiencies.



Review of Operations

Net revenues for six months ended June 30, 1989 advanced 22%, year to year, reflecting gains in the consumer lending, commercial financial services, and life insurance segments. Margins narrowed somewhat, and the increase in pretax income was limited to 9.6%. After taxes at 37.8%, versus 38.5%, net income increased 11%. Share earnings were $2.59, compared with $2.35, before income from discontinued operations of $0.42, versus $0.91.

Important Developments

Oct. '89— HI said that it had filed a shelf registration with the SEC for $250 million of nonconvertible preferred stock. A registration statement relating to the offering has been filed with the SEC but has not yet become effective. Earlier, Donald Clark, chairman, reiterated that HI still expected earnings from continuing operations for 1989 to be 15% to 20% higher than those of 1988.

Aug. '89— As part of its strategy of broadening its funding sources and expanding its geographical presence, HI announced that it had acquired the following thrifts: Fedstar Savings Bank in Alexandria, Va., with assets of $360 million in August; Sharon Savings Bank in Maryland with assets of $260 million in July; and Land of Lincoln Savings and Loan in Illinois with assets of $950 million in June.

Next earnings report expected early November.

Business Summary

This company provides a broad range of financial services for individuals and businesses through consumer finance, consumer banking, commercial finance and insurance units. Manufacturing businesses were either spun off in early 1989 or accounted for as discontinued operations. Segment contributions in 1988:

	Revs.	Profits
Consumer finance & banking	77%	68%
Commercial finance	12%	24%
Life insurance	11%	8%

Household Finance Corp. makes cash loans, including home equity loans, to middle income consumers who require funding for home expansion, children's education, debt consolidation and other purposes. It is also engaged in retail installment sales finance. The company operates through 656 branch offices in the U.S., 118 in Canada and 75 in Australia. In 1988 the interest rate spread was 7.2%, down from 7.9% in 1987. Real estate secured loans amounted to about 55% of the total consumer finance portfolio of $12.8 billion at 1988 year-end. The company's three consumer banking units had assets of $7 billion at the end of 1988.

Commercial finance provides financing services including investments in leveraged leases, term preferred stocks, corporate finance, equipment loans and leases and real estate secured by loans on income-producing property.

The Alexander Hamilton Life Insurance Co., with $19.2 billion of life insurance in force (up 30% from 1987), provides credit life, credit accident and health, household contents and term insurance.

Dividend Data

Dividends have been paid since 1926. A dividend reinvestment plan is available. A "poison pill" stock purchase plan was adopted in 1984.

35¼	35⅞-26¾	13	2.96	8.4%	A-	0.49

Summary

This diversified utility holding company, serving the oil dependent region of the Texas Gulf Coast, derives its power requirements primarily from gas and to a lesser extent from coal. HOU is adding nuclear capacity through its 30.8% investment in the South Texas nuclear project. Near-term prospects will be impaired by rate proceedings associated with the South Texas nuclear project and the $1.3 billion acquisition of RCA Cablesystems Holding Co. (Rogers Communications U.S.A.) in March, 1989.

Current Outlook

Share earnings for 1990 are projected at $3.00, up from 1989's estimated $2.60, which includes a nonrecurring gain of about $0.42.

Rate proceedings for the South Texas project and dilution from the RCA Cablesystems acquisition are expected to preclude an increase in the $0.74 quarterly dividend in 1990.

Share earnings for 1990 are expected to benefit from higher rates, and increased kwh sales due to improved economic activity in the Houston area.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	806	809	777	796
Jun.	950	863	899	861
Sep.	1,142	1,108	1,136	1,101
Dec.	---	870	816	779
	---	3,649	3,628	3,536

Revenues for the nine months ended September 30, 1989 rose 7.3%, year to year, mostly reflecting higher kwh sales, and the addition of cable television sales in the 1989 period. However, nonrecurring gains from the sale of the oil and gas business and from deferred accounting for the South Texas nuclear project were more than offset by lower AFUDC and increased interest charges, and pretax income fell 3.6%. After taxes at 38.1%, against 26.7%, net income declined 19%. Share earnings were $2.28 on 5.1% more shares, compared with $2.95.

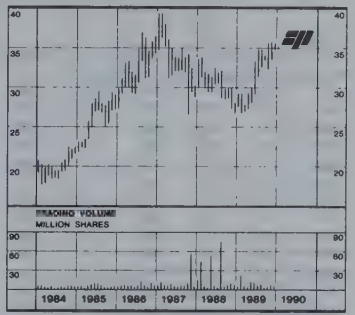
	E2.60	3.34	3.74	3.81



Important Developments

Nov. '89— HOU stated that until further regulatory action is taken, earnings will be adversely impacted by approximately $15 million per month due to costs associated with units 1 and 2 of the company's 31%-owned South Texas nuclear project (STP). HOU has requested approval of deferred accouting treatment for unit 2's costs and an extension of deferred accounting treatment for costs associated with unit 1. Separately, the Texas PUC staff recommended that with regard to HOU's pending rate case, the Commission disallowed $126 million in costs associated with STP units I and II. The Commission was expected to rule on the $432 million rate request by mid-1990. In anticipation of the rate ruling, HOU implemented approximately $227 million in increased electric rates, subject to refund pending the outcome of the rate request.

Next earnings report expected in late January.

Business Summary

Houston Industries is the holding company for Houston Lighting & Power Co., which supplies electricity along the Texas Gulf Coast. Electric operations accounted for 84% of revenues in 1988 and fuel sales and oil and gas activities 16%. Electric revenues by customer class:

Revenues	1988	1987	1986	1985
Residential	37%	36%	37%	35%
Commercial	24%	23%	24%	23%
Industrial	35%	33%	35%	38%
Other	4%	8%	4%	4%

Power requirements in 1988 were derived from gas 44%, coal and lignite 37%, nuclear 2% and cogeneration and purchases 17%. Peak load in 1988 was 10,422 mw and capability totaled 13,675 mw for a capacity margin of 24%.

In March, 1989 HOU's KBLCOM Inc. cable television unit purchased for about $1.3 billion (adjusted post-closing) RCA Cablesystems Holding Co. (Rogers Communications U.S.A.), which provides cable television service to some 558,000 subscribers in Texas, Minnesota, Oregon and California. KBLCOM has a 50% interest in Paragon Communications which serves some 735,000 subscribers in Texas, Arizona, Florida, New Hampshire, New York, Maine and California. The Cablesystems' purchase was financed with about 60% debt and 40% equity. Approximately half the equity was derived from HOU's sale of its oil and gas properties. HOU said that it expects the purchase to be cash positive in 1991 and earnings positive in 1993, and that the debt used in the acquisition will have been paid off by 1999.

Dividend Data

Dividends have been paid since 1922. A dividend reinvestment plan is available.

Summary

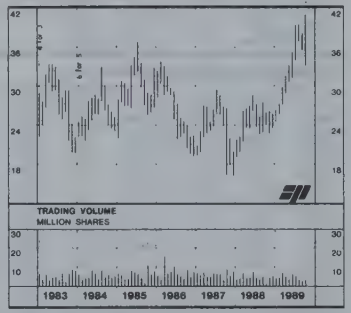
Humana is a leading investor-owned hospital management chain, with 84 hospitals located throughout the U.S. and abroad. The company also offers prepaid health care and indemnity insurance plans through its Group Health division. Recent earnings have benefited from a turnaround at the Group Health division, sharply higher outpatient revenues, and improved inpatient occupancy.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 are projected at about $2.90 a share, up from the $2.56 reported for fiscal 1989.

An increase in the $0.26 quarterly dividend is likely in the fourth quarter of fiscal 1990.

Revenues for fiscal 1990 should show another good gain, aided by continued strength in outpatient revenues, acquisitions, rate increases, and further improvement expected in inpatient utilization. Bolstered by a larger membership and cost control measures, much improved results are forecast for the Group Health division. Margins should be well maintained on the better volume.



Net Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	938	794	674	607

	2.56	2.30	1.86	0.56

Important Developments

Aug. '89— Revenues from Humana hospitals increased 12%, to $3.15 billion in fiscal 1989, reflecting an 8.1% rise in inpatient revenues (accounting for about 78% of hospital revenues) and a 27% increase in outpatient revenues. Modest gains were scored in patient days and admissions and occupancy at Humana hospitals edged up to 47.1% in 1988-9 from 46.5% in fiscal 1988. Group health revenues climbed 51%, to $1.09 billion (hospital revenues paid by Group Health eliminated in the consolidation were $153.7 million, versus $98.9 million). Pretax profits from Group Health unit totaled $12.9 million, versus a loss of $796,000 in fiscal 1988.

Aug. '89— The company filed with the SEC a shelf registration covering up to $400 million of unsecured debt.

Next earnings report expected mid-December.

Business Summary

Humana is a leading hospital management chain operating medical care facilities and group health insurance businesses. Contributions by business segment (income in million $) in fiscal 1988 were:

	Rev.	Income
Medical care facilities	80%	$559
Group health insurance	20%	-37

As of August 31, 1989 HUM owned and operated 84 hospitals with 17,576 beds, located in 20 states, London, England and Geneva, Switzerland. All hospitals, except for one psychiatric unit, provide general medical and surgical care.

During fiscal 1988 room and board accounted for about 21% of hospital revenues, inpatient ancillary services (laboratory, medication, etc.) 60%, and outpatient 19%. Patient days of care in fiscal 1988 totaled 2,987,900 (versus 2,995,300 in fiscal 1987) and occupancy was at a 46.5% rate (46.6% in fiscal 1987). Medicare accounted for about 39% of domestic hospital gross revenues in fiscal 1988; HUM's Group Health plans 7%; Medicaid and cost-based Blue Cross plans 6%; and charge-based Blue Cross, private insurance and other 48%.

The Group Health unit offers a variety of health benefit insurance plans for employee groups and Medicare beneficiaries, integrating those services with HUM's acute care hospitals. As of August 31, 1989 Group Health had about 926,900 members, versus 790,700 a year earlier.

Dividend Data

Dividends were initiated in 1976. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

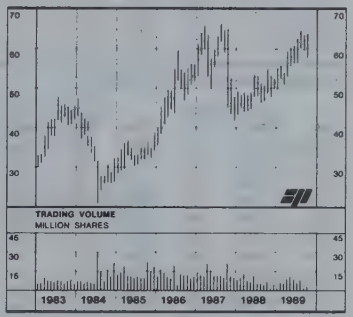
ITT is a widely diversified conglomerate. The company produces industrial goods, which include automative products and electronic components, while diversified services include hotel operations and insurance and finance subsidiaries. ITT also owns 37% of Alcatel N.V., a joint venture formed when ITT combined most of its worldwide telecommunications operations with those of Compagnie Generale d'Electricite of France.

Current Outlook

Including estimated "fresh start" tax benefits of $0.25 a share, earnings for 1989 are estimate at $6.35 a share, versus 1988's $5.99. Share earnings for 1990 could reach $7.10.

The $0.37 quarterly dividend is the minimum expectation.

Revenues are expected to advance moderately in 1989, led by higher sales of pulp and timber and automotive products. Further margin gains, as well as continuing profit improvements at Alcatel, N.V., are projected to be partially offset by a softening of the property-casualty insurance business.



Sales & Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	4.83	4.54	1.91	1.67
Jun.	5.22	4.96	2.19	1.91
Sep.	---	4.69	2.05	1.89
Dec.	---	5.16	2.40	2.13
	---	19.36	8.55	7.60

Revenues for the six months ended June 30, 1989 rose 5.7%, year to year, reflecting growth in all segments. Margins widened, and pretax earnings were up 14%. After taxes at 23.0% versus 19.8%, and minority interests, net income advanced 9.1%. Earnings were equal to $3.10 a share, up from $2.84 in the first half of 1988.

Important Developments

Aug. '89— ITT said insurance operating income declined substantially in 1989's first half, reflecting the p-c market downturn and higher storm-related claims. Defense profits were aided by higher volume and wider margins, while electronic components showed modest gains. Fluid technology profits were much better due to growth in volume and an acquisition. Automotive profits, while on target, seemed to be softening. Pulp and timber profits were up on favorable pricing and higher volume, while hotel profits were hurt by foreign exchange losses. Alcatel profits rose despite a stronger U.S. dollar. An $18 million ($0.12 a share) gain on the sale of European real estate also aided earnings. Partially offsetting these gains was a $28 million ($0.19) writedown of The Hartford's interest in Thomson McKinnon when it agreed to sell its interest in that securities firm.

Next earnings report expected in late October.

Business Summary

ITT is a widely diversified conglomerate. Segment contributions to revenues and profits in 1988:

	Revs.	Profits
Products:		
Automotive	14%	14%
Electronic components	6%	5%
Fluid technology	4%	6%
Defense technology	7%	6%
Pulp and timber	6%	14%
Services:		
Insurance	45%	29%
Finance	8%	14%
Communications	6%	4%
Hotels	4%	8%

ITT supplies components to automotive manufacturers; makes electronic products; produces fluid control systems; builds defense technology products; and owns pulp and timber operations through ITT Rayonier.

The Hartford Group offers group health and property-casualty insurance, while ITT Financial operates consumer and commercial lending operations. Other units offer long-distance telephone service and operate Sheraton Hotels.

ITT's worldwide telecommunications equipment operations were spun off into a 37%-stake in Alcatel N.V. in 1986.

Dividend Data

Cash dividends have been paid since 1951. A dividend reinvestment plan is available.

Nov. 28'89	1989					
29⅜	29⅜-22	13	1.86	6.3%	B+	0.40

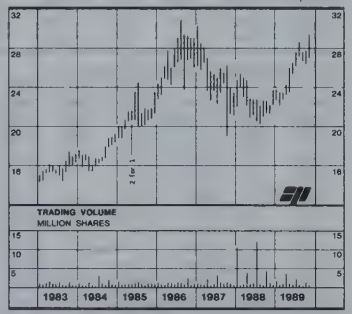
Summary

This utility provides electric service in Idaho and, to a much lesser extent, in eastern Oregon and northern Nevada. In a normal year about 66% of power generation is hydroelectric; most of the remainder is coal. Profits for the first nine months of 1989 rebounded sharply from 1988's abnormally low level, principally reflecting a return to near-normal streamflow conditions. Assuming normal weather conditions in 1990, a small earnings gain is expected.

Current Outlook

Earnings for 1990 could approximate $2.40 a share, up from the $2.30 projected for 1989.
Dividends are expected to continue at $0.46½ quarterly.

Assuming a continuation of normal streamflow conditions, slightly favorable earnings comparisons are expected for 1990 on the basis of modest rate relief granted in mid-1989, a stronger regional economy, growth in the customer base, improved operating efficiencies, and IDA's efforts to increase wholesale electric power sales. No additional rate relief will be needed in 1990. Pending legislation governing acid rain emissions should have a minimal effect on the company's operations.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	132.4	102.9	96.3	117.1
Jun.	119.1	98.4	98.4	98.3
Sep.	128.2	111.6	103.6	103.1
Dec.	---	99.4	96.3	90.3
	---	412.3	394.6	408.9

Operating revenues for the nine months ended September 30, 1989 advanced 21%, year to year, reflecting strong sales to all customer classes and growth in the number of customers. Helped by improved streamflows, rate relief, and greater operating efficiencies, operating income was up 54%. After significantly higher other income and interest charges, net income rose to $61.2 million from $26.5 million. Earnings per share were $1.80, versus $0.78.

Dec.	E0.50	0.54	0.20	0.45
	E2.30	1.32	1.30	2.00

Important Developments

Nov. '89— Idaho Power said that through September nearly 60% of its energy produced came from water, a significant increase in hydroelectric generation over last year that allowed the company to reduce production at its coal fired facilities. IDA added that it was also benefiting from the continued strengthening of the economy within its service territory and brisk business activity.

Nov. '89— The company announced that it had formed Ida-West Energy Company, a wholly-owned subsidiary, to develop independent energy projects and sell energy from such projects in the bulk power market. IDA said that it was optimistic about Ida-West's future and believed that it signaled its ability to adapt to the changes occurring within the electric utility industry.

Next earnings report expected in mid-February.

Business Summary

Idaho Power supplies electricity in an area of 20,000 square miles (Snake River Valley) in southern Idaho, eastern Oregon and northern Nevada with a population of about 626,000 people. The principal cities served are Boise, Pocatello, Twin Falls, Nampa, and Caldwell. About 91% of revenues are derived from Idaho. Contributions by class of customers in recent years:

Revenues	1988	1987	1986	1985
Commercial-industrial	38%	39%	37%	33%
Residential	36%	35%	34%	31%
Irrigation/other	18%	17%	15%	14%
Other utilities	8%	9%	14%	22%

The fuel mix in 1988 was 43% hydro, 45% coal and 12% purchased power. Peak load in 1988 was 2,161 mw, and system capacity was 2,838 mw, for a capacity margin of 23.9%; electricity sales were 11,892,900 mw, down 0.7% from 1987.

Because of its reliance on hydroelectric generation, IDA's generating system tends to be energy constrained rather than capacity limited. With completion of Valmy Unit 2 in 1985, the need for new generating capacity is not anticipated until near the year 2000.

Dividend Data

Dividends have been paid since 1917. A dividend reinvestment plan is available.

Illinois Power

NYSE Symbol IPC

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 14'89	1989					
18⅞	21¾-13⅜	NM	¹---	¹---	B+	0.49

Summary

This electric and gas utility serves a 15,000-square-mile area composed of parts of northern, central and southern Illinois. Auditors noted in their report on IPC's 1988 financial statements that there were significant uncertainties with respect to various matters related to the Clinton nuclear station. IPC reported a large loss for the first nine months of 1989 due to a $346 million write-off of disallowed Clinton costs. Another large write-off is possible in 1990. The common dividend was omitted in early 1989.

Current Outlook

Earnings of $1.20 a share are expected for 1990 (excluding any possible write-offs), versus a loss of $4.00 anticipated for 1989, which includes disallowed Clinton costs of some $4.62.

In April, 1989 directors omitted the $0.66 quarterly dividend on the common stock.

A return to modest profitability is seen for 1990, reflecting the likelihood of rate relief being granted after mid-year, lower financing costs tied to a projected drop in interest rates, and a major cost-cutting campaign. Besides the amount of rate relief eventually obtained, another uncertainty is whether additional write-offs will be required. If the Illinois PSC determines that all or a part of Clinton's generating capacity is not "used and useful," another substantial write-off could result.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	327	334	326	356
Jun.	280	271	254	245
Sep.	392	392	348	304
Dec.	---	288	292	279
	---	1,285	1,220	1,184

Operating revenues for the nine months ended September 30, 1989 edged up 0.3%, year to year. Hurt by both scheduled and unscheduled plant outages, operating income fell 7.4%. After a write-off of $346 million (net) for disallowed Clinton plant costs, there was a net loss of $287.3 million, versus net income of $149.6 million. The loss per share was $4.21 (on 6.7% more shares), versus earnings of $1.73 (before a special credit of $0.49).

Common Share Earnings ($)

Quarter:	1990	1989	1988	1987
Mar.	E0.25	d4.83	0.27	0.94
Jun.	E0.30	d0.14	0.23	0.81

Dec.	E0.15	E0.27	d0.05	0.46
	E1.20	Ed4.00	1.66	3.75

Important Developments

Nov. '89— The company reported that since returning to service on August 8 the Clinton nuclear unit had operated continuously. Of the four forced outages occurring earlier in the year following start-up for the second operating cycle, all were nonnuclear in nature and unrelated.

Oct. '89— Illinois Power said that the Illinois PSC had set the following revised schedule for rebuttal and cross-examination regarding the company's July filing for a one-time retail rate increase of $264.5 million (28.2%): December 27 IPC to file rebuttal testimony, February 5, 1990 cross examinaton of all parties, and June 11 deadline for rate order. Illinois Power believes that such a rate increase is necessary to move it toward an adequate level of financial integrity and to protect the interests of shareholders.

Next earnings report expected in mid-February.

Business Summary

Illinois Power supplies electricity and natural gas to a population of about 1,595,000 in Illinois. Electric operations provided 74% of revenues and 91% of operating income in 1988, and gas activities provided 26% and 9%, respectively. Revenues by type of customer in 1988:

	Electric	Gas
Residential	39%	62%
Commercial	23%	21%
Industrial	33%	14%
Other	5%	3%

The fuel mix in 1988 was 74% coal and 26% nuclear, with negligible contributions from oil and gas. Peak demand in 1988 was 3,775 mw, and system capacity was 4,286 mw, for a capacity margin of 11.9%. Gas sales in 1988 were 678 million therms, up 19% from 570 million therms in 1987.

The cost of the company's construction program for 1989-1993 period was estimated at $715 million. With operation of the 950,000 kilowatt Clinton nuclear unit on November 24, 1987, the company expected that additional generating capacity would not be required until after the year 2000.

Dividend Data

Common dividends were omitted on April 28, 1989 after having been paid since 1947. Dividends on the preferred and preference stock have been maintained. Common dividends in the past 12 months:

Illinois Tool Works

1186M

NYSE Symbol ITW Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 8'89	1989					
40¼	47½-33	14	0.60	1.5%	A-	1.42

Summary

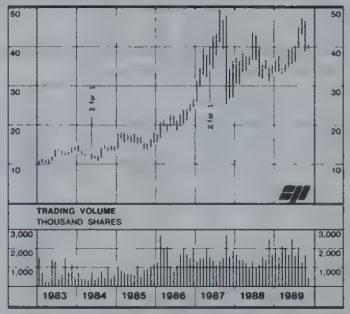
Illinois Tool Works makes industrial components and other specialty products and equipment for high-volume manufacturing. Primary markets include the automotive, food, and construction industries. Higher revenues, some expansion in margins and a probable decrease in interest expense should lead to higher earnings for 1990. In April, 1989 ITW completed the acquisition of Ransburg Corp. for $180.8 million.

Current Outlook

Earnings for 1990 are projected at $3.50 a share, versus the $3.05 estimated for 1989.

Dividends were raised 25%, to $0.15 quarterly from $0.12, with the September, 1989 payment.

Revenues for 1990 are expected to rise less rapidly, reflecting the diminished impact of the Ransburg acquisition and slower growth in core businesses. Revenue growth in existing units will probably be restricted by slower activity in the U. S. auto and construction markets. Margins should improve as a result of lower raw material costs and decreased expense for integrating acquisitions. Assuming no major acquisitions, interest expense should decline and earnings should rise.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	494	454	401	177
Jun.	573	503	425	203
Sep.	547	483	420	192
Dec.	---	490	452	389
	---	1,930	1,698	961

Revenues for the nine months ended September 30, 1989 rose 12%, year to year, reflecting gains in both business segments. Margins narrowed slightly, and the gain in operating income was pared to 11%. Aided by lower nonoperating expense, pretax income advanced 15%. After taxes at 39.9%, versus 40.1%, net income rose 16%. Share earnings were $2.29, versus $2.01.

	E3.05	2.66	2.06	1.56

Important Developments

Apr. '89— The company completed the acquisition of Ransburg Corp. for $21 a share or a total of approximately $181 million. Ransburg is primarily a manufacturer and distributor of electrostatic finishing systems for liquid and powder coatings, equipment for detecting and neutralizing static in manufacturing devices, and industrial balancing equipment and systems. Ransburg reported a net loss of $7.5 million on revenues of $236.7 million for 1988.

Feb. '89— ITW acquired Lakeville Corp., a manufacturer of injection molded parts for the automotive and business machine industries, for 118,679 shares of common stock.

Next earnings report expected in early February.

Business Summary

Illinois Tool Works primarily manufactures engineered industrial components for a variety of industries in markets worldwide. The company also manufactures machines to produce or apply products and components which it has developed. In September, 1986 ITW doubled its size with the acquisition of Signode Industries, a maker of steel and plastic strapping, packaging and fastening systems. Industry segment contributions in 1988:

	Sales	Profits
Engineered components	50%	45%
Industrial systems & consumables	50%	55%

Foreign operations accounted for 38% of total revenues and 43% of operating profits in 1988.

Engineered components consist of automotive, electronic, medical, plastic and metal components; specialty gearing and components; and thermoplastic profile extrusions. Markets include aerospace, appliance, automotive, truck, computer, electrical equipment and electronics, furniture, and health care equipment.

Industrial systems and consumables include data entry products; multipackaging products and systems; perishable cutting tools; and precision instruments and systems. Markets include aerospace, agricultural, automotive and truck, aviation, brewery, canned goods, and electronics.

Summary

One of the world's largest chemical companies, this British firm's product line includes pharmaceuticals, agricultural chemicals, synthetic fibers, paints, petrochemicals, and inorganic chemicals. ICI has reduced its breakeven level through aggressive cost cutting and productivity improvements and has shifted its product mix to specialty chemicals and products while increasing its geographic diversity. Earnings in sterling for 1989 are expected to rise, but slow economic growth will hurt the 1990 performance.

Current Outlook

Earnings for 1990 and 1989 are both projected at $8.50 per ADS (translated at £1$1.60).

The interim dividend from 1989 earnings of about $1.54 per ADS (after 15% British tax) was paid in October, 1989. Total dividends of $3.82 per ADS were paid from 1988 earnings.

Profits (in £ sterling) for 1990 are expected to be virtually unchanged from 1989 due to slower economic growth in the UK and U.S. and lower selling prices for plastics and petrochemicals. New product marketing and research costs will limit gains in the pharmaceuticals and specialty businesses. The pesticide unit should advanced with stronger demand in the U.S., but difficult conditions are expected to continue for the fertilizer business despite benefits of a restructuring program.

Net Sales (Billion $)

Period:	1989	1988	1987	1986
3 Mos. Mar.	5.42	5.52	4.42	3.72
6 Mos. Jun.	10.30	10.09	8.97	7.70
9 Mos. Sep.	16.06	14.71	13.51	10.72
12 Mos. Dec. ...		21.06	20.80	15.00

Sales (in British pounds) for the first nine months of 1989 rose 13%, year to year, reflecting higher prices and volumes and favorable currency exchange rates. With profit gains in drugs, pesticides and industrial products, net income advanced 10%. Earnings per ADS were $7.06, versus $6.50 (before a $0.42 special charge), both translated at £1=$1.63.

Important Developments

Oct. '89— ICI said that the decline in third quarter earnings from 1988 levels ($1.71 per ADS versus $1.98) reflected some softening of demand and margins in a number of markets, and specific problems in fertilizers, films and paints. The third quarter was also affected by production problems and reorganization costs. ICI announced the further restructuring of the UK fertilizer business, including the closing of four plants due to reduced demand. ICI agreed to sell its U.S. OTC drug business (annual sales of $125 million) to a joint venture between Johnson & Johnson and Merck & Co. in return for the antidepressant Elavil from Merck and a substantial cash payment. ICI valued the exchange at $450 million. ICI expected to soon introduce in the U.S. its prostate cancer drug Zoladex and its new anaesthetic Diprivan.

Next earnings report expected in late February.

Business Summary

ICI is one of the world's largest chemical companies with a broad line of consumer, specialty, industrial and agricultural products. Pharmaceuticals (9% of 1988 sales and 22% of trading profits, before intergroup eliminations) include cardiovascular and cancer drugs, antiseptics, antibiotics and anaesthetics. ICI Paints (11% and 7%) is the world's largest paint producer. Specialty businesses (17% and 10%) consists of polyurethane chemicals, dyes and pigments, polyester and polypropylene films, specialty chemicals, and advanced materials. General Chemicals (16% and 19%) includes salts, chlorine and derivatives, caustic soda, soda ash, and PVC. Petrochemicals and plastics (22% and 29%) include ethylene, aromatics, ethylene oxides and derivatives, and polypropylene, acrylic and polyester polymers. Fibers (5% and 3%) are used for apparel, carpet and industrial uses. Explosives (3% and 3%) include commercial explosives and accessories. Agriculture consists of pesticides and seeds (10% and 8%) and nitrogen and compound fertilizers (7% and -1%).

The United Kingdom accounted for 41% of 1988 sales (19% domestic sales and 22% exports, before elimination of intergroup sales) and 43% of trading profits. Contributions to sales and trading profits by overseas markets were: Continental Europe 20% and 19%, the Americas 23% and 22%, Asia Pacific 13% and 13%, and others including India 3% and 3%.

Dividend Data

The company normally pays an interim dividend from a year's earnings in October and a final dividend in April or May of the following year. Payments on the ADS in the past 12 months:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

This Canadian company is the largest in the nickel industry, with about 34% of the non-Communist world market; it also produces copper. Costs were cut in the mid-1980s through application of more mechanized mining techniques. After a strong recovery by the nickel market in 1987-89, earnings for 1990 may fall substantially, reflecting sluggish economic growth. Dividends were recently raised 25%.

Current Outlook

Earnings for 1990 are projected at $4.75 a share, off sharply from 1989's estimated $6.60.

Regular dividends were increased 25%, to $0.25 quarterly from $0.20, with the October, 1989 payment; a $10.00 special dividend was distributed in December, 1988.

Sales for 1990 may decline moderately, reflecting expected lower average nickel and copper realizations. Nickel demand should be little changed on a plateauing of stainless steel output; copper use is also likely to be flat. Alloy products income may decrease slightly. With the lower prices, share earnings should fall substantially despite anticipated fewer shares.

Net Sales (Million U.S. $)

Quarter:	1989	1988	1987	1986
Mar.	1,117	676	381	375
Jun.	1,066	831	422	387
Sep.	849	784	415	306
Dec.	---	972	571	384
	---	3,263	1,790	1,452

Sales for the first nine months of 1989 rose 32%, year to year. On higher production costs, and in the absence of a $28 million net unusual gain, net income was up 14%, to $5.24 a share from $4.60. Results exclude special credits of $0.43 and $0.26 a share, respectively.

Important Developments

Oct. '89— Inco (N) planned a new program to buy back an additional five million shares (4.8%) of common stock. This program would supercede the previous two million-share repurchase program, under which 1,728,800 shares were acquired.

Jan. '89— N said that it would spend some C$494 million in the next five years to reduce sulphur dioxide (SO_2) emissions from its Sudbury, Ontario smelter complex.

Jan. '89— N paid a $10 a share special dividend as part of a recapitalization plan, which included shareholder confirmation of a "poison pill" stock purchase right to ensure that all stockholders would be treated fairly in the event of a takeover attempt. The $1.07 billion dividend was financed by cash and some $500 million of added debt.

Next earnings report expected in early February.

Business Summary

Inco (N) produces about 34% of the non-Communist world's nickel, as well as copper and other metals and metals products. Segment contributions:

1988	Sales	Op. Inc.
Primary metals	82%	97%
Alloy products	17%	3%
Other business	1%	Nil

N mined some 17 million short tons of ore in 1988. Nickel production was 434 million pounds. At year-end 1988 N had proven and probable reserves in Canada of 434 million short tons containing 6.2 million tons of nickel. Primary nickel accounted for 82% of 1988 group sales, refined copper 11%, precious metals 5%, and other metals 2%.

Inco Gold (IG), engaged in exploration, development and operation of precious metals properties, should produce 42,000 ounces of gold for its account in 1989 from its 60%-owned Casa Berardi Est (Que.) mine (started-up in September, 1988 at a rate of 60,000 ounces a year); 50%-owned Mineral Hill (Mont.) mine (opened in September, 1989 at a designed rate of 42,000 ounces a year); and 50%-owned Crixas (Brazil) mine (to open in the 1989 fourth quarter at a designed rate of 120,000 ounces a year).

Products businesses, serving aerospace, marine, energy and other markets, include Inco Alloys International, the world's largest supplier of wrought nickel alloys; and Inco Engineered Products, which makes forged and precision-machined components.

Dividend Data

Dividends have been paid since 1934. A "poison pill" stock purchase right was adopted in 1988.

Summary

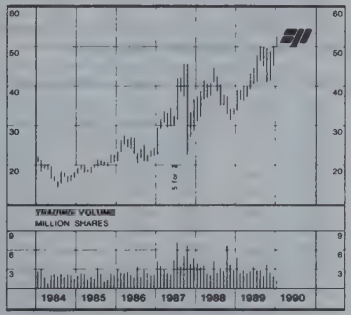
This diversified manufacturer is a major producer of air compressors and has an important stake in other nonelectrical machinery, including equipment for the mining, construction and auto industries. IR is also the largest broad-line bearings manufacturer in the U.S. Earnings for the first nine months of 1989 benefited from higher sales, wider margins and a profit turnaround at Dresser-Rand. Forecasted higher sales together with continued improvement in margins and increased profit contributions from Dresser-Rand should lead to an earnings gain in 1990.

Current Outlook

Earnings for 1990 are projected at $4.10 a share, versus the $3.70 estimated for 1989.

The $0.30 quarterly dividend may be increased in 1990.

Sales for 1990 are expected to rise less rapidly than in 1989, mostly reflecting the impact of forecasted lower auto production on the bearings, locks and tools unit. Margins should continue to improve. Benefiting further from stable interest costs and increased profit contributions from Dresser-Rand, earnings should rise.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	802	711	609	660
Jun.	907	780	664	726
Sep.	845	715	631	645
Dec.	---	815	743	768
	---	3,021	2,648	2,800

Sales for the nine months ended September 30, 1989 rose 16%, year to year, reflecting gains in all units. Aided by wider margins in all but the standard machinery unit, and a $14.3 million profit at Dresser-Rand versus a $300,000 loss, pretax income increased 37%. After taxes at 34.8%, versus 33.0%, net income rose 33%. Share earnings were $2.56, versus $1.91, before a special credit of $0.17 in the 1989 period.

Important Developments

Oct. '89— IR reported a 52% increase in share earnings on an 18% rise in sales for 1989's third quarter. IR attributed the increased earnings for the third quarter and nine months of 1989 to increased demand for its products principally in the Construction Equipment, Air Compressor, Production Equipment, Bearnings and Components and Industrial Process and Machinery groups. IR also benefited from a profit turnaround the Dresser-Rand joint venture. Incoming orders for 1989's third quarter were up 8.0% over the same period in 1988. IR stated while it expected business improvement in the early 1990s, some sluggishness might occur in the near term and that the company would continue a conservative approach in day-to-day operations.

Next earnings report expected in late January.

Business Summary

Ingersoll-Rand is a diversified producer of capital goods. Its primary business involves the design and manufacture of compressed air systems. Sales and operating profits in 1988:

	Sales	Profits
Standard machinery	38%	46%
Engineered equipment	13%	5%
Bearings, locks & tools	49%	49%

Foreign operations accounted for 31% of sales and 38% of operating profits in 1988.

Standard machinery includes air compressors, vacuum pumps, air drying and filtering systems, portable and packaged air compressors, pavement millers, rock drills, blasthole drills, water-well drills, continuous and long wall mining machines, crushers, coal haulers and mine service vehicles.

Engineered equipment consists of centrifical and reciprocating pumps, waterjet cutting systems, pulp and paper processing equipment, pelletizing equipment, filters, aerators and dewatering systems.

Bearings, locks and tools include needle bearings, heavy bearings, precision components, air hoists and winches, air, electric and hand tools, engine starting systems, automated production systems, door locks, electronic access systems, door closers and exit devices.

Dividend Data

Dividends have been paid since 1910. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

33¼	48½–33¼	7	1.40	4.2%	B–	1.24

Summary

The nation's fourth largest integrated steelmaker, IAD produces sheet, strip and bar products for the auto, appliance and machinery industries. It also owns two leading steel service centers. IAD reported record sales and earnings for 1988, reflecting higher product prices, increased shipments and wider margins. A projected decline in sales and some narrowing of margins will probably result in lower earnings for 1989. In July, 1989 directors authorized the creation of an ESOP.

Current Outlook

Earnings for 1990 are projected at $2.90 a share, versus the $3.50 estimated for 1989.

Dividends should remain at $0.35 quarterly.

Sales for 1990 are expected to decline, reflecting the impact of forecasted lower demand from automotive, service centers and construction markets. Operating rates may decrease from those of 1989, offseting the benefit of lower raw material costs and lead to narrower margins. Despite the probable absence of nonrecurring charges in 1990, earnings will likely decline.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,101	967	843	754
Jun.	1,111	1,048	845	816
Sep.	981	1,017	845	786
Dec.	---	1,037	921	818
	---	4,068	3,453	3,173

Sales for the nine months ended September 30, 1989 rose 5.4%, year to year, reflecting gains in both units. Margins narrowed, and operating profits fell 31%. Hurt further by a $17 million ($0.30 a share) nonrecurring charge, pretax income declined 37%. After taxes at 36.6%, versus 32.4%, net income fell 41%. After preferred dividends, earnings were $3.04 a share on 6.9% more shares, versus $5.36.

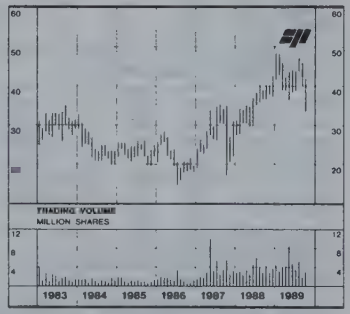
Dec.	E0.46	1.63	0.95	1.27
	E3.50	6.99	3.09	0.95



Important Developments

Jul. '89— IAD's directors authorized the establishment of an employee stock ownership plan (ESOP) for salaried employees. IAD sold $150 million of 7.25% convertible preferred stock to the ESOP to implement the plan. The preferred stock is convertible into common on a share-for-share basis and represents about a 10% interest in the company. Directors also authorized the repurchase of up to 3.5 million common shares in connection with the ESOP.

May '89— IAD announced that Harold C. Simmons had filed for permission from the Federal Trade Commission and the Justice Department to acquire up to 14.9% of IAD's common shares.

Next earnings report expected in late January.

Business Summary

Inland Steel is a major integrated steel producer, and has other related operations. Contributions by business segment in 1988:

	Sales	Profits
Integrated steel	56%	72%
Steel service center	44%	28%

Raw steel production in 1988 was 6,126,000 net tons (5,519,000 in 1987); shipments totaled 5,020,000 tons (4,889,000). IAD used 94.3% of capacity in 1988, versus 84.9% in 1987. Steel shipments by market were steel service centers 29%, transportation 25%, steel converters 13%, industrial, electrical and farm machinery 11%, construction and contractors' products 10%, and other 12%.

General Motors accounted for about 8% of sales in 1988, 10% in 1987 and 13 % in 1986.

Wholly-owned Joseph T. Ryerson & Son, Inc. is the largest steel service center organization in the U.S., with 26 locations nationwide. J.M. Tull Industries, Inc., one of the 10 largest service centers in the U. S., operates a chain of metals service centers in the southeastern U.S.

Dividend Data

Common dividends were resumed in early 1988 after omission since late 1985. A "poison pill" stock purchase right was adopted in 1987.

Intel Corp.

4249H

NASDAQ Symbol INTC (Incl. in Nat'l Market) Options on ASE, CBOE & Pacific In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
32¼	35-22⅞	17	None	None	B-	1.67

Summary

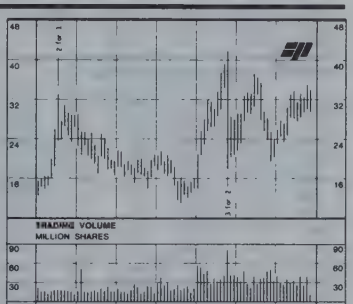
Intel is a leading manufacturer of semiconductors, microprocessors and microcomputers. Its business is closely tied to the computer industry. Following sharply higher sales and earnings in 1988, significantly lower earnings are likely in 1989, due to slowing growth in the semiconductor industry and pressure on prices. Cost reductions and the absence of nonrecurring charges should allow for a meaningful earnings increase in 1990 despite only minimal industry growth.

Current Outlook

Earnings for 1990 are expected to reach $2.50 a share, up from the $2.10 projected for 1989.

No cash dividends have been paid.

Sales are expected to increase modestly in 1990, aided by new product introductions. However, minimal industry growth will restrict the increase. The gain will also be restrained by a somewhat less favorable product mix and some pressure on prices, especially for EPROMs, although the company's decision not to license others to produce its leading 386 microprocessors should limit pricing pressures on that highly profitable line. However, any renewed weakness in the personal computer market could have a substantial impact on results. Margins are likely to widen, due to recent cost reductions and the absence of $52 million of nonrecurring charges. Long-term prospects are clouded by a resumption of intense foreign competition and the capital intensive nature of the semiconductor industry.



Revenues (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	713	636	395	280

Important Developments

Oct. '89— The company said that its third-quarter earnings were reduced by a $35 million ($0.12 a share) pretax charge related to costs to terminate a computer joint venture with Siemens AG. The company added that its bookings improved as the quarter progressed and that September was especially good.

Next earnings report expected in late January.

Business Summary

Intel designs and manufactures semiconductor components and related single-board computers, microcomputer systems and software for original equipment manufacturers.

The company introduced the first microprocessor in 1971 and remains the world's largest manufacturer of such devices. A microprocessor is the central processing unit in a microcomputer-based system. Microprocessor peripherals, microcontrollers, microcomputer modules and systems and microcommunications products are also manufactured.

Intel is the largest supplier of EPROMs—erasable, programmable, read-only memories. Memory components store computer programs and data entered during system operation.

Software, which is a set of programming instructions that directs a microcomputer-based system to perform specific tasks, is provided for microcomputer operating systems and high-level networking.

In 1986, Intel entered the application-specific integrated circuit (ASIC) market. An ASIC is a chip designed by a customer for one application.

Foreign business accounted for 43% of sales and 37% of operating income in 1988.

Dividend Data

No cash dividends have been paid.

Finances

During 1987, Intel raised $90.4 million through the sale of warrants and also sold $110 million of 8⅛%, 10-year notes.

In June 1987, Intel purchased 13,350,000 of its common shares from IBM for $361,562,000 in cash.

Summary

In late 1988 INTERCO began a recapitalization and restructuring plan, following a tender offer attempt by City Capital Associates. As part of the plan, ISS paid out to shareholders special dividends it valued at about $71 a share, including $38.60 in cash and $32.43 of fixed income securities. As part of the restructuring, ISS offered for sale its Apparel Manufacturing Group, Ethan Allen Furniture, and its General Retail Merchandising Group.

Current Outlook

A net loss from continuing operations of $3.00 a share is estimated for the fiscal year ending February 28, 1990, versus fiscal 1988-9's loss of $0.42.

The common dividend was omitted with the recapitalization completed in December, 1988.

Revenues should decline sharply in fiscal 1989-90, reflecting divestiture of the Apparel Manufacturing Group, Ethan Allen, and the General Retailing Group. While margins will benefit from costs savings programs, there should be a net loss per share due to higher interest charges and preferred dividend payments as a result of the December, 1988 recapitalization.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
May	469	490	781	579
Aug.	430	491	843	626
Nov.	---	547	924	757
Feb.	---	483	793	652
	---	2,012	3,341	2,614

Sales from continuing operations for the six months ended August 31, 1989 fell 8.4%, year to year. Substantially higher interest expense more than offset a $109.3 million gain on the disposal of assets, and results from continuing operations were breakeven, versus net income of $42.4 million. After preferred dividends in the fiscal 1989-90 interim only, the per-share loss was $1.02, versus income of $1.12, before income from discontinued operations of $2.16, versus $0.61.

Important Developments

Oct. '89— During the fiscal 1989-90 first half ISS sold a number of its divisions in accordance with its 1988 recapitalization and restructuring program. ISS realized a $70.1 million net gain from the sale of Ethan Allen and Senack Shoes. ISS also realized a $74.3 million net gain that was included in discontinued operations from the sale of The Biltwell Co., International Hat Co., Big Yank Corp., Cowden Manufacturing Co., Central Hardware Co. and Golde's Department Stores. ISS also announced that it had sold Fine's Men's Shops and United Shirt Distributors in October, and had agreed to sell Stuffed Shirt Separately, ISS said that cash flow from operations was sufficient and that at October 2, 1989 the balance of the asset sale bridge loan (originally at $1.15 billion) was $270 million.

Next earnings report expected in early January.

Business Summary

INTERCO is a manufacturer and retailer of consumer products including footwear and furniture. In late 1988 the company embarked on a recapitalization and restructuring plan which included divesting its apparel manufacturing group, general retail merchandising group, and Ethan Allen.

The footwear manufacturing and retailing group produces and distributes primarily men's footwear, and a broad range of athletic footwear, principally in the United States, Australia, Canada and Mexico. Major brand names include Florsheim, Florsheim Thayer, McNeil, Thomson, Boland & Lee, and Converse. There are nine manufacturing plants and five major distribution centers in operation. The group operates 743 retail shoe stores and leased shoe departments in 40 states in the U.S. and in Australia, Canada, and Mexico. Footwear products are also distributed in more than 85 foreign countries. The furniture and home furnishings group manufactures and distributes quality furniture and home furnishings under the Lane and Broyhill names. There are 64 factories and 17 major distribution centers and warehouses located throughout the U.S. The company also owns and operates 34 galleries.

Dividend Data

After paying dividends since 1913, common dividends were eliminated with the recapitalization plan begun in late 1988. As part of the plan special dividends were paid, which included $14.221 per share cash payable Nov. 29, 1988 to holders of record Oct. 13, and $24.379 cash payable Nov. 29, 1988 to holders of record Nov. 22. Special dividends also included $11 per share principal amount of 13.75% senior subordinated debentures payable Dec. 22, 1988 to holders of record Oct. 13; $10.47 face value (estimated $6.55 net of original issue discount) of subordinated discount debentures due 2003 payable Dec. 22, 1988 to holders of record Nov. 22; and $5.60 principal amount of 14.5% 5 year pay-in-kind subordinated debentures and $9.00 worth of $100.00 stated value of 17.5% 6 year pay-in-kind exchangeable preferred stock with warrants to buy common stock, payable Dec. 22, 1988 to holders of record Dec. 12. The liquidation preference of this preferred stock was increased to $104.375 on March 15, 1989 to holders of record March 15.

15	22⅜-13¾	10	None	None	B+	1.58

Summary

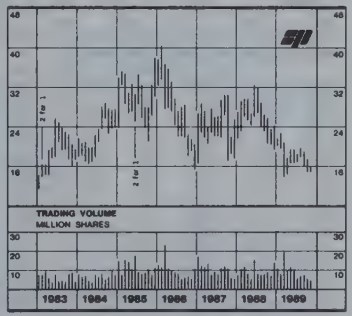
Intergraph manufactures interactive computer graphics systems and related products for computer-aided engineering, design and manufacturing (CAE/CAD/CAM). The Advanced Processor Division manufactures the Clipper microprocessor chipset, which is at the heart of Intergraph's workstations. Revenues and earnings growth in 1990 is expected to be under continued pressure, reflecting customers' delayed purchase decisions due to rapidly changing product cycles, coupled with intense price competition.

Current Outlook

Earnings for 1990 are projected to rise to $1.50 a share, versus the $1.35 estimated for 1989.

Initiation of cash dividends is not anticipated.

Modest revenue growth is projected for 1990, as customers are delaying purchase decisions due to confusion in the marketplace over new product announcements by several workstation vendors promising higher levels of price/performance. Gross margins may stabilize if a larger portion of the sales mix consists of software; however, other elements expected to pressure gross margins include intense price competition in both the U.S. and international markets and strength of the U.S. dollar. INGR added significantly to its sales and marketing staff in 1989 in an attempt to gain market share; continued worldwide build-up in this area is likely, but at a slower pace. Share earnings should benefit from a stock buyback program.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	185.7	174.7	128.5	147.0
Jun.	219.2	203.5	160.2	150.4
Sep.	211.5	207.2	157.1	151.0
Dec.	---	214.8	195.3	157.4
	---	800.2	641.1	605.7

Revenues for nine months ended September 30, 1989 rose 5.3% year to year; systems sales were up 3.8% while service revenues grew 9.5%. Gross margins narrowed, reflecting price competition, a stronger U.S. dollar, and lower than planned production volume. A 32% rise in marketing expenses and a 13% increase in product development costs led to a 33% decline in operating income. Following a $12 million ($0.15 a share after taxes) gain on the sale of a subsidiary in the first quarter, pretax income was down 14%. After taxes at 34.1%, versus 36.5%, net income fell 11%, to $1.03 a share from $1.11.

Dec.	E0.32	0.44	0.44	0.35
	E1.35	1.55	1.23	1.26

Important Developments

Oct. '89— INGR said that systems orders for the first nine months of 1989 were $476.6 million, up 12% from the prior year period. European orders remained on plan for the year. U.S. orders were well below plan but were up slightly from the prior year period with most of the growth in the federal systems area. International orders made up 46% of total system orders for the year to date.

Next earnings report expected in mid-January.

Business Summary

Intergraph Corp. manufactures interactive graphics and database management systems for computer-aided design, manufacturing and engineering (CAD/CAM/CAE). Foreign operations accounted for 38% of revenues in 1988, and 16% of operating income, and revenues from the U.S. government accounted for 14% of revenues.

Intergraph systems support the creation, analysis, display, and maintenance of almost any type of design, drawing, map or other graphic representation while simultaneously managing a database of nongraphic descriptive attributes associated with the graphics. The operator is able to execute a software operation and immediately see the results displayed on the screen.

The systems are networked configurations of DEC VAX 32-bit computers and Intergraph workstations and servers which run under INGR's UNIX-based operating system and and special purpose scanners and plotters as well as other industry standard peripheral devices.

The Interactive Graphics Design Software (IGDS) is the basic proprietary software that provides the fundamental graphics element manipulation for VAX-based systems while the Data Management and Retrieval System (DMRS) manages the attribute data. MicroStation is IGDS-compatible software for MS DOS-compatible personal computers and INGR UNIX-based workstations. INGR offers more than 350 interactive graphics software applications.

The advanced processor division supplies the Clipper 32-t microprocessor for use in INGR workstations and for sale to other OEM's.

Dividend Data

No cash has been paid.

Finances

INGR authorized the repurchase of up to 10 million of its shares. As of September 30, 1989, INGR had purchased about 5.4 million shares.Since September 30, an additional 1,487,000 shares had been purchased at a cost of about $23 million.

Capitalization

Summary

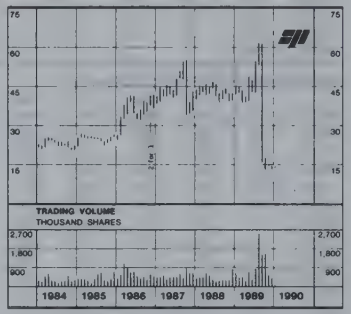
Interlake is a manufacturer of special materials, including metal powders, aerospace components, and precision investment castings. IK also makes handling and packaging systems and automated storage/retrieval systems. In 1989's third quarter IK adopted a restructuring program which included the payment of a $45 special dividend, the creation of an ESOP, the expenditure of up to $20 million to repurchase common shares to implement the ESOP, and a substantial rise in long-term debt.

Current Outlook

Earnings for 1990 are estimated at $1.00 a share, versus a loss of $0.10 estimated for 1989.

Following payment of the $45 special dividend, IK will discontinue quarterly dividends.

Sales for 1990 are expected to rise at a less rapid rate than in 1989, reflecting the impact of a probable decrease in total automotive vehicle production on the engineered materials segment and a lower backlog in the handling/packaging unit. Margins will likely remain unchanged as improvement in aerospace is offset by lingering price weakness in Canadian steel strapping and pressure in powered metals. While interest expense will be sharply higher, the absence of restructuring costs, a lower tax rate and gains on asset sales should permit a return to profitability in 1990.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	212	193	177
Jun.	[5]465	220	206	188
Sep.	226	214	202	188
Dec.	---	245	222	183
	---	892	823	736

Sales for the nine months ended October 1, 1989 rose 6.7%, year to year, with handling/packaging unit sales up 11% and sales of engineered materials up 2.0%. Profits were hurt by a $23.6 million restructuring charge, and with nonoperating income lower, pretax income fell 58%. After taxes at 83.1%, versus 39.6%, and minority interest, net income was down 98%. Share earnings were $0.05, versus $2.53.

Dec.	Ed.15	1.22	2.04	0.91
	Ed0.10	3.75	4.69	2.69

Important Developments

Oct. '89— IK reported a per-share loss of $1.74 in 1989's third quarter on a 5.2% rise in sales, versus earnings of $0.79 a year-earlier. IK attributed the loss to unusual charges totaling $23.6 million and a sharply higher income tax rate stemming from its restructuring program. IK's restructuring program provided for the payment of a $45 special dividend, formation of an Employee Stock Ownership Plan (ESOP), the expenditure of up to $20 million to buyback common shares to offset issuances to the ESOP, and an increase in the company's long-term debt to $550.6 million at September 31, 1989 from $76.7 million a year-earlier. IK noted that if the impact of the restructuring program had been excluded, net income for the third quarter and nine months of 1989 would have been $6.1 million ($0.60 a share) and $24.2 million ($2.39), respectively.

Next earnings report expected in late January.

Business Summary

Interlake makes special materials and finished components for the auto and aerospace industries and automated storage/retrieval and handling and packaging systems. It spun off its iron, steel and domestic steel strapping business in June, 1986. Segment contributions in 1988:

	Sales	Profits
Engineered materials	34%	58%
Handling/packaging	66%	42%

Foreign operations provided 43% of sales in 1988 and 33% of operating profits.

Special materials includes ferrous metal powders for forming complex metal parts, and investment castings and jet engine casings and rings. Markets are primarily the automotive and commercial/military aerospace industries.

Packaging & handling comprises nonmetallic strapping and stitching wire and tools for their application. It also includes light- and heavy-duty storage racks and shelving and manual and automated retrieval or conveyor installations.

In December, 1986 IK acquired the remaining 40% minority interest in Conco-Tellus, Inc., a maker of automated guided vehicle systems.

Dividend Data

Dividends had been paid since 1941. Following payment of a $45 special dividend in September, 1989, quarterly cash dividends were omitted. A new "poison pill" stock purchase right was adopted in 1989.

Finances

In a report to the SEC dated October 20, 1989 IK disclosed that it was expecting to report net income of $17.0 million ($1.67 a share), $20.2 million ($1.98), $27.9 million ($2.73), $33.9 million ($3.33) and $40.3 million ($3.95) for the years 1990 through 1994. Long-term debt was projected to decline from $529.5 million in 1990 to $406.9 million in 1994.

Capitalization

NYSE Symbol IBM Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 27'89	1989					
94 3/4	130 7/8-93 3/8	10	4.84	5.1%	A+	0.84

Summary

IBM is the world's dominant manufacturer of mainframe computers and is also a major supplier of minicomputers, computer peripheral equipment, personal computers, networking products, and system software. An earnings recovery is foreseen for 1990, reflecting the absence of restructuring costs, increased global capital expenditures in the second half, and translation gains from a weaker dollar.

Current Outlook

Earnings for 1990 are expected to increase to $10.20 a share from 1989's estimated $6.90, which includes a $2.25 restructuring charge.

The $1.21 quarterly dividend is the minimum expectation.

Gross income should rise over 5% in 1990, benefiting from healthy demand overseas and a modest resurgence in domestic demand for IBM's main hardware products, plus translation gains from a weaker dollar. Profit margins should be stable, with gains from the domestic cost containment program offsetting pricing pressures in the mainframe and minicomputer markets.

Revenues (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	12.73	12.06	10.68
Jun.	---	15.21	13.91	12.80
Sep.	---	14.31	13.71	12.73
Dec.	---	---	20.00	18.01
	---	---	59.68	54.22

Revenues for the first nine months of 1989 advanced 6.5%, year to year, reflecting increased hardware and software sales, both in the U.S. and major international markets, despite the negative impact the stronger dollar had on the reporting of foreign revenues. Despite the absence of onetime manufacturing restructuring charges, net income edged up just 0.7%. Earnings per share were $5.43, compared with $5.30, which was before a $0.53 special credit from an accounting change.

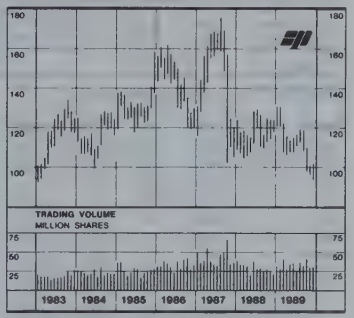
Dec.	E4.25	E1.47	3.97	3.47
	E10.20	E6.90	9.27	8.72



Important Developments

Dec. '89— The company said it would restructure its domestic operations, resulting in a $2.3 billion pretax charge in the fourth quarter, equal to about $2.25 a share after taxes. Some 10,000 positions would be eliminated. Nonetheless, management expected modest growth in the U.S. in 1990 and continued double digit revenue growth overseas in local currencies. Savings from the restructuring, which would include consolidations, capacity reductions, and technology investment writedowns, could add $1.00 to share earnings by 1991.

Dec. '89— Directors approved the repurchase of $4 billion of IBM stock in addition to the $1 billion previously authorized in October.

Aug. '89— During July and August IBM announced the actual or planned acquisition of minority stakes in a number of computer software concerns as part of an effort to speed development of applications software for IBM computers.

Next earnings report expected in mid-January.

Business Summary

IBM is the largest manufacturer of data processing equipment and systems. Industry segment contributions in recent years:

Gross Revenues	1988	1987
Processors/peripherals	44%	46%
Workstations	19%	19%
Programs/maint./other	34%	31%
Federal systems	3%	4%

Hardware sales provided 67% of revenues in 1988, software and services 29%, and rentals 4%. Foreign operations contributed 58% of revenues in 1988 and 71% of profits.

Processors manipulate data through the operation of a stored program. Peripherals include printers, storage and telecommunication devices. Workstations include small business computers, intelligent workstations and typewriters. Program products include applications and systems software. Maintenance represents separately billed maintenance services. Other revenues are derived from financing revenue, supplies and miscellaneous support services. The Federal systems group serves the U.S. government's defense, space and other agencies.

Dividend Data

Dividends have been paid since 1916. A dividend reinvestment plan is available.

Summary

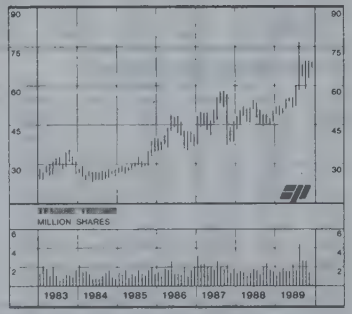
This well-regarded company, which derives two-thirds of sales and earnings from foreign operations, is a leading producer of products used by other manufacturers to impart or improve flavor or fragrance in a wide variety of consumer goods. Earnings in the first half of the 1980s were restricted by the strong U.S. dollar and adverse economic conditions in foreign markets, but profits in recent years advanced with the weaker U.S. dollar and improving worldwide sales.

Current Outlook

Share earnings for 1990 are projected at about $4.20, versus the $3.75 expected for 1989.

The quarterly dividend was raised 13%, to $0.54 from $0.48, with the December, 1989 declaration.

Sales and earnings for 1990 are expected to advance moderately. Growth should reflect continued rising sales volumes of flavors, fragrances and aromas in most parts of the world stemming from stronger consumer demand for personal care, household, cleaning, food and beverage products, and a continued resurgence of the domestic fine fragrance market for perfumes. However, the stronger U.S. dollar will limit gains. Continued growth in new product introductions by customers should also be beneficial in 1990.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar	227.2	224.0	179.0	148.0
Jun	236.8	234.2	199.9	162.1
Sep	216.9	200.1	187.7	164.9
Dec	---	181.3	179.3	145.7
	---	839.5	745.9	620.7

Sales for the nine months of 1989 rose 3.4%, year to year, as increased sales worldwide were partly offset by the effects of the stronger U.S. dollar. Margins widened, and pretax income gained 7.2%. After taxes at 38.0%, against 38.7%, net income advanced 8.3%, to $3.01 a share from $2.78.

Dec	E0.74	0.62	0.56	0.45
	E3.75	3.40	2.83	2.29

Important Developments

Nov. '89— IFF said that both the third quarter and nine month 1989 results were affected by comparison with an exceptional strong performance in 1988 and by the decline of the European currencies against the U.S. dollar.

Mar. '89— IFF said that it expected strong sales and earnings growth in 1989. Its U.S. flavor business was expected to improve as product planning and new launches in the food industry return to normal levels following disruptions from merger and acquisition activities. The company also expected to continue to obtain a high rate of new business in fine fragrances and perfumes. Capital expenditures for 1989 were budgeted at $50 million, versus the $41 million of 1988, and R&D spending was expected to approximate $52 million, up about 5% from the year before.

Next earnings report expected in early February.

Business Summary

International Flavors & Fragrances is a leading producer of products used by other manufacturers to impart or improve flavor or fragrance in a wide variety of consumer products. Contributions in 1988 by geographic area were:

	Sales	Profits
United States	30%	21%
Western Europe	45%	55%
Other areas	25%	24%

Fragrance products (64% of 1988 sales) are used in the manufacture of soaps, detergents, cosmetic creams, lotions and powders, lipsticks, aftershave lotions, deodorants, hair preparations, air fresheners, perfumes and colognes, and other consumer products. The cosmetics (including perfumes and toiletries) and household products (soaps and detergents) are the company's two largest customer groups.

Flavor products (36% of 1988 sales) are sold principally to the food, beverage and other industries for use in such consumer products as soft drinks, candies, cake mixes, desserts, prepared foods, dietary foods, dairy products, drink powders, pharmaceuticals, oral care products, alcoholic beverages and tobacco.

The company uses both synthetic and natural ingredients in its compounds. A substantial portion of the company's synthetic production is sold to others, including such chemicals as phenyl ethyl alcohol, ionones, alpha amyl cinnamic aldehyde, and various synthetic musks.

NYSE Symbol IGL Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 25'89	1989					
48⅝	55½-38	14	1.00	2.1%	B	0.91

Summary

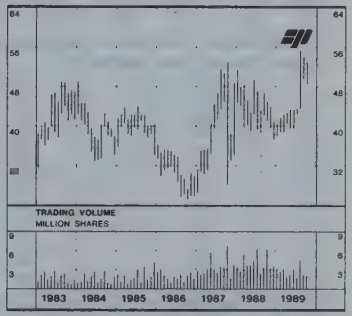
This company is a major producer of medical products, specialty chemicals, flavors, and animal health and nutrition products. A 38% interest is also held in IMC Fertilizer Group (IFL), one of the world's largest fertilizer producers. IGL intends to greatly expand its specialty and animal health businesses through acquisitions and internal development, while also repurchasing 4.8 million more shares of its common stock. A major acquisition of an unrelated business is also possible.

Current Outlook

Share earnings for the fiscal year ending June 30, 1990 are estimated at about $3.00, versus the $4.20 of fiscal 1989.

Dividends should continue at $0.25 quarterly.

Earnings from operations for fiscal 1990 should begin to benefit from new product introductions and plant start-ups and cost savings resulting from the integration of recent acquisitions, but product development costs will remain relatively high for some time. Lower fertilizer prices will likely greatly reduce earnings for IMC Fertilizer. Continued stock repurchases and/or possible major acquisitions will have an impact on reported earnings.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	311	218	425	340
Dec.		241	460	381
Mar.		258	323	456
Jun.		266	263	461
		983	1,471	1,638

Sales for the three months ended September 30, 1989 rose 43%, year to year, reflecting the acquisition of Coopers Animal Health. With lower fertilizer profits, the absence a $0.72 a share nonrecurring gain, and higher interest expense, net income fell 74%.

Common Share Earnings ($)

Mar		0.91	0.27	0.58
Jun		1.88	0.78	d0.05
		4.20	3.30	0.08

Next earnings report expected in mid-January.

Important Developments

Oct '89— IGL said that while first quarter operating profits more than doubled, year to year, lower IMC Fertilizer earnings reduced after-tax earnings by $0.21 a share. IGL repurchased 1 million common shares from Curtiss Wright Corp. for $51.7 million. IGL has repurchased 9.2 million shares since October, 1987 with an additional 4.8 million shares authorized for repurchase.

Jul. '89— Earnings for fiscal 1989 included nonrecurring income of $1.76 a share, including a $0.89 a share gain from IMC Fertilizer's July, 1988 public stock offering. IGL said that while net income for 1989 rose slightly, earnings per share increased a substantial 34% as a result of the stock repurchase program. IGL acquired the Coopers Animal Health Group (annual sales of $300 million) for a total cost of $255 million.

Business Summary

Following the February, 1988 public offering of IMC Fertilizer Group, IGL has two major businesses. Mallinckrodt is a producer of medical products and specialty chemicals. Pitman-Moore is a leading supplier of animal health and nutrition products. Contributions by product segment in fiscal 1989.

	Sales	Profits
Medical products	35%	45%
Specialty chemicals	38%	38%
Animal products	27%	17%

Foreign operations accounted for 24% of sales and contributed 22% of profits in fiscal 1989.

Medical products include X-ray contrast media, catheters and other disposable medical devices, radiopharmaceuticals, and temperature, blood gas, and vital sign monitoring systems and products.

Specialty chemicals include cosmetic, drug, fine, laboratory and electronic chemicals, catalysts, and flavors for food, beverage and pharmaceutical products.

Animal products include mineral feed ingredients, growth promotants, pharmaceuticals, biologicals, anesthetics, antibiotics and diagnostic and surgical products.

IMC Fertilizer Group Inc. (38% owned) is the world's largest private enterprise producer of phosphate rock and potash. Anydrous ammonia, phosphate chemicals, mixed fertilizers and uranium oxide are also produced. Equity income in IMC Fertilizer was $52.9 million in fiscal 1989

Dividend Data

Dividends were resumed in 1971. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

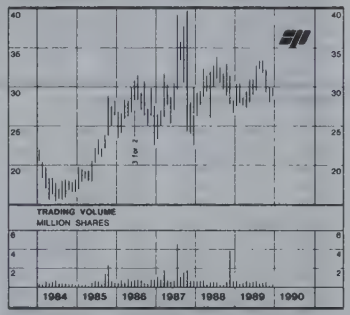
Through a restructuring program begun in 1985, this international food company has become a major foodservice distributor and producer of frozen foods and bakery ingredients. Swings in Venezuelan currency exchange rates can lead to volatile earnings. Favorable comparisons in U.S. and Canadian operations should allow a meaningful earnings turnaround in fiscal 1990-91.

Current Outlook

Earnings for the fiscal year ending February 28, 1991 may improve to $2.45 a share from the depressed $1.90 estimated for fiscal 1989-90.

The dividend may remain at $0.29½ quarterly.

Net profits for fiscal 1990-91 should trend significantly higher on continued progress on assimilation of acquired businesses, higher unit volume and growing operating efficiencies in the U.S. Better comparisons are expectecd for U.S. agribusiness as well. In Canada, 1989 divestitures should also aid comparisons, while improvment in Venezuelan currency translations will be important to overall earnings progress. Sale of Mister Donut franchises would enhance expected earnings.



Net Sales (Million $)

Quarter:	1990-1	1989-90	1988-9	1987-8
May	---	503	447	379
Aug.	---	493	439	404
Nov.	---	550	508	462
Feb.	---	---	480	452
	---	---	1,874	1,698

Sales for nine months ended November 30, 1989 rose 7.0%, year to year, led by an 11% increase in the U.S. Profitability improved on gains in domestic unit volume and efficiencies, but after sharply higher interest expense and losses on Venezuelan currency exchange and grain subsidy claims, net income fell 24%. Share earnings were $1.64 (on 11% fewer shares), versus $1.93.

Feb.	E0.55	E0.26	0.56	0.53
	E2.45	E1.90	2.49	2.26

Important Developments

Dec. '89— For the first nine months of fiscal 1989-90 IMC reported a foreign currency exchange loss of $1.3 million (which included a $2.1 million loss in the third quarter alone), versus a gain of $3.3 million a year earlier. It also reported a $4.7 million loss on grain subsidy claims in Venezuela in the fiscal 1989-90 third quarter.

Dec. '89— IMC attributed an 11% increase in sales and 15% higher earnings in the U.S. for the fiscal 1989-90 nine months to higher foodservice unit volume and operating efficiencies.

Oct. '89— IMC said that it was discussing the possible sale of its Mister Donut franchising business in the U.S. and Canada. The second largest franchised donut chain in North America, Mister Donut had 486 franchised shops in the U.S. and 87 in Canada. Sales for fiscal 1989 were estimated at $156 million. IMC expected to reach a decision by the end of fiscal 1989-90.

Next earnings report expected in late March.

Business Summary

IMC is a diversified international food company. Contributions by market in fiscal 1988-9:

	Sales	Profits
United States	71%	47%
Canada	19%	25%
Venezuela	10%	28%

U.S. operations include the manufacture and supply of specialty products to vending operators (VSA) and pizza restaurants (Pueringer); processing frozen and refrigerated appetizers and ethnic foods (Fred's Frozen Foods, Centre Brands, Rotanelli), surimi-based seafood (SeaFest) and specialty meats (Reuben Meats and Prepared Foods); bakery mixes and supplies to the baking industry. The company also distributes bakery ingredients to in-store bakeries in Southern California, is a Mister Donut franchisor, makes animal feeds and health products, and is a grain merchandiser.

Canadian operations make industrial flours, oat products and bakery ingredients; consumer products including family flour and baking mixes (Robin Hood brands); oat cereals; pickles, relishes and condiments; horseradish and sauces; specialty meats and livestock and poultry feeds. The company is a Mister Donut franchisor in Canada as well. In Venezuela IMC makes consumer products including precooked corn flour, family flour, oats, cachapa mix, spices, rice products, industrial flour and livestock and poultry formula feeds.

Dividend Data

Dividends have been paid since 1923. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

48⅞	58¾-45⅛	6	1.48	3.0%	B+	1.16

Summary

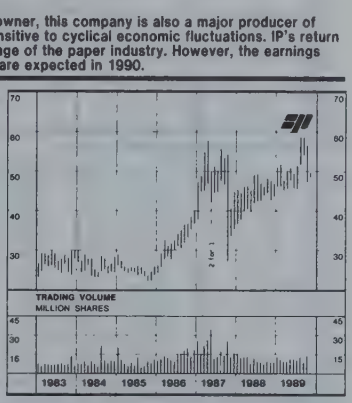
The world's largest paper producer and private landowner, this company is also a major producer of lumber and plywood. Sales and earnings are very sensitive to cyclical economic fluctuations. IP's return on equity in recent years has ranked below the average of the paper industry. However, the earnings outlook for 1989 is positive, and near-record profits are expected in 1990.

Current Outlook

Earnings for 1990 are projected at $7.20 a share, compared with the $7.80 estimated for 1989.

The $0.37 quarterly dividend will likely be raised in late 1989.

Sales for 1990 should grow modestly, unless the general economy begins to decline. Selling prices for most pulp and paper prices are near cyclical highs, and some price erosion may occur as the year progresses. Pulp prices will be especially vulnerable as new industry capacity comes on stream late in the year. Earnings should remain near historically high levels.



Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	2,619	2,280	1,828
Jun.	---	2,960	2,382	1,910
Sep.	---	[2]2,900	2,373	2,012
Dec.	---	---	2,498	2,013
	---	---	9,533	7,763

Sales for the nine months ended September 30, 1989 rose 20%, year to year, reflecting acquisitions and gains in most product segments. Margins widened on higher selling prices for most pulp and paper products, and net income increased 22%. Following preferred dividends, share earnings were $5.91 on 2.0% fewer shares outstanding, compared with $4.76.

	E7.20	E7.80	6.57	3.68

Important Developments

Sep. '89— IP's Arizona Chemical Co. subsidiary completed the acquisition of the Newport division of Reichhold Chemicals, Inc. Terms were not disclosed. Following the acquisition, Arizona Chemical will have worldwide revenues of $250 million.

Apr. '89— IP completed the acquisition of Aussedat Rey, the second largest paper producer in France for approximately $320 million. Aussedat Ray had 1988 sales in excess of $710 million.

Apr. '89— The company completed the acquisition of the ILFORD Group from Ciba-Geigy. ILFORD is a European manufacturer of professional black-and-white and color photographic papers and films.

Next earnings report expected in mid-January.

Business Summary

IP is the world's largest paper producer and a major factor in building materials. Contributions by industry segment in 1988 were:

	Sales	Profits
Pulp and paper	31%	43%
Paperboard and packaging	33%	39%
Wood products and timber	8%	8%
Specialty products	8%	8%
Distribution	19%	2%

Foreign sales accounted for about 10% of total sales in 1988.

The November, 1986 acquisition of Hammermill Paper Co. greatly increased IP's sales and improved the company's position in the fine writing and printing paper markets. IP also produces lumber, plywood and veneer. The company consumes about 60% of its containerboard production at its own box plants and about one-half of its bleached board at its own converting facilities. IP controls some 6.5 million acres of timberland.

Other activities include the production of formed (non-woven) fabrics, consumer tissue products, and agricultural and other products. IP is also engaged in mineral development and financial operations.

In December, 1987 IP purchased the nonwovens division of Kendall Corp. and Anitec Image Technology Corp. Anitec manufactures photographic film, papers and processing chemicals.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available.

Summary

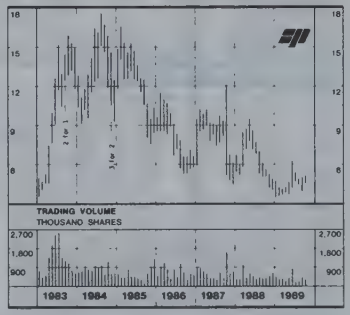
This company a broad range of power semiconductor products used to control electricity. It is the largest producer of power MOSFETs sold under its HEXFET tradename. Despite higher sales, the company incurred its fourth consecutive loss in fiscal 1989 due to low utilization of a major plant opened in April, 1987. Modest profitability may be restored in fiscal 1990 due greater utilization of its major plant and the impact of a planned restructuring and consolidation. Finances are weak.

Current Outlook

Modest profitability is likely for the fiscal year ending June 30, 1990, in contrast to fiscal 1989's loss of $1.13 a share.

Early resumption of dividends is not anticipated.

Sales should rise in fiscal 1990 due to rapid growth in MOSFETs. Higher sales of other products are also likely. However, the gain will be restrained by industry growth that is likely to be only minimal and continuing pressure on prices. Margins will be aided the higher volume and greater utilization of the company's $100 million HEXMET America plant that was opened in 1987. In addition, the pending restructuring, including the formation of two indepentent operating divisions, and a consolidation of manufacturing facilities should allow margins to widen significantly. Interest expense could decline if a possible equity offering is made to bolster the company's weak finances. Modest profitability is likely to be restored.



Net Sales (Million $)

Important Developments

Sep. '89— IRF said that its improved results in the first quarter of fiscal 1989-90 reflected higher production rates and improved gross margins at its HEXFET America plant opened in 1987. Utilization of wafer fabrication capacity at the plant averaged 45% in the quarter, up from 40% in the previous quarter and 22% in the year-earlier period.

Next earnings report expected in mid-January.

Business Summary

International Rectifier manufactures a broad range of power semiconductor products use to control electricity in a variety of applications.

IRF adapted metal oxide silicon (MOS) process technology to introduce in 1979 an innovative power MOSFET (metal oxide silicon field effect transistor), marketed under the tradename HEXFET. Sales of HEXFETs have made IRF the world's largest supplier in the power MOSFET market. IRF has also extended its expertise in MOS and other technologies to develop power integrated circuit devi ces.

The company also manufacturers and sells a broad line of high power semiconductor products including thyristors, rectifiers and Schottky diodes.

A $100 million, highly-automated 285,000 sq. ft. plant to produce HEXFETs began production on April 1, 1987. The facility features an innovative production line with linear flow of silicon wafers, similar to that in an automobile factory.

Foreign operations accounted for 45% of sales and a $3.5 million operating profit in fiscal 1989.

Dividend Data

Annual dividends were omitted in 1982 after having been paid since 1973. The shares were split 3-for-2 in December, 1984, and 2-for-1 in October, 1983.

Finances

In 1987 the company entered into a three-year credit facility of $60 million with Chrysler Capital Corporation. During fiscal 1989 the company used nearly 100% of this facility. In its fiscal 1989 Annual Report, the company said it had agreed with Chrysler Capital Corporation in September, 1989 to an amendment to provide an additional $3 million on its term loan and to extend the agreement for one year.

In the fiscal 1989 Annual Report, the company said that it expected capital equipment outlays in fiscal 1990 to be minimal.

Dec. 28'89	1989					
32⅜	37⅞-24⅜	16	0.68	2.1%	A	1.15

Summary

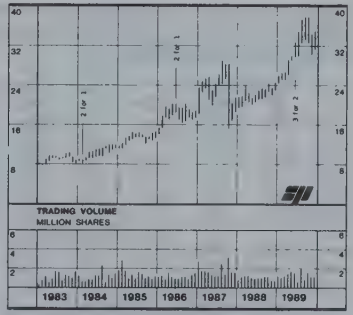
Interpublic is one of the largest advertising agency systems in the world. The level of billings reflects worldwide economic conditions and success in expanding the agency network and in adding clients. Long-term growth patterns for the industry appear favorable, particularly overseas, and Interpublic's large size provides a greater cushion to account shifts than is the case for many smaller agencies. The stock was split 3-for-2 in June, 1989.

Current Outlook

Earnings for 1990 are projected at $2.35 a share, versus the $2.10 estimated for 1989.

The $0.17 quarterly dividend is expected to be raised to $0.19 or $0.20 in 1990.

Gross income for 1990 is expected to rise about 9%, reflecting sluggishness in U.S. advertising but strong international gains, aided particularly by contributions from new business and improving advertising conditions in European markets. Margins will benefit from ongoing cost controls. Equity earnings will increase, and net income should receive an additional boost from a weaker U.S. dollar against foreign currencies.



Gross Income (Million $)

Quarter:	1989	1988	1987	1986
Mar.	276.5	242.8	202.5	167.9
Jun.	317.1	282.6	249.6	215.3

Important Developments

Oct. '89— IPG said that its agency systems' net new business in the nine months through September, 1989 was $403 million.

Jun. '89— IPG announced a restructuring of its relationship with Lowe Group. IPG increased its equity interestp in Lowe in exchange for IPG's 70% interest in New York-based Lowe Marschalk, Inc. (LM). IPG now holds 35.75% of Lowe Group (up from 24.95% previously), while LM has become a wholly-owned subsidiary of Lowe. Separately, IPG agreed to acquire a 49% minority interest in Fremantle International, Inc. and its wholly-owned British subsidiary, Talbot Television Ltd., which over the past decade have become Europe's largest suppliers of game shows, with 43 different series of production in nine countries.

Next earnings report expected in late January.

Business Summary

The Interpublic Group of Companies is one of the world's largest advertising agency systems. The advertising agency functions of the company are carried on in 65 countries through IPG's five agency systems including McCann-Erickson Worldwide; Lintas: Worldwide; Dailey & Associates; Campbell-Ewald Co.; and interests in Lowe Group. The company also offers advertising agency services in 23 other countries through association arrangements with local agencies. During 1989, 15 acquisitions were completed around the world, compared with 25 acquisitions in 1988.

The principal functions of the company's advertising agencies are to plan and create advertising programs for clients and to place the advertising in various media, such as radio, television, magazines and newspapers. The usual advertising agency commission is 15% of the gross charge (billings) for advertising space or time. During 1988 IPG's two largest clients accounted for 19% of income from commissions, fees and publications, compared with 22% in 1987.

Operations outside the U.S. accounted for 61% of income from commissions, fees and publications, and 60% of income before taxes and unallocated expenses in 1988.

In addition to advertising agency activities, IPG is engaged in publishing, market research, sales promotion, public relations, product development and other related services.

Dividend Data

Dividends have been paid since 1971. A dividend reinvestment plan is available.

Summary

This well-managed utility holding company serves the diversified regional economy of Indianapolis and surrounding communities. Benefiting from the growth of the local service territory in addition to excellent cash flow, the company's near-term prospects are quite favorable. The longer-term outlook is enhanced by supportive Indiana regulation and completion of the construction program.

Current Outlook

Share earnings for 1990 are projected at $2.65, up from the $2.60 estimated for 1989.

Dividends are expected to continue at $0.43 quarterly.

Share earnings for 1990 should benefit from slightly higher kwh sales. The longer-term outlook is enhanced by supportive regulation and completion of the construction program.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar	151.8	157.7	140.9	128.6
Jun	137.5	140.1	128.1	112.4
Sep	159.3	165.7	148.1	137.8
Dec	---	146.0	136.7	133.6
	---	609.4	553.7	512.4

Revenues for the nine months ended September 30, 1989 fell 3.2%, year to year, due primarily to the absence of a $9.8 million onetime sale for resale to a neighboring utility made in the 1988 period. After a nominal decline in production costs, operating income dropped 8.9%. Following substantially higher net other income on a gain from the redemption of a limited partnership investment, and lower fixed charges, net income was down 4.6%. Share earnings were $2.02, versus $2.12.

Important Developments

Nov. '89— IPL reported that for the 1989 third quarter electric operating revenues were $6.6 million lower, year to year, due primarily to a nonrecurring sale for resale during 1988, a 2.5% decrease in retail sales, and decreased fuel cost recoveries. Share earnings, however, benefited from decreased operating expenses, and an after-tax gain realized on the redemption of a nonutility limited partnership investment in September, 1989. Separately, IPL and Ebara Environmental Corp. filed an application on August 29, 1989 with the U.S. Department of Energy as an initial step in construction and operation on a commercial-scale demonstration project using new clean coal technology. The proposed project is estimated to cost $46.4 million, and the Department of Energy is being asked to support 50% of that cost.

Next earnings report expected in late January.

Business Summary

IPALCO Enterprises is the holding company for Indianapolis Power & Light. In 1988 some 96% of revenues were derived from electricity and 4% from steam. IPL also owns Mid-America Capital Resources, Inc., a holding company created to participate in nonutility ventures. The unit currently engages in investment management and has an equity interest in a broadcast property. The company is considering investments independent power production. Electric revenue contributions in recent years:

	1988	1987	1986	1985
Residential	36%	36%	36%	31%
Small comm'l & ind'l	24%	25%	26%	23%
Large comm'l & ind'l	35%	36%	36%	45%
Other	5%	3%	2%	1%

Nearly all of 1988's generation requirements were derived from coal. Peak load in 1988 was 2,475 mw, and system capability totaled 2,845 mw for a capacity margin of 13%. IPL's generating capacity is sufficient for well into the 1990's.

IPL projects total system sales will grow about 3.3% annually for the next five years. All of its current financing needs are projected to be met with internal capital. If Congress passes stringent acid rain legislation, the company would be expected to access the capital markets to finance construction of environmental protection equipment. Construction work-in-progress for environmental equipment can be included in rates in Indiana.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available.

21¼	28⅞-18	59	None	None	C	1.68

Summary

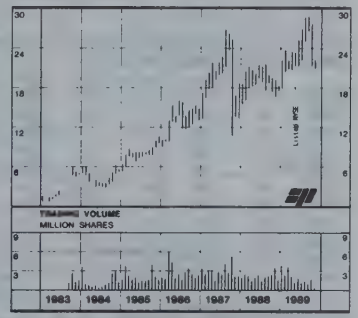
The firm is the leading lessor of containers and railcars, a major provider of marine construction services, and a distributor of wiring systems. While profits should continue to advance in 1990, share earnings will be limited by the dilutive effects of the late 1988 purchase from Henley Group of Pullman Leasing and equity stakes in Santa Fe Pacific and American President Cos. for $827 million and 18,700,000 common shares. Trading in ITL's common and $3.375 convertible preferred stock shifted to the NYSE from the NASDAQ system in May, 1989.

Current Outlook

Earnings for 1990 are estimated at $1.00 a share, versus the $0.60 anticipated for 1989.

Payment of common dividends is unlikely over the next 12 months.

Profits for container leasing should continue to advance in 1990, as cargo rates remain firm and fleet utilization holds steady at high levels. Railcar lease profits may be flat, reflecting soft demand for boxcars and the dilutive effect of ITL's stake in Quadrum S.A. Profit growth for warehousing will be fueled by recent acquisitions. Anixter should continue to post solid gains, reflecting strong domestic demand and expansion into European markets. While tax rates and interest costs should ease, comparisons will continue to be limited by heavy costs for carrying Itel's investments in Santa Fe Pacific Corp. and American President Cos.



Revenues (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Nov. '89— ITL filed notice with regulatory authorities seeking clearance to purchase at least $15 million of Ryder System's common stock. Ryder, which earned $31.1 million during 1989's first nine months on revenues of $3.8 billion, is a leading lessor of trucks.

Sep. '89— Itel bought a 35% stake in Quadrum, S.A. a Mexican railcar lessor, for $46.3 million. In August, ITL sold the equipment financing unit of its Signal Capital Corp. subsidiary for $675 million. ITL expects to close the sale of Signal's real estate operations by 1989 year-end. Signal was acquired from Henley Group in 1988 in a package that included minority stakes in Santa Fe Pacific Corp. and American President Cos.

May '89— ITL's common and $3.375 preferred shares were listed on the NYSE on May 4.

Next earnings report expected in late January.

Business Summary

Contributions (in $ millions) to operating profits by business segment in recent years:

	1988	1987	1986
Container	$89.2	$51.1	$21.7
Rail	111.4	43.1	27.5
Dredging	18.8	20.0	8.6
Wire distribution	54.0	46.0	---

Following a series of acquisitions in recent years, Itel has emerged as the world's largest lessor of marine containers. ITL's fleet at 1988 year-end of 528,000 20-foot equivalent units represents some 20% of worldwide lease capacity. The fleet utilization rate in 1988 was 88%, versus 81% in 1987 and 67% in 1986.

The acquisition of Pullman Leasing from Henley Group in September, 1988 expanded Itel's railcar fleet to 72,000 units, making the firm the largest railcar lessor in the U.S. Itel also operates seven short-line railroads and eight railcar repair facilities, and provides nationwide warehouse and distribution serves through a network of 19 facilities.

Great Lakes International is a leading marine dredging firm, active primarily in deepening and maintaining shipping channels and ports in the U.S. Its fleet consists of 27 dredges, 48 barges, 12 tugboats and over 150 support vessels.

Anixter Bros. is a leading distributor of wiring and cable used for the transmission of power, voice, video and data communications. Anixter stocks more than 75,000 products at facilities numbering over 120 worldwide.

Itel also owns 17% of Santa Fe Pacific Corp., a rail and natural resources firm and 16% of American President Cos., a container shipping line. ITL is selling its Signal Capital unit (acquired in 1988), which engages in equipment financing, leveraged leasing and commercial finance.

Sep. 26'89	1989					
29¾	34⅜-27½	10	0.60	2.0%	A-	1.11

Summary

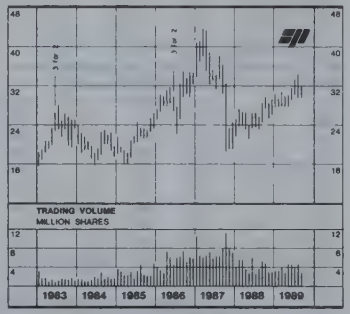
James River is a major integrated manufacturer of pulp, paper and converted paper and plastic products, including towel and tissue paper, communication paper, folding cartons and flexible packaging materials and food and beverage service items. The company has expanded rapidly through acquisitions in recent years.

Current Outlook

Earnings for the fiscal year ending April 30, 1990 are estimated at $3.00 a share, compared with the $2.87 of fiscal 1988-9.

The quarterly dividend was raised 25%, to $0.15 from $0.12, with the July, 1989 payment.

Sales for fiscal 1989-90 should show moderate improvement because of acquisitions and some volume gains. Prices should remain firm as long as the general economy avoids recession. Earnings should be helped by only moderate increases in raw materials costs.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	1,470	1,388	1,179	1,070
Oct.	---	1,455	1,286	1,160

Apr	E0.85	0.84	0.66	0.53
	E3.00	2.87	2.36	2.03

Important Developments

Aug. '89— The company announced plans for a $280 million expansion of its Marathon pulp mill in Ontario, Canada, where JR has cutting rights on 2.4 million acres of timberland. The expansion will increase Marathon's capacity to 1,000 tons per day and minimize the impact of market pulp price swings on earnings.

Apr. '89— JR purchased substantially all of the assets of the Wyomissing Paper division of Paper Corp. of America. Wyomissing has annual sales of approximately $36 million.

Feb. '89— The company adopted a "poison pill" preferred stock purchase rights plan as an anti-takeover move.

Next earnings report expected in late November.

Business Summary

James River is the nation's largest producer of towel and tissue paper, food and beverage packaging products, and specialty papers. JR is also the second largest maker of food and beverage service products and is a major factor in communications papers. The distribution of sales in recent fiscal years:

	1988-9	1987-8
Hygenic paper products	27%	27%
Specialty papers	14%	14%
Food service products	15%	16%
Food & consumer packaging	16%	16%
Communication papers	23%	23%
Market pulp & other	5%	4%

Specialty and communication papers include special purpose papers used in the manufacture of industrial and consumer products and cast coated papers, blotting papers, textured text and cover papers, and other related items. Towel and tissue products are sold to institutions and consumers. Dixie brand food-service products include paper and plastic disposable plates, cups and related items. Packaging products are designed to meet the needs of customers. Other sales include coated products and market pulp.

Dividend Data

Dividends have been paid since 1973. A "poison pill" stock purchase right was adopted in 1989.

Summary

Jefferson-Pilot is a holding company whose subsidiaries provide a wide-range of insurance, financial and communications products and services. JP derives a substantial portion of its income from life insurance operations. It also owns a fire and casualty and title insurance company, and has interests in radio and TV broadcasting. Earnings are expected to improve in 1989 and 1990.

Current Outlook

Excluding realized capital gains or losses, net earnings for 1989 are expected to rise to $3.00 a share from 1988's $2.50. Share earnings for 1990 could reach $3.25.

The $0.34 quarterly dividend, increased 6.3% from $0.32 in the second quarter of 1989, is the minimum expectation.

An expected improvement in the depressed group health area, together with moderate advances in life profits, should propel earnings upward in 1989. Rate hikes have been implemented in the group health line to combat rising medical care costs. A large loss was incurred in this line in 1988, largely due to an $8 million addition to reserves. Barring further reserving action, improvements are likely in 1989. Individual life operations should benefit from rising investment income and lower operating expenses. P-C profits are likely to come under pressure throughout 1989, but may begin to improve in 1990 as an upturn in the underwriting cycle approaches. Communications profit growth may slow due to softening demand. Share repurchases will aid share earnings comparisons.

Review of Operations

Revenues for the six months ended June 30, 1989 rose 4.4%, year to year (1988 restated), mainly reflecting sharply increased pretax realized investment gains of $13.1 million, versus $953,000. Life and annuity premiums declined 12%, while accident and health premiums increased 6.1%. Total benefits and expenses edged up 1.2%, resulting in a 25% rise in pretax earnings. After taxes at 33.3%, versus 29.2%, net income was up 23%. Share earnings were $1.74 (including $0.23 in net realized investment gains), versus $1.37 ($0.02).

By segment, individual life profits advanced 6.8%; group life and health posted a $2.2 million profit versus a $1.0 million loss; p-c and title earnings fell 14%; and communication profits were down 1%.

Important Developments

Aug. '89— JP said first half 1989 individual life earnings benefited from continued cost controls and improved agent productivity. Profitability in group life lines was satisfactory. While group health remained unprofitable, recent premium increases were beginning to outpace claims growth. P-C profits remained under pressure from competitive pricing. A softening of the broadcast media market impeded the communications segment's growth.

Next earnings report expected in early November.

Business Summary

Jefferson-Pilot Corp. is a holding company, whose principal insurance subsidiaries are Jefferson-Pilot Life Insurance Co., Jefferson-Pilot Fire & Casualty Co., and Jefferson-Pilot Title Insurance Co. JP also owns and operates radio and television stations, and is engaged in televised sports program production and electronic data services. Contributions to revenues and pretax operating income in 1988:

	Revs.	Profits
Life insurance	85%	78%
Other insurance	4%	7%
Communications (nonconsol.)	10%	11%
Other	1%	3%

Life insurance subsidiaries provide a complete line of life, accident and health, annuity, and pension policies. Life insurance in force at year-end 1988 was $36.3 billion, of which individual life insurance represented 40% and group 60%.

Jefferson-Pilot Fire & Casualty offers a full line of fire, property and casualty insurance. Jefferson-Pilot Title Insurance is licensed to operate in 7 states and the District of Columbia. Other units provide management services and mutual fund sales.

Jefferson-Pilot Communication Co. owns and operates two television and 10 radio stations in North Carolina, Virginia, Georgia, Florida, and Colorado and California. Other operations include a sports production and syndication business and a regional college sports promotion business.

Dividend Data

Dividends have been paid since 1913. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Nov. 2'89	1989					
28 3/4	46 3/4-28 3/8	11	1.16	4.0%	A-	1.00

Summary

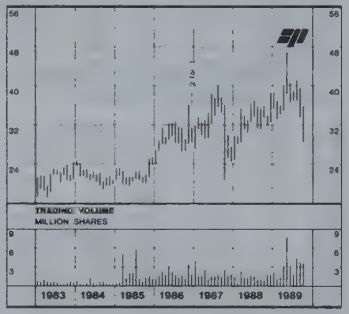
This diversified company supplies building controls and energy/fluid management systems for nonresidential buildings and the process industries. It also manufactures complete seats, seating components and lead batteries for the auto industry and is a leading producer of plastic soft drink bottles and plastic containers. A projected rise in sales and a modest improvement in margins should permit a small earnings gain for fiscal 1990.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are projected at $2.65 a share, versus the $2.55 recorded for fiscal 1989.

Dividends should remain at $0.29 quarterly.

Sales for fiscal 1990 are expected to rise, with gains in all units. Projected lower auto output will restrict sales and earnings growth in the auto unit, but the inclusion of PAW in the controls unit together with increases in other segments should lead to a sales gain in excess of that in fiscal 1989. Margins should improve, but high interest costs, share dilution, and preferred dividend requirements will limit the earnings gain.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	860	733	603	707
Mar.	864	745	603	626
Jun.	911	793	653	603
Sep.	1,049	829	818	704
	3,684	3,100	2,677	2,639

Sales for the fiscal year ended September 30, 1989 (preliminary) rose 19% from those of fiscal 1988, reflecting gains in the automotive, controls and plastics segments. Start-up costs along with production inefficiencies in the automotive unit and severe pricing pressure in the battery unit cut the gain in gross profits to 1.6%. After higher SG&A expenses and increased interest costs, pretax income fell 4.1%. After taxes at 45.5%, versus 44.5%, net income declined 5.8%. Following initial preferred dividends in 1989, share earnings were $2.55, versus $2.83.

Sep.	0.57	0.83	0.95	0.86
	2.55	2.83	2.20	2.36

Important Developments

May '89— JCI acquired Pan Am World Services, Inc. (PAW) for $165 million in cash plus expenses. The acquisition was financed with proceeds from the sale of preferred stock to a newly established ESOP. PAW, based in Cape Canaveral, Fla., provides facility management services for military bases, space centers and airports. PAW had revenues of about $600 million in 1988.

May '89— JCI established an Employee Stock Ownership Plan (ESOP) as part of its 401K savings and investment plan for employees. JCI said that it would issue $175 million of convertible preferred stock to the ESOP. The new preferred stock would pay a guaranteed annual dividend of 7.75% and when converted would be equivalent (initially) to about 8% of JCI's outstanding common shares.

Next earnings report expected in late January.

Business Summary

JCI is a leading manufacturer of automated building controls, batteries, automotive seating and plastics. Contributions in fiscal 1988:

	Sales	Income
Controls	35%	29%
Battery	21%	21%
Automotive	28%	27%
Plastics	16%	23%

The controls segment manufactures, installs and services controls and control systems, principally for nonresidential buildings. JCI's control systems are used for temperature and energy management, firesafety and security maintenance. The segment also includes custom engineering, installation and servicing of process control systems.

The battery segment makes lead-acid batteries primarily for the automotive replacement market and for original equipment manufacturers.

The automotive segment manufactures complete seats and seating components for U.S. manufacturers of cars and light trucks.

The plastics segment is the leading U.S. producer of plastic soft drink bottles. This unit also manufactures plastic blowmolding machinery for consumer and industrial packaging.

Dividend Data

Dividends have been paid since 1901. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1984.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Summary

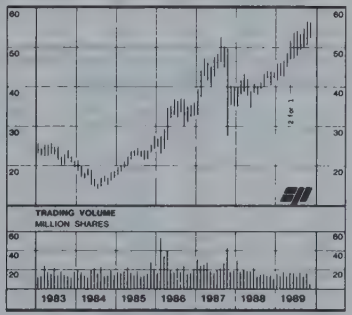
This well-known health care firm has one of the broadest product lines in the industry, offering consumer products, ethical and over-the-counter pharmaceuticals, and various other medical and dental items. Above-average growth prospects for major markets coupled with new product contributions should support good sales and earnings growth in the years ahead.

Current Outlook

Earnings for 1990 are estimated at $3.75 a share, up from the $3.25 likely for 1989.

An increase in the $0.29 quarterly dividend is likely in early 1990.

Sales for 1990 should post show further progress. Despite persisting softness in U.S. health and beauty aid markets and intensified competition in the sanitary protection line, volume should be lifted by continued strong gains in pharmaceutical sales and further growth in professional lines. New products, including Hismanal antihistamine, Eprex anti-anemia treatment and Acuvue disposable contact lenses, will be an added plus. Margins should be well maintained on the better volume and cost efficiencies.



Net Sales (Million $)

Important Developments

Oct. '89— The company's over-the-counter pharmaceuticals (OTC) joint venture with Merck announced plans to acquire the U.S. OTC drug business of ICI Americas, Inc. for $450 million. That business includes the Mylanta line of antacid products and the Mylicon line of anti-gas products. JNJ also recently announced a joint agreement with Abbott Laboratories and Chiron Corp. for the development of diagnostic tests. Management noted that four recent product introductions recorded substantial sales growth during the third quarter. These include Acuvue, the world's first disposable contact lens; Hismanal, a once-a-day, less-sedating antihistamine; Eprex, an anti-anemia agent used by dialysis patients; and Prepulsid, a gastro-intestinal prokinetic.

Next earnings report expected in mid-February.

Business Summary

This company is one of the world's leading manufacturers of health care products. Sales and operating profits were divided as follows in 1988:

	Sales	Profits
Consumer	41%	26%
Pharmaceutical	26%	49%
Professional	33%	25%

Foreign operations accounted for about 49% of sales and 61% of operating profits in 1988.

Consumer products encompass baby toiletries, first aid products, and nonprescription drugs. Some of the better known products include Johnson's baby powder, shampoo, oil and lotion; Tylenol analgesic; Stayfree, Carefree, and Sure & Natural feminine hygiene products; Band-Aid adhesive bandages, and Reach toothbrushes.

Pharmaceuticals consist of prescription drugs, contraceptives, therapeutics and veterinary products. Some items are Ortho-Novum oral contraceptives, Haldol tranquilizer, Tolectin antiarthritic, Nizoral and Miconazole antifungals, Eprex anti-anemia agent, Imodium antidiarrheal, Retin-A for acne, and Hismanal antihistamine.Professional items include ligatures and sutures, mechanical wound closure products, diagnostic products, dental products, medical equipment and devices, surgical dressings, surgical apparel and accessories, surgical instruments, intraocular lenses and hyaluronic acid.

Summary

This company processes and distributes from service centers throughout the U.S. a wide range of steel and aluminum products. Major markets include machinery, transportation, aerospace, construction, and energy related industries. Earnings rose rapidly in 1988 and into 1989's first half, reflecting continued strong demand for the company's products. During 1989's second quarter, JOR recorded a nonrecurring gain of $4.6 million ($0.72 a share) from the sale of its Honolulu service center land and buildings.

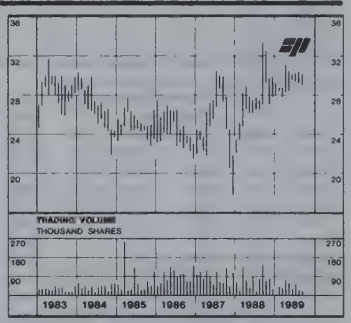
Business Summary

Jorgensen (Earle M.) is a nationwide distributor and preproduction processor of steel and aluminum products. Products include complete ranges of grades and sizes in alloy, carbon, stainless, tool, and specialty steels, as well as aluminum. These metals are carried in the form of bars, sheets, strip, plates, structurals, tubing, pipe and billets. The metals are held in the company's plants for sale and immediate delivery in their original condition, or are processed in accordance with a customer's request. Approximately 80% of all orders received by the company require some processing. Contributions to sales by classes of products sold in recent years:

	1988	1987
Steel sheets, plates, coils	11.5%	20.3%
Cold finished bars, tubing	25.4%	24.0%
Stainless steel & aluminum	30.2%	26.6%
Hot rolled steel bars, structurals & forgings	24.8%	21.3%
Other	8.1%	7.8%

JOR's customers represent virtually all industries. Included among them are machinery, transportation, fabricated metal products, aerospace, oil tool, construction, shipbuilding, plastics, petrochemical, farm implement, food processing, energy and environmental control. An estimated 40,000 metal users purchase metal from both steel producers and service centers while an additional 160,000 companies buy exclusively from service centers.

Operations are conducted at the company's 26 plants throughout the U.S. Processing consists of saw cutting to lengths, flame cutting into pattern shapes, surface grinding, slitting, roller leveling, roll forming, shearing, forging, trepanning, machining, heat treating, and galvanizing.



Important Developments

Aug. '89— The company reported that a slight softening in demand together with high levels of distributor inventories, produced intensified price competition and downward pressure on profit margins during its second quarter; JOR expected these conditions to improve later in the year, however. Separately, included in the second quarter and six months earnings for 1989 was a nonrecurring net gain of $4,562,000 ($0.72 a share) on the sale of its Honolulu service center land and buildings made excess by the upcoming consolidation of service center operations into the Campbell Industrial Park plant site already housing JOR's galvenizing, culvert pipe, and building, roofing, and siding production. JOR noted that construction of buildings for the service center operations at the Campbell Park location was nearing completion, and the move into such facilities west of the city should soon be under way.

Next earnings report expected in late October.

Quarter:	1989	1988	1987	1986
Mar.	138.9	114.8	79.4	75.7
Jun.	135.4	118.7	81.0	70.9
Sep.		119.2	85.6	69.9
Dec.		121.4	95.4	68.7
		474.0	341.5	285.2

Sales for the six months ended June 30, 1989 advanced 18%, year to year, reflecting continued strong demand for the company's products. Costs and expenses were well controlled, and pretax profits surged to $19.9 million from $9.1 million. After taxes at 37.9%, versus 38.8%, net income rose to $12.3 million ($1.94 a share) from $5.5 million ($0.88). Results include a gain of $4.6 million ($0.72 a share) from the sale of certain land and property in 1989, and a net loss of $1.6 million ($0.25 a share) from discontinued operations in 1988.

Nov. 28'89	1989					
29¼	29¼-18⅛	21	0.72	2.5%	A+	1.04

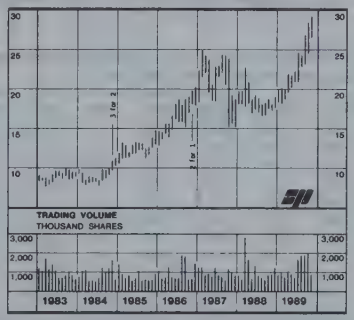
Summary

Jostens is a leading producer of class rings, yearbooks and recognition items for schools, universities and businesses. Reflecting acquisitions made in fiscal 1989, Jostens has entered the school photography market and formed a computer-based instructional technology company. Earnings in fiscal 1990 are expected to increase on higher sales and wider margins. The dividend was raised 13% in October, 1989.

Earnings for the fiscal year ending June 30, 1990 are estimated at $1.55 a share, up from fiscal 1989's $1.39.

Dividends were raised 12.5%, to $0.18 from $0.16, with the December, 1989 payment.

Sales in fiscal 1990 are expected to rise about 13%, reflecting contributions from recent acquisitions and the steady, highly predictable growth of the company's core businesses. Margins are expected to widen on volume efficiencies and acquisition related synergies. Profits will be restrained by higher interest expense.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	129.5	102.6	92.0	95.3
Dec.	---	182.6	131.1	143.1

Jun.	---	259.8	211.6	218.2
	---	696.4	560.0	587.3

Sales for the three months ended September 30, 1989 advanced 26%, year to year (1988 restated), reflecting both internal growth and acquisitions. Margins widened in this seasonally weak first quarter, and operating profits advanced 38%. Following heavier interest expense (net), the gain in pretax income was limited to 19%. After taxes at 36.3%, versus 36.9%, net income increased 20%, to $0.06 a share from $0.05.

Important Developments

Aug. '89— JOS said that it planned capital expenditures of about $22 million for fiscal 1990.

May '89— JOS acquired Education Systems Corp. (ESC) for 3.2 million common shares. ESC, based in San Diego and with sales of $22 million, develops and markets computer-based education systems providing instruction in reading, writing, mathematics, and science. Subsequently, ESC was combined with JOS' Prescription Learning unit to form a new subsidiary called Josten's Learning Corp., which has total sales of approximately $80 million. Also in fiscal 1989, JOS acquired School Pictures, Inc., Portrait World, Inc. and Edwards Photography (total annual sales of $32 million); Hunter Publishing (annual sales of $26 million) and about a one-fourth interest in Broderlund Software, Inc. (total annual sales of $40 million).

Next earnings report expected in early February.

Business Summary

Jostens is the leading producer of class rings, yearbooks, graduation announcements and diplomas. It also makes custom-made recognition products; provides educational services; and, reflecting acquisitions made in fiscal 1989, is in the school photography and computer-based instructional businesses. Sales in recent fiscal years:

	1989	1988	1987
Scholastic	35%	40%	41%
Printing & publishing	22%	22%	24%
Jostens Learning	12%	9%	7%
Artex	10%	12%	12%
Recognition	9%	11%	11%
Canada	6%	6%	5%
School pictures	4%	---	---
Wayneco	2%	---	---

The Scholastic division, JOS's longest established segment, manufactures class rings, graduation announcements, diplomas, and caps and gowns. The Printing & Publishing unit publishes student yearbooks and specialized publications.

Jostens Learning Corp. markets software and hardware for computer assisted instruction in the classroom and provides staff training, consulting and testing and computer maintenance services. Artex produces custom-imprinted activewear which is sold to college bookstores, retail stores, military outlets and theme parks.

The Recognition segment makes motivation and recognition products, including specialized jewelry, rings, watches, plaques and engraved certificates. Canada offers selected photography packages, publishes yearbooks and makes class rings and recognition jewelry for Canadian customers.

School Pictures provides student pictures and senior portraits to students. Wayenco is a direct marketer of customized products to university alumni and members of sororities, fraternities and other affinity groups.

Dividend Data

Dividends have been paid since 1960. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in fiscal 1989.

KLM Royal Dutch Airlines

NYSE Symbol KLM

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 28'89	1989					
24¼	26½-19⅞	7	¹0.8127	¹3.4%	NR	0.88

Summary

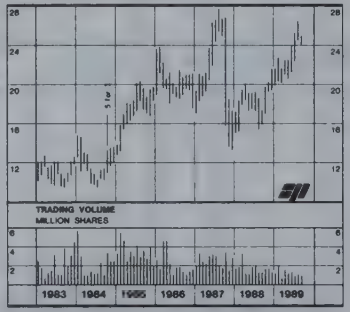
This company, which is 38%-owned by the Dutch Government, is one of the world's largest airlines, serving 141 cities in 77 countries. It derives substantial revenues from international traffic to and from European cities through Amsterdam. Improved earnings are likely for fiscal 1989-90, aided by gains on equipment sales. KLM recently obtained a minority equity interest in the buyout of Northwest Airlines, which could lead to some joint marketing arrangements between the carriers.

Current Outlook

Earnings for the fiscal year to end March 31, 1990 are estimated at $3.50 a share (before extraordinary gains), up from $3.31 in fiscal 1988-9.

The dividend for fiscal 1989-90 could be slightly above the $0.8127 (pretax) paid for 1988-9.

Moderate growth in revenues appears likely for the 1989-90 fiscal year. Economic conditions generated good traffic growth during the summer season, although some softening could be seen later in the fiscal year. Fare yield could improve slightly and good control of unit operating costs should continue. The contribution of gains on sale of aircraft could be slightly larger than in fiscal 1988-9.



Oper. Revenues (Million $)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	744	720	672	550
6 Mos. Sep.		1,480	1,389	1,273
9 Mos. Dec.		2,301	2,396	1,896
12 Mos. Mar. ...		2,787	3,002	2,641

Revenues (in guilders) for the three months ended June 30, 1989 increased 11.0%, year to year. Operating expenses rose 10.2%, gain on sale of assets increased substantially through sale of aircraft, and pretax income was up 40.4%. After taxes at 29.0%, against none a year earlier, net income was unchanged. Results exclude an extraordinary gain in the 1989-90 period.

Common Share Earnings ($)

Period:	1989-90	1988-9	1987-8	1986-7
3 Mos. Jun.	0.91	0.98	1.17	0.64

9 Mos. Dec.		3.27	3.57	2.60
12 Mos. Mar. ...		3.31	3.20	2.91

Important Developments

Sep. '89— Because of Department of Transportation demands, KLM's portion of the equity in the recent buyout of NWA Inc. will be reduced from $400 million to $175 million, or 25% of the total. KLM will retain a 5% voting and a seat on the Northwest Airlines board.

Jun. '89— KLM ordered five additional 747-400 aircraft as replacements for the five DC-10s in the fleet. Delivery would be in 1991-92. It also ordered 10 737s for delivery in 1990-92, which would standardize its European fleet with this aircraft model.

Next earnings report expected early November.

Business Summary

KLM, one of the world's leading airlines, operates over some 265,000 route-miles reaching 141 cities in 77 countries, primarily from its home base at Amsterdam. In addition to scheduled and charter passenger service, it conducts maintenance, aircraft handling, aerial photography, leasing, and hotel operations. Contributions to revenues in recent fiscal years:

Revenues	1988-9	1987-8	1986-7
Passengers	64%	62%	61%
Freight	18%	17%	18%
Mail	1%	2%	2%
Charters	1%	1%	2%
Other	16%	18%	17%

In fiscal 1988-9 North America accounted for 44% of total traffic, the Far East 30%, Central and South America 9%, Europe 7%, Africa 6% and the Near East 4%.

At March 31, 1989 the fleet consisted of 19 747s, five DC-10s, 10 A310s, 16 737s, and two F-100s. The NML and NetherLines subsidiaries operated four F-28s, nine F-27s, two Saab 340s and four Jetstream 31s. On order were four F-100s, eight 747-406s, three 737-406s, seven F-50s and six Saab 340Bs.

Summary

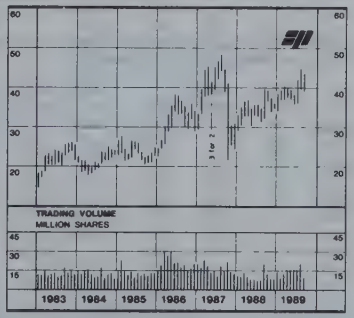
K mart, the second largest general merchandise retailer, grew rapidly in the 1970s through aggressive expansion, but emphasis in the 1980s has been on revitalizing discount department stores through remodelings and new merchandising strategies, and diversification into specialty retailing. Slower sales growth and higher expenses have temporarily put a damper on earnings but growth should resume in the second half of fiscal 1989-90, benefiting from an emphasis on higher-margin merchandise, greater efficiencies through automation, and increasing contributions from specialty businesses.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 are estimated at $3.95 a share, down slightly from the $4.00 of fiscal 1988-9. Earnings for fiscal 1990-1 should approximate $4.00 a share.

The quarterly dividend was increased 24%, to $0.41 from $0.33, with the June, 1989 payment.

Sales for fiscal 1989-90 should increase modestly, picking up in the second half. Margins should benefit in the second half from the higher volume and from an improved product mix, tight expense and inventory controls. Lower advertising costs and improved computer systems will also begin to benefit margins. Interest expense will be higher. Share earnings will benefit from fewer shares outstanding.



Sales (Billion $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	6.07	5.84	5.59	5.12

Important Developments

Sep. '89— Sales on a comparable store basis were up 1.5% in the second quarter of fiscal 1989-90. Weak sales in May resulted in below plan sales for the second quarter. This sales shortfall combined with lower gross margins, caused a decline in earnings in the second quarter. Reduced margins reflected KM's strategy of everyday low prices and greater sales contribution from lower-margined Makro. Management predicted an improving trend in sales and earnings for the second half of fiscal 1989-90, due to stronger merchandising programs, continued emphasis on everyday low prices and increased use of retail automation to improve the management of hours and productivity. Separately, the company announced that it was offering to repurchase common shares from holders who owned fewer than 100 shares.

Next earnings report expected in mid-November.

Business Summary

K mart is the nation's second largest general merchandise retailer, operating 4,082 retail outlets (as of January 25, 1989) in 50 states, Canada and Puerto Rico. This included 2,307 K mart discount department stores, and 1,775 specialty retail stores. In fiscal 1984-5 KM acquired the Waldenbooks retail book chain (1,218 units at 1988 year-end) and Builders Square do-it-yourself home improvement centers (133). In fiscal 1985-6 KM acquired Oregon-based Pay Less Drug Stores Northwest, with 269 super drug stores at 1988-9 year-end, and Canadian-based Bargain Harold's discount outlets (153).

K mart stores accounted for more than 84% of fiscal 1988-9 sales. The stores produced sales of $188 per sq. ft. of selling space, versus $183 in 1987-8, reflecting increased emphasis on lower everyday shelf price, merchandise enhancement and store refurnishing programs.

A 21.5% equity interest is held in Coles Myer Ltd., the major food and general merchandise retailer in Australia, and equity income of this operation was $61 million in fiscal 1988-9. Equity income from 49%-owned Meldisco footwear departments was $43 million.

In March, 1988 K mart purchased a 51% ownership interest in Makro Inc. Makro operates six warehouse clubs. In 1987 KM formed a partnership with Bruno's, Inc., a leading food retailer, to develop hypermarket stores. The first American Fare hypermarket opened January, 1989 in Atlanta, Ga. K mart has a 51% ownership in the partnership.

In 1988 KM introduced two new specialty concepts, Office Square, carrying mainly office supplies, and Sports Giant, selling sporting goods, footwear and apparel merchandise.

Dividend Data

Dividends have been paid since 1913. A "poison pill" stock purchase right was adopted in 1988.

NYSE Symbol KNE

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 14'89	1989					
24	25 3/8-17 5/8	NM	1.00	4.2%	NR	1.01

Summary

KN Energy is an integrated natural gas company serving customers in Kansas, Nebraska, Colorado, and Wyoming. Nonpipeline operations consist of exploration, development and production of mineral resources. Earnings for the first nine months of 1989 declined sharply, reflecting the absence of a gain on an 1988 asset sale and higher losses at the mineral resources segment.

Business Summary

KN Energy (formerly Kansas-Nebraska Natural Gas) is engaged in the sale of natural gas at wholesale and retail and in exploration, development and production of mineral resources including oil, gas, natural gas liquids, and coal. Revenues by business segment in recent years:

	1988	1987	1986
Gas Service	94.6%	98.4%	97.1%
Mineral Resources	4.8%	1.5%	2.7%
Other	0.6%	0.1%	0.2%

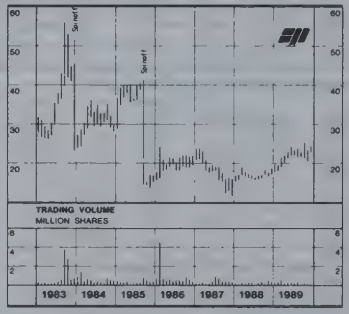
KNE's integrated interstate pipeline system provides natural gas service primarily in Kansas, Nebraska, Colorado and Wyoming, to 153,000 retail customers. As of December 31, 1988 the interstate system provided gas service in six states to 290 communities. Sales for resale are also made to other gas utilities which serve approximately 68,000 gas customers. Intrastate systems operate in Colorado and Wyoming. Total gas sales revenues for 1988 was 62% residential, commercial and agricultural, 34% sale for resale, and 4% industrial.

Oil and gas development subsidiaries are involved in lease acquisition and development projects in the Rocky Mountain area and south central U.S.

Oil and gas exploration development is conducted primarily through Western Oil Corp. and Wytex Exploration Co. in northern Louisiana, southwestern Wyoming and west Texas.

Wyoming Fuel Co. (100% owned) is involved in exploration, development and production of coal. Principal coal properties in southern Colorado have estimated coal reserves of 244 million tons.

Other operations involve maintaining and operating a microwave and two-way radio communications system.



Important Developments

Oct. '89— KNE began selling natural gas to the City of Colorado Springs; the company expected to deliver 1.9 Bcf of gas in 1989 and between 5.0 and 5.5 Bcf of gas in 1990. The company said that its mineral resources segment recorded for the first nine months of 1989 a operating loss of almost $1.5 million higher than in the year-earlier period, reflecting a reduction in the level of mine development costs being capitalized and higher than expected expenses to prepare the Golden Eagle Mine for installation of longwall equipment; the longwall mining equipment began operating in late August. Separately, the Nebraska Supreme Court made a ruling in a KNE rate case which the company expected would have a positive revenue impact of $1.3 million per year.

Next earnings report expected in mid-February.

Summary

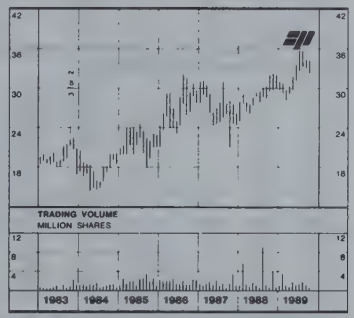
This medium-size electric utility derives about 95% of its business from metropolitan Kansas City, which has experienced steady economic growth due to its diverse economy. The Wolf Creek nuclear generating station, which was completed in 1985, supplies approximately 30% of KLT's electric requirements. Barring unusual weather conditions, flat earnings are expected for 1989, as growth in the customer base is offset by certain accounting changes.

Current Outlook

Share earnings for 1989 are estimated at the $3.20 reported for 1988. Share earnings for 1990 are projected at $3.30.

Directors boosted the quarterly dividend 4.9%, to $0.64 from $0.61, with the September, 1989 payment.

Flat earnings per share are anticipated for 1989, as the positive effects of gains in customer levels, higher rates and the redemption of preferred and preference stock issues should be offset by the cooler summer weather and the start of amortization of certain deferred costs and the ceasing of accruals of certain revenues as stipulated under a rate phase-in plan.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	163.2	165.3	150.8	142.5
Jun.	176.8	183.6	179.0	167.6
Sep.	---	228.0	218.4	203.8
Dec.	---	159.6	156.7	151.0
	---	736.5	704.8	664.9

Operating revenues for the six months ended June 30, 1989 fell 2.6%, year to year, reflecting mild Spring weather, partially offset by an increase in customers. Operating income declined 9.7%. After lower other income and interest charges, net income was down 21%. Share earnings were $1.17, versus $1.50.

Important Developments

Aug. '89— For the three months ended June 30 electric revenues from residential customers decreased 15%, while revenues from commercial, industrial, other, and resale sources increased 2.4%, 1.2%, 3.9% and 3.7%, respectively.

Jun. '89— The company said that the Nuclear Regulatory Commission (NRC) had issued its third assessment of nuclear plant performance, on Wolf Creek. For the April 1, 1988 through March 31, 1989 period, the report showed that Wolf Creek's performance had improved. Wolf Creek's performance received either Category 1 or Category 2 rankings in each of the seven functional areas evaluated. Category 1 indicates that reduced NRC attention in the functional area may be appropriate, while Category 2 rankings indicate that NRC attention may be maintained at normal levels.

Next earnings report expected in late October.

Business Summary

Kansas City Power & Light supplies electricity to a population of about 850,000 in Kansas City, Mo. and neighboring communities in Missouri and Kansas. About 70% of electric sales are made in Missouri. Contributions in recent years:

Revenues	1988	1987	1986	1985
Residential	37%	36%	36%	34%
Commercial	45%	45%	44%	44%
Industrial	15%	16%	17%	18%
Other	3%	3%	3%	4%

The fuel mix in 1988 was 76% coal, 23.6% nuclear, and 0.3% oil, and 0.1% natural gas. Peak load in 1988 was 2,656 mw and system capacity was 2,992 mw, for a capacity margin of 11.2%.

The company has estimated construction expenditures (excluding AFUDC) for the 1989-1993 period at $593.2 million. The largest items were for upgrading distribution and general facilities ($321.8 million) and for nuclear fuel ($85.9 million). Management believed KLT will be able to meet construction outlays with internally-generated funds.

Dec. 26'89	1989					
23¼	24¼-19¼	13	1.72	7.4%	B	0.62

Summary

This electric utility serves more than 250,000 customers in the southeastern portion of Kansas. With the completion of the Wolf Creek nuclear station in September 1985, the company has no plans for additional generating units. Under a July 15, 1988 rate order, KGE will not be entitled to any rate increases between January 1, 1989 and January 1, 1992, barring extraordinary circumstances. Slightly higher earnings are expected for 1990.

Current Outlook

Share earnings for 1990 are expected to approximate $2.10, up slightly from the $2.00 likely for 1989.

The quarterly dividend was increased 7.5%, to $0.43 from $0.40, with the December, 1989 payment.

Modestly higher earnings per share are anticipated for 1990, principally reflecting a likely increase in kwh sales, a return to more normal weather conditions, a decline in interest costs, greater investment income and the beneficial effect of a share repurchase program. Like a number of other utilities, KGE is experiencing increasing competition from customers building their own generating facilities. Under a July, 1988 rate order, the company would not be entitled to any rate increases until 1992 unless extraordinary circumstances develop.

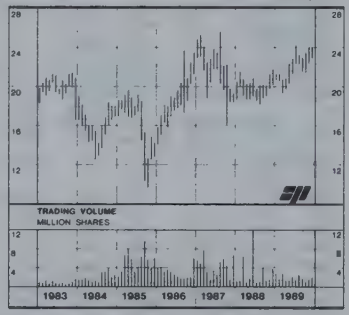
Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	121.3	118.3	113.3
Jun.	---	138.4	115.3	124.3
Sep.	---	167.5	174.1	164.0
Dec	---	---	118.5	110.5
	---	---	526.2	512.1

Operating revenues for the nine months ended September 30, 1989 rose 4.8%, year to year, primarily reflecting an increase in wholesale sales and a rate hike. Operating income was up 1.8%. Hurt by the discontinuation of phase-in revenues and lower investment income, net income declined 20%. Earnings per share were $1.62 on 6.9% fewer shares, compared with $1.88.

Common Share Earnings ($)

Quarter:	1990	1989	1988	1987
Mar	E0.20	0.22	0.30	0.45
Jun	E0.45	0.47	0.32	0.54
Sep	E1.10	0.94	1.32	1.04
Dec.	E0.35	E0.37	0.20	0.31
	E2.10	E2 00	2.10	2.34



Important Developments

Nov. '89— KGE estimated that fewer outstanding shares added some $0.02, $0.11 and $0.15 to earnings per share for the quarter, year-to-date and 12 months ended September 30, respectively. It said that lower earnings for the quarter were due primarily to reduced revenues from retail kwh sales, the loss of phase-in revenues accruals and the amortization of accrued phase-in revenues. These decreases were partially offset by reduced interest charges.

Oct. '89— The company said that the Kansas Corporate Commission had approved its special rate contract with a major manufacturing customer. Approval of the contract would reduce the customer's annual electric bill by about $2 million. KGE made the proposal to avoid the customer building a cogeneration unit which would have resulted in the loss of about $20 million in annual revenues.

Next earnings report expected in late January.

Business Summary

Kansas Gas & Electric provides electric service in southeastern Kansas (including the Wichita metropolitan area) to some 251,810 retail customers. Wholesale service is provided to 12 other electric utilities. Contributions to electric revenues by class of customers in recent years:

Revenues	1988	1987	1986	1985
Residential	38%	37%	37%	36%
Commercial	26%	25%	25%	25%
Industrial	30%	30%	31%	31%
Other	6%	8%	7%	8%

The fuel mix in 1988 was 56% coal, 35% nuclear and 9% gas. In 1972, 99% of KGE's fuel usage was gas. The company anticipates that in the near future, fuel usage will remain relatively constant with 1986-8 levels. Peak load in 1988 was 1,677 mw, and system capacity was 2,376 mw, for a capacity margin of 29.4%.

The 47%-owned Wolf Creek nuclear plant (KGE's share is 530 mw) began commercial operation in September, 1985. Total cost of the plant was $1.39 billion, including $429 million of AFUDC. The company has no plans to build additional generating capacity.

Dividend Data

Dividends have been paid since 1922. A dividend reinvestment plan is available.

Summary

KBH, formed in 1986, is a regional builder of single-family homes, generally in medium-sized developments close to major metropolitan areas in California and France. Under a March, 1989 restructuring, Kaufman and Broad, Inc. (KB) spun off its 92.6% stake in KBH and KBH paid a special dividend of $4.50 a share. Earnings increased in 1989's first nine months, on higher sales and wider margins. In October, a KBH joint venture sold an office building complex in Paris for about $600 million.

Business Summary

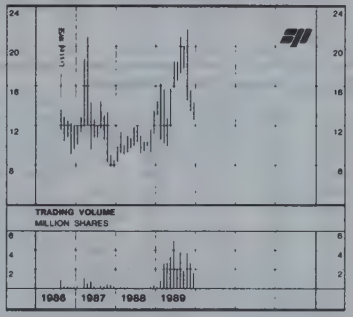
KBH builds and markets innovatively designed single-family homes, generally in medium-sized development close to major metropolitan areas. The company operates primarily in California, where it is the largest single-family home builder, and in France, catering to first-time home buyers and, in some markets, to trade up customers. KBH also provides mortgage banking services to its California home buyers through its IMC subsidiary. Contributions by geographic location in fiscal 1988:

	Sales	Profits
United States	49%	38%
France	44%	48%
Canada	7%	14%

Unit deliveries for fiscal 1988 were 4,836, versus 4,664 in fiscal 1987.

Home building activity in California is concentrated in the Los-Angeles, San Diego, San Bernardino-Riverside and San Francisco Bay Area-San Jose markets. KBH continues to pursue a strong land acquisition program in California. As of November 30, 1988 KBH owned more than 7,200 lots and 2,300 acres, with an additional 9,854 lots and 2,349 acres under option. Most of KBH's single-family homes in California are detached, ranging from 815 to 2,055 square feet, and were sold at an average price of $140,000 in 1988, compared with the state average of over $185,000.

KBH maintains three separate operations in France. Kaufman and Broad-France sells to the upwardly mobile executive market homes averaging $184,700 in price and 1,400 square feet in size in fiscal 1988. Bati-Service primarily builds townhouses and single-family attached homes, which sold at an average price of $99,200 and had an average size of 1,000 square feet in fiscal 1988. Kaufman and Broad-France also sells groups of homes and it develops medium sized commercial buildings in France. Kaufman and Broad Development, formed in 1987, was created to direct KBH's expansion into presold office and residential developments.



KBH also operates the Victoria Wood Development Corp. in Toronto, Canada, and participates in 24 joint ventures. In fiscal 1988 these joint ventures produced 128 homes.

Important Developments

Oct. '89— KBH and a joint venture partner, Banque IndoSuez, sold an office building complex in Paris for $600 million to a an international group led by a unit of Industrial Bank of Japan.

Aug. '89— KBH received proceeds of about $125 million from the sale of $405.4 million of zero coupon subordinated notes due 2004, which are convertible into common stock at a rate of 14.69 shares per each $1,000 face amount at maturity. Proceeds were used to redeem debt, resulting in a $3.4 million charge in fiscal 1989's third quarter.

Finances

Under a restructuring in March, 1989, Kaufman and Broad (KB) spun off its 92.6% stake in KBH through distribution of about 0.733 KBH common share for each share of KB common and Class B held, and KBH paid a special dividend of $4.50 a share on March 6. Also under the restructuring, KB changed its name to Broad Co. and KBH issued to certain Broad Co. units, for $81.75 million, 817,500 shares of new $12 preferred stock (exchangeable for subordinated notes) plus warrants to buy 7,500,000 shares of a new class of common stock at $6.98 each; proceeds were used to finance part of the $4.50 a share dividend paid on March 6, with the balance financed by debt. On a pro forma basis, the restructuring reduced KBH's shareholders' equity by about $122.8 million and increased debt by about the same amount. On May 31, 1989 KBH exchanged its $12 preferred stock for 12% subordinated notes due March 1, 1993. KBH redeemed the notes in August with proceeds from its sale of zero coupon notes.

In November, 1987 Kaufman & Broad Development presold the Atlantique Mountparnesse project in Paris, for $372 million. The project, scheduled for completion by late 1991, will include 770,000 sq. ft. of office and commercial space. Revenues would be recognized by KBH over a four-year period beginning in 1988, with profits to be shared equally with its financial partner.

In February, 1989 KBH entered into an agreement to raise the revolving line of credit to $200 million from $150 million. Financial covenant requirements under this borrowing agreement are typically more restrictive than under the prior agreement.

Dividend Data

Cash dividends were initiated in 1985.

Kellogg Co.

NYSE Symbol K Options on ASE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 11'89	1989					
68⅛	81⅝-57¾	16	1.72	2.5%	A+	0.81

Summary

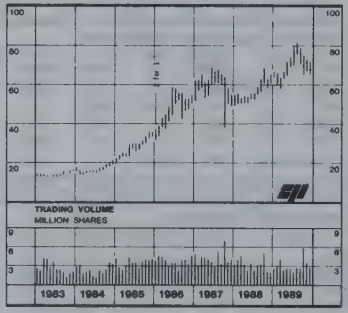
Kellogg is the dominant U.S. producer of ready-to-eat cereals, and is an important factor in foreign markets. Earnings have risen every year for over three decades, and dividends have been increased annually since 1956. Intense competition in ready-to-eat cereals hurt volume and profits in 1989, but aggressive new product and cost-saving programs should allow a substantial recovery in 1990.

Current Outlook

Earnings for 1990 are projected at $4.20 a share, up from the $3.60 estimated for 1989.

The $0.43 quarterly dividend is the minimum expected.

Sales should trend higher in 1990, reflecting higher prices and a recovery in unit sales of ready-to-eat cereal. Introduction of popular oat bran and similar products for health conscious consumers should also aid volume and reverse a decline in domestic market share. More aggressive costly marketing campaigns may be offset by an improving product mix combined with growing manufacturing efficiencies. Good growth abroad and comparatively stable foreign currency exchange will be important to the expected earnings uptrend. Share repurchases may also aid per-share gains.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,134	1,030	896
Jun.	---	1,234	1,087	923
Sep.	---	1,195	1,140	1,009
Dec.	---	---	1,092	965
	---	---	4,349	3,793

Sales for the 1989 nine months rose 9.4%, year to year, largely on higher selling prices and ready-to-eat cereal volume abroad. Results were penalized by a onetime charge of $0.08 a share, and net income was up 9.1%, to $4.36 a share from $3.08.

Dec	E1.00	E0.61	0.82	0.67
	E4.20	E3.60	3.90	3.20

Important Developments

Dec. '89— Management said that lower-than-expected U.S. ready-to-eat cereal volume would depress 1989 earnings below the year-earlier level. It was giving strong marketing support to established products and had introduced Oatbake and Heartwise, two high soluble fiber bran ready-to-eat cereals which were expected to help recover market share lost to competing oat brand cereals.

Oct. '89— The timetable for construction of a new cereal plant in Memphis, Tenn. was delayed due to slower growth for cereal in the U.S. than was expected when plans for the facilities were made.

Sep. '89— The company's president and chief operating officer and director resigned for personal reasons. Chairman William E. LaMothe assumed his responsibilities.

Next earnings report expected in late January.

Business Summary

Kellogg is the leading producer of ready-to-eat cereals, accounting for about 42% of the U.S. market. The company also makes a number of other food products. In 1988 foreign operations (including Canada) accounted for 36% of sales and 27% of net earnings.

Kellogg's ready-to-eat cereals include Corn Flakes, Rice Krispies, Special K, Frosted Flakes, All-Bran, Corn Pops, Raisin Bran, Bran Flakes, Honey Smacks, Froot Loops, Cocoa Krispies, Apple Jacks, Frosted Mini-Wheats, Nutri-Grain cereals, Bran Buds, Product 19, Raisins Rice and Rye, Cracklin Oat Bran, Crispix, Fruitful Bran, Apple Raisin Crisp, OJ's, Just Right and Raisin Squares. The principal raw ingredients include corn grits, rice, wheat, oats, various fruits and sugar. Noncereal products include toaster pastries, grain based snacks, stuffing croutons, corn flake crumbs, salad dressings, syrups and baking mixes.

Mrs. Smith's Frozen Foods is the leading U.S. producer of frozen dessert pies, and makes other frozen products including Eggo waffles. Salada Foods makes dessert mixes, and other food products. Fearn International produces a number of food items, including soup bases, condensed soups, gelatin desserts, pie fillings, and entrees for sale to institutional and restaurant markets. Whitney's Foods markets yogurt products under the Whitney's and Le Shake labels.

Kerr-McGee

NYSE Symbol KMG Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 3'89	1989					
45½	51¾-37⅜	19	1.32	2.9%	B	0.94

Summary

This integrated oil and gas company has sizable operations in chemicals, coal and contract drilling. KMG is emphasizing exploration and production in the North Sea, Canada and the Gulf of Mexico. The refining and marketing segment is being streamlined and the company is expanding its specialty chemical business. An improved outlook for the natural gas industry, tight North American refining capacity and the potential for significant North Sea reserve additions enhance the longer term.

Current Outlook

Share earnings for 1990 are estimated at $2.70, up from 1989's projected $2.35.

The dividend should continue at $0.33 quarterly.

Revenues for 1990 are expected to improve, reflecting increased natural gas and crude oil volumes and higher gas prices. Revenues should include a greater contribution from the chemical business. The improved outlook for natural gas should enhance exploration and production margins while increased demand for specialty chemicals is expected to strengthen per share profits.

Sales & Services (Million $)

Quarter:	1989	1988	1987	1986
Mar.	717	664	547	719
Jun.	821	730	726	626
Sep.	750	660	694	601
Dec.	---	690	641	589
	---	2,743	2,608	2,535

Revenues for the nine months ended September 30, 1989 rose 14%, year to year, reflecting greater refining volumes and increased crude oil production and higher crude prices. After a less rapid increase in production costs, net income from continuing operations was up 29%. Share earnings were $1.81, compared with $1.40, before income from discontinued operations of $0.64, versus $0.18.

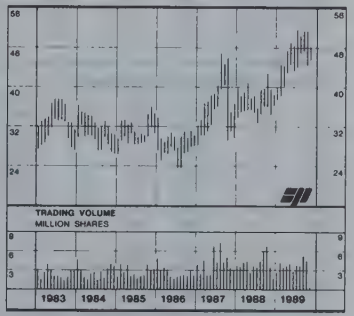
Dec.	E0.54	0.53	0.30	0.18
	E2.35	2.11	1.73	d6.01



Important Developments

Nov. '89— Share earnings in 1989's third quarter were limited by weak operating margins in the refining and marketing business. KMG said that product sales prices did not rise as fast as feedstock costs. KMG added that margins were depressed in July and August but began to strengthen in September and October. Operating profits in the exploration and production segment were enhanced by higher prices and increased volumes. Yet, net operating profits in the exploration and production business were impaired by sharply higher foreign taxes. The contract drilling business continued to be hurt by industry overcapacity. The rig utilization rate in 1989's third quarter was 61%, versus 71% in the 1988 period. Improved pricing aided the chemicals segment. Net operating profits in the coal business benefited from increased shipments.

Next earnings report expected in late January.

Business Summary

Kerr-McGee is an integrated oil and gas company and is a major factor in contract offshore drilling. It also mines coal, manufactures chemicals, and owns timberland. KMG sold its uranium properties effective December 31, 1988.

Net Profits (million $)	1988	1987	1986
Petr. expl. & prod.	$19	$39	-$176
Petr. ref. & mkt.	20	12	14
Contract drilling	-9	-18	-115
Chemicals	69	44	37
Coal	58	43	47
Other	-5	1	-42

In 1988 crude oil and condensate production averaged 38,600 barrels daily (36,600 in 1987); gas liquids production 4,500 b/d (4,900b/d), natural gas sales 261.3 million cubic feet a day (243.4 Mmcf), crude refinery runs 141,800 b/d (140,900 b/d), and petroleum product sales 191,000 b/d (182,700 b/d). Net proved reserves at the end of 1988 stood at 93,500,000 barrels of crude oil and condensate (89,600,000 bbls.), of which 45% was in the U.S. and 55% foreign, and 784.0 billion cubic feet of natural gas (712.9 Bcf) 82% domestic and 18% foreign.

Coal shipped in 1988 totaled 17,400,000 tons (14,900,000 in 1987); proved and probable reserves at 1988 year-end stood at 732.5 million tons (746.6). KMG's Transworld Drilling (19 rigs at 1988 year end) provides offshore contract drilling services primarily in the North Sea and the Gulf of Mexico.

Dividend Data

Dividends have been paid since 1941. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

This company is a leading producer of consumer and personal care products sold under trademarks, including Kleenex, Kotex and Huggies, and has interests in newsprint and specialty papers. While operations will continue to depend on general business conditions, the company's well-established position in consumer paper products combined with growth in nonwoven disposable products enhance long-term prospects.

Current Outlook

Earnings for 1990 are projected at $5.80 a share, compared with the $5.25 estimated for 1989.

The $0.65 quarterly dividend will likely be raised early in 1990.

Sales for 1990 are expected to continue to show moderate gains, especially in fast-growing overseas markets. Diaper sales should increase significantly. Prices for newsprint may should continue weak, as new industry capacity comes on stream.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,422	1,294	1,183
Jun.	---	1,396	1,341	1,224
Sep.	---	1,453	1,368	1,223
Dec.	---	---	1,391	1,254
	---	---	5,394	4,885

Sales for the nine months ended September 30, 1989 rose 6.7%, year to year, reflecting volume gains and price changes. Margins narrowed, due to higher marketing expenses and weakening newsprint markets, and the gain in pretax earnings was held to 5.0%. After taxes at 39.0% versus 40.4%, higher equity income and lower minority interest, net income was up 10%. Share earnings were $3.89, versus $3.53.

Common Share Earnings ($)

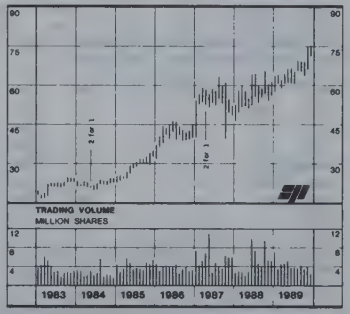
Dec.	E1.45	E1.36	1.18	0.99
	E5.80	E5.25	4.71	3.73



Important Developments

Oct. '89— The company said that the improved third quarter net income came in part from increased operating profits from consumer businesses in North America, Brazil and Korea. Earnings of the company's newsprint business remained depressed because of industrywide price discounting.

May '89— The company said that its $2.0 billion capital spending program for 1989 and 1990 would include tissue mills in Wales and France. The mills are expected to be completed in 1991.

Jan. '89— KMB raised its objective for sustainable return on shareholders' equity to 20% from 18%. KMB achieved a 22% return in 1988.

Next earnings report expected in late January.

Business Summary

KMB is a leading producer of facial tissue, disposable diapers, feminine pads and paper towels for consumer markets and newsprint, specialty papers and other fiber-based products for commercial and institutional markets. Product line contributions in 1988 were:

	Sales	Profits
Class I products	76%	66%
Class II products	21%	31%
Class III products	3%	3%

Foreign operations accounted for about 32% of total sales in 1988. Including equity earnings, foreign activities represented about 35% of net income.

Class I products include household and institutional tissues; feminine, infant and incontinence care products; industrial and commercial wipers; hospital and home health care products; and related products and by-products. Familiar brand names include Kleenex, Kotex, New Freedom, Huggies, Delsey and Hi-Dri.

Class II contains premium business and correspondence papers; tobacco industry papers and products; newsprint and other printing papers; technical and specialty papers; and related products and by-products.

Class III comprises aircraft services; air and truck transportation; and other miscellaneous products and services.

Dividend Data

Dividends have been paid since 1935. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

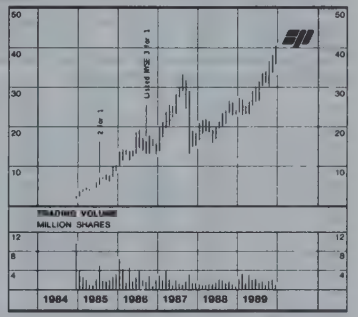
This company, which derives most of its revenues from distribution of the "Wheel of Fortune," "Jeopardy!" and "The Oprah Winfrey Show" TV shows, acquired a Buffalo, N.Y., TV station in December 1988. KWP's earnings have risen sharply in recent years, and a further advance is expected in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 are estimated at $3.30 a share, up from fiscal 1989's $2.91.

Initiation of cash dividends is not expected.

Higher license fees and favorable advertising demand for KWP's three primary television shows are expected to help boost revenues and profits in fiscal 1990. KWP's ownership of a Buffalo TV station will continue to be dilutive, but improved results are possible from the TV show "Inside Edition." Longer-term earnings visibility is aided by KWP's advance licensing of several shows through the early 1990s. Also, foreign markets may increasingly contribute to KWP's growth, and development of a new game show based on "Monopoly" may broaden KWP's product mix.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Nov.	136.5	97.5	81.4	52.8
Feb.	94.5	61.9	56.4	23.2

Aug.	0.66	0.51	0.40	0.26
	2.91	2.28	1.11	0.65

Important Developments

Nov. '89— KWP and Merv Griffin Enterprises said that they planned to launch a syndicated television program based on the board game "Monopoly." The show would debut in the fall of 1990. Future prospects will depend, to some extent, on what kind of reception KWP receives when it attempts to sell the program to individual TV stations around the U.S. Merv Griffin Enterprises is already the producer of "Wheel of Fortune" and "Jeopardy!," two popular game shows distributed by KWP. In fiscal 1989, these programs accounted for 33% and 26%, respectively, of KWP's revenues, while "The Oprah Winfrey Show" accounted for another 29%. "Wheel of Fortune" and "Jeopardy" have been renewed at higher prices through August 1992 in each of the top 10 U.S. TV markets, and "The Oprah Winfrey Show" also has received long-term renewals.

Next earnings report expected in early January.

Business Summary

King World Productions is a distributor or syndicator of television programs and feature length films to television stations. In December 1988, KWP acquired WIBV-TV, a Buffalo, N.Y., television station.

The majority of KWP's revenues come from three programs-"Wheel of Fortune" (about 33% of fiscal 1988 revenues), "Jeopardy!" (26%) and "The Oprah Winfrey Show" (29%). Each of these three shows is among the top-rated (in terms of viewership) syndicated television shows in the U.S. A new syndicated magazine-type program from KWP debuted in January 1989. The show, called "Inside Edition," is both produced and distributed by KWP. The company's other three major shows are distributed by KWP, but produced by others.

As a distributor of first-run syndicated programming, revenues are generated from two sources. KWP typically receives license fees from individual TV stations and receives an amount of commercial time which KWP sells to advertisers.

Merv Griffin Enterprises is the producer of "Wheel of Fortune" and "Jeopardy!" KWP has exclusive distribution rights for these shows so long as KWP has sufficient broadcast commitments to cover their production and distribution costs. However, the agreements prohibit KWP from distributing, on a similar basis, game shows of other producers while it is distributing "Wheel of Fortune" and "Jeopardy!" KWP and Merv Griffin Enterprises are planning to launch a new game show based on the board game "Monopoly."

"The Oprah Winfrey Show," for which KWP also has distribution rights, is now being produced by Harpo Productions, Inc., a business controlled by Ms Winfrey.

KWP also distributes its library of 68 feature length films and 210 television programs to domestic television stations. These include various Sherlock Holmes, Charlie Chan, and Mr. Moto films, and "The Little Rascals."

During the period it was owned by KWP in fiscal 1989, WIVB-TV, which is a CBS affiliate, had revenues of $12.8 million and an operating loss of $1 million.

Dividend Data

No cash dividends have been paid.

Finances

In January 1988, KWP repurchased 3,483,085 of its common shares from certain members of the King family and management (including a former executive of KWP). This followed an 878,578 share repurchase from an undersubscribed tender offer which expired in July 1987. Both repurchases were for $28 a share.

Capitalization

Long Term Debt: $89,525,000.

Common Stock: 25,260,262 shs. ($0.01 par). Members of the King family own about 39%. Institutions hold about 51%. Shareholders of record: 1,059.

52¼	58⅜–42⅞	12	1.22	2.3%	A+	1.18

Summary

Knight-Ridder is one of the largest newspaper publishers in the U.S., and has major interests in the electronic distribution of information. As part of a major restructuring, KRI has completed the sale of certain assets, including its eight TV stations. In October, 1989 the U.S. Supreme Court okayed a joint operating agreement for KRI's and Gannett's Detroit newspapers, thereby paving the way for a return to profitability in that market.

Current Outlook

Earnings for 1990 are projected at $3.00 a share, versus the $3.30 from continuing operations estimated for 1989, which includes a $0.58 capital gain.

The $0.30½ quarterly dividend is the minimum anticipated.

Revenues from continuing operations are expected to rise by about 5% in 1990. Operating income should rise at a slightly better rate, aided by lower newsprint prices and operating efficiencies which should more than counter severance expenses at the Detroit newspaper. Interest costs will be lower, but in the absence of capital gains from asset sales, net earnings will be lower.

Operating Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	541	490	489
Jun.	---	579	516	527
Sep.	---	541	503	500
Dec.	---	---	575	557
	---	---	2,083	2,073

Revenues for the nine months ended September 30, 1989 rose 10%, year to year, largely reflecting an acquisition. Operating income advanced 14%, aided by lower newsprint costs. After higher interest expense, and a capital gain equal to $0.58 a share, income from continuing operations rose 19%. Share earnings were $2.38, compared with $1.83, before income from discontinued operations of $1.15, versus $0.11.

Important Developments

Nov. '89— The U.S. Supreme Court cleared the way for KRI's Detroit Free Press and Gannett, Inc.'s The Detroit News to implement a joint operating agreement (JOA), which in the long run will pave the way for operating efficiencies and advertising and circulation rate increases.

Oct. '89— Construction began on a $299.5 million production and distribution plant for the company's two Philadelphia newspapers. The state-of-the-art plant will be fully operational in early 1993.

Oct. '89— KRI sold the last three of its eight TV stations for a total consideration of over $400 million. Earlier, a Pasadena newspaper was sold for $55 million. Proceeds from the asset sales are slated for reduction of debt incurred in the August 1988 acquisition of Dialog Information Services.

Next earnings report expected in late January.

Business Summary

Knight-Ridder (formerly Knight-Ridder Newspapers) derives some 89% of revenues from newspaper publishing. The company is also engaged in cable TV operations, electronic distribution of commodity and financial news and market quotes, newsprint production, book publishing, and selected computerized information retrieval services. As part of a restructuring announced in October, 1988, KRI has completed the sale of its eight TV stations in order to emphasize newspaper publishing, electronic information and cable television.

KRI owns 30 daily newspapers in 15 states, with average daily and Sunday circulations of 3.96 million and 4.85 million, respectively. The larger papers include the Miami Herald, Philadelphia Inquirer and Philadelphia Daily News, the Detroit Free Press, the San Jose Mercury and San Jose News. KRI also publishes six non-daily suburban newspapers and partially owns three other dailies.

Dialog Information Services, acquired in August 1988, maintains the world's largest computer-based databank, with more than 320 databases. Other operations include Commodity News Services, the Journal of Commerce, a partial interest in a newsprint mill, and cable television joint ventures serving over 289,000 basic subscribers. KRI also owns Commodity Research Bureau, a charting and newsletter advisory firm serving the futures industry; Tradecenter, Inc., which provides graphic price information to financial institutions; and 49.5% of the voting and 65% of the non-voting common stock of Seattle Times Co.

Dividend Data

Dividends have been paid since 1941. A "poison pill" stock purchase right was adopted in 1986. A dividend reinvestment plan is available.

Kollmorgen Corp.

1309L

NYSE Symbol KOL

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 20'89	1989					
13¾	25⅞-12	20	0.32	2.3%	B	1.36

Summary

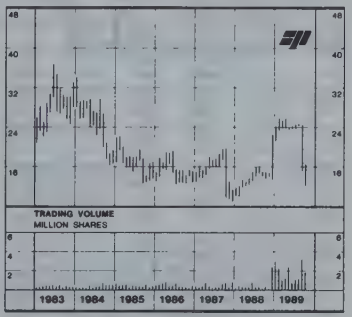
This company produces motors and controls, electro-optical instruments, and electronic interconnections. In September, 1989 Vernitron Corp. terminated a definitive agreement to acquire the company because of unanticipated adverse changes in Kollmorgan's financial performance. Each company is seeking damages from the other for the cancellation of the agreement. In addition, Kollmorgan has obtained an order temporarily enjoining Vernitron from violating a "standstill" agreement reached last April. Although earnings are likely to decline sharply in 1989 due to a variety of factors, a recovery appears likely in 1990.

Current Outlook

Earnings for 1990 are likely to rise to $1.50 a share from the depressed $0.38 estimated for 1989.

Dividends should continue at $0.08 quarterly.

Sales for 1990 should rise moderately, reflecting gains in all segments. Margins should benefit from the higher volume, smoother product deliveries, and the anticipated absence of costs related to the terminated tender offer by Vernitron Corp.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	66.1	85.6	72.4	85.1
Jun.	61.4	87.1	74.0	90.1
Sep.	---	83.5	70.6	73.2
Dec.	---	88.6	84.0	70.8
	---	344.8	301.0	319.2

Sales for the six months ended June 30, 1989 were off 16%, year to year, primarily reflecting a 68% decline in electronic interconnections revenues due to the deconsolidation of a new joint venture in the interconnection segment. The absence of licensing income and costs connected with the proposed acquisition of the company caused margins to narrow. Pretax income dropped 98%. After taxes at 33.9%, versus 9.9%, net income from continuing operations fell 99%, to $0.01 a share from $0.52, before a loss of $0.80 from discontinued operations versus a gain of $0.10.

Dec.	E0.19	0.42	0.11	d1.37
	E0.38	1.34	0.03	d1.96

Important Developments

Sep '89— KOL saidon September 29 that it had obtained a temporary order enjoining Vernitron Corp. from pursuing any further proposals to acquire KOL, or acquiring any shares of KOL in violation of the "standstill" agreement the parties reached in April, 1989. This followed the initiation of litigation by each of the companies seeking damages from one another following Vernitron's decision on September 21 to terminate a definitive merger agreement with KOL. Terms had called for each KOL share to be exchanged for $25 in cash. Vernitron cited as reasons for terminating the merger agreement unanticipated adverse changes in KOL's financial performance since the merger agreement was signed on April 30, 1989, and unspecified other factors. KOL said at that time that there had been no fundamental weakening in its core businesses.

Next earnings report expected in early November.

Business Summary

Kollmorgen has leading market and technological positions in three areas. Sales and profit contributions by business segment in 1988:

	Sales	Profits
Motors and controls	37%	35%
Electro-optical instruments	35%	35%
Electronic interconnections	28%	30%

Foreign operations accounted for 12% of sales and 6.6% of net income. Sales to the U.S. Government (principally of electro-optical instruments) totaled 26%.

In the motors and controls area, KOL makes specialty direct current motors and associated electronic power supplies primarily for the military/aerospace and industrial markets.

In electro-optical instruments, Kollmorgen is a major supplier of submarine periscopes and other instruments for various weapon systems. Industrial products include densitometers, spectrophotometers and colorimeters.

Electronic interconnection consists primarily of the production of proprietary printed circuit boards. A 35%-owned joint venture with Akzo N.V. develops electronic materials.

Dividend Data

Dividends have been paid since 1943. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

As part of a major restructuring, Kroger is focusing on its core business of supermarkets and convenience stores and divesting certain assets, reducing capital expenditures, and maintaining tight cost controls. In 1988's fourth quarter KR paid to shareholders a special dividend consisting of $40 a share in cash and $17 principal amount of discount debentures (approximately $8 trading value). KR also took a $195 million onetime charge in 1988 for costs associated with the restructuring and reorganization.

Current Outlook

Earnings for 1990 are projected at $0.10 a share, versus 1989's estimated loss of $0.25.

Resumption of dividends is not in prospect.

Sales from continuing operations should increase about 7% to 8% in 1990. Operating margins should improve on continued tight cost controls. Interest expense will begin to decline, reflecting the paying down of the substantial debt incurred in the financing of its special dividend paid to shareholders as part of the restructuring.

Sales from continuing operations for the 40 weeks ended October 7, 1989 rose 7.2%, year to year. Following much higher interest expense offset by a gain of $28.4 million from the sale of assets, there was a pretax loss of $26.0 million, versus income of $251.2 million. After a tax benefit of $4.4 million, versus taxes at 38.9%, the net loss was $21.6 million, in contrast to net income of $153.5 million. The loss per share was $0.30 (before a special charge of $0.06), versus net income of $1.81 a share.

Important Developments

Oct. '89— Management said that identical store sales were beginning to outpace food inflation, which appears to be on a downward trend as the impact of the drought in the summer of 1988 begins to wane. Sales were uniformly strong throughout the company's Kroger and Dillon divisions; strong sales and cash flow gains were also achieved at the company's convenience stores. Same store sales for the third quarter of 1989 were up 5.6%. During the third quarter the company prepaid an additional $66 million of debt incurred in last year's restructuring. On a year-to-year basis, the company has prepaid $211 million in debt obligations and has made a total of $286 million in principal payments on its senior term restructuring loan.

Next earnings report expected in mid-January.

Business Summary

Kroger operates supermarkets and convenience stores, as well as manufacturing facilities. As part of a late 1988 recapitalization, the company paid a $40 a share cash dividend to shareholders plus $17 principal amount of discount debentures valued at about $8. Kroger plans to focus on its core business of combination (food/drug) and convenience stores, disposing of noncore and underproductive assets.

The company operated 1,235 supermarkets in 27 states as of December 31, 1988. After the sale or closing of certain businesses pursuant to the restructuring plan, the company expects to operate 1,225 supermarkets. The company's primary focus is on the combination food and drug store format. Combination stores range from 40,000 to 69,000 sq. ft. with an average size of 47,160 sq. ft.

At December 31, 1988 Dillon Cos. operated 233 supermarkets, principally in Colorado, Kansas, and Arizona and 958 convenience stores in 16 states. M & M Super Markets operates 14 supermarkets in the Savannah, Ga. area.

The company's 44 food processing facilities supply more than 4,000 private label products to the supermarkets. Kroger planned to sell 11 of these units.

As part of its divestiture program, Kroger has sold its Price Savers Wholesale, Inc. subsidiary; KR is retaining a 40% interest in the 13-unit membership warehouse business. The company has agreed to sell four of its Welcome, Inc. superwarehouse stores. In addition, KR has sold 33 Florida Choice Supermarkets and 26 liquor stores and plans to sell the remaining Florida Choice Supermarkets. The company sold its 27 Fry's Food Stores in Northern California.

Dividend Data

Following the special dividend distributions in late 1988, the company has no plans to resume quarterly dividends. Dividends had been paid since 1902. A "poison pill" stock purchase right was adopted in 1986. Payments in the past 12 months:

Summary

This diversified manufacturer is Japan's largest producer of farm equipment, and also of pipe used primarily in water supply systems. Other products lines include iron and steel castings, industrial equipment, environmental control facilities and housing. Despite higher sales, earnings for the first half of fiscal 1989-90 declined on new business development costs, higher interest expense, and lower foreign exchange gains.

Business Summary

Kubota is Japan's largest manufacturer of agricultural machinery and of pipe and related equipment for water supply and other utilities. Sales by product line in the past three fiscal years:

Sales	1988-9	1987-8	1986-7
Farm & industrial equipment	38%	39%	42%
Pipe	26%	27%	27%
Industrial castings/machinery	20%	19%	19%
Building materials/housing	16%	15%	12%

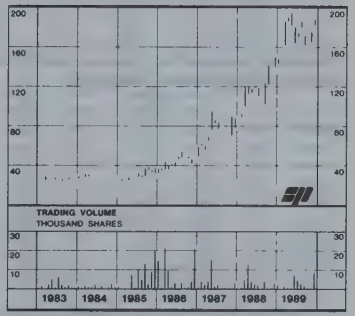
Kubota holds a leading share of the Japanese market for farm equipment. KUB's major products include farm tractors, combine harvesters, reaper binders, rice planters, and power tillers. Other products include a line of lightweight construction machinery, and engines for agricultural purposes, marine applications, and emergency power generation. Domestic sales are through wholesale-retail dealers, wholesalers, and the National Federation of Agricultural Cooperative Associations.

The pipe division is the leading manufacturer of ductile iron pipe in Japan. It also produces pipe made of spiral welded steel, unplasticized polyvinyl chloride and wound filament. The pipe is used primarily in water supply systems, as well as irrigation and sewerage facilities.

The industrial castings and machinery product line includes environmental control plants, vending machines, scales, pumps, valves, air-conditioning equipment, and other products for the steel, petrochemical, paper and construction industries.

The principal building materials sold are cement roofing and siding made with asbestos. Kubota also produces bathtubs and septic systems, and constructs prefabricated houses.

KUB owns 25% of Dana Computer Corp., a U.S. maker of super workstations. KUB has received exclusive rights to produce and market Dana's super workstations in the Far East.



Important Developments

Dec. '89— MIPS Computer Systems, Inc. registered with the SEC for the initial public sale of 4,750,000 common shares, of which 3,750,000 shares would be sold in the U.S. and Canada. KUB will not sell any of its 20.73% interest in MIPS, but its stake in the firm will drop to 17.03% due to the offering.

Nov. '89— KUB said that although business forecasts indicate that the Japanese economy will continue to expand steadily "for the time being," the business conditions surrounding KUB "are not optimistic." In particular, KUB cited difficult conditions in Japanese agriculture and the the outlook for the U.S. economy, which it termed "at best uncertain."

Jun. '89— KUB shareholders voted to change its name to Kubota Corp., effective April 1, 1990.

Sales (in yen) for the six months ended September 30, 1989 advanced 10%, year to year, reflecting sales increases in all groups. Domestic and export sales were up 8.1% and 25.2%, respectively. However, results were hurt by costs incurred in the development of new businesses, higher interest expense, and lower foreign exchange gains. Pretax income fell 23%. After taxes at 60.4%, versus 58.2%, net income was down 27%. Earnings per ADS for the 1989-90 interim were $0.55 (translated at ¥140 = $1).

Summary

Kyocera Corp. is a leading Japanese producer of ceramic products used primarily by the electronics industry. The company also produces electronic equipment and optical instruments. Foreign business accounted for approximately 32% of sales and 13% of operating profit in fiscal 1988-9. Earnings made good progress in fiscal 1988-9, benefiting from increased sales, a more favorable product mix, and efficiency gains.

Business Summary

Kyocera Corp. (formerly Kyoto Ceramic) manufactures ceramic and related products for the electronics and other industries, electronic equipment, and optical instruments. Sales and operating profits (in million $) were derived as follows in fiscal 1988-9:

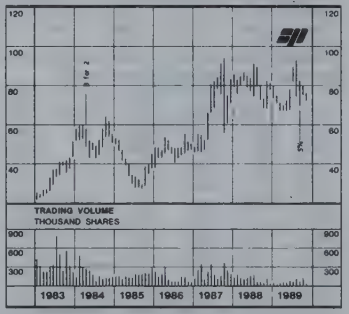
	Sales	Profits
Ceramic & related products	69%	71%
Electronic equipment	20%	17%
Optical & precision instruments	11%	12%

Foreign business (outside Japan) accounted for 32% of and 13% of operating profit in fiscal 1988-9, compared with 32% and 10% the year before.

Ceramic and related products include ceramic materials for the electronic industry (alumina substrates, substrates for volume control and resistors, and multiform glass for color TVs); industrial ceramics (parts for machine tools, pump and valve components, sliders, automotive components, and connectors for optical fiber glass cable); semiconductor parts (cerdips, chip carriers and mother boards, pin grid arrays, and metallized microwave packages); electronic components (chip capacitors, ceramic filters, resonators, chip resistors, thermal printheads, amorphous silicon drums, and liquid crystal displays); and consumer related products (crescent vert jewelry, bioceram dental and medical implants, solar water heaters, and solar cells).

Electronic equipment includes transceivers, navigation equipment, compact disc players, desk-top computers, compact laser printers, and video conference systems.

Optical & precision instruments include single-lens reflex cameras (Contax, Yashica, and Kyocera), 35mm cameras, 8 mm video camcorders, and optical applied equipment.



Important Developments

Sep. '89— The company announced that it had signed a definitive agreement to acquire AVX Corp., a leading American manufacturer of multilayer ceramic, tantalum and glass capacitors, for KYO stock valued at approximately $560 million.

Aug. '89— The company acquired for about $250 million, Wickes Co.'s Elco Corp. subsidiary, which produces industrial and military products.

Feb. '89— KYO said that it had formed a subsidiary which would be engaged in the management of real estate, hotels, golf courses and recreational facilities.

Next earnings report expected in late December.

Labatt (John)

Toronto S.E. Symbol LBT

Price	Range	P–E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 13'89	1989					
23⅞	27½–21⅛	13	[1]0.74	3.1%	A	NA

Summary

Canada's leading brewer, this food and beverage company now derives the largest portion of revenues from its food products businesses. Labatt also holds interests in a variety of other businesses. In 1989, the company purchased a 70% interest in Birra Moretti S.p.A. (Italy) and sold Catelli Inc., its retail packaged food business (annual sales C$200 million), as well as its wine operations.

Business Summary

John Labatt Limited is a broadly based food and beverage company with major participation in the North American brewing and food industries. Contributions in 1988-9 were:

	Sales	Profits
Brewing operations	34%	60%
Food operations	66%	40%

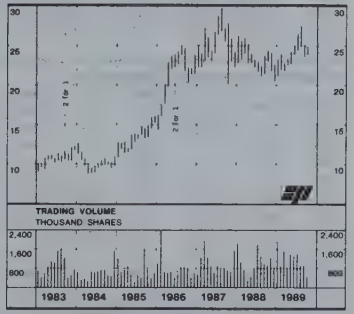
In 1988-9, sales in the U.S. approximated 37% of total sales.

Operating 12 breweries nationwide, Labatt is Canada's leading brewer, with 42% of the beer market in 1988-9. Through Labatt Importers, it exports its Canadian brewed products throughout the U.S. In October 1987, Labatt acquired its first U.S. brewing plant, Latrobe Brewing Co. (Latrobe, Pa.), maker of Rolling Rock beer. Under a licensing agreement with Anheuser-Busch, Labatt brews Budweiser beer for sale in Canada.

Following an extensive review, operations were significantly reorganized in 1988-9. Effective April 30, 1989, the company's Catelli food and Canadian wine operations were sold. Labatt realized a pretax gain of C$141 million on the sale, which was more than offset by a pretax charge of C$150 million for the impairment in the carrying value of certain assets.

The Food Products operations include Ault Foods, U.S. Dairies and Ogilvie Mills. Under the Sealtest, Light n' Lively and Silverwood names, Ault produces table milk products, yogurt, cottage cheese, sour cream, juices and frozen products. U.S. Dairy processes and markets milk products, fruit juices and drinks and yogurt. Five Roses flour is milled and marketed by Ogilvie.

John Labatt Foods markets a wide variety of frozen soups and vegetables, fish, pizza and grocery products and related support services to the food-service and retail food industries, primarily in the U.S. Major operations include Everfresh Juice Co., Chef Francisco and Pasquale Food Co.



Partly owned businesses include Canada Malting (20%); the Toronto Blue Jays American League Baseball Team (45%); McGavin Foods (60%), a bakery with five plants in Canada; BCL Entertainment (45%), a rock concert promoter and merchandiser; Supercorp Entertainment (50%), a provider of communications services; Auscan Closures (50%), a manufacturer of bottle seals; and Allelix Inc. (30%), a biotechnology research firm.

Labatt also operates The Sports Network (TSN), a radiply growing pay television service with 1,900,000 subscribers at 1988-9 year-end.

In line with plans to expand in the European beer market, in June 1989 the company acquired a 70% interest in Birra Moretti S.p.A. of Italy, for an undisclosed amount.

Next earnings report expected in mid-December.

Apr.		1,301	1,243	1,094
		5,424	5,107	4,253

For the three months ended July 31, 1989, sales dipped 3.6%, year to year, but net income expanded 11%, to $43,700,000 ($0.55 a share), from $39,500,000 ($0.53).

Net income for 1988-9 declined slightly from that of 1987-8, despite a sales increase, as strong performances by Labatt Brewing and the Broadcast Group were more than offset by declining contributions from food operations (which experienced intense competitive conditions).

Lee Enterprises

NYSE Symbol LEE

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 4'89	1989					
32⅜	34¾-24¾	19	0.68	2.1%	A-	0.73

Summary

Lee Enterprises publishes 18 daily newspapers and seven weekly newspapers in eight Midwestern and Western states. The company also operates five television stations and is involved in graphic arts systems through 50%-owned NAPP Systems (USA) Inc., a leading producer of photosensitive polymer printing plates for newspapers. Earnings for fiscal 1989's first nine months increased, primarily reflecting higher revenues and lower net financial expense.

Business Summary

The company primarily publishes newspapers, and also operates television stations. Contributions by major operating segment in fiscal 1988:

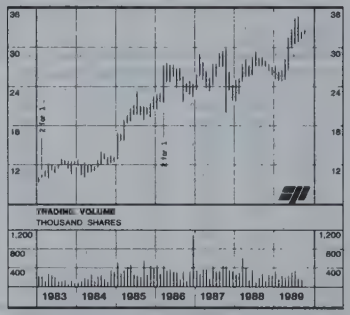
	Rev.	Profits
Newspaper publishing	71%	84%
Broadcasting	29%	16%

Total newspaper revenues in fiscal 1988 (from company-owned papers) were comprised of 64% advertising revenues, 28% circulation revenues and 8% other. Lee publishes 18 daily newspapers and seven weekly newspapers in eight states, including Montana, Iowa, Minnesota, Wisconsin, Nebraska, North Dakota, Oregon and Illinois. Five of the weekly newspapers were acquired in fiscal 1988; three in Illinois and two in North Dakota. The company, also through acquisitions made in fiscal 1988, publishes two weekly shoppers; one in Illinois and one in North Dakota, and produces a specialty publication in North Dakota.

Five network-affiliated television stations are owned and operated in Tucson, Ariz. (KGUN-TV, ABC); Honolulu, Ha. (KGMB-TV, CBS); Omaha, Neb. (KMTV-TV, CBS); Portland, Ore. (KOIN-TV, CBS); and Huntington/Charleston, W. Va. (WSAZ-TV, NBC).

NAPP Systems (USA) Inc., a 50%-owned joint venture with Nippon Paint Co. of Osaka, Japan, manufactures photosensitive polymer plastic printing plates. Lee also has 50% interests in two newspaper publishing companies located in Lincoln, Neb. and Madison, Wis., and a 42% interest in New Mexico Broadcasting Co., parent of KGGM-TV, a network affiliated station in Albuquerque.

In December, 1987 the company changed the name of Call-It Co. to Voice Response, Inc., an audiotext venture.



Important Developments

Jul. '89— The company reported that a 7.7% year-to-year increase in newspaper publishing revenues in the first nine months of fiscal 1989 stemmed from gains in advertising and circulation revenues of 4.2% and 3.2%, respectively, reflecting increased units. Broadcasting revenues were up 4.4%, despite sluggish national spot advertising, benefiting from a strong first fiscal quarter. Separately, LEE said that net financial expense declined in fiscal 1989's first nine months due to the capitalization of interest costs associated with new construction and increased income from invested cash. Operating cash flow (operating income plus depreciation and amortization charges) totaled $57.6 million in fiscal 1989's first nine months, up from $55.1 million in the year-earlier period.

Next earnings report expected in mid-November.

Total Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	70.1	65.5	61.2	58.7
Mar.	62.4	58.5	54.7	50.4
Jun.	69.4	64.8	61.8	57.5
Sep.		63.8	59.9	54.3
		252.5	237.6	220.9

Revenues for the nine months ended June 30, 1989 advanced 7.0%, year to year, reflecting a 7.7% increase in the newspaper publishing segment, a 4.4% rise in the broadcasting segment, and greater equity in net income of associated companies, new venture and other. Margins narrowed, and following lower net financial expense of $4,049,000 versus $5,384,000, pretax profits rose 5.7%. After taxes at 33.5%, against 33.6%, net income was up 5.8%, to $1.14 a share from $1.07.

Leggett & Platt

NYSE Symbol LEG

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 27'89	1989					
31⅛	34⅞-23⅝	12	0.76	2.4%	A	1.08

Summary

This company produces a broad line of components used by manufacturers of furniture and bedding for homes, offices, and institutions; a line of finished furniture and carpet cushioning materials; and a variety of diversified non-home furnishing products with similar manufacturing processes. Leggett & Platt's strategy is to grow both internally and through an active acquisition program. Earnings have trended higher over the past decade, and the uptrend continued for the first nine months of 1989.

Business Summary

Leggett & Platt manufactures components used by others in the manufacture of bedding and furniture; related finished products; and various non-home furnishing products. Sales contributions (as originally reported):

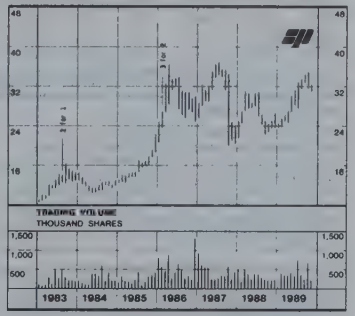
	1988	1987	1986
Bedding components ...	30%	34%	34%
Furniture components...	29%	28%	28%
Finished products	19%	18%	19%
Diversified products.....	22%	20%	19%

Bedding components include boxspring tops and coils, dimension lumber for boxspring frames, edge and corner springs, innerspring assemblies for mattresses, innersprings, mounted and unmounted boxsprings, polyurethane foams, insulator pads for mattresses and boxsprings, spring wires and spring wire insulators, synthetic wool and cotton cushioning materials, and wood frames for boxsprings.

Furniture components include chair controls and other components for office furniture, incliner mechanisms for motion and upholstered groups, coil spring assemblies and accessories for upholstered furniture, components for office panel systems, die cast aluminum and steel bases for office furniture and dinettes, seating systems, metal bed rails for bedroom suites, polyurethane foams, and plastic furniture components.

Finished products include bed frames, wood and steel bunk beds, carpet cushioning and underlay materials, brass and wood daybeds, electric beds, metal fashion beds and headboards, pedestal bed bases, rollaway beds, trundle beds and wood headboards.

Diversified products include custom aluminum die cast products, motion control products, metal and wire shelving for utility vehicles and consumer products, industrial wire, point-of-sale display racks, sound insulation and welded steel tubing.



Important Developments

Oct. '89— Leggett & Platt said that the short-term outlook for the economy and the home furnishings industry seemed to be clouded by more than the usual amount of uncertainty. LEG expected consumer spending and demand for furniture and bedding to remain relatively soft during the next several months, but not substantially below year-earlier levels.

Aug. '89— Directors raised the dividend 5.6%, to $0.19 quarterly from $0.18.

May '89— Leggett acquired Culp Smelting & Refining Co., a manufacturer of aluminum ingot with annual sales of about $40 million. In April LEG acquired two privately held companies, Webster Spring Co. and Webster Wire, which have combined annual sales of about $45 million.

Next earnings report expected in late February.

Summary

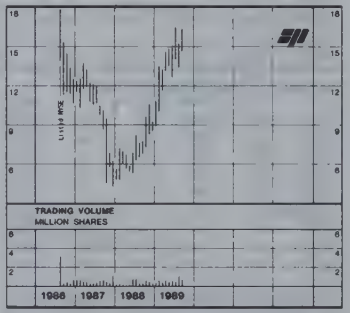
This company designs and makes diversified lines of moderate and better priced women's dresses, suits and blouses, and men's and women's sportswear. In the spring of 1988 LES acquired Albert Nipon, Inc. and Mary Ann Restivo, both well-known women's designer apparel companies. Earnings in 1989 and 1990 should benefit from these acquisitions, new apparel lines, and more efficient operations.

Current Outlook

Earnings for 1989 are estimated at $1.70 a share, up from 1988's $1.17. Earnings for 1990 could reach $1.90 a share.

Dividends are not in prospect.

Sales for 1989 are expected to increase substantially, reflecting acquisitions and increased demand for LES's brand name products, new apparel lines, the establishment of in-store boutiques, and licensing. Margins should expand on a more favorable product mix, efficient sourcing and manufacturing operations, and fewer markdowns and allowances.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	203.4	169.1	164.4	164.7
Jun.	155.0	128.1	103.6	99.7

Important Developments

Jul. '89— LES said that it was gratified to report a profit during the second quarter, most of which falls between the summer and fall shipping seasons and which is normally the weakest quarter. The company also said that earnings during the second quarter were adversely affected by the closing of the Summit Sportswear operations, representing a loss of $0.09 a share after tax. However, the company said that results for the first half of the year were on target and it remained optimistic for the remainder of the year. LES said that it was in a strong financial position, with working capital totaling $137.0 million at July 1, 1989, and shareholders' equity totaling $143.4 million.

Next earnings report expected in late October.

Business Summary

The Leslie Fay Companies designs and makes widely diversified lines of moderately and better priced women's dresses, suits, blouses and sportswear. These products are sold through 14 separate divisions under nationally known names as Leslie Fay, Kasper for A.S.L., Albert Nipon (acquired 1988), Mary Ann Restivo (acquired 1988), Breckenridge, Outlander, Castleberry Knits, and Nolan Miller.

Dresses and related products are produced through the Leslie Fay dress division which sells moderate priced dresses, suits and dresses with coordinated jackets; the Sassco division which offers moderate and better priced dresses and suits; the Albert Nipon division which offers designer dresses and suits; the Castleberry Knits division which sells better-priced knitted suits and one and two piece dresses; the Non-Stop division which offers better priced dresses; and the Andrea Gayle division which offers dresses styled for the career woman at moderate prices.

Sportswear and related products are produced through the Leslie Fay sportswear division which sells moderately priced coordinated sportswear; the Breckenridge division which sells better priced sportswear; the Leslie Fay separates division which sells moderate priced blouses, knits and pants; the Mary Ann Restivo division which offers designer sportswear; the Outlander division which sells contemporary knitted sportswear; the Knitivo division which sells moderately-priced sweaters; the Lyse Spenard division which sells updated sportswear; the AG Options division which sells moderate updated sportswear; and the Head division which sells ski, tennis and golf activewear for men and women sold under the Head, Euro Head and Tyrolia names.

During 1988 the company's products were sold to over 16,300 customers, operating in over 17,650 department and specialty stores. About 88% of the apparel sold by LES is made by independent contractors located domestically and abroad. Approximately 59% of the apparel sold was made abroad, mainly in Hong Kong, Taiwan, Korea, Malaysia, and the Philippines.

Dividend Data

The company has no current plans to pay cash dividends and intends to retain all earnings for use in the company's business.

Finances

In May, 1987 LES entered into a new five-year financing agreement with its banks under which it could borrow up to $150 million. As of December 31, 1988, total borrowings under the financing agreement amounted to $74,000,000, of which $45,000,000 was classified as long-term debt. The financing agreement also provided for an additional $50 million of trade letters of credit, of which the company was committed for unexpired letters of credit of approximately $34,401,000 as of December 31, 1988.

On August 1, 1986 LES sold 5,000,000 common shares at $18 each through underwriters led by Merrill Lynch Capital Markets and Bear, Stearns & Co. Underwriters were granted an option by certain shareholders to buy up to 750,000 additional common shares to cover overallotments. The proceeds of about $84.0 million were earmarked to repay the term loan portion of bank debt.

The Leslie Fay Companies, Inc. is the successor to The Leslie Fay Companies, a New Jersey limited partnership which had acquired the Leslie Fay business for about $180 million in June, 1984 from The Leslie Fay Company, a New York general partnership. A portion of the debt incurred to finance this transaction was to be repaid out of the proceeds of the August, 1986 common stock offering. In April, 1982 The Leslie Fay Company purchased the assets and business of Leslie Fay Inc., a public corporation listed in the NYSE, in a leveraged buyout transaction for about $48 million.

Summary

This holding company owns Liberty Life Insurance Co., which has life insurance in force in excess of $13 billion. The company markets a broad range of life and health insurance products and annuities. The company owns and operates eight TV stations. In late 1986 LC expanded its insurance operations via the acquisition of Southern Life Insurance Co. for $80 million. In July, 1987 LC sold its group insurance business. The Hipp family and related trusts control some 60% of the shares.

Business Summary

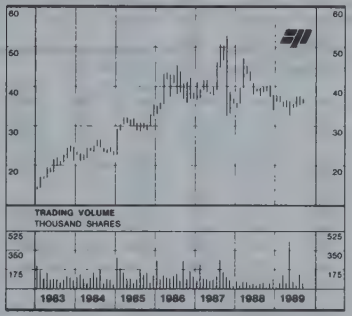
Liberty Corp. is a holding company whose major subsidiaries are engaged in the life insurance business and broadcasting. As of year-end 1987, Liberty Life believes that it ranked 135th in individual life insurance in force among approximately 2,265 U.S. life insurance companies. Business segment contributions (profits in million $) in 1988:

1988	Revs.	Profits
Insurance	73%	$36.7
Broadcasting	27%	17.3
Corp. & other	Nil	-20.9

The company's principal subsidiary, Liberty Life Insurance Co., provides a broad range of individual life insurance, annuities, and accident and health insurance. Life insurance accounted for 87% of premiums in 1988; accident and health insurance accounted for the remainder. Most life policies are written on a nonparticipating basis. Products are marketed by full-time career agents emphasizing the home service system, through independent agents, brokers and salaried representatives. The company is licensed in 46 states and the District of Columbia, and engages in business in 13 of these states. In 1988, 44% of premium income was derived from South Carolina and 26% from North Carolina.

At December 31, 1988 life insurance in force totaled $13.2 billion, of which 89% was ordinary life, 9% group, 2% industrial, and 1% credit. Liberty Life sold its group insurance business in July, 1987.

Cosmos Broadcasting Corp. owns WSFA-TV, Montgomery, Ala.; WDSU-TV, New Orleans, La.; WTOL-TV, Toledo, Ohio; WIS-TV, Columbia, S.C.; WAVE-TV, Louisville, Ky.; WFIE-TV, Evansville, Ind.; KAIT-TV, Jonesboro, Ark., and KPLC-TV Lake Charles, La. The Evansville station is UHF, while the remainder are VHF stations. The Toledo station is affiliated with the CBS Television Network, the Jonesboro station with ABC and the other six with NBC. In 1988 approximately 55% of gross television operating revenues were derived from local and regional advertising, 31% from national spot advertising and 10% from network advertising.



Important Developments

Aug. '89— The company said that expenses in the second quarter of 1989 were significantly affected by asset valuation write-downs. During the quarter Liberty Life reviewed the valuation of certain assets on its balance sheet and, as a result of this review, determined that approximately $9.7 million of acquisition costs previously deferred should be written off. LC also incurred increased television programming costs due to the purchase of the "Cosby" show.

Next earnings report expected in early November.

Review of Operations

Total revenues for the six months ended June 30, 1989 declined 2.7%, year to year, reflecting a sharp decrease in realized investment gains and lower interest and dividend income. Following increases in benefits to policyowners and beneficiaries and higher commissions, pretax income fell 86%. After a tax credit of $5.5 million, against taxes at 32.8%, net income was down 50%. Share earnings were $1.10, versus $2.17 (as restated).

Finances

The company has bank lines of credit totaling $240 million, under which it had borrowed $52.9 million as of June 30, 1989. LC has used its lines extensively for the short-term funding of operations, acquisitions and the repurchase of common stock.

In December, 1987 some 1,229,000 shares were tendered pursuant to an offer by LC to repurchase up to 350,000 of its shares at $42 each. LC repurchased 350,000 of the shares on a pro rata basis, and also repurchased 350,000 shares from the Hipp family.

Dec. 19'89	1989					
65 1/8	68 3/8-42 3/8	21	1.64	2.5%	A+	1.23

Summary

This company is a major worldwide manufacturer of prescription drugs, with special emphasis in the area of oral and injectable antibiotics. It also produces various medical instruments and animal health products. Superior growth seen for major markets coupled with new products spawned from an ambitious R&D program enhance Lilly's long-term earnings growth prospects. The shares were split 2-for-1 in May, 1989 and the dividend was recently raised 21.5%.

Current Outlook

Earnings for 1990 are projected at about $3.85 a share, up from the $3.20 estimated for 1989.

Directors raised the dividend 21.5%, to $0.41 quarterly from $0.33 3/4, effective with the March, 1990 payment.

Sales for 1990 should post another good gain. Pharmaceutical sales are expected to rise, aided by gains in Prozac antidepressant, Axid antiulcer, Ceclor antibiotic, Dobutrex cardiovascular, Humulin insulin and other Lilly drugs. Sales of medical devices should also increase, aided by new products. Profitability should benefit from the better volume, cost efficiencies and possible improvement in foreign exchange.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

Nov. '89— The company reached an agreement with the FDA to correct certain manufacturing and record keeping problems at LLY facilities uncovered by FDA inspections earlier in the year. The agreement allowed LLY to resume shipments from its Indianapolis plant.

Oct. '89— The company and Dow Chemical completed the formation of Dow Elanco, a joint venture that includes the plant science businesses of both firms, as well as Dow's industrial pest control business. Dow has a 60% interest in the new venture, with Lilly holding 40%. Sales of Dow Elanco are projected at about $1.5 billion in its first year of operation. In November, Dow Elanco agreed to collaborate with Ecogen, Inc. on the development of a new form of microbial biopesticides.

Next earnings report expected in early February.

Business Summary

Eli Lilly is a leading producer of prescription pharmaceuticals. Medical products are also manufactured. The company's herbicides business was transferred to Dow Elanco, a joint venture with Dow Chemical (60% owned by Dow and 40% by Lilly), in October, 1989. Sales and profit contributions by business segment in 1988 were:

	Sales	Profits
Human health	80%	88%
Agriculture	20%	12%

Foreign operations contributed about 37% of total sales and 30% of profits in 1988.

The most important pharmaceuticals are antibiotics (33% of 1988 sales) that include Keflex, Keftab, and Ceclor orals and injectables such as Mandol, Nebcin, Vancocin and Tazidime. Other human health products (33%) include Humulin insulin, Prozac antidepresant, Darvon analgesic, Nalfon nonsteroidal antiarthritic, Dobutex cardiovascular for congestive heart failure and Axid antiulcer, and monoclonal antibodies and immunodiagnostic devices produced by the Hybritech subsidiary. Medical instruments (14%) include balloon angioplasty catheters, other catheter systems, cardiac pacemakers, implantable defibrillators and related items.

Agricultural products (which were transferred to Dow Elanco) consist of plant science items (12%) such as Treflan and Sonalan herbicides and animal health (8%) products, which include Rumensin cattle feed additive, Coban coccidiostat and Tylan growth promotant for swine.

Dividend Data

Dividends have been paid since 1885. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

LTD is one of the largest specialty and mail order retailers of women's apparel. Impressive growth of recent years stalled in mid-1987 as the women's apparel industry was hurt by the absence of strong fashion trends and higher prices. Earnings growth resumed in the fourth quarter of fiscal 1988-9, reflecting improved spending on women's apparel and fewer markdowns. Over the longer term, opportunities in men's and children's business and new larger store formats enhance growth prospects.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $2.35 a share, versus the $1.90 estimated for fiscal 1989-90.

The $0.08 quarterly dividend is the minimum expected.

Addition of new and larger stores should boost revenues for fiscal 1990-1. A lean inventory position and increased volume should aid margins. Over the longer term, new store prototypes will provide a good base for expansion, and acquisitions are a possibility.

Net Sales (Million $)

Important Developments

Nov. '89— Reflecting management's view that the general economy is softening and lacks strong consumer demand, the company entered the fall season with inventories less than a year ago on a square foot basis. Limited Express posted record earnings for the third quarter of fiscal 1989-90; sales at Victoria's Secret more than doubled, while profit increased as a percentage of sales. Management said that it was optimistic as the company entered the fourth quater. In July, the company projected net sales to reach $10 billion within six fiscal years. LTD currently operates 3,120 specialty apparel stores. Separately, in August the company sold $100 million of 8⅞% notes due 1990.

Next earnings report expected in mid-February.

Business Summary

LTD is a leading specialty retailer operating 3,381 women's apparel shops across the country as of January 28, 1988. Apparel is also distributed through catalog operations. In addition to acquiring Lerner Stores, which carry fashionable, budget-priced apparel, LTD acquired in 1985-6 the assets of Henri Bendel, operator of one upscale store in New York City. Abercrombie & Fitch, an upscale specialty store with 25 stores and a catalog division, was acquired in early 1988 for $25 million.

The Limited Stores operates 754 women's fashion apparel stores designed to attract customers in the 20 to 40 age group. Merchandise is medium priced and emphasizes the current fashion look. Limited Stores continued the development of its 12,000 to 20,000 sq. ft. larger store format, which presents an expanded line of fashion apparel and accessories, including Lingerie Cacique and Limited, Too fashion for kids. At the end of fiscal year 1988-9, 25 of the larger stores were opened. The 418 Limited Express stores located throughout the country feature fashion-forward sportswear and accessories at popular prices for the 15-25 year olds. Express for Men, which began in 1987, had departments in 74 Express stores at the end of fiscal 1988-9.

Lane Bryant (acquired in 1982 for about $139 million) with 687 outlets, is the largest U.S. retailer of medium-priced apparel for large women. In April, 1989 the company agreed to sell its Lerner Woman division.

Victoria's Secret specializes in designer lingerie sold through 328 stores and retail catalogs. During 1988, Victoria's Secret stores introduced several new products lines, including toiletries, fragrances and bath products and accessories.

Mast Industries, is a contract manufacturer and importer of women's apparel, supplying company stores.

Summary

On September 10, 1989, LIN signed a definitive agreement with Bellsouth Corp. to combine their cellular operations in a 50/50 venture that would be the nation's second largest cellular company. As part of the merger, LIN would spin off its TV and other media operations into a separate company and would pay a special cash dividend of $20 per share. An unfriendly tender offer by McCaw Cellular Communications for all of LIN's outstanding common for $110 a share was due to expire on September 22.

Current Outlook

Earnings for 1990 for the company as currently constituted are projected at about $2.50 a share, up 25% from the $2.00 estimated for 1989.

No cash dividends have been paid, but directors have approved a special $20 cash dividend as part of a complex merger transaction (see Important Developments).

Revenues in 1990 will largely benefit from significant gains in cellular operations on a larger customer base. Margins should be aided by the growth in cellular revenues. Broadcasting revenues and margins should be moderately improved. Long-term prospects are favorable.

Net Revenues (Million $)

Quarter:	1989	[1]1988	1987	[1]1986
Mar.	52.90	48.27	48.50	39.35
Jun.	66.24	59.77	61.61	49.98

Dec.	---	62.66	67.84	47.58
	---	225.54	236.75	195.34

Net revenues from continuing operations for the 1989 first half rose 10%, year to year. Operating income rose 11%, boosted by a 57% increase in cellular profits. Media profits were virtually flat. After sharply higher equity and investment income, and taxes and minority interest, net income climbed 34%, and share net advanced to $0.90 from $0.66.

Important Developments

Sep. '89— LIN and BellSouth Corp. signed a definitive agreement to merge their cellular operations into a 50/50 joint venture that would be the second largest cellular company in the U.S., serving areas with some 46 million potential subscribers. In connection with the merger, LIN would complete the previously announced spinoff of its media properties and pay a special cash dividend of $20 a share. The transactions, expected to be completed in early 1990, were subject to a number of conditions, including shareholder approvals. There was speculation that McCaw Cellular Communications would raise its $110-a-share tender offer for the 90% of LIN that it did not already own; McCaw's hostile tender offer was due to expire on September 22.

Next earnings report expected in late October.

Business Summary

LIN Broadcasting derives its revenues from television broadcasting and from its interests in cellular radiotelephone activities and from specialty publications. In 1986 and 1987, the company sold its 10 radio stations and its radio paging and two-way mobile-radio businesses in order to emphasize its expanding and promising cellular operations.

Contributions to revenues and operating profit by business segment in 1988 were:

	Revs.	Profit
Broadcasting/publishing	70%	79%
Cellular	30%	21%

LIN's seven TV stations (four VHF and three UHF), all network-affiliated, are: WOTV, Grand Rapids-Kalamazoo-Battle Creek, Mich.; KXAS-TV, Dallas-Ft. Worth; WAVY-TV, Hampton Roads, Va.; WAND-TV, Decatur-Champaign-Springfield, Ill.; KXAN-TV, Austin, Texas; WISH-TV, Indianapolis, Ind.; and WANE-TV, Ft. Wayne, Indiana. Four of the stations are affiliated with NBC, two with CBS and one with ABC.

Through joint-venture partnerships, LIN is engaged in the cellular radiotelephone business. The partnerships operate in the following five major markets: Houston (56% interest); Dallas/Ft. Worth (60%); New York City (45%); Los Angeles (35%) and Philadelphia (51%). At March 31, 1989, cellular operations in which LIN has interests had more than 260,000 customers.

GuestInformant, Inc. publishes annual, advertiser-supported hardcover magazines placed in hotel rooms in 36 major cities.

Dividend Data

No cash has been paid (see Important Developments). A two-for-one stock split was effected in 1987. A "poison pill" preferred stock purchase right was adopted in 1988 and amended in January 1989.

Finances

In October 1987, directors authorized the repurchase of up to five million shares of common stock, in addition to an existing program to purchase two million shares. Pursuant to these authorizations, LIN purchased 0.9 million shares in 1988 and 2.8 million shares in 1987.

Capitalization

Long Term Debt: $2,689,000 (6/89).

Minority Interest: $32,716,000.

Common Stock: 51,329,989 shs. ($0.01 par). Institutions hold some 70%.
Shareholders: 2,600 of record (2/89).

Summary

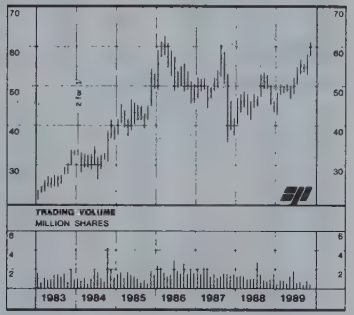
Lincoln National Corp., a multi-line insurance holding company, is the seventh largest (based on assets) in the U.S. The company's operations are divided into five segments: property-casualty insurance, employee life-health benefits, individual life, life-health reinsurance, and investment products. Earnings for the first nine months of 1989 benefited from a turnaround in the group health and HMO operations. Further advances are expected in 1990.

Current Outlook

Earnings for 1990, excluding realized capital gains or losses, are estimated at $5.00 a share, up from the $4.35 likely for 1989.

The quarterly dividend was raised 4.8%, to $0.65 from $0.62, with the November, 1989 declaration.

Earnings in coming periods are expected to rebound, largely reflecting a turnaround in the group health (indemnity and HMO) lines. As price increases and stringent underwriting in indemnity lines, and tight expense controls and the sale of certain unprofitable units bolster the HMO business, these lines will be the source of future earnings growth. In the p-c lines, stiff competition and a lackluster underwriting performance will continue to impede earnings growth. Modest advances are expected in the individual life business, while pension and annuity products should continue to benefit from growing assets under management.



Review of Operations

Based on a brief report, net income for the nine months ended September 30, 1989 increased 94%, year to year (1988 restated). This growth was primarily attributable to a return to profitability in the group life and health indemnity lines together with a much smaller loss in the HMO business and growth in pension, annuity and other assets under management. Share earnings amounted to $3.83 (including realized capital gains of $0.57), compared with $1.89 (including realized capital losses of $0.70).

Dec.	---	1.62	1.36	1.17
	---	4.12	5.17	4.56

Next earnings report expected in early February.

Important Developments

Nov. '89— Commenting on operations for 1989's first nine months, LNC said that profits of $3.4 million in the group life and health line, versus a $26.0 million loss, reflected premium increases, stringent underwriting and expense controls. HMO operations incurred a smaller loss of $6.5 million, versus $92.2 million, and had a small profit in the third quarter. Earnings in all other lines were lower, with the exception of investment products, where profits benefited from growth in assets under management. Also, LNC expected the sale of its National Reinsurance Corp. unit to be completed in early 1990. In exchange, LNC will receive $320.1 million in cash, $75 million of preferred stock, and a warrant to buy common stock of the holding company formed to make the purchase which, when combined with LNC's planned investment, would give it a 25% equity interest in the venture.

Business Summary

Lincoln National Corp. is a holding company which, through its subsidiaries, provides life-health insurance and annuities and property-casualty insurance on a national basis. Based on assets, Lincoln National is the seventh largest publicly held insurance organization in the U.S. Operating income (in million $) by segment.

	1988	1987
Individual life	$108.8	$88.7
Employee benefits	-90.8	-41.7
Property-casualty	241.3	235.0
Other operations	-75.8	-45.9

Subsidiaries include Lincoln National Life Insurance Co. (the 14th largest life insurer and one of the largest life reinsurer in the U.S.), Lincoln National Pension Insurance Co. and Security-Connecticut Life Insurance Co., among others. Total insurance in force at year-end 1988 amounted to $173.8 billion, of which individual life insurance accounted for 86% and group 14%.

The employee benefits division offers group life and health insurance and annuities, performs administrative services and health care management services, and owns health maintenance organizations in Illinois, Colorado and the District of Columbia. In 1988 LNC decided to sell its Florida HMO's.

Property-casualty operations are conducted through American States Insurance Co. and its subsidiaries. In 1988 personal insurance accounted for about 30% of the $2.2 billion in p-c premiums earned, commercial lines 54%, and reinsurance 16%.

Litton Industries

1363K

NYSE Symbol LIT Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 4'89	1989					
91¼	98-71½	13	None	None	B+	1.05

Summary

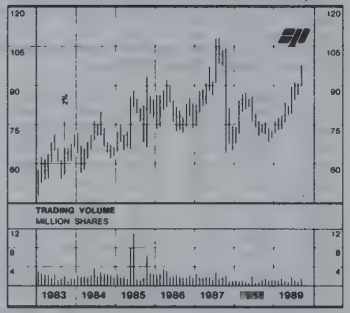
Litton's operations are focused in three business areas: advanced electronics and defense systems, industrial automation systems, and geophysical services. Improvement in resource exploration services should lead to higher earnings in fiscal 1990. LIT is also favorably positioned to attain higher earnings in the years ahead as many of its Government contracts enter the production stage.

Current Outlook

Earnings for the fiscal year ending July 31, 1990 are projected at $7.50 a share, versus the $7.05 of fiscal 1989.

In mid-1985 the company discontinued payment of cash dividends on its common stock to be consistent with the nature of its high technology oriented business and its strategic plan.

Sales for fiscal 1990 should rise moderately, reflecting further gains in resource exploration activities through the addition of international contracts and slight pickup in shipbuilding activities. Some slowdown is expected for industrial automation operations. Modest improvement in margins should develop as more of Litton's Government contracts move into the production stage. Interest expense should increase.



Sales & Oper. Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Oct.	1,229	1,197	1,064	1,103
Jan.	1,205	1,158	975	1,166
Apr.	1,267	1,197	1,147	1,108
Jul.	1,322	1,312	1,234	1,144
	5,023	4,864	4,420	4,521

Sales for the fiscal year ended July 31, 1989 (preliminary) advanced 3.3%, year to year. The gain reflected increased activity in industrial systems and services and improvement for the marine engineering and production segment. Advanced electronics revenues declined. Margins widened, and pretax income increased 7.8%. After taxes at 40.4% versus 39.9%, and minority interests, net income advanced 6.7%.

Business Summary

Litton Industries is a diversified company, which had fiscal 1989 operations in three business segments. Contributions in fiscal 1989:

	Sales	Profits
Advanced electronics	44%	40%
Industrial systems/services	36%	32%
Marine engineering/production	20%	28%

Approximately 48% of total sales in fiscal 1988 were for U.S. Government contracts or subcontracts.

Advanced electronics includes inertial navigation and guidance systems; command, control, communications and intelligence systems; electronic warfare systems; optical systems and night vision devices; laser systems; and other electronic instruments.

Industrial systems and services includes computer-integrated machine tools; material handling and industrial automation products; seismic field recording products and services; wireline oil well logging; and components for computer peripherals and other electronic components.

Marine engineering and production includes building and overhauling military and commercial vessels at Ingalls Shipbuilding.

Dividend Data

Common dividends were discontinued following the July, 1985 $0.50 quarterly payment.

Finances

In June, 1985 LIT exchanged $1.314 billion of various debt securities for 15 million of its outstanding common shares ($87.60 face value of debt per share). Teledyne, Inc. exchanged 3.6 million shares to maintain its (then) 27% ownership of LIT.

Summary

This designer of women's and men's clothing, made by independent suppliers in the U.S. and overseas, sells its "better apparel" merchandise through about 3,500 department and specialty stores. Earnings for 1988 were hurt by soft sales of women's apparel and by expansion into retail specialty stores; however, earnings should rebound in 1989 and 1990 as demand for women's apparel picks up. In May 1989, Elisabeth Claiborne Ortenberg and Arthur Ortenberg, both founders and members of top management, retired from the company.

Current Outlook

Share earnings for 1989 are estimated at $1.70, up from 1988's $1.26. Earnings for 1990 could reach $2.00 a share.

The quarterly dividend should remain at $0.05 a share.

Sales for 1989 should increase 10%-12%, reflecting a rebound in consumer spending for women's apparel and increased contributions from new divisions. Margins should expand on fewer markdowns and inventory controls, offsetting continued costs associated with expanding into retailing and expenses for starting up a new line for large-size women, a new fashion jewelry divison and a new sportswear line.

Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar.	353	328	275	204

Sep.	---	318	304	239
Dec.	---	290	238	192
	---	1,184	1,053	813

Net sales for the 26 weeks ended July 1, 1989, rose 8.3%, year to year. Margins widened substantially on fewer markdowns and tighter inventory controls, and pretax income advanced 39%. After taxes at 39.0%, versus 39.5%, net income was up 40%, to $73.1 million ($0.83 a share), from $52.1 million ($0.60).

Important Developments

Jul. '89— LIZC said that strong performances at the wholesale and retail levels enabled it to achieve record sales and earnings for the second quarter and first half of 1989. The company added that gross margins reached 40.2% during the first half of the year, up from 34.4% in the same period of 1988, due principally to a higher percentage of sell-through of its products at regular prices. As a result, inventories were at levels substantially lower than those carried during the first half of 1988.

May '89— Following an announcement in February 1989, Elisabeth Claiborne Ortenberg (chairman, CEO and president of LIZC) and her husband, Arthur Ortenberg (vice chairman), retired from active management roles at LIZC. Both remain directors.

Next earnings report expected in late October.

Business Summary

Liz Claiborne, Inc. markets a wide range of women's apparel, designed for the work and leisure-time needs of the career woman. The company also designs sportswear and furnishings for men and markets fragrances and related items. Products are manufactured to the company's specifications in the U.S. and abroad and marketed through leading department and speciality stores. Products are generally considered designer apparel but are sold at prices offering consumers high quality and value.

Contributions to sales by product lines were:

	1988	1987	1986
Misses sportswear	48%	52%	54%
Petite sportswear	11%	12%	13%
Women's dresses	12%	13%	16%
Women's accessories	14%	13%	10%
Menswear	10%	7%	5%

The "Liz Claiborne" sportswear division produces an extensive range of "better" sportswear products, while the "Lizsport" and "Lizwear" divisions provide more-casual sportswear items. The dress division offers a wide variety of dresses. Accessories include handbags, belts, scarves and other items sold under the "Liz Claiborne" label. The Menswear division offers a broad selection of related separates and furnishings. The "bridge" Sportswear division sells more-expensive sportswear under the "Dana Buchman" label.

In 1988, the company opened 13 "First Issue" specialty stores carrying the First Issue trademark. In addition, through Liz Claiborne Cosmetics, the company markets fragrances and related products under the Liz Claiborne name. As of the end of 1988, the company also had plans to establish a new large-size division under the Elisabeth trademark, to establish a new sportswear division under the Liz & Co. name and to establish a fashion jewelry division (since formed).

Summary

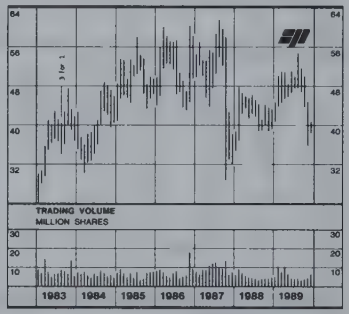
This leading aerospace contractor is involved in military programs for aircraft, missiles, space, electronics, and aerospace support services. A deficit will likely be reported for 1989, reflecting the end of production of the important C-5B program and substantial writeoffs on development programs. Recovery is likely in 1990. Part of the information systems group is to be sold. Harold C. Simmons has acquired a 16.9% interest in the company.

Current Outlook

Earnings for 1990 are projected at $5.80 a share, in contrast to the deficit of $0.25 estimated for 1989.

Dividends are expected to continue at the $0.45 quarterly.

Sales are likely to rise slightly in 1990. Missiles and space revenues should advance moderately, reflecting progress on major programs. Margins here could be slightly narrower, however. Aeronautics revenues should continue their two-year decline, reflecting the end of the C-5B production and winding down of other programs. Margins should improve following the large 1989 writeoffs. Both electronics and the recently formed technical services segments should have moderately higher revenues and margins.



Sales (Billion $)

Quarter:	1990	1989	1988	1987

Important Developments

Dec. '89— LK announced that it planned to merge Lockheed Electronics into Sanders. The move would reduce employment by 935.

Dec. '89— Investor Harold C. Simmons reported increasing his control of Lockheed shares to 16.9% from 10.4%.

Nov. '89— The company reported that it would take a pretax charge of about $300 million in the fourth quarter of 1989 to reflect the cost of design and schedule problems in development of the P-7A aircraft. As a result, a loss for the full year is possible. In the third quarter LK took a charge of $165 million for problems in the development of the C-17 transport (a subcontract) and the EP-3E aircraft modifications.

Next earnings report expected in late January.

Business Summary

Lockheed Corp. is primarily engaged in the research, design and production of military aircraft, space systems, missiles, and electronics systems. Program sales and profits in 1988 as restated for a restructuring in early 1989:

	Sales	Profits
Missiles & space	47%	56%
Aeronautical systems	33%	35%
Technology services	11%	5%
Electronic systems	9%	4%

Sales to the U.S. Government accounted for 86% of total sales in 1988.

Important military aircraft programs include the F-117A Stealth fighter, C-130 Hercules transport, the P-3 Orion antisubmarine warfare aircraft, the TR-1 Reconnaissance Aircraft, and the C-5B (to end in 1989). Electronics systems includes Sanders division (acquired 1986),a producer of electronic warfare and military test equipment.

LK is prime contractor for the Navy's fleet ballistic missile system; production is underway on the Trident II. Space contracts include NASA and DOD programs.

Technology services include space shuttle processing, systems integration, aircraft and airport modernization and maintenance and data processing.

The former Information Systems segment is to be sold.

Dividend Data

Dividends were resumed in mid-1984 after omission since 1969. A "poison pill" stock purchase right was adopted in 1986.

Summary

This diversified company derives most of its income from property-casualty and life insurance operations (CNA Financial Corp.) and the sale of tobacco products (the Lorillard division). Other activities include the development and operation of hotels, and the distribution and sale of Bulova watches and clocks. Loews owns 24.8% of the outstanding shares of CBS Inc.

Business Summary

Loews Corp. is a highly diversified concern, generating the bulk of its earnings in 1988 from insurance and tobacco operations. Since 1986 Loews has held a 24.8% interest in CBS Inc. Revenue and net income contributions from continuing operations in 1988:

	Revs.	Profits
Property-casualty ins.	57.1%	47.4%
Life insurance	20.7%	4.5%
Cigarettes	16.7%	39.4%
Hotels	1.9%	1.7%
Watches/timing devices	1.4%	0.3%
Investment income	1.1%	8.9%
Equity in CBS	0.5%	5.7%
Interest & other	0.6%	-7.9%

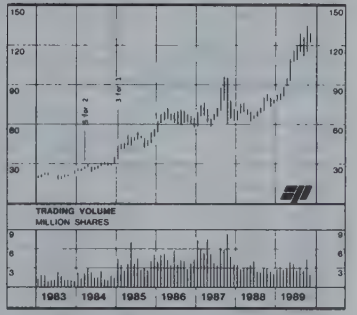
CNA Financial Corp. (83%-owned) is engaged in property and casualty insurance, as well as life, accident and health insurance.

Lorillard, Inc. is engaged in the production and sale of cigarettes. It is the fourth largest producer of tobacco products in the U.S., with a market share of 8.2%. Major brands include Newport, Kent, Kent III, Kent Golden Lights, True, Satin, Max, Old Gold, and Triumph. In 1988 the little cigar and chewing tobacco business was sold.

The hotel division operates 13 hotel and motor hotels (eight owned or leased) in the U.S., Canada, France, Monaco, and the Bahamas.

The consumer products segment of Bulova Corp. (95%-owned) distributes and sells watches, clocks, timepiece parts and power cells. The industrial and defense segment produces fuzes and precision electro-mechanical devices for national defense.

Loews increased its holding of CBS Inc. common stock to 24.8% from 11.8% in 1986. Through a wholly-owned subsidiary LTR owns and operates oil tankers. In July, 1989 LTR acquired a majority interest in an offshore drilling operation.



Important Developments

Oct. '89— LTR's higher earnings for 1989's first nine months reflected improved property-casualty insurance operations of 83%-owned CNA Financial Corp. This offset declines in virtually every other unit. A sharply lower tax rate due to certain deferments aided growth. Separately, LTR raised some $432.9 million through the sale of $1.075 billion of zero coupon subordinated Liquid Yield Option Notes (LYONs) due 2004 at $411.99 per note. Each $1,000 face amount of note is convertible into 2.745 common shares and the notes are redeemable beginning in 1991. Both transactions are subject to certain conditions.

Next earnings report expected early February.

Total Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.62	2.50	2.10	1.94
Jun.	2.99	2.79	2.40	2.24
Sep.	2.80	2.62	2.22	2.09
Dec.		2.96	2.60	2.36
		10.87	9.32	8.63

Total revenues for the nine months ended September 30, 1989 rose 6.3%, year to year, primarily reflecting higher premiums and net investment income at CNA Financial Corp. Pretax realized investment gains were $185.0 million, versus $248.0 million. Total expenses were 9.5% higher and pretax income fell 16%. After taxes of $404,000 versus $271.5 million, and 31% greater minority interest, net income rose 14%, to $9.52 a share on fewer shares from $8.22. Results exclude income from discontinued operations of $0.24 a share in the 1988 period.

Summary

On September 24, 1989 Lomas Financial Corp. filed for protection under Chapter 11 of the Bankruptcy Code after terminating over three months of negotiations with its lenders on a financial restructuring. Excluded from the filing were the company's mortgage banking and other subsidiaries. LFC attributed its financial problems to a nationwide surge in personal bankruptcies and home foreclosures, rising mortgage rates in fiscal 1989, and a depressed Texas real estate market.

Business Summary

On September 24, 1989 Lomas Financial Corp. (formerly Lomas & Nettleton Financial), one of the nation's largest mortgage banking organizations, and certain of its subsidiaries, filed separate voluntary petitions for reorganization under Chapter 11 of the Federal Bankruptcy Code. The Chapter 11 filing did not include LFC mortgage banking, commercial leasing and other important units.

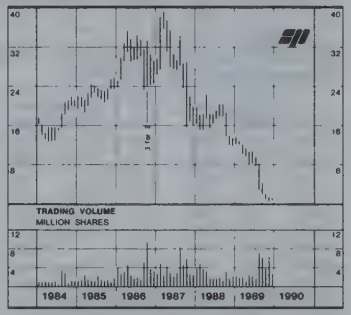
Segment contributions in fiscal 1989 (operating profits in million $):

	Revs.	Profits
Mortgage banking	35%	-$44.5
Life insurance	41%	7.7
Short-term lending	12%	13.3
Real estate devel.	2%	-157.2
Inform. systems	6%	-50.3
Other	4%	-3.7

At June 30, 1989 Lomas was servicing 545,701 mortgages (606,361 a year earlier) totaling $21.5 billion ($23.5 billion) in unamortized principal amount. The average loan balance was $39,388 ($38,771). At June 30, 1989 about $15.3 billion of the loans serviced consisted of loans included in pools or security issuances of one of the three secondary Federal mortgage agencies. The company also invests in mortgage loans secured by single family properties.

Life Insurance offers individual life and annuity products sold by general agents; annuity contracts sold through financial insitutions; and life, disability and accidental death insurance sold on a direct response basis; and group life excess loss and credit insurance.

Short-term real estate lending consists primarily of first-mortgage construction, acquisition and development loans. Such loans originated in fiscal 1989 were $1.3 billion ($1.2 billion the prior year), of which LFC retained $362 million ($396 million).



Real estate development activities are conducted principally in Texas, Florida, Georgia and California. During fiscal 1989 real estate continued to experience depressed conditions, principally in Texas. Accordingly, LFC made a provision of $125 million for possible foreclosure losses and reduced its investment in real estate held for development and sale to net realizable value.

Important Developments

Nov. '89— LFC said that although it believed that the fair value of its assets exceeded its liabilities, there could be no assurance that such liabilities will not be found in the Chapter 11 proceedings to exceed the fair value of its assets. This could result in claims being liquidated in Chapter 11 proceedings at less than 100% of their face value and the equity of the company's common and preferred stockholders being diluted or canceled.

Next earnings report expected in late February.

Review of Operations

Revenues for the three months ended September 30, 1989 fell 3.5%, year to year, reflecting reduced interest income and smaller gains on sales. Hurt by operating losses in real estate development, there was a pretax loss from continuing operations of $18.6 million, versus a loss of $1.1 million. After taxes of $1.3 million, versus a tax credit of $1.2 million, the net loss was $19.9 million, in contrast to net income of $85,000. The loss per share was $0.59, versus income of Nil, excluding a loss from discontinued operations of $0.22 against income of $0.11, and a special credit of $0.07 in the 1988-9 period.

Dividend Data

Common dividends were omitted in August, 1989 after having been paid since 1971.

Finances

Auditors said in the Annual Report for fiscal 1989 that as a result of the Chapter 11 filings, the company was in default on substantially all of its debt. They added that these conditions raised substantial doubt about the company's ability to continue as a going concern. Separately, LFC said in December, 1989 that its leasing unit had agreed with various lenders to extend to March 14, 1990 a standstill agreement on $634 million of debt.

LFC's Chapter 11 filings did not include its mortgage banking, commercial leasing, life insurance and its other operating subsidiaries, principally Lomas Corporate Services, Lomas Information Systems, Lomas Management, and Lomas Administrative Services.

Jan. 9'90	1989-90					
16 3/8	37-16 1/4	9	[4]---	[4]---	B-	1.08

Summary

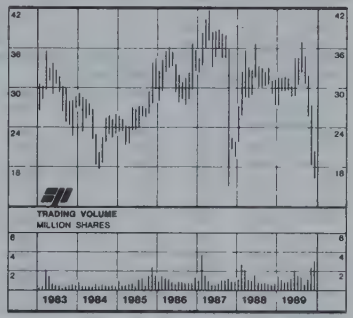
Lone Star is the largest U.S. producer of cement, concrete, sand and gravel, and is a leading producer of crushed stone and precast concrete products. Low cement price realizations led to very poor results in recent years, which led to a November, 1989 restructuring that will result in a fourth quarter after tax charge of $250 million. Cash dividends on the common stock will be suspended because of the restructuring.

Current Outlook

Despite the restructuring, a further loss is projected for continuing operations for 1990, following a large operating loss estimated for 1989.

The payment of future cash dividends is prohibited under curent loan agreements.

Cement shipments for 1990 are expected to be flat because of lackluster new homebuilding activity. Highway and public works markets should hold up well. Cement prices may improve with less pressure from low-priced imports as ocean freight rates increase.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986

Dec.		92	200	227
		371	761	883

Sales for the nine months ended September 30, 1989 declined 8.5%, year to year. The pretax loss widened to $19.1 million from $5.1 million. After tax credits, the net loss was $7.9 million, versus a loss of $3.4 million. Following preferred dividends, the loss per share was $0.71, versus $0.44. Results for the 1988 period exclude a special charge of $0.09 a share.

Dec.		2.44	2.08	5.81
		2.00	1.99	7.01

Important Developments

Nov. '89— Lone Star announced a restructuring program that would result in a $250 million net after tax charge against fourth quarter income. As part of the restructuring, the company will sell certain facilities and marginal businesses, including several in the Southwest, and certain other assets. The establishment of the $250 million charge will prevent future payment of cash dividends on common stock.

Aug. '89— LCE reported that some 500,000 concrete railroad ties produced by a subsidiary between 1983 and 1988 had experienced accelerated aging. CSX Transportation filed a $7.5 million lawsuit against LCE, and Amtrack advised LCE that it would hold LCE responsible for defective ties. LCE believes it has substantial insurance coverage.

Next earnings report expected in late January.

Business Summary

Lone Star is the largest producer of cement and ready-mixed concrete and sand and gravel aggregates, and is a major source of crushed stone aggregates and concrete products. Contributions by business segment in 1988:

	Sales	Profits
Cement & related products ..	82%	59%
Construction aggregates	17%	27%
Other	1%	14%

Foreign operations contributed 6.0% of sales and 40% of pretax income.

Cement and related products operations included the production and distribution of portland, masonary, and other types of cement, and the manufacture and distribution of ready-mixed concrete and concrete products.

Construction aggregates operations include the mining, processing and distribution of sand, gravel and crushed stone. Other businesses include real estate and wholesale lumber operations.

Lone Star has sharply downsized its operations in recent years through joint ventures.

Dividend Data

Future dividends are prohibited by loan agreements, after having been paid since 1934. A "poison pill" stock purchase right was adopted in 1988.

Longs Drug Stores

NYSE Symbol LDG In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 25'89	1989					
41 7/8	46-34 1/2	15	0.96	2.3%	A	0.92

Summary

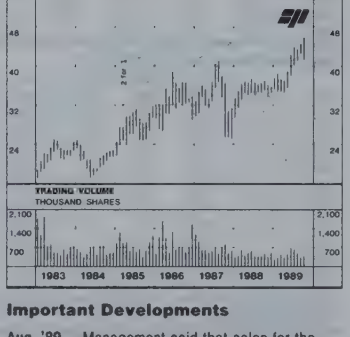
This conservatively financed company has achieved good sales growth through steady additions to its chain of super drug stores, most of which are located in California. Operations are decentralized with each store manager responsible for purchasing and pricing. New store openings coming on stream and continued expense controls should contribute to higher earnings in coming quarters.

Current Outlook

Share earnings for the fiscal year ending January 31, 1990 are projected at $3.00, up from the $2.75 of fiscal 1988-9. Earnings should rise to about $3.35 in fiscal 1990-1.

The quarterly dividend was raised 9.1%, to $0.24 from $0.22, with the July, 1989 payment.

Sales for fiscal 1989-90 should reflect store openings and increased market share; prescription sales should continue to rise. Margins should benefit from a better merchandise mix and careful attention to costs. Per-share earnings will benefit from fewer shares outstanding.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	493	450	422	384
Jul.	503	465	428	389
Oct.	---	461	426	392
Jan	---	550	497	470
	---	1,926	1,772	1,635

Sales for the six months ended July 27, 1989 rose 8.9%, year to year. Gross margins remained about level, and operating and administrative costs and occupancy expenses increased as a percentage of sales; pretax income increased 7.5%. After taxes at 39.3%, versus 40.0%, net income rose 8.8%, to $1.45 a share from $1.34.

Jan.	E0.91	0.84	0.73	0.53
	E3.00	2.75	2.33	1.78

Important Developments

Aug. '89— Management said that sales for the second quarter of fiscal 1989-90 rose 8% and net income increased 9%. Five new stores were opened during the quarter and several other sites are in various stages of development. At August 15, 1989 the company operated 242 stores. Most new stores are the larger 23,000-25,000 sq. ft. format. LDG had said it was continuing to test different configurations in its cosmetic and photo departments and was investigating new ways to distribute merchandise to stores, as well as looking for improved systems to enhance store autonomy. Directors authorized the repurchase of up to 3 million additional shares; the company said it had repurchased about 63% of the 2 million shares authorized for repurchase in February, 1988.

Next earnings report expected in mid-November.

Data as orig. reptd.

Business Summary

Longs Drug Stores was operating 236 super drug stores at January 26, 1989, versus 229 a year earlier. The bulk of the stores were in California (200), with the balance in Hawaii (21), Arizona (2), Nevada (6), Colorado (5) and Alaska (2).

All of the stores are self-service, but provide sales assistance in their photo, liquor and prescription drug departments. All have pharmacies. Most are 15,000-40,000 sq. ft. in size (66% selling area), with recent openings typically comprising 23,000 sq. ft. In total, there was 6,046,000 sq. ft. of retail space, versus 5,877,000 sq. ft. a year earlier. Merchandise sales averaged $8.3 million per store in fiscal 1988-9, versus $7.8 million a year earlier. Operations are decentralized, with each store manager responsible for purchasing and pricing.

The merchandise mix consisted of proprietary and related drug items, food and beverages, housewares and household supplies, cosmetics and toiletries, tobacco, magazines, sporting goods, photo finishing and other items. Food products are used extensively to increase traffic and to strengthen the company's reputation for low retail prices.

Dividend Data

Dividends have been paid since 1961. A "poison pill" stock purchase right was adopted in 1986.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date

Loral Corp.

NYSE Symbol LOR Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 12'89	1989					
31	37⅞-30¼	11	0.80	2.6%	A+	1.08

Summary

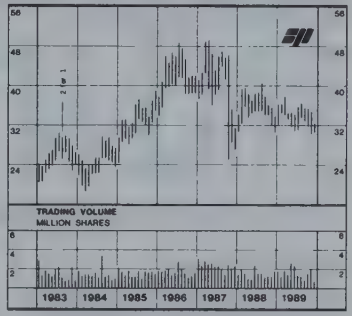
Loral is a major manufacturer of a variety of electronic warfare and communications systems and military computers. Through the acquisition of Goodyear Aerospace in 1987 (part of which was resold in early 1989), LOR broadened the types of defense electronics systems it can produce. LOR purchased the Fairchild Weston defense business in June, 1989, and has agreed to purchase Honeywell's Electro-Optics division. Additional acquisitions are likely.

Current Outlook

Earnings for the fiscal year ending March 31, 1990 are estimated at $3.15 a share, versus 1988-9's $2.41. For fiscal 1990-91 $3.75 a share is projected.

Dividends should continue at least at the current $0.20 quarterly rate.

Sales for fiscal 1989-90 are likely to rise moderately, primarily reflecting the acquisition of Fairchild Weston. Modest growth is likely in Loral electronic warfare programs. Margins will be affected by the charge for the ALR-56M settlement. Reductions of debt from proceeds of sale of the wheel and brake division will reduce interest expense.



Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	233	256	318	153

Mar.	E1.05	0.67	0.91	0.73
	E3.15	2.41	3.01	2.35

Important Developments

Dec. '89— Loral was fined $6 million for illegalities concerning awarding of the contract for the ALR-56M advanced radar warning receiver. It will continue as prime contractor, with Litton as second source. A $10.5 million charge will be made against earnings in the December quarter.

Nov. '89— LOR agreed to purchase the Electro-Optics division of Honeywell. The division will have 1989 sales of $130 million and a backlog of $170 million.

Jun. '89— LOR acquired Fairchild Weston for $180 million. Its annual revenues are about $270 million and operating income $22 million.

Apr. '89— LOR sold its aircraft braking systems and engineered fabrics divisions for $455 million.

Next earnings report expected in late January.

Business Summary

Loral primarily designs, develops and manufactures defense electronic systems. These include radar detection and warning, radar and infrared jamming and expendable countermeasures systems for aircraft and ships; acoustic undersea systems and countermeasures for anti-submarine warfare; guidance and target recognition systems; airborne synthetic aperture radar; anti-submarine warfare and aircraft training simulators; parallel processors; maritime and airborne surveillance systems; airborne antennas; militarized computers and related software and peripherals; information and graphics displays; telemetry tracking and ranging; laser-based military training systems; and microwave integrated components.

Other products include missile ground support systems, fuel tanks, commun ications equipment and aerospace metals.

In fiscal 1989 sales to U.S. Government agencies accounted for 68% and foreign sales accounted for 12% of total sales.

The aircraft braking and engineered materials divisions were sold in early 1989.

Dividend Data

Dividends were initiated in 1976.

Summary

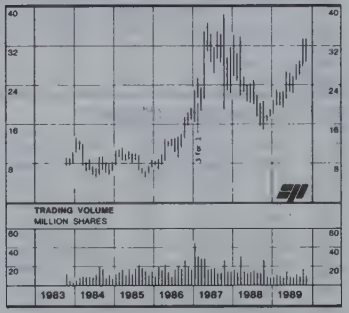
This leading maker of microcomputer applications software is seeking to build upon the success of its best-selling 1-2-3 product with a series of diversification efforts. The extent of future earnings growth depends largely on the success of its new products.

Current Outlook

Earnings for 1990 are projected at $2.15 a share, versus the $1.55 estimated for 1989 and the $1.29 recorded in 1988.

Cash dividends are not currently anticipated.

Revenues through 1990 are expected to benefit from the availability of and upgrades to new versions of the company's flagship 1-2-3 spreadsheet program, increased computer shipments and a strong international marketplace. Margins should widen on the higher volume and restrained growth in spending. Share earnings will further benefit from a stock repurchase plan. LOTS' strategy of diversifying its product line while building on its installed base of more than five million users is being realized, with fast-growing contributors including the CD-ROM and personal information management product lines. The extent of LOTS' earnings growth depends largely on the success of its new products.



Net Sales (Million $)

13 Weeks:	1989	1988	1987	1986
Mar	120.0	117.3	84.8	69.3
Jun.	132.2	122.1	94.0	66.2
Sep.	153.9	116.8	101.2	65.6
Dec	---	112.4	115.6	81.8
	---	468.5	395.6	282.9

Sales for the nine months ended September 30, 1989, were up 14%, year to year, aided by the availability of 1-2-3 Releases 3.0 and 2.2. Gross margins narrowed reflecting costs associated with earlier-in-the-year sales and marketing programs and distribution channel incentives aimed at sustaining the company's market position in spreadsheets. Following lower interest and other income (net), pretax profits fell 25%. With taxes at 25.0%, versus 27.0%, net income declined 23%, to $38.5 million ($0.92 a share, on 8.9% fewer shares), from $49.9 million ($1.08).

	E1.55	1.29	1.58	1.03

Important Developments

Nov. '89— LOTS began its final beta testing cycle of 1-2-3/G, the graphical version of its spreadsheet designed for the OS/2 and Presentation Manager operating systems. In July, LOTS began shipping its 1-2-3 Release 2.2 spreadsheet, which followed by a month the introduction of 1-2-3 Release 3.0.

Sep. '89— LOTS acquired a 15% interest in Sybase Inc., with a provision to purchase an additional 10%, and announced joint development, marketing and distribution provisions for future products. Sybase is the developer of SQL Server, the database server software product it markets jointly with Ashton-Tate and Microsoft.

Business Summary

Lotus Development Corp. engages primarily in the development, production and marketing of applications software and information services for personal computers (PCs).

The company's initial product, 1-2-3, was shipped in January 1983. An integrated software product that combines spreadsheet, database and graphing capabilities into a single program for use with most personal computers, 1-2-3 became the PC software industry's best-selling business application software product soon after its introduction. Lotus shipped its second product, Symphony, in June 1984. Symphony is a general-purpose management tool that integrates spreadsheet technology with graphics, database, word processing and communications. By the end of 1988, the company had sold approximately 4.8 million units of 1-2-3 and Symphony.

Products marketed by the company in addition to 1-2-3 and Symphony include: Freelance Plus and Graphwriter II, both graphics products; Manuscript, a document and word processing product; Agenda and Magellan, both information management products; and Lotus One Source, a PC-based system that combines industry standard financial databases, stored on CD-ROM media.

Lotus hopes to maintain and build upon its large customer base by developing applications and information services products that operate in multiple hardware and operating system environments, including mainframe computers, workstations and networks. A central element of the company's strategy is to provide common mechanisms within these products that promote ease of learning and use.

Lotus markets its products principally through direct sales to dealers and through third-party distributors. While retail remains Lotus' principal distribution channel, the company has begun to establish supplemental sales channels for targeted products and markets. Sales to customers outside the U.S. in 1988 were $159,248,000 (34% of net sales), up from $109,867,000 (28%) the year before.

Dividend Data

Lotus has never paid cash dividends. A three-for-one stock split was effected in 1987. A "poison pill" stock purchase rights plan was adopted during 1988.

Finances

The company said that, through June 30, 1989, it had repurchased about 5.3 million shares under an authorization to buy back up to approximately 6.7 million shares (15%) of its common stock.

Capitalization

Long Term Debt: $167,000,000 (9/89).

Summary

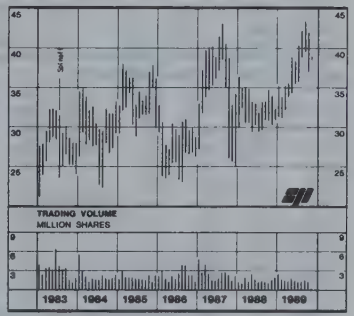
LLX is a major independent crude oil and natural gas producer with the majority of its holdings along the Gulf Coast, and in Louisiana and the Rocky Mountain region, in addition to foreign interests in the North Sea and Canada. The company is completing a restructuring program which has sharply lowered its operating and financing cost structure. LLX is seeking to expand its North American production program in order to exploit projected growth in the U.S. energy markets.

Current Outlook

Share earnings for 1990 are projected at $1.60, versus the $1.50 (including a $0.40 first quarter gain on asset sales) estimated for 1989.

The dividend should continue at $0.25 quarterly.

Revenues for 1990 are expected to show modest improvement, reflecting increased natural gas production and stronger gas pricing. LLX's cost structure has been materially lowered, due to the company's restructuring program. Share earnings comparisons will be enhanced by lower indebtedness and the company's share buyback program. Over the longer term, LLX will be looking to increase its exploration program primarily in Canada.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	196	202	198	254
Jun.	205	191	195	181
Sep.	163	182	211	185
Dec.	---	152	225	207
	---	726	828	827

Revenues for the nine months ended September 30, 1989 fell 1.8%, year to year, owing to lower crude oil and natural gas production. As a result of an improved cost structure, nonrecurring income and the absence of 1988's restructuring costs, net income was $36.7 million ($1.23 a share, excluding a special charge of $0.09), in contrast to a net loss of $71.2 million ($2.29, which excluded a special credit of $1.18).

Dec.	E0.27	0.03	0.23	d1.46
	E1.50	d2.27	0.80	d0.71

Important Developments

Nov. '89— LLX reported share earnings for 1989's third quarter of $0.27, compared with a loss of $1.79 a year earlier. Results for the 1989 period benefited from higher crude oil prices and lower costs which offset lower production resulting from the company's asset disposition program. The program has been designed to divest nonstrategic properties and to lower LLX's cost of production. The program has enabled the company to reduce outstanding indebtedness and to buy back some 2 million common shares in 1989. In 1989, LLX recorded a $12.5 million net gain from the sale of real estate offset in part by a $2.8 million net charge for early debt retirement. In 1988, LLX incurred a $54 million net restructuring charge and a $11.7 million net reserve for pending litigation. Also, in 1988 LLX recorded a $36.9 million special credit from a change in accounting.

Next earnings report expected in late January.

Business Summary

LLX is a major independent oil and gas producer and owns a small refinery in Mobile, Ala. Copper and gold mining activities were sold in 1984 and real estate holdings have been reduced.

Oper. Profits (Million $)	1988	1987
Domestic petroleum	-$68.2	$97.7
North Sea petroleum	5.1	8.6
Other foreign petroleum	-2.0	0.7

LLX operates onshore in the continental U.S. and the Federal offshore area of the Gulf of Mexico. LLX has working interests in Canada, Colombia, and in the Netherlands and U.K. sectors of the North Sea. LLX also receives royalties, lease bonuses, and income from a net profits interest in production by others of oil and gas properties LLX owns and leases in south Louisiana.

In 1988 production of crude and condensate averaged 38,953 barrels a day (40,648 in 1987), plant products 3,247 b/d (2,696 b/d), and natural gas 264.3 million cubic feet a day (295.1). Net proved reserves at 1988 year-end stood at 85 million barrels of crude and other petroleum liquids (94 million in 1987) and 677 billion cubic feet of natural gas (819).

The July, 1986 acquisition of Inexco Oil (for $6 million in cash, 4.2 million common shares and assumption of $322 million of Inexco long-term debt) added at least 367 billion cubic feet of long-lived domestic natural gas and 11.8 million barrels of petroleum liquids to LLX's proved reserves. Owing in part to the acquisition, LLX's replacement of production with new reserves, has averaged about 138% since 1982.

Dividend Data

Dividends have been paid since 1935. A "poison pill" stock purchase right was declared in 1986.

40⅝	42⅝-28	9	1.00	2.5%	B	1.38

Summary

This company is an important producer of lumber, plywood, particleboard and pulp. LPX has been in the forefront of an industry move to substitute waferboard for plywood production, a move that should enhance future earnings. Recent sales and earnings were helped by production cutbacks at competitors' mills caused by a lack of timber supplies from national forests.

Current Outlook

Earnings for 1990 are projected at $4.25 a share, compared with the $4.75 estimated for 1989.

The $0.25 quarterly dividend will likely be raised in 1990.

Building products sales for 1990 should remain strong, reflecting production curtailments at other producers' mills caused by timber supply shortages. Prices for pulp should remain firm as long as the economy does not deteriorate.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	467	414	423
Jun.	---	526	474	489
Sep.	---	510	463	532
Dec.	---	---	448	478
	---	---	1,799	1,922

Sales for the nine months ended September 30, 1989 rose 11%, year to year, reflecting higher pulp prices and better than expected wood products sales. Margins widened, and pretax income increased 26%. After taxes at 34.5%, versus 38.5%, net income was up 34%. Share earnings were $3.66, compared with $2.73. Results for the 1988 interim exclude income from discontinued operations of $0.48 a share and a special credit of $3.82 a share from the settlement of the Redwood National Park comdemnation.

Important Developments

Oct. '89— The board of directors authorized a common stock repurchase program of up to five million shares. The stock will be used for the LPX employee stock plan and other corporate purposes.

Jun. '89— The company announced plans to construct a new oriented structural board plant in Silsbee, Texas. The plant will have an annual production capacity of 300 million square feet. It will be LPX' sixteenth oriented board plant.

Feb. '89— LPX announced an employee stock ownership plan for all hourly employees whose pension benefits are not subject to collective bargaining. LPX' contribution for 1989 will equal 5% of compensation.

Next earnings report expected in mid-January.

Business Summary

Louisiana-Pacific is an important producer of lumber, softwood plywood, particleboard, pulp and other wood products. Industry segment contributions in 1988:

	Sales	Profits
Building products	87%	65%
Pulp, paperboard & containers	13%	35%

Export sales accounted for about 20% of sales in 1988, versus 14% the year before.

Building products include redwood lumber (4% of total 1988 sales), other lumber (34%), panel products (35%), and logs, chips, veneer, windows, doors and insulation (14%). LPX is a leading producer of particleboard, waferboard, redwood lumber and other lumber products.

During 1988 LPX produced 2.44 million bd. ft. of lumber; 1,552 million sq. ft. of plywood; 2,013 million sq. ft. of waferboard; 443 million sq. ft. of fiberboard and particleboard; 257 million sq. ft. hardwood veneer; and 381,000 tons of pulp. The company owns 1,538,300 acres of timberland, which supplied 18% of its log requirements in 1988. The company also holds cutting rights to approximately $242 million of government timber.

LPX's Fibreboard subsidiary, a defendant in numerous lawsuits claiming damages from use of asbestos-containing products made by that unit prior to 1971, was spun off to shareholders in June, 1988.

Dividend Data

Dividends have been paid since 1973. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 15'89	1989					
30	32⅛-20¾	15	0.52	1.7%	A-	1.26

Summary

This company retails building materials and supplies, lumber, hardware and appliances through some 300 stores, primarily in the southern U.S. Earnings are strongly affected by seasonal and cyclical trends in construction activity, but a shift in emphasis toward the do-it-yourself, home improvement market bodes well for future growth. The dividend was raised 8.3% in December, 1989.

Current Outlook

Earnings for the fiscal year ending January 31, 1991 are projected at $2.10 a share, up from the $2.00 estimated for fiscal 1989-90.

Dividends were raised 8.3%, to $0.13 quarterly from $0.12, with the December, 1989 declaration.

Sales through fiscal 1990-91 are expected to increase moderately, reflecting LOW's store expansion program and strategic shift in emphasis toward the strong do-it-yourself retail market. Profits will benefit from a more favorable product mix and lower interest expense, but the gain will be restrained by expansion-related costs.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	602	591	569	534
Jul.	746	705	725	658
Oct.	703	652	646	594
Jan.	---	570	502	497
	---	2,517	2,442	2,283

Sales for the nine months ending October 31, 1989 rose 5.3%, year to year, reflecting more units in operation and higher same store sales. Gross margins widened on a more favorable product mix; however, profits were penalized by expansion related costs and higher employee retirement expenses. Following lower interest expense, pretax income rose 5.4%. After taxes at 31.8%, versus 36.3%, net income advanced 12.9%, to $1.74 a share (on 1.8% fewer shares) from $1.51.

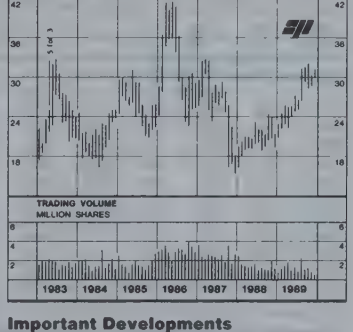
Jan.	E0.27	0.32	0.02	0.25
	E2.00	1.83	1.41	1.41



Important Developments

Dec. '89— The company said that its November sales totaled $203.1 million, up 12%, year to year; same store sales rose 11%.

Dec. '89— LOW said that in the first 10 months of fiscal 1989-90 it opened six new stores, relocated nine and closed two, bringing the number of stores in operation at December 1 to 300. Management said that it would continue its store expansion program and during fiscal 1990-91 planned to open about five more new stores and relocate 22.

Oct. '89— The company said that it had completed the purchase of $6 million of LOW common stock for its ESOP. In August, 1988 the company completed its $50 million stock repurchase program (authorized in December, 1987), under which 2,498,950 common shares were repurchased.

Next earnings report expected in mid-March.

Business Summary

Lowe's Companies is a retail distributor, at discount prices, of building materials, consumer durables, and home center products for the do-it-yourself and home construction markets. As of January 31, 1989 it was operating 296 retail stores in 20 states, located principally in the South Atlantic and South Central regions of the U.S.

Contributions to sales by product line in recent fiscal years:

	1988-9	1987-8
Structural lumber	19%	20%
Building materials	29%	30%
Home decoration	12%	12%
Kitchens & baths	9%	9%
Heating & cooling	5%	5%
Home entertainment	5%	4%
Recreation, garden & farm	9%	8%
Tools	3%	3%
Special orders	9%	9%

At January 31, 1989 Lowe's had total sales floor space of 5,062,865 sq. ft. The average sales floor size was 17,104 sq. ft., versus 16,182 sq. ft. the year before, with the company planning to continue expanding the size of its stores. Total sales per sq. ft. in fiscal 1988-9 were $510, and retail sales per sq. ft. were $301.

In an effort to reduce the impact of construction cycles, Lowe's has been seeking an increase in its retail business in recent years. Building materials sales are seasonal, the largest portion occurring in the spring and summer months.

Dividend Data

Cash dividends were initiated in 1961. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

Lubrizol is believed to be the largest supplier to the petroleum industry of chemical additives used in lubricants and fuel. LZ is also engaged in the development and production of seeds for agricultural crops and specialty vegetables oils and their chemical derivatives. Earnings in recent years have remained well below earlier highs, mainly due to lower demand for LZ's chemical additives. However, some recovery has been seen since 1986 with higher chemical sales.

Business Summary

Lubrizol is a specialty chemical company serving the transportation, industrial and agricultural markets. Its principal products are chemical additives for lubricants and fuels. It also produces agricultural crop seeds and related products. Contributions by business segment (operating profits in million $) in 1988:

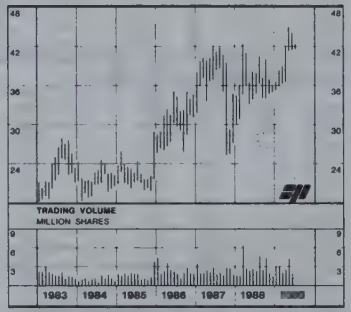
	Sales	Profits
Specialty chemicals	92%	$223.4
Agribusiness	8%	-$40.2

Foreign operations accounted for 53% of sales and 60% of operating profits in 1988.

Specialty chemicals consist of chemical additives for automotive and industrial lubricants, functional fluids and fuels, primarily engine oils, automotive transmission fluids, gear oils, hydraulic fluids, machine oils, metal working compounds and gasoline and diesel fuels used in cars, trucks, buses, off-highway equipment, marine engines, and industrial applications. Other products include corrosion control coatings, plastic and paint additives, and mining chemicals.

Agrigenetics Corp. is engaged in the development and sale of crop seeds and the development of specialty vegetable oils derived from oilseed crops, primarily sunflower. Corn accounted for 52% of seed sales in 1988, soybeans 16%, sorghum 11%, sunflowers 9% and other crops 12%. Export sales were 15% of the total.

Various venture capital interests are held in: Genentech, Inc., a bio-engineering concern; Mycogen Corp., a producer of pesticides; Syntro Corp., a producer of animal vaccines and specialty chemicals; Ocean Genetics, Inc., a marine biotechnology firm; Altus Corp., a maker of higher energy lithium batteries; Creative BioMolecules, Inc., a protein engineering and production company; and Sungene Technologies Corp., a plant biotechnology research firm.



Important Developments

Apr. '89— Both the specialty chemicals and agribusiness units demonstrated strong performances in the first quarter. Specialty chemicals revenues were a record for any quarter. Agribusiness benefited from higher selling prices and greater crop seed sales reflecting projected higher planted acreage. Chemical raw material prices continued upward and testing costs remained high. LZ settled litigation related to Agrigenetics Research Associated Limited Partnerhip.

Oct. '88— LZ settled a patent infringement suit against Exxon Corp., which agreed to pay LZ $80 million in cash and $6 million in trade credits. Exxon recognized the validity of 10 patents owned by LZ, and agreed not to market over 300 accused products. Fourth quarter 1988 earnings include a $53.2 million ($1.37 a share) gain from the settlement.

Next earnings report expected in late July.

Luby's Cafeterias

NYSE Symbol LUB In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 4'90	1989-90					
26 3/4	28 3/8-23 1/8	16	0.64	2.4%	A	0.76

Summary

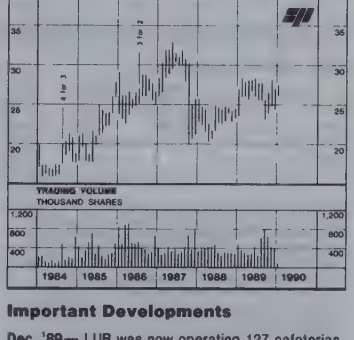
This owner and operator of more than 120 cafeterias, located primarily in Texas, has consistently posted strong profitability and return on equity over the past decade. New cafeteria openings are contributing to revenue growth, and although LUB's margins have recently weakened somewhat, share earnings are expected to continue to rise in fiscal 1990.

Current Outlook

Earnings for the fiscal year ending August 31, 1990 are estimated at $1.75 a share, up from fiscal 1989's $1.62.

The dividend was raised 14.3%, to $0.16 quarterly from $0.14, with the September, 1989 payment.

Further sales increases are expected in fiscal 1990, aided by more cafeterias in operation. Overall profitability is expected to again be strong, helped by LUB's incentive program for store managers. Near-term expansion is expected to center on Texas. Longer-term, there could a greater emphasis on restaurant development in other states, but this could put LUB into more direct competition with other cafeteria chain companies.



Sales[1] (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7

	E1.75	1.62	1.51	1.30

Important Developments

Dec. '89— LUB was now operating 127 cafeterias, including three that opened in fiscal 1990's first quarter. The three new cafeterias were in Austin, El Paso, and Bellmead, Tex., and nine other units were under construction. Separately, in August, 1989 LUB was ranked as the third largest cafeteria chain company in the U.S., by Nation's Restaurant News, a trade newspaper. The leader was Morrison's Family Dining, which had systemwide sales of $306 million in its fiscal year ended May, 1989. Morrison's had about 172 units, most of which are in the Southeast. Furr's/Bishop's Cafeterias, L.P., ranked second, with estimated calendar 1989 sales of $285 million, while Piccadilly Cafeterias, which had sales of $276 million in the fiscal year ended June, was fourth.

Next earnings report expected in mid-February.

Business Summary

LUB, which is one of the largest cafeteria chain companies in the U.S., operated 124 restaurants at August 31, 1989, of which 99 were in Texas, nine in Oklahoma, nine in Arizaona, four in New Mexico, two in Arkansas, and one in Florida. Number of cafeterias in operation at fiscal year-end:

1989	124	1985	85	1981	59
1988	113	1984	77	1980	56
1987	103	1983	70		
1986	94	1982	64		

Most of the cafeterias are located in suburban shopping areas. The units cater primarily to shoppers and office and store personnel for lunch and to families for dinner. LUB's cafeterias are generally 10,000-11,000 sq. ft. in area and can typically accommodate 300 guests in a carpeted dining room. Most of the cafeterias do business seven days a week, and are open for lunch and dinner. Menus, which are not uniform in all outlets on any particular day, are designed to reflect local and seasonal food preferences and to take advantage of any food purchasing opportunity.

Many of LUB's cafeterias are located in the larger cities of Texas. As of December 1989 LUB had 20 units in Houston, 15 in San Antonio, five in Dallas and four in Austin.

The company has historically increased its number of cafeterias about 10% each year. In fiscal 1990, expansion is expected in Texas and Arizona, including three new units in Houston.

Dividend Data

Quarterly cash dividends have been paid since fiscal 1965 (since March, 1973 on the publicly held shares).

Lyondell Petrochemical

1389

NYSE Symbol LYO Options on NYSE (Mar-Jun-Sep-Dec)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 26'89	1989					
21¼	33½-16¾	NM	1.60	7.5%	NR	NA

Summary

This company, formerly a wholly-owned subsidiary of Atlantic Richfield Co. (ARCO), is a leading producer of a wide variety of petrochemicals, including ethylene, propylene, methanol and aromatics, and refined petroleum products, including gasoline, heating oil, jet fuel and lubricants. Earnings in 1989 were penalized by lower chemical volumes and increased maintenance expenses. In December, 1989 LYO agreed to purchase polyethylene and polypropylene plants, thus entering key derivative markets.

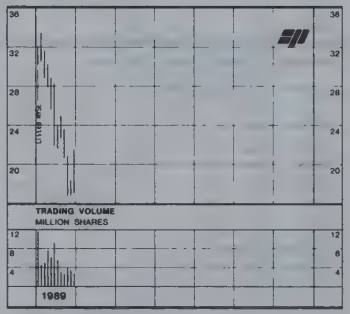
Business Summary

Lyondell Petrochemical is an integrated petrochemical and petroleum processor and marketer. The company was formed in 1985 by the combination of Atlantic Richfield Co.'s Channelview, Texas petrochemical complex and its full conversion Houston Refinery. Sales contributions:

	1988	1987
Petrochemical	41%	35%
Refined products	38%	55%
Other	21%	10%

The Channelview petrochemical complex consists of two large olefins plants, a methanol plant and other processing units. The complex obtains its feedstocks from the Houston refinery and from outside sources. Olefins consists of ethylene (capacity of 3.4 billion pounds per year) used for polyethylene, polyvinyl chloride and polystyrene resins, anti-freeze, and detergents; propylene (2.1 billion pounds) for plastics, fibers, and solvents; and butadiene (420 million) for rubber products, tires, and solvents. LYO is the largest domestic merchant marketer of ethylene and propylene. Aromatics (including those produced at the refinery) include benzene (130 million gallons), used for styrene, fibers and detergents; paraxylene (320 million pounds) for polyester films and fibers; and orthoxylene (240 million) for plasticizers and polyester resins. Methanol (220 million gallons) is used for adhesives, polyester fibers, and as an octane enhancer. The Channelview complex also includes two MTBE units owned by LYO, which manufactures MTBE for ARCO Chemical Co. at one unit. Output from the second plant is used as a gasoline blending components at the Houston refinery.

The Houston refinery, with operable crude capacity of 265,000 barrels per day, produces gasoline, diesel fuel, heating oil, jet fuels, lubricant oils, chemical feedstocks, aromatics, and industrial



products (coke, sulfur, and residual fuel). The refinery has the full conversion capability to process heavier crude oils into a product mix that does not include lower value residual fuels.

Important Developments

Dec. '89— LYO agreed to purchase Rexene Products Co.'s low density polyethylene (capacity of 125 million pounds) and polypropylene (300 million pounds) plants in Bayport, Texas for $88 million. LYO planned to finance the purchase with new debt, thus not reducing the amount of the special dividend LYO plans to pay in early 1990.

Oct. '89— LYO said that the 600 million pound expansions of its two olefins plants were completed and that it expected lower costs for the rest of 1989. However, petrochemical margins were continuing to narrow into the fourth quarter.

Next earnings report expected in late January.

Dec.		1,128	1,100
		4,696	3,931

Sales for the first nine months of 1989 rose 13%, year to year, reflecting increased volumes and prices for refined products and increased prices for petrochemicals, partially offset by lower volumes. However, penalized by costs associated with maintenance and expansion programs, reduced olefins volumes and narrower refined margins, operating income declined 14%. With increased interest expense, pretax net fell 21%. After taxes at 33.5%, against 34.4%, net income declined 20%, to $310 million from $386 million. Earnings for the 1989 period were equal to $3.87 a share.

Net income for the third quarter of 1989 fell 54%, year to year, to $73 million from $160 million, reflecting reduced olefins sales volumes and margins and higher maintenance expenses.

Finances

In January, 1989, in the company's initial public offering, underwriters led by Goldman, Sach & Co. and Salomon Brothers Inc. sold 43 million shares (including 3 million to cover over-allotments) of LYO common stock held by Atlantic Richfield Co. (ARCO) at $30 a share. LYO did not receive any of the net proceeds of $1.22 billion. The sale reduced ARCO's interest in LYO to 46.25%. ARCO intends to maintain ownership of just under 50% in LYO. ARCO may repurchase LYO shares from time to time in the open market. Since March, 1989 ARCO raised its interest in LYO to 49.97%.

In connection with the public offering, on January 17, 1989, LYO made a special distribution of $500 million to ARCO. Funds were provided by a $500 million bank credit agreement. In June, 1989 LYO publicly sold $300 million of notes; proceeds were used to repay bank debt. The distribution resulted in a negative shareholders' equity of $330 million (pro forma) for LYO. In addition, on December 30, 1988 LYO paid a dividend of $207 million to ARCO, all the available cash at the end of December, 1988. On October 24, 1988 LYO paid a dividend of $117 million to ARCO.

In April, 1985 Atlantic Richfield established Lyondell Petrochemical, formed by the combination of its Channelview, Texas petrochemical complex and the Houston refinery. The Channelview complex and the Houston refinery are linked by pipeline.

Dividend Data

Quarterly dividends were initiated in 1989. In addition to regular dividends, LYO intends to distribute, as dividends or otherwise, cash that directors from time to time determine to be in excess of the company's needs. LYO expects to make an initial decision in the first quarter of 1990 following the review of 1989 results.

Summary

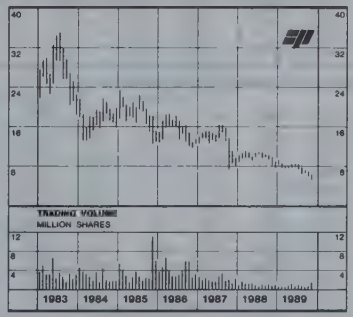
M/A-Com produces components and subsystems for manufacturers of equipment used in the defense and commercial telecommunications markets, and supplies microwave systems for commercial terrestrial and satellite systems. In July, 1989 MAI acquired Adams-Russell Inc., which supplies electronic equipment for the defense industry, for approximately $80 million in cash. Directors omitted the cash dividend in November, 1989.

Current Outlook

Earnings for the fiscal year ending September 30, 1990 are tentatively estimated at $0.20 a share, versus the $0.01 reported for fiscal 1989.

Directors omitted the $0.06 quarterly cash dividend on November 15, 1989.

Sales for fiscal 1990 are expected to increase moderately, reflecting primarily the acquisition of Adams-Russell, offset partly by the disposal of certain operations. Sales are likely to continue to be adversely affected by poor market conditions in the defense electronics industry. Margins should should improve, largely reflecting the absence of large cost overruns associated with long-term contracts.



Net Sales (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Dec.	97.4	112.3	111.1	134.2

Sep.	d0.31	0.18	d1.34	0.02
	0.01	0.65	d0.88	d0.51

Important Developments

Nov. '89— MAI attributed the fiscal 1989 fourth quarter loss to cost overruns on certain long-term programs and an after tax charge of $1.5 million for restructuring measures. Also cited were flat defense spending, high technical risk, program delays and competition within the defense electronics industry. MAI anticipated that its performance would improve in 1990, with a difficult first half and improvement in the second half.

Aug. '89— MAI agreed to sell its Government Systems division (about 15% of fiscal 1988 sales) for about $70 million to a management group. Earlier, MAI acquired 5,141,951 shares (about 97%) of Adams-Russell Inc. in a cash tender offer of $15.50 a share. Adams-Russell, a defense electronics supplier, had sales of $138 million during the fiscal year ended October 2, 1988.

Next earnings report expected in early February.

Business Summary

M/A-Com (formerly Microwave Associates) manufactures microwave and millimeter wave components and integrated assembles for defense applications in radar, electronic warfare, missile guidance and communications systems. Digital equipment and software are manufactured by M/A-Com for defense applications principally in satellite systems. MAI also makes microwave transmission equipment for commercial terrestrial communications applications.

MAI has a broad range of products and technology for complex semiconductor devices, components and circuits, to multi-function assemblies and subsystems. The majority of M/A-Com's component products incorporate microwave semiconductor technology for the generation, transmission, control and reception of microwave energy.

In fiscal 1987 MAI sold its Telecommunications division (fiscal 1986 sales of $120 million), M/A-Com Information Systems, Inc., and several product lines. MAI also withdrew from the telephone switching products business. In fiscal 1986 MAI sold its Cable/Home Communications business (28% of fiscal 1985 revenues) and withdrew from the terrestrial microwave point to multipoint data only transmission business.

Dividend Data

Prior to omission in November, 1989, dividends had been paid since 1977. A "poison pill" stock purchase right was adopted in 1986. Payments in past 12 months.

Summary

This diversified leisure and entertainment company is a major provider of television programming and theatrical films. Also, its interests include the Universal Studios Tour in California, recorded music, retail and mail order merchandising, book publishing and toy manufacturing. MCA is jointly developing a production facility and tourist attraction in Florida.

Current Outlook

Earnings for 1990 are projected at $2.95 a share, up from 1989's estimated $2.50, which excludes prospective asset sale gains.

The $0.17 quarterly dividend is the minimum expected.

In 1990, earnings are expected to be helped by ancillary market (e.g. home video and pay TV) contributions from recent theatrical movie successes (e.g. "Parenthood," and the upcoming "Back to the Future" sequel). Also, management or takeover-related disruptions at several other major movie companies may help MCA to boost its results from new theatrical releases. Music profits are expected to rise again. There could some impact from the expected 1990 opening of a new 50%-owned Florida theme park.

Important Developments

Oct. '89— MCA had conditionally agreed to sell its 23.6 million restricted shares of movie theater company Cineplex Odeon (CPX) to a company formed by members of CPX management. Conditions included provisions that the proposed acquirer start a tender offer for CPX at a price of not less than $16.40 Can. (about $13.94 U.S.) a share on or before Nov. 22. At this price, MCA's CPX shares (about 49% of the number outstanding) would be worth about $329 million (U.S.), versus a carrying cost on MCA's balance sheet of about $236 million at year-end 1988. Meanwhile, in 1989's third quarter MCA's ownership interest in CPX resulted in an equity charge to MCA's earnings of about $19 million (about $0.26 a share). Also, in October MCA and IBM had agreed to sell their jointly-owned Discovision Associates business for $200 million.

Next earnings report expected in late January.

Business Summary

MCA is a diversified entertainment company, whose businesses include the production and distribution of movies, television shows and home video; recorded music and music publishing; toy products; retailing and mail order of gift merchandise; and recreation services. Segment contributions in 1988:

	Revs.	Profits
Filmed entertainment	50%	70%
Music entertainment	22%	18%
Retail & mail order	10%	Nil
Book publishing	6%	7%
Toy products	4%	-10%
Broadcasting & cable	4%	4%
Other	4%	12%

Filmed entertainment includes movies produced and distributed through Universal Pictures. Also, MCA is a leading supplier of TV shows.

MCA's recorded music business includes its own labels. The company also has a 20% interest in Motown Records.

The toy segment consists of LJN Toys. The retail and mail order business includes Spencer Gifts, Intrigue jewelry stores and kiosks, and several A2Z-The Best of Everything Shops.

Also, MCA owns an independent TV station in the metropolitan New York market, publishes books, operates a tour at Universal Studios, and has 50% interests in cable TV channel USA Network and Discovision Associates, which is involved in patent licensing. In addition, MCA has about a 49% equity interest in movie exhibitor Cineplex Odeon.

Dividend Data

Dividends have been paid since 1967. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

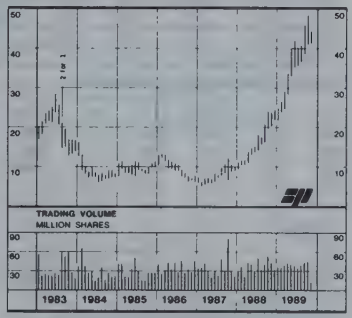
MCI operates the U.S.'s second largest long-distance telephone business, providing domestic and international telecommunications services primarily over its own microwave and optical fiber network. The company has experienced a significant rise in earnings in recent years, mainly reflecting rapid growth in the long distance market and successful efforts at increasing market penetration.

Current Outlook

Earnings for 1990 are projected at $3.25 a share, up from the $2.45 estimated for 1989. Earnings for 1991 are tentatively projected at $4.10 a share.

MCI may choose to initiate common cash dividends sometime in 1990.

Revenues are expected to increase about 23% in 1990, reflecting an increase in calling volume of about 27%, offset partly by rate cuts anticipated to total some 3% to 4%. Operating margins should expand on the higher volume. Interest costs should decrease. Average common shares outstanding should rise slightly.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,500	1,131	955	819
Jun.	1,594	1,219	952	943

Dec.		1,431	1,038	920
		5,137	3,939	3,592

Revenues for the nine months ended September 30, 1989, increased 28%, year to year. Operating income rose 92%. After a 7.5% increase in net interest expense, and $18 million of income from antitrust settlements, versus $48 million, pretax income was up 2.3-fold. After taxes at 25.0%, against 16.1%, net income rose to $460 million, from $224 million. After preferred dividends, share earnings were $1.73 a share (on 9.6% fewer shares) and $0.78, respectively, excluding a $0.04 extraordinary charge in the 1989 period.

	E2.45	1.27	0.30	d1.57

Important Developments

Oct. '89— The company said that it continued to garner a greater share of the business market during the 1989 third quarter. Nonetheless, residential traffic volumes grew faster than business traffic volumes, due largely to the roll-out of the new PrimeTime calling plan and expansion of operator and payphone services.

Aug. '89— MCI announced it was reducing its basic interstate long distance rates approximately $12 million (annualized), or an average of 1.5%, effective immediately. Residential rates would be cut an average of 1.9%, business/commercial rates by an average of 0.4%, and MCI Card usage rates by 1.0%. MCI indicated that the cuts were being made in response to rate cuts AT&T initiated in connection with that company's new rate cap regulation.

Next earnings report due in early February.

Business Summary

MCI Communications is the second largest carrier (after AT&T) of intercity voice and data communication services in the U.S. In addition to domestic long-distance services, MCI provides international telephone service to some 150 countries.

Billable calls for 1988 amounted to about 5.4 billion, an increase of 48% from the previous year. Recent growth in billable call volume has been driven primarily by business customers. Long distance telephone services are used for voice communications and the transmission of data, facsimile, teleprinter and other signals. Other services include MCI WATS, MCI PRISM and MCI 800 service. MCI also offers Vnet and private line service for customers with large communication volumes between two or more locations in the U.S.

International record services are offered through the Western Union International subsidiary (acquired in 1982) and RCA Globcom (acquired in May 1988). MCI Mail, begun in 1983, offers electronic mail and document delivery services in the U.S. and internationally.

Domestic service to metropolitan areas is provided over MCI's own coast-to-coast intercity microwave and optical fiber communications system and, to a far lesser extent, over intercity facilities leased from other common carriers.

Dividend Data

No common cash payments have been made. In 1986, MCI said it was not likely to begin paying dividends on its common stock prior to the end of the decade.

Finances

In 1988, MCI invested $896 million in its communication system, an increase of 45% from 1987's spending level. Capital expenditures for 1989 were planned at about $900 million.

In May 1988, MCI acquired RCA Global Communications Inc., which provides worldwide telex, facsimile and high-speed data transmission, from General Electric Co. for about $160 million.

In August 1988, MCI repurchased 47 million of its common shares from IBM for $677.3 million. MCI had issued the shares to IBM in March 1986 in exchange for IBM's Satellite Business Systems unit (SBS). In a separate transaction, IBM purchased two million 7.35% preferred shares from MCI for $400 million.

Capitalization

MDU Resources Group

NYSE Symbol MDU

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 25'89	1989					
20 3/8	22 1/4-17 7/8	10	1.42	7.0%	A-	0.40

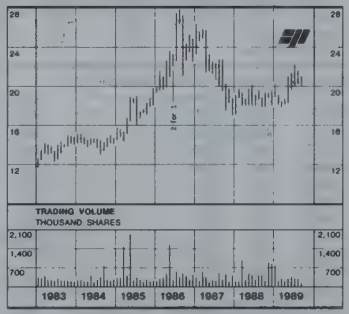
Summary

This integrated energy resource company provides electric and gas utility services at retail to customers in the Dakotas, Montana and Wyoming. MDU also operates a 4,100-mile natural gas transportation system, mines lignite coal and participates in oil and gas exploration and production ventures. Earnings for the first half of 1989 benefited from increased efficiencies in operations and an aggressive gas marketing program.

Business Summary

MDU Resources Group (formerly Montana-Dakota Utilities), through Montana-Dakota Utilities Co., provides gas service to approximately 176,000 customers in 127 communities and electric service to about 110,000 customers in 174 communities in Montana, North Dakota, South Dakota and Wyoming. Important industries in the service area include agribusiness, oil and natural gas production, and coal mining. MDU is also engaged in coal mining and oil production, and operates a 4,100-mile natural gas transportation system. Revenues and operating profit contributions in 1988:

	Revs.	Profits
Natural gas	49%	34%
Electric	36%	43%
Coal	12%	13%
Oil	3%	10%



MDU produces most of its base load power through four lignite-fueled generating stations. Peaking power is furnished by a series of combustion turbines. Electricity provided in Wyoming is purchased from another utility. Electric system generating capacity in 1988 was 439.9 mw and peak load was 386.7 mw, for a capacity margin of 12.1%. In 1988 electric sales totaled 1,844 million kwh, up from 1,737 million kwh in 1987. Average annual revenue per kilowatthour was $0.065 in 1988, versus $0.066 in 1987.

MDU provides natural gas service at retail and, through Williston Basin Interstate Pipeline (wholly owned), sells natural gas at wholesale and provides underground storage and transportation services. It operates 4,100 miles of pipeline in four states. Retail natural gas sales were 32,557 Mdk in 1988, versus 29,684 Mdk in 1987.

Lignite coal mining production (conducted through wholly owned Knife River Coal Mining Co.) amounted to 4,759,000 tons in 1988, versus 3,419,000 tons in 1987. Sales in 1987 were depressed due to the prolonged shutdown of MDU's 22.7% owned Big Stone Generating Station, the mine's major customer. Big Stone returned to production early in 1988. Through Fidelity Oil Group, MDU participates in oil and natural gas exploration and production ventures located throughout the western United States, in the Gulf of Mexico area and Canada, and holds approximately 12.4 million equivalent barrels of oil.

Construction costs for 1989-91 are projected to average $29.1 million annually, including $19.7 million at Montana-Dakota, $5.6 million at Williston Basin and $3.8 million at Knife River. Oil investments during the same period are expected to average about $20 million each year.

Important Developments

Jul. '89— The company said that an unfavorable Federal Energy Regulatory Commission order issued July 11 concerning Williston Basin Interstate Pipeline's cost of service could result in it having to refund $10 million to $12 million, plus interest, to customers.

Next earnings report expected in mid-November.

		343.8	325.5	363.5

Operating revenues for the six months ended June 30, 1989 fell 2.8%, year to year, reflecting decreased natural gas revenues and reduced air conditioning loads. Fuel, purchased power and natural gas costs declined, and operating income increased 13%. Following only slightly higher interest charges, pretax income was up 19%. After taxes at 31.3%, against 29.7%, net income rose 16%. Following preferred dividends, share earnings were $1.14 versus $0.99.

NYSE Symbol MNC

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 15'89	1989					
56⅛	58½-43⅜	9	2.32	4.1%	A	0.96

Summary

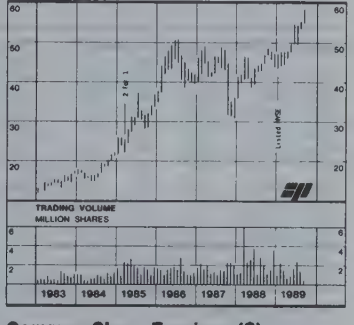
This bank holding company owns the largest bank in Maryland, and in 1987 expanded into Washington, D.C. and Virginia through acquisitions. The rapid growth of recent years was aided by a strong regional economy and expansion of credit card operations, from which MNC derives a significant portion of earnings. Operating efficiencies could help maintain earnings growth despite a cooling economy. In July, 1989 MNC agreed to acquire Equitable Bancorporation for stock. A 2-for-1 stock split has been declared.

Current Outlook

Earnings for 1990 could reach $7.20 a share, up from 1989's estimated $6.65, both unadjusted for the pending 2-for-1 stock split.

Dividends were raised 22%, to $0.58 quarterly from $0.47½ (both unadjusted), with the September, 1989 payment.

Fueled by MNC's nationwide credit card business, and benefiting from the relatively robust Baltimore/Washington market, loan growth is expected to remain strong into 1990. As credit card receivables are sold, earnings on receivables sold should continue at almost the same level, though in the form of fee income rather than interest. MNC's leadership in marketing credit cards to "affinity" groups and further gains in market share could result in continued very rapid growth of this business. The profitability of lending to consumers and small businesses could rise with improving loan quality and efficiencies from integrating American Security. The proposed acquisition (expected to be completed in early 1990) of Equitable Bancorporation, a $5 billion Baltimore based concern will likely restrain earnings growth in 1990, but should lead to contributions in 1991.



Review of Operations

Net interest income for the six months ended June 30, 1989 rose 3.8%, year to year, reflecting a 5.7% growth in earning assets and a narrower net interest margin (4.18%, versus 4.28%). Provision for loan losses was 49% lower, at $41 million. Aided by rapid growth of fee income from service fees from securitization and sales of credit card receivables and other loan assets, noninterest income rose 27%. With noninterest expense up 17%, pretax earnings rose 48%. After taxes at 31.7%, versus 25.1%, net income was up 35%, to $3.21 a share ($3.19 fully diluted; unadjusted) from $2.51 ($2.43), which excludes a $0.42 special credit.

Important Developments

Jul. '89— MNC and Equitable Bancorporation (EB), a Baltimore bank, entered into an agreement providing for the merger of EB into MNC. Under terms of the agreement, each EB common share (about 15 million shares) would be exchanged for 0.705 MNC share (unadjusted), and each Class B EB share (343,000) would receive 0.673 MNC share (unadjusted).

Next earnings report due in mid-October.

Business Summary

MNC Financial (formerly Maryland National Corp.) owns Maryland National Bank, the largest bank in that state, with 150 offices, American Security Bank in Washington, D.C. (30 offices), Virginia Federal S & L (16 offices) and Maryland Bank, which conducts extensive credit card operations (3.1 million accounts) that provide a substantial proportion of earnings. The company also engages in providing services for smaller corporations, real estate lending and retail banking. Trust operations are also important, and include $7.5 billion of assets under management. Nonbank subsidiaries engaged in leasing, mortgage banking, consumer finance and corporate finance provided 5% of earnings in 1988.

During 1988, average earning assets of $15.7 billion were divided: commercial loans and leases 36%, real estate loans 19%, consumer loans 22%, foreign loans 2%, investment securities 15%, money-market investments 6%. Average sources of funds were: demand deposits 16%, savings accounts 19%, time deposits 32%, short-term borrowings 23%, long-term debt 2%, equity 6% and other 2%.

At year-end 1988, nonperforming assets were $197 million (1.53% of loans)—including $92 million of Brazilian loans—versus $202 million (1.75%) a year earlier. The reserve for loan losses was 2.14% of loans, versus 1.74%. Net chargeoffs during 1988 were 0.82% of average loans, against 0.76% in 1987.

Summary

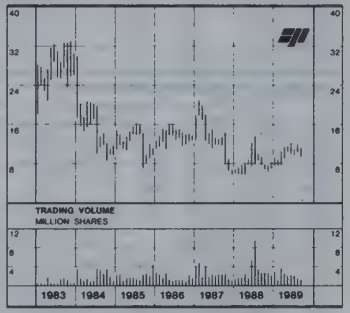
This company is a leading independent supplier of manufacturing, financial, government and other industry-oriented mainframe software. Results for 1988 were penalized by lower-than-expected revenues and by restructuring charges; however, the company returned to profitability in the first half of 1989, aided by cost-reduction measures and a lower tax rate.

Current Outlook

Earnings for 1990 are estimated in the area of $1.00 a share, up from the $0.75 projected for 1989 and in contrast to the $2.02 loss reported for 1988.

Cash dividends are not currently anticipated.

Revenues through 1990 are expected to rise modestly, year to year, aided by an expanded product line and a growing software consulting business. Margins are expected to widen, owing to the higher volume and stringent cost-control efforts. The company is focusing its software development efforts to conform with IBM's Systems Application Architecture (SAA). IBM's recent 5% investment in MSAI is a marketing plus.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	63.2	62.9	53.4	29.4
Jun.	67.2	68.9	82.6	47.6
Sep.	---	58.9	56.8	38.8
Dec.	---	59.3	65.7	77.7
	---	250.0	258.5	193.5

Revenues for the six months ended June 30, 1989, rose 1.5%, year to year, as a 15% gain in support services outweighed a 16% decline in software license fees, which reflected a change in marketing strategy and price allocation to place increased emphasis on support services. Margins narrowed as higher customer support expenses outweighed other well-controlled costs, and despite higher investment income (net), pretax profits declined 23%. After taxes at 10.0%, versus 13.1%, net income was $6,512,000 ($0.36 a share), against $8,207,000 ($0.48).

Business Summary

Management Science America, Inc. develops, markets and supports standard computer applications software packages primarily for mainframe computers. MSAI has licensed about 24,500 software packages to more than 7,500 customers.

MSAI offers a broad line of applications software packages for general business and specific industries. These include financial and human resources applications for general business, as well as functionally specific applications for manufacturers, financial institutions, governmental organizations, healthcare providers, educational institutions, distributors and insurance firms. The company also provides various consulting services related to the installation and utilization of its software packages.

Most of the company's applications are structured around its proprietary technology—Information Expert. This technology achieves a high level of systems integration, permitting users to combine information from multiple applications (including their own), those provided by MSAI and those provided by other software vendors. Information Expert provides tools that make it easy for nontechnical users to access mainframe information, create reports, design screens and link personal computers to mainframes. For data processing professionals, Information Expert provides facilities for applications design, prototyping and development. During the third quarter of 1988, MSAI committed to make its products compliant with IBM's Systems Application Architecture (SAA).

MSAI licenses rather than sells its products, with most licenses granted with nontransferable rights for an indefinite term. To receive support from the company after the first year, customers must pay an annual fee, which varies by product. Support fees accounted for about 61% of MSAI's revenues in 1988, versus some 51% in 1987. Revenues outside of North America totaled $59.1 million (24% of total revenues), against $50.0 million (19%) in 1987.

Dividend Data

No cash dividends have been paid. A "poison pill" stock purchase right was adopted in 1988.

Finances

During 1988, the company spent $58.9 million (24% of total revenues) on product development, versus $52.7 million (20%) in 1987.

Summary

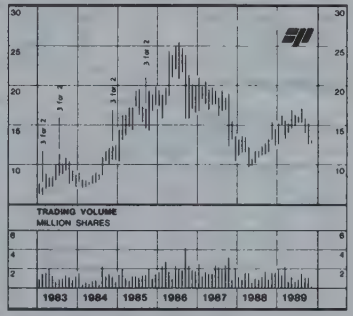
Manor Care is one of the nation's largest nursing home companies, operating some 157 facilities throughout the country. It also owns Quality Inns, which owns, operates, and franchises motels in the U.S. and abroad. Longer-range prospects are enhanced by expected benefits from an ambitious expansion program coupled with a higher-than-industry average of private pay patients in its homes.

Current Outlook

Earnings for the fiscal year ending May 31, 1990 are projected at about $0.70 a share, up from the $0.60 reported for fiscal 1988-9.

Dividends are expected to continue at $0.033 quarterly.

Revenues for fiscal 1989-90 should show another good advance, with gains likely for both healthcare and lodging. Nursing home operations should benefit from maturation of newer facilities and rate increases. The lodging business is expected to be helped by further expansion in its franchise network. Margins should benefit from the better volume and cost efficiencies.



Operating Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Aug.	173.1	148.0	133.0	126.9
Nov.	---	149.6	134.0	127.5
Feb.	---	149.2	129.1	120.6
Mar.	---	170.2	138.3	126.9
	---	617.0	534.3	501.8

Revenues for the three months ended August 31, 1989 increased 17%, year to year. Although operating profits rose, earnings comparisons were hurt by the absence of a net $0.04 a share nonrecurring gain from the sale of property included in the 1988-9 period. Net income fell 4.1%, to $0.17 a share from $0.18.

Important Developments

Sep. '89— Commenting on its performance for the first quarter of fiscal 1989-90, the company noted that the 18.4% rise in healthcare revenues was due to an increase in Medicare census and the opening of new facilities. The company opened 28 new nursing facilities over the past two and one-half years as part of its internal expansion program and it expected to open seven additional homes during the remainder of 1989-90. MNR said that the 11% gain in operating earnings for the first quarter was due primarily to the maturing of new facilities. As of the end of fiscal 1988-9, the 28 new nursing homes had a combined overall occupancy rate of 62% and a combined private pay and Medicare census of 91% of occupied beds. Lodging revenues in the first quarter increased 10.8%, aided by expansion in the franchise network.

Next earnings report expected in mid-December.

Business Summary

Manor Care is a holding company whose subsidiaries include Manor Healthcare Corp., one of the nation's largest nursing home operators, and Quality Inns, a major hotel chain. Contributions by business segment in fiscal 1988-9 were as follows:

	Revs.	Profits
Healthcare	82%	76%
Lodging	18%	24%

As of August 31, 1989 Manor Care operated 157 nursing centers with some 21,000 beds in 28 states, providing skilled nursing and convalescent care, principally to residents over age 65. The company also operated one acute care general hospital in Texas. In fiscal 1988-9 healthcare patient days totaled 6,046,000, up from 5,865,000 in the preceding fiscal year. Average nursing center occupancy at the company's mature facilities was 88% in fiscal 1988-9, down from 89% in the prior year. Private pay patients represented about 56% of total nursing home occupancy and 62% of nursing home revenues in fiscal 1988-9; Medicaid patients 32% and 21%, respectively; and Medicare patients 12% and 17%.

As of the end of August, 1989 the company had some 1,029 hotels with a total of about 114,000 rooms in its Quality Inns franchise network. It also owned directly 10 hotels. Facilities are primarily in the U.S. but also located in Canada, Mexico, Europe, India, Australia, and New Zealand.

Summary

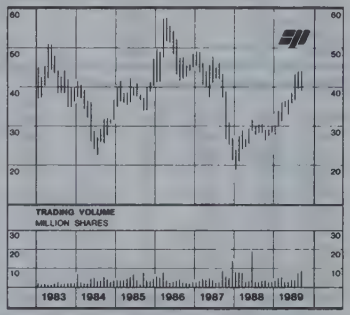
This bank holding company emphasizes both retail banking and lending to corporations, including capital markets activities and other corporate finance services, specialized lending and significant international banking operations. In September, 1989 MHC announced a plan to sell 60% of CIT Group, raise approximately $620 million in equity capital, and increase reserves for loan losses by $950 million. MHC expects to post a $475 million net loss for 1989.

Current Outlook

Earnings for 1990 could reach $6.00 a share, versus the $9.40 a share loss estimated for 1989.

The $0.82 quarterly dividend is expected to be maintained, despite 1988's projected loss.

MHC's aggressive capital rebuilding strengthens earnings potential in 1990 and in future years, but will result in a huge loss in 1989. The $950 million addition to reserves for possible credit losses for LDC debt brings reserves to a healthier 36% (from 22%) of the $6.8 billion in medium and long-term loans outstanding. However, further reserving may be needed in 1990 (a number of MHC's competitors are reserved in excess of 40%). While the sale of 60% of CIT provides capital, removes leverage from the balance sheet, and reduces goodwill charges from the income statement, it could restrain longer-term growth. The planned sale of some $620 million in new equity (an additional 14.6 million shares at the current price) will be dilutive to share earnings.



Review of Operations

Net interest income for the six months ended June 30, 1989 fell 2.4%, year to year, primarily reflecting 1988's sale of a consumer finance unit. The provision for loan losses was 28% lower at $199 million. Including 1988's $329 million gain from the sale of subsidiaries, noninterest income fell 36%. With noninterest expense down 1.5%, pretax earnings fell 47%. After taxes at 38.5%, versus 43.9%, net income was down 42%. Share earnings were $3.70, compared with $6.83, before an extraordinary gain of $3.69 in the 1988 period.

Important Developments

Sep. '89— MHC announced a four-step plan to strengthen its balance sheet and increase its reserve for possible credit losses. The plan includes a $950 million increase to reserves for refinancing countries (to 36% of medium and long-term outstandings); the sale of a 60% interest in CIT Group for $1.28 billion, to Dai-Ichi Kangyo Bank, Ltd (DKB); the sale to DKB of 2.7 million MHC common shares (a 4.9% stake, and includes a standstill agreement for 10 years) for $120 million; and a public offering of up to $500 million in new MHC common stock, which is expected to be completed by year-end. MHC said the reserve additions would result in an expected $775 million net loss in the third quarter, and a $475 million loss for the year. MHC said these initiatives were part of its strategic plan to focus on regional banking in the tri-state area and wholesale banking on a global basis.

Next earnings report expected in mid-October.

Business Summary

Manufacturers Hanover Corp. is the seventh largest banking organization in the U. S. Contributions to net income and assets by sector in 1988:

	Net Inc.	Assets
Wholesale banking	60%	69%
Asset-based finance	1%	20%
Retail banking	39%	11%

The wholesale banking segment provides services to corporations nationwide, and abroad, including credit, corporate finance, transaction processing, trust, trade finance and correspondent banking; investment banking services such as bond and currency trading, risk management products, and limited underwriting through Manufacturers Hanover Securities Corp. as well as venture capital and acquisition finance. The asset-based finance segment provides specialized financing such as equipment leasing and real estate lending to mid-sized corporations, partly through the CIT Group. Retail banking services are provided through 222 branches in New York and include extensive credit card operations (6 million cardholders).

At year-end 1988 nonperforming assets were $3.6 billion (7.2% of loans), including $2.3 billion of LDC loans, against $3.6 billion (6.5%; including $1.7 billion LDC) a year earlier. The reserve for loan losses was 4.78% of loans, against 4.77%. Net chargeoffs during 1988 were 1.49% of average loans, against 1.06% in 1987.

Dividend Data

Dividends have been paid since 1852. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Summary

This company is involved in a broad range of energy-related activities, including refining, gas liquids transmission, coal production, propane distribution, and the operation of retail gasoline outlets in 11 states. Through early November, 1989, MDA repurchased 7,000,000 shares (or 16%) of its common stock under a 12.5 million share buyback program (29%) authorized in April.

Current Outlook

Profits for 1990 are projected at $3.40 a share, versus the $2.95 anticipated for 1989.

Dividends, which were doubled in mid-1989 to $0.25 quarterly, are unlikely to be lifted in 1990.

Refining profits should continue to advance in 1990, reflecting high plant operating rates and an increased proportion of sales to MDA's retail gasoline outlets. Pipeline profits could be flat as slackening gas demand by domestic petrochemical firms outweighs the commencement of shipments through a new line extension in Illinois. The coal segment will benefit from a strong export market, the acquisition of South Atlantic Coal and rising output at MDA's Dotiki mine. Profits for gas products will be flat. While comparisons will benefit from share repurchases, heavier interest expense will be offsetting.

Next earnings report expected in early February.

Important Developments

Nov. '89— MDA acquired South Atlantic Coal Co. from Jno. McCall Coal. Co. for an undisclosed amount. The acquisition of South Atlantic, which produces about 2.2 million tons of coal annually, will lift coal sales by approximately 20%. MDA said that it was also negotiating with McCall Coal for the acquisition of additional coal properties presently producing about 3.6 million tons annually.

Nov. '89— MDA reported that it had repurchased through early November some 7,000,000 shares of its common stock (16%), including 2.5 million for a company ESOP, as part of 12.5 million (adjusted) share (29%) buyback program authorized in April. The buybacks represent part of a multi-point plan designed to enhance shareholders value. Other steps taken included a 2-for-1 stock split and a doubling of cash dividends.

Business Summary

MAPCO is a diversified energy concern. Contributions (in million $) to operating profits:

	1988	1987	1986
Transportation	$87.2	$53.1	$58.9
Petroleum	58.6	18.0	48.2
Coal	51.8	49.7	71.9
Gas Products	27.1	19.9	18.9

MAPCO's Mid-America Pipeline unit transports natural gas liquids through a 6,985-mile system extending from Rocky Mountain area to markets in the Southwest and Midwest. A 1,097-mile line moves anhydrous ammonia from the Southwest to Central U.S. MDA also holds a 45% interest in the 740-mile Seminole Pipeline, which transports gas liquids within Texas. Total throughput in 1988 was 201 million bbls., versus 189 million bbls. in 1987. MDA also has interests in underground facilities capable of storing 13 million bbls. of natural gas liquids and a gas liquids fractionator.

MDA operates a 90,000 bbl.-per-day refinery in Alaska and a 60,000 bbl.-per-day facility in Tennessee. MDA retails gasoline and convenience items through 245 Delta Express outlets in 9 southeastern states and 15 MAPCO Express outlets in Alaska. A 10% interest is held in producing properties in Indonesia.

MDA produced 9.7 million tons of coal in 1988 from six mines in Kentucky, Maryland and Illinois. Coal reserves at 1988 year-end aggregated 414 million tons.

MAPCO Gas Products distributes propane, gas liquids and fertilizers through 129 company-owned Thermogas outlets as well as franchised dealers in 11 states. MDA also processes and sells, and engages in gas liquids trading.

Dividend Data

Dividends have been paid since 1965. A dividend reinvestment plan is available. A "poison pill" stock purchase right, adopted in 1986, was amended in 1989.

Jan. 8'90	1989-90					
33¼	41¼-29¾	18	0.28	0.8%	A+	1.16

Summary

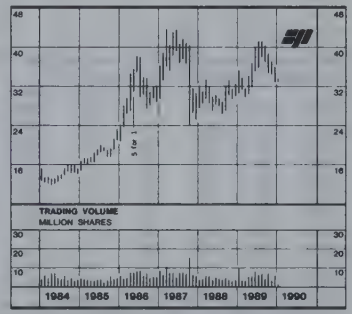
In December, 1989 this hotel and food service company announced that it would be largely disposing of its restaurant operations, which include the Roy Rogers fast-food chain. In addition, the repurchase of 10 million MHS shares was authorized. The sale of restaurant operations will negatively impact near-term earnings from continuing operations, but MHS's restructuring is expected to improve long-term growth prospects.

Current Outlook

Earnings from continuing operations for 1990 are projected at $2.10 a share, up from 1989's estimated $1.60, which includes a number of unusual items.

The dividend was raised 16.7%, to $0.07 quarterly from $0.06, with the January, 1990 payment.

Earnings from continuing operations for 1990 are expected to benefit from higher lodging profits, the absence of restructuring charges, lower net interest expense, and fewer shares outstanding. This is expected to more than offset the absence of MHS's airline catering business, whose sale and operation is expected to contribute roughly $270 million to 1989's pretax profits. MHS's long-term growth may be helped by development of retirement communities and more overseas hotels.



Sales (Million $)

16 Wks. Dec. ...	E0.31	0.56	0.48	0.41
	E1.60	1.95	1.67	1.40

Important Developments

Dec. '89— MHS announced a major restructuring, including plans to dispose of most of its restaurant holdings; the completed sale of its airline catering business; restructuring charges and writeoffs related to continuing operations of $225 million to $250 million; and authorization by directors to repurchase 10 million MHS common shares. Including the catering business, but excluding most of MHS's restaurants, MHS's restated 1988 earnings from continuing operations were $1.59 a share, versus the $1.95 originally reported. In 1989 a gain of more than $200 million from the sale of the catering business was expected to largely offset MHS's unusual charges, enabling earnings from continuing operations to be up slightly. MHS said that it believed the restructuring will help future earnings from continuing operations to grow 15% to 20% a year.

Next earnings report expected in early February.

Business Summary

Marriott Corp. owns, operates and manages hotels, is engaged in a wide range of contract food services, and operates restaurants. In December, 1989 said it planned to dispose of most its restaurant holdings. Approximate contributions by segment to sales and profits in 1988:

	Sales	Profits
Lodging	42%	52%
Contract services	44%	31%
Restaurants	13%	17%

At year-end 1988 MHS's lodging business included 451 hotels with 117,789 rooms. This included 188 traditional full-service Marriott hotels, 4 Marriott Suites properties, 130 Residence Inns, 111 Courtyard hotels, 18 Fairfield Inns.

MHS is also the leading U.S. supplier of contract food services. Food service operations include emmployee cafeterias, hospitals, and schools. In December, 1989 MHS completed the sale of its airline catering tbusiness for more than $500 million.

The restaurants to tbe sold by MHS include the Roy Rogers chain (about 600 units, including 358 company-operated), and 434 family restaurants, which operated under the Bob's Big Boy, Wag's, Howard Johnson's, Allie's, and Bickford's names. The MHS-operated restaurants (excluding Roy Rogers franchises) were expected to have 1989 sales of about $840 million. Restaurant operations to be retained by MHS include airport and travel plaza operations and Hot Shoppes units in the Washington, D.C. area.

Also, MHS has a growing presence in the management and development of retirement communties. As of late 1988 MHS was managing nine such communities.

Dividend Data

Dividends were resumed in 1978. A "poison pill" stock purchase right was adopted in 1989.

Marsh & McLennan

NYSE Symbol MMC Options on Pacific (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 15'89	1989					
84¾	89¾-55⅛	21	2.50	3.0%	A	0.74

Summary

This holding company owns Marsh & McLennan, the world's largest insurance and reinsurance brokerage concern. Other subsidiaries provide employee benefit consulting, investment management, and other services. The continued competitive nature of the insurance marketplace, particularly the commercial property-casualty segment, depressed earnings for the first nine months of 1989.

Business Summary

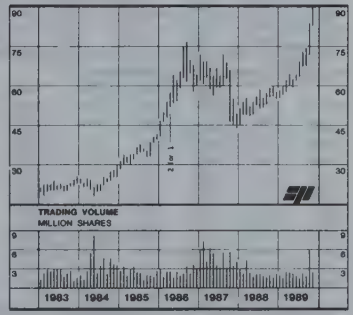
Operating through subsidiaries, Marsh & McLennan Companies provides professional advice and related services in the areas of insurance and reinsurance, consulting, and investment management to clients throughout the world. Contributions by business segment in 1988:

	Revs.	Profits
Insurance services	61%	67%
Consulting	28%	16%
Investment management	11%	17%

In 1988, 29% of revenues and 27% of operating income was derived from foreign operations.

MMC advises clients in risk assessment and represents them in the design and implementation of arrangements that transfer risk to insurance underwriters or through alternative funding methods. Services, provided mostly to corporations, include counseling on risk management problems and administrative services for captive insurance companies. Reinsurance services are provided to insurance underwriters worldwide through Guy Carpenter & Co. and C.T. Bowring Reinsurance Ltd. Marsh & McLennan Group Associates designs, distributes and administers a wide range of insurance and financial services.

William M. Mercer-Meidinger is the world's largest employee benefit consulting firm. National Economic Research Associates provides consulting services on a broad range of microeconomic issues including antitrust and trade regulation for the energy, telecommunications, entertainment and public utility industries. Clayton Environmental Consultants analyzes environmental risks. Lippincott & Margulies provides clients with corporate identity programs and communications strategies. In December, 1987 MMC acquired Temple, Barker & Sloane, Inc. a general management consulting firm.



Investment management activities are concentrated in the Boston-based Putnam organization, with $40.9 billion of assets under management at December 31, 1988.

Important Developments

Oct. '89— MMC signed a definitive agreement to acquire, for an undisclosed amount, a controlling interest in Gradman & Holler, a major West German insurance brokerage firm. MMC, which already owns about 15% of G&H, said the acquisition will enable it to capitalize on business opportunities arising from the unification of the European market. Commenting on third-quarter earnings, management said that increased demand for consulting and investment management services was not enough to offset continued weakness in the insurance market and the effects of a stronger dollar, and profits were lower.

Next earnings report expected in late January.

Martin Marietta

NYSE Symbol ML Options on Phila (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
41	53½-37¾	8	1.35	3.3%	A-	1.20

Summary

Following extensive restructuring in recent years, Martin Marietta now emphasizes its strengths in technological areas such as defense electronics and space. A broad mix of programs in electronics and missiles and growth expected for Titan launch vehicle sales, as well as growth in information systems, should permit continued earnings gains despite the poor outlook for defense spending.

Current Outlook

Earnings for 1990 are projected at $6.50 a share, up from the $5.95 estimated for 1989.

Dividends should continue at least at the current $0.33¾ quarterly rate.

Moderate sales growth appears likely in 1990. Astronautics group sales will benefit from further boosts for space launches and manned space systems with some improvement in margins likely. Slightly higher missiles and electronics revenues are also likely to be accompanied by moderately higher margins for several important programs. A moderate pick-up is possible for information systems following a decline in 1989. Interest expense may be lower, but the tax rate should be higher.

Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,316	1,296	1,139
Jun.	---	1,434	1,442	1,373
Sep.	---	1,423	1,455	1,313
Dec.	---	---	1,535	1,340
	---	---	5,727	5,165

Sales for the first nine months of 1989 declined 0.5%, year to year. Margins widened, but including a gain on sale of an investment of $2.55 a share in the 1988 period, net income was down 21.2%, to $4.41 a share from $5.57.

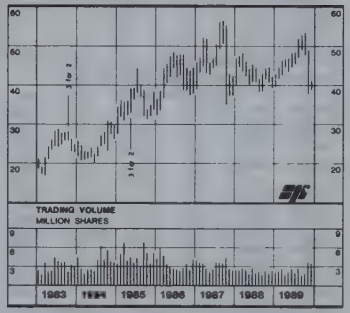
Dec.	E1.80	E1.54	0.45	1.12
	E6.50	E5.95	6.02	4.25



Important Developments

Dec. '89— Directors authorized the repurchase of 3.5 million common shares, including one million from the company's retirement trust.

Nov. '89— Martin Marietta was awarded an Air Force contract valued at $1.6 billion for 18 additional Titan IV launch vehicles, bringing the total to 41, with an option for eight more. The initial launch was on June 14, with launches to continue through 1995.

Oct. '89— The backlog at September 30, 1989 was $11.6 billion, compared with $10.6 billion a year earlier.

Aug. '89— ML reported that it planned to sell the remaining 1,800 acres of property held by a subsidiary in Orlando, Florida.

Next earnings report expected in late January.

Business Summary

Martin Marietta's business segment contributions for 1988 were:

	Sales	Profits
Astronautics	43%	14%
Electronics & Missiles	36%	34%
Information Systems	13%	38%
Materials	7%	12%
Other	1%	2%

Sales to the U.S. Government accounted for 85% of total 1988 sales.

Astronautics activities include production of space launch vehicles (Titan), spacecraft, space- and ground-based strategic systems, Space Shuttle external tanks and electronics and instrumentation. The Electronics and Missiles segment produces missiles and launching systems, electronic systems for guidance and air defense, electro-optical systems for targeting and navigation, undersea systems, ordnance and aircraft components.

The Information Systems segment designs and services information management and engineering systems for command, control and communications; air traffic control; telecommunications; and communications networks.

The Materials segment produces aggregates (crushed stone and gravel) for construction and magnesia refractory materials used in steel, chemical and other industries.

Other activities include management of U.S. Department of Energy uranium facilities.

Dividend Data

Dividends have been paid since 1954. A "poison pill" stock purchase right was adopted in 1986.

Masco Corp.

1429K

NYSE Symbol MAS Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 27'89	1989					
26¼	31⅛-24⅛	13	0.52	2.0%	A	1.33

Summary

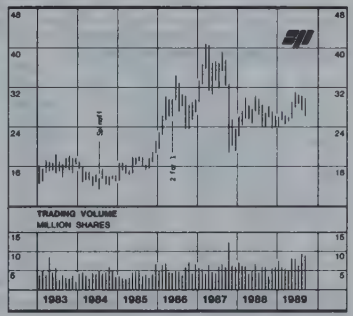
This leading manufacturer of building and home improvement products has expanded into the home furnishings area in recent years with the acquisitions of Henredon Furniture, Drexel Heritage, and Lexington Furniture. In May, 1989 MAS acquired Universal Furniture Ltd. for about 19.1 million common shares. MAS owns 42% of Masco Industries, which it spun off in 1984. Earnings for 1989 should rise only slightly, but there should be substantial earnings improvement in 1990.

Current Outlook

Earnings for 1989 are estimated at $2.05 a share, up from 1988's $2.03 (as restated to reflect the May, 1989 Universal Furniture acquisition). Earnings for 1990 could reach $2.35 a share.

The quarterly dividend was raised 8.3%, to $0.13 from $0.12, with the August, 1989 payment.

Acquisitions, favorable demographics, strength in the home improvement area, and increased market share in the furniture industry should boost revenues for 1989, despite a slowdown in the housing industry. However, margins will narrow on a less profitable and wider product mix, as well as pricing pressures. Interest expense will rise.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	785	599	450	314
Jun.	791	616	489	338
Sep.	---	614	541	379
Dec.	---	610	543	421
	---	2,439	2,023	1,452

Sales for the first half of 1989 rose 9.5%, year to year. Results for both periods were restated to reflect the May 1989 acquisition of Universal Furniture. Margins narrowed and pretax income fell 18%. After taxes at 30.0%, versus 33.1%, net income declined 14.3%, to $0.98 a share from $1.14.

Important Developments

Jul. '89— MAS attributed the sales gain for the second quarter of 1989 to higher sales of kitchen, bathroom, and home furnishings products. However, earnings were hurt by higher interest rates, inflationary pressures and moderated consumer spending, all of which MAS said would continue to hurt margins over the near term. Earnings were also penalized by the absence of net realized marketable securities gains. MAS said that the slowing growth in the economy should result in lower interest rates and favorably affect its markets in 1990. Separately, MAS made two acquisitions during the second quarter of 1989, including Sherle Wagner International, a decorative high-end bathroom products company, and StarMark, Inc. a manufacturer of medium priced kitchen and bathroom cabinetry.

Next earnings report expected in late October.

Business Summary

Masco Corp. manufactures building, home improvement, home furnishings and consumer products. The company was reorganized in 1984, when 50% of the former industrial products segment was spun off to shareholders as Masco Industries, and the company embarked on an active acquisition program in the home furnishings area. Segment contributions in 1988:

	Sales	Profits
Building and home improvement products	64%	69%
Home furnishings and other consumer speciality products	36%	31%

MAS believes it is the largest U.S. manufacturer of faucets, plumbing supplies, kitchen and bathroom cabinets. Faucets are sold under the Delta, Peerless, Epic and Artistic Brass brands. MAS also produces kitchen and bathroom cabinets under the Merillat and Fieldstone names, plumbing products under the Brass-Craft and Plum Shop names, kitchen appliances under the Thermador and Waste King names, bathroom and spa items under the Aqua Glass and Hot Spring Spas trademarks and locks and builder's hardware under the Baldwin and Weiser names.

Through a series of acquisitions, MAS has become a leading domestic manufacturer of furniture and other home furnishings products. MAS produces high-end traditional furniture sold under the Henredon trademark, and medium high-end furniture sold under the Drexel Heritage name. Furniture is also produced through the Lexington Furniture Industries Group, Marge Carson, Inc., and Maitland-Smith, Ltd. MAS also produces upholstery fabrics through Robert Allen Fabrics and Ametex Fabrics. Other products include trailer hitches, stabilizers, steel consoles and workstations, and brass giftware.

Oct. 19'89	1989					
166½	198⅛–158	22	10.735	10.4%	NR	0.43

Summary

Matsushita is Japan's largest producer of consumer electric and electronic products. Worldwide export sales accounted for about 42% of sales in fiscal 1988-9. Earnings have increased in recent years as MC successfully responded to the strength of the yen by increasing production outside Japan, developing new products, and strengthening its cost-competitiveness and marketing power.

Business Summary

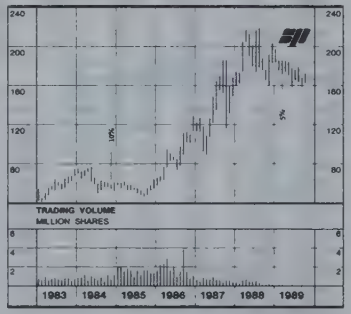
Matsushita Electric Industrial is Japan's largest manufacturer of electric and electronic products for household use. Consolidated net sales were derived as follows in recent fiscal years:

Products	1988-9	1987-8
Video equipment	29%	30%
Audio equipment	9%	8%
Home appliances	14%	15%
Communications & industrial equipment	20%	21%
Energy & kitchen products	5%	5%
Electronic components	13%	12%
Other	10%	9%

Export sales, to more than 130 countries, contributed about 42% of sales in fiscal 1988-9.

Video equipment includes: video tape recorders, color and black-&-white TV sets, video projection systems, and video disc players. Audio: radios, radio/cassette recorders, tape recorders, stereo equipment, compact disc players, and electronic organs. Home appliances: refrigerators, air conditioners, home laundry equipment, vacuum cleaners, microwave ovens, electric fans, and heaters.

Communications/industrial equipment includes: office automation, communications and measuring equipment, electric motors, industrial robots, and welding and air conditioning equipment. Energy and kitchen-related: dry batteries, lead-acid storage batteries, lithium and solar cells, gas appliances, kitchen sinks and cabinets, and solar energy equipment. Electronic components: semiconductors, transistors, diodes, cathode-ray tubes, image pickup tubes, electric lamps, tuners, capacitors, resistors, speakers, photographic equipment and printed circuits.



Products are marketed under various trademarks including Panasonic, Quasar, National and Technics.

Important Developments

Aug.'89— MC said that its fiscal 1989-90 first quarter results were aided by active private capital investment in Japan, but penalized by relatively slow consumer spending. While the international environment remained competitive, results were aided by increased overseas production.

May '89— MC said that it expected sales in fiscal 1989-90 to rise about 5%, to 5.76 trillion yen and consolidated net income to be up about 8%, to 231 billion yen. MC also said that it was planning capital investments of 325.4 billion yen, versus the 229.2 billion yen spent in fiscal 1988-9.

Next earnings report expected in mid-November.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 13'89	1989					
17⅞	20⅞-9⅜	13	None	None	C	1.45

Summary

Mattel is one of the world's largest toy makers. Its products include the long-lived Barbie doll, Hot Wheels, and Disney infant and preschool toys. Following a return to profitability in 1988, earnings are projected to more than double in 1989 due to higher sales of each of the company's major product lines and well controlled costs. Further growth in 1990 will likely be restrained by a projected resurgence of competition and a probable slowing in sales of Nintendo video games that the company distributes in Canada and other countries.

Current Outlook

Earnings in 1990 should approximate $1.60 a share, up from the $1.55 projected for 1989.

Resumption of common dividends, omitted in 1983, is unlikely.

Sales for 1990 are likely to increase moderately, aided by new products. The gain will likely be restrained by pressure on Barbie sales due to increased competition from new dolls and other girls' toys. Following sharply higher sales in the past two years, the gain in the Hot Wheels line should moderate, as should growth of the Disney toys, that have been highly sucessful since being introduced in 1987. However, a significant decline in sales from distributing Nintendo video games is likely as interest in video games begins to wane. Margins are projected to be well maintained as costs to support new product introductions and slowing growth of certain lines are offset by the lower sales from distributing Nintendo video games, which carry lower margins than other products.

Important Developments

Oct. '89— MAT said that retail trade and consumer sales for its products remained very strong and that prospects for the fourth quarter were good. It added that its asset management program had allowed cash net of debt to increase $115 million over the year-earlier level.

Next earnings report expected in mid-February.

Business Summary

Mattel is one of the largest manufacturers and marketers of toys in the world.

The long-lived Barbie fashion doll line is the company's largest product line. Its sales exceeded $450 million worldwide in 1988. Other continuing lines for 1989 are Hot Wheels cars and playsets, pre-school toys utilizing the Disney license, Lil Miss Makeup, Boglins puppets, Lady Lovely Locks and the Heart Family. Important new product introductions are being made in each of these lines for 1988, including a sharp expansion in the number of Disney pre-school toys.

Major new product introductions for 1989 are the Food Fighters action figure line, the Cherry Merry Muffin 6¹/₄" dolls, Baby Turtle Tots stuffed animals, the Baby Rose Tender Love doll, the P. J. Sparkle doll that features twinkling lights, Men of Metal male action figures and badges and the Power Glove, an accessory for the Nintendo video game system that allows the hand to function as a joy stick. In addition, the He Man male action figure line will be reintroduced.

The Nintendo video game system is distributed in Canada, Italy and Australia.

Operations outside North America accounted for 53% of sales and 39% of operating income in 1988.

Dividend Data

Dividends on the common were omitted in late 1983 after having been resumed in 1978. A "poison pill" stock purchase right was adopted in 1986.

Finances

MAT has an agreement a secured credit line of $135 million through March 31, 1991 to finance the short-term working capital needs of its domestic operations. Short-term credit lines for foreign operations total approximately $200 million.

Summary

MXS is an independent crude oil and natural gas producer operating in North American onshore basins, the Gulf of Mexico, Indonesia and other areas. MXS (formerly Diamond Shamrock Corp.) spun off to shareholders in April, 1987 its refining and marketing business as part of a restructuring plan. The company is continuing to divest marginal activities in order to enhance operating margins and to reduce overhead expenses. Potential weakness in near-term energy prices may defer the company's return to profitability beyond 1990. Early restoration of the common dividend is not expected.

Current Outlook

A loss of $0.75 per share is estimated for 1990, excluding a gain on the planned sale of certain Indonesian interests. A share loss of $0.75 is also expected for 1989.

Resumption of common dividends, eliminated after the 1987 spin-off, is unlikely over the near term.

Revenues in 1990 should be about flat as potentially soft crude oil prices offset some volume increases. A weak energy pricing environment is expected to defer earnings beyond 1990.

Sales & Oper. Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	146	163	152	731

Sep.	147	131	169	557
Dec.	---	129	154	590
	---	575	632	2,513

Revenues for the nine months ended September 30, 1989 were off 0.6%, year to year, due to the sale of North American nonstrategic assets. Reflecting a gain on the sale of nonstrategic U. S. properties and improving pricing, pretax income was $1.0 million, against a loss of $43.2 million. After taxes, including increased Indonesian taxes in 1989, the net loss was $27.0 million, versus a loss of $47.0 million. Following preferred dividends, the per-share losses were $0.69, versus $0.92 (restated), which excludes a special charge of $0.78.

Important Developments

Nov. '89— In 1989's third quarter MXS's pretax loss narrowed to $5.5 million, versus $36.3 million in the 1988 period. In 1989's third quarter crude oil prices averaged about $16.92 per barrel, up from $14.34 per barrel in the year-earlier quarter. Natural gas prices were $1.64 per mcf, compared with $1.55 per mcf a year earlier. The company's worldwide crude oil and liquids production amounted to 58,831 barrels per day, up from 53,814 bpd a year ago. The increase included production from fields in Indonesia. U.S. crude oil production was down in 1989's third quarter, due primarily to the sale of North American nonstrategic assets. Worldwide gas production for the third quarter was 258 million cf a day, down from 302 MMcf a day a year earlier, due mostly to North American asset sales.

Next earnings report expected in late January.

Business Summary

Following the April, 1987 spin-off of its refining and marketing operations, MXS is principally an exploration and production company operating primarily in North America and Indonesia, as well as in certain other foreign areas. Through its 82% interest in Diamond Shamrock Offshore Partners (DSP), an oil and gas limited partnership, MXS participates in drilling in the Gulf of Mexico.

In 1988 net production of crude and oil condensate averaged 57,400 barrels a day, natural gas production 311 million cubic feet a day. Net proved reserves at 1988 year-end were 200,400,000 barrels of oil and condensate (16% U.S., 71% Indonesian, 5% Canadian and 8% other foreign), and 790 billion cubic feet of natural gas (87% U.S., 10% Canadian and 3% Indonesian).

In 1988 MXS replaced 255% of its worldwide production with new reserves.

Dividend Data

Common dividends, paid since 1932, were eliminated by Maxus Energy following the April, 1987 spin-off of Diamond Shamrock R&M. The company redeemed its stock purchase rights on September 29, 1988 with a payment of $0.05 per right to holders of record September 12.

Finances

Under a restructuring plan, Diamond Shamrock Corp. (DIA, which is now MXS) holders of record April 30, 1987 received one common share of Diamond Shamrock R&M (refining and marketing) for every four DIA shares held (after DIA tendered for 20,000,000 of its own shares at $17 each).

In the 1987 second quarter MXS took a $380 million write-down of nonoil and gas assets, entailing geothermal operations and Alaskan coal assets. Effective January 1, 1989 MXS sold its Canadian subsidiary for a net gain of $16.6 million. In October, 1989 MXS agreed to sell a 10% interest in a production-sharing contract in Indonesia for $100 million, reducing its interest to 24.27%.

May Department Stores

NYSE Symbol MA Options on CBOE (Mar-Jun-Sep-Dec) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 20'89	1989					
45½	52⅝–34⅝	13	1.42	3.1%	A+	1.41

Summary

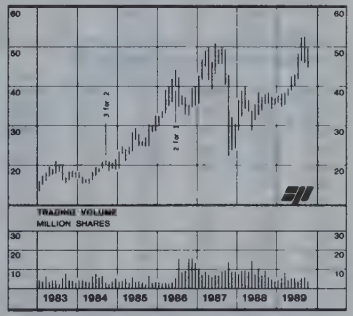
May Department Stores is one of the largest retailing companies in the U.S., operating 14 department store companies, two regional discount chains and a nationwide chain of shoe stores. Earnings growth should continue benefiting from improved apparel sales and the May, 1988 acquisitions of Filene's Department Stores, based in Boston, and Foley's, based in Houston. In October, 1989 MA announced that it has signed an agreement to sell its Caldor discount units for $500 million and plans to spin off to shareholders its Venture discount operations.

Current Outlook

Share earnings for the fiscal year ending January 31, 1990 are projected at $3.80, versus the $3.42 of fiscal 1988-9. Earnings could approximate $4.20 in fiscal 1990-1.

Dividends are expected to continue at $0.35½ quarterly.

Sales in fiscal 1989-90 should reflect acquisitions, May's ongoing expansion program and more acceptable fashion trends. Increased productivity, cuts in overhead and divisional consolidations should lead to better margins. Share earnings will reflect fewer shares outstanding.



Revenues[1] (Billion $)

13 Weeks:	1989-90	1988-9	1987-8	[2]1986-7
Apr.	1.99	2.19	2.34	2.19

Jan.	---	4.05	3.37	3.36
	---	11.74	10.58	10.33

Revenues from continuing operations for the 26 weeks ended July 29, 1989 rose 18%, year to year. Gross margins widened and expense ratios improved. Interest expense rose significantly, and pretax income advanced 17%. After taxes at 35.7%, versus 34.4%, net income rose 14%, to $0.96 a share (on 10% fewer shares) from $0.79. Results exclude income from discontinued operations of $0.05 a share, versus $0.04.

	E3.80	3.42	2.90	2.44

Important Developments

Oct. '89— MA said that it reached an agreement to sell its Caldor discount chain to management for $500 million in cash plus assumption of $52 million in debt and capitalized leases. It will also acquire a 20% equity interest in the new Caldor. MA planned to distribute to shareholders its Venture discount operations in a tax-free spinoff. Earlier, management said that these divestitures would allow MA to focus on its higher return and faster growing department store and specialty shoe store businesses. In fiscal 1988-9 Caldor had sales of $1.6 billion and operating earnings of $50 million; Venture's sales were $1.3 billion with operating earnings of $81 million. Over the next five years MA plans to spend $3.7 billion on expansion, including 68 new department stores and 700 (net) Payless ShoeSource stores.

Next earnings report expected in mid-November.

Business Summary

May Department Stores became one of the nation's largest retailing companies through its 1986 acquisition of Associated Dry Goods. Its three principal segments consist of 14 department store companies, two regional discount store companies (which the company plans to sell), and one national specialty store. Segment contributions in 1988-9:

	Sales	Profits
Department stores	65%	75%
Discount stores	25%	12%
Specialty	10%	13%

Department stores included Lord & Taylor, Foley's, May Co. California, Hecht's, Famous-Barr, Filene's, Kaufmann's, L.S. Ayres, G. Fox, May Company, California, May Company, Ohio, Meier & Frank, Sibley's, May D&F, and Goldwaters. Robinson's of Florida and the Sycamore division were sold in fiscal 1987-8.

Specialty businesses consisted of Volume Shoe, which operates principally under the trade name of Payless ShoeSource with 2,602 outlets at the end of fiscal 1988-9. In June, 1989 MA said that it was exploring the possible sale of its discount operations: the Caldor chain with 119 stores in the Northeast and Venture with 73 outlets in the Midwest. MA sold its Loehmann's division in fiscal 1988-9.

In 1988 the company formed a partnership with Melvin Simon & Associates and The Prudential Life Insurance Co. for the operation of May Centers, Inc., which included the 29 shopping centers it owned or had a partnership interest in.

Nov. 29'89	1989					
20¾	26¾ - 18⅞	16	[1]0.90	[1]4.3%	A	1.14

Summary

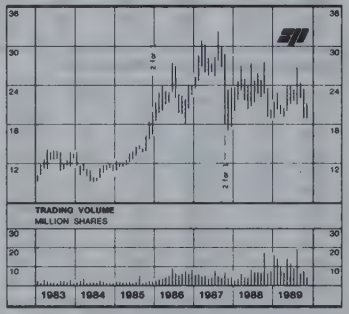
This company is a leading producer of laundry equipment, and also manufactures a broad line of kitchen appliances under the Maytag, Magic Chef, Admiral and Jenn-Air names. In January, 1989 MYG entered the international market by acquiring Chicago Pacific Corp., a manufacturer of furniture and Hoover appliances, for about $940 million. In July, 1989 Chicago Pacific's furniture division was sold for about $213 million. Earnings for 1989 will be restricted mainly by higher interest charges and weak European operations, but profits should rebound somewhat in 1990.

Current Outlook

Earnings for 1990 are projected at $1.35 a share, up from 1989's estimated $1.20.

The quarterly dividend should remain at $0.22½. A $0.05 extra was paid in December, 1989.

Sales for 1990 should rise moderately, mainly reflecting increased volume in North American markets, partly due to successful new product introductions. Foreign sales may be flat. Benefits from higher prices and manufacturing efficiencies from the overall increased volume may be offset by increased competitive pressures. Interest costs should increase somewhat.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	679	437	479	406
Jun.	814	481	489	452
Sep.	796	491	494	452
Dec.	---	477	447	414
	---	1,886	1,910	1,724

Net sales for the first nine months of 1989 rose 63%, year to year, reflecting the Chicago Pacific acquisition, greater unit sales, and higher prices. Following greater selling and marketing expenses, higher interest charges, lower operating profits at the U.K. unit, and a slightly higher tax rate, net income declined 10%, to $0.89 a share (on 35% more shares) from $1.34, which exludes income from discontinued operations of $0.04.

	E1.20	1.77	1.91	1.38

Important Developments

Oct. '89— MYG said that its U.S. appliance sales were strong in the third quarter, but sales in the U.K. continued to be off, causing consolidated earnings for the entire company to be under pressure. The company said that sales of major appliances and floor care products in North America were up on volume increases, partly reflecting new product introductions; but prices increases effected in 1989 were not sufficient to offset higher selling and marketing expenses and new product introduction costs. Meanwhile, U.K. sales of Hoover appliances and floor care products continued to be down, reflecting general economic conditions in that country. MYG said that it was restructuring Hoovers' two major manufacturing operations in the U.K. as a result, and was designing a new, more efficient washing machine line.

Next earnings report expected in early February.

Business Summary

Maytag is engaged in two industry segments — appliances (88% of sales and 77% of operating profits in 1988) and vending equipment (12% and 23%, respectively).

Home appliances include washers and dryers, gas and electric ranges, microwave ovens, refrigerators, freezers, dishwashers, food waste disposals, and dehumidifiers. Important trademarks include Maytag, Magic Chef (acquired May, 1986), Admiral, Jenn-Air, Hardwick and Norge. In January, 1987 the company sold its Toastmaster subsidiary for $52 million, and in December, 1988 sold its Magic Chef Air Conditioning subsidiary for $75.3 million.

Maytag's products are sold to all major market segments including the replacement market, the new home and apartment building market, the manufactured housing (mobile home) market, recreational vehicle market and the private label market. Most products are sold directly to dealers and through independent distributors.

Dixie-Narco produces soft drink vending equipment. Its products are sold to all major bottlers.

In January, 1989 Maytag acquired Chicago Pacific Corp. for about $940 million. Through The Hoover Company, Chicago Pacific is a worldwide manufacturer and marketer of major appliances and floor care products. In July, 1989, MYT sold Chicago Pacific's six furniture companies (Pennsylvania House, Kittinger, McGuire, Brown Jordan, Gunlock, and Charter Group subsidiaries) for $202.5 million cash and $10.9 million in debt.

Dividend Data

Dividends have been paid since 1946. A dividend reinvestment plan is available.A new "poison pill" stock purchase right was adopted in 1988.

McDermott International

NYSE Symbol MDR Options on Phila (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 20'89 21⅛	1989 26¼-14⅝	NM	1.00	4.7%	B-	1.31

Summary

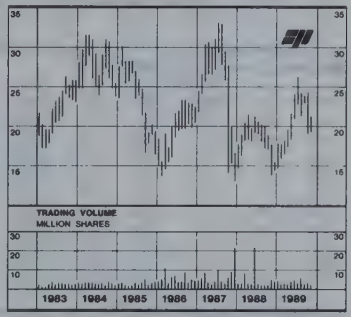
This energy services company builds power generation systems for utilities and offshore structures for the oil industry. MDR's power generation segment has sustained the company in recent years, as the marine construction business has been depressed by lagging demand and overcapacity. Over the longer term an improved outlook for natural gas and greater overseas crude oil production should strengthen offshore drilling fundamentals. Directors cut the dividend 45% in November, 1988; maintenance of the current $0.25 quarterly rate may hinge upon a turnaround in the offshore drilling industry.

Current Outlook

A loss of about $1.80 a share is projected for the fiscal year ending March 31, 1991, down from the loss of $2.20 estimated for fiscal 1989-90, excluding extraordinary income.

The $0.25 quarterly dividend cannot be considered secure.

The smaller loss forecast for fiscal 1990-1 reflects projected stronger margins in the power generation segment and an improved outlook for natural gas drilling and overseas marine services.



Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	651	512	581	757
Sep.	688	546	527	823
Dec.	---	614	608	812
Mar.	---	751	636	898
	---	2,423	2,352	3,289

Revenues for the six months ended September 30, 1989 advanced 42%, year to year (fiscal 1988-9 restated), owing mostly to greater activity in the marine segment. Margins improved, and the net loss narrowed to $46.1 million ($1.23 a share, excluding income from discontinued operations of $0.05) from $62.9 million ($1.70, excluding a $0.69 loss from discontinued operations and a $1.42 gain from an accounting change).

Mar.	Ed0.37	d0.53	d0.66	d1.87
	Ed2.20	d3.09	d6.23	2.36

Important Developments

Sep. '89— MDR formed the B & W Nuclear Service Co., a joint venture with Framatome S.A., which acquired 50% of the new company for about $50 million. In October, MDR closed on the sale of the Bailey Controls operations to Finmeccanica Societa Finanziaria Per Azioni for $295 million. The gain on the sales will be recognized in the December, 1989 quarter. For three months ended September 30, 1989 the power generation segment earned $17.0 million, versus $12.1 million in the year-earlier quarter, owing to gains in the power generation and defense groups. The marine services segment recorded an operating loss of $16.0 million, versus a $14.5 million loss in the year-earlier period, reflecting nonrecurring charges in the current period, compared with nonrecurring income a year earlier.

Next earnings report expected in mid-February.

Business Summary

This energy services company builds structures for the oil and gas industry and power generation systems. Foreign operations accounted for 23% of revenues in fiscal 1988-9 and an operating loss of $24.1 million. Industry segment contributions (profits in million $) in fiscal 1988-9:

	Revs.	Profits
Power generation	76%	$61.6
Marine construction	24%	-60.9

The power generation systems and equipment segment is composed of three groups. The power generation group builds and services power generation and environmental control equipment. The unit also provides research and development for MDR and its customers. The industrial products and services group manufactures control systems, and boiler cleaning and heat exchange equipment. The defense and nuclear power group is a major supplier to the U.S. Naval Reactors Program and to the U.S. Department of Energy.

The marine construction segment manufactures, transports and installs offshore structures and pipelines for the oil and gas industry. The segment also builds and repairs seagoing and inland vessels, and provides energy-related services for onshore and offshore projects.

As a result of the adoption of FAS No. 96, Accounting for Income Taxes, effective April 1, 1988 MDR recorded an extraordinary gain of $52.6 million ($1.42 a share) in fiscal 1988-9.

Dividend Data

Dividends have been paid since 1955. A "poison pill" stock purchase right was adopted in 1986.

30⅛	33-23	16	0.31	1.0%	A+	1.03

Summary

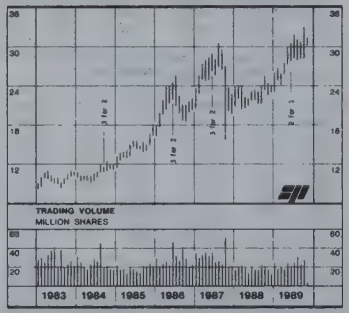
Aggressive expansion and creative merchandising over the years have enabled McDonald's to maintain its position as the dominant force in the fast-food industry. Continuation of these strategies, including an emphasis on international markets, is expected to help future results. The stock was split 2-for-1 in June, 1989.

Current Outlook

Earnings for 1990 are estimated at $2.20 a share, up from the $1.95 expected for 1989.

The dividend is expected to remain at $0.07¾ quarterly.

Revenue growth of about 10% is expected in 1990, largely due to new unit openings and further strength in international results. MCD is expected to maintain its leadership position in the fast-food industry, but there could be some pressure on margins from higher labor costs. Testing of a pizza product could lead to a broad introduction in the future, but a national debut is not expected in 1990. MCD's sizable revenue stream from franchises and large real estate holdings give it a hedge against future inflation.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,382	1,228	1,068	941
Jun.	1,548	1,426	1,246	1,077

Dec.	E0.45	0.41	0.34	0.30
	E1.95	1.72	1.45	1.24

Important Developments

Oct. '89— MCD was testing a pizza product, which could lead to a major menu addition in the future. In May, 1989 MCD nationally introduced a new chicken sandwich. Meanwhile, in 1989's third quarter systemwide sales were up 9.3%, year to year. International sales rose 17%, while U.S. sales increased 5.9%. In the third quarter, profitability at company-operated restaurants benefited from lower relative food costs, partially offset by higher occupancy costs. At September 30, 1989 MCD had 10,873 restaurants, up from 10,190 a year earlier. Of the total, 8,100 were in the U.S. and 2,763 were located in other areas. MCD operated 2,640 of the restaurants, while franchisees and affiliates operated 7,385 and 848, respectively.

Next earnings report expected late January.

Data as orig reptd. 1. Bef. spec. item(s) in 1987

Business Summary

McDonald's Corp. operates, licenses and services the world's largest chain of fast-food restaurants. At December 31, 1988 there were 7,907 units in the U.S. and 2,606 units in foreign countries, mostly Japan, Canada, West Germany, the United Kingdom and Australia. Contributions by geographic area in 1988:

	Revs.	Profits
United States	67%	71%
Europe	18%	13%
Canada	10%	9%
Other	5%	8%

Units in operation at year-end:

Operated by:	1988	1987	1986	1985
Company	2,600	2,399	2,301	2,165
Franchisees	7,110	6,760	6,406	6,150
Affiliates	803	752	703	586
Total	10,513	9,911	9,410	8,901

The restaurants offer a substantially uniform menu including hamburgers, fries, chicken, fish, specialty sandwiches, beverages and desserts; most units also serve breakfast.

Franchise fees under domestic arrangements executed between 1970 and 1986 are generally 11.5% of sales, including 8.5% for rent and a 3.0% service fee. Licensees also make sizable investments in start-up costs.

Dividend Data

Dividends were initiated in 1976. A dividend reinvestment plan is available. A new "poison pill" preferred stock purchase right was adopted in 1988.

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 26'89	1989					
61	94½-61¼	19	2.82	4.6%	A	0.78

Summary

The company is the leading factor in fighter aircraft for the U.S. military. It also produces commercial jetliners, missiles and space systems, and provides data processing services. Combat aircraft and missile sales should remain at relatively high levels in the near future, but longer term, some programs will be affected by Federal budget cuts. Transport aircraft sales are benefiting from demand for the MD-80 and the MD-11. Earnings during 1989 were down sharply, reflecting aircraft production problems, interest expense and costs of new aircraft programs, but an earnings recovery is likely in 1990.

Current Outlook

Earnings for 1990 are projected at $7.00 a share, versus the $1.35 estimated for 1989.

Dividends should continue at least at $0.70½ quarterly.

Sales for 1990 could rise 10%-12%. Transport aircraft revenues should provide most of the gain, reflecting an expected pickup in MD-80 deliveries and initial deliveries of the MD-11. Margins should recover as the serious production problems of 1989 are overcome. Combat aircraft revenues should be down, reflecting lower deliveries of some models, but margins should improve. Some gains are also likely for space systems and missiles. Remaining portions of information systems could be up moderately.

¹Revenues (Billion $)

Quarter:	1990	1989	1988	1987
Mar.	---	---	3.31	2.99
Jun.	---	⁴6.61	3.61	3.49
Sep.	---	3.72	3.81	3.16
Dec.	---	---	4.34	3.50
	---	---	15.07	13.15

Revenues from continuing operations for the first nine months of 1989 were about unchanged, year to year. Primarily reflecting losses on transport aircraft and higher interest expense, there was a loss from continuing operations of $26 million ($0.68 a share), against net income of $220 million ($5.73 a share).

Important Developments

Dec. '89— South Korea announced that it would procure 120 F/A-18s, 72 of which are to be co-produced in South Korea, subject to U.S. approval.

Nov. '89— MD announced a new transport, the MD-90, partially based on the MD-80. It will be available in three sizes of 114, 150 and 180 seats. Delta Air Lines ordered 50 and took options on 110 for delivery beginning in 1994.

Nov. '89— MD sold its Tymnet data communications network to British Telecommunications for $355 million. It also plans to sell the North American field service business and will convert the Information Systems International unit into a public company.

Next earnings report expected in late January.

Business Summary

McDonnell Douglas is a leading producer of military and commercial aircraft. Sales and operating earnings (million $) for 1988:

	Sales	Profits
Combat aircraft	40%	$403
Transport aircraft	32%	127
Space systems and missiles	16%	177
Financial services	3%	64
Information systems	9%	-76

Sales to the U.S. Government, including foreign military sales, accounted for 65% of 1988 sales.

Combat aircraft include the F/A-18 multi-role aircraft for the U.S. Navy and Marines, and for Canada, Australia and Spain; the F-15 fighter for the USAF and several foreign nations; and the AV-8B Harrier II VSTOL plane for the U.S. Marine Corps and the Royal Air Force in a 60-40 partnership with British Aerospace. MD also makes the AH-64 helicopter for the U.S. Army.

Transport aircraft include several models of the MD-80, and under development, the three-engined MD-11 long-range derivative of the DC-10. In 1988 the DC-10/KC-10 program ended and production of the C-17 Air Force transport began.

Missiles and space programs include the U.S. Navy's Harpoon antiship missile, the Tomahawk cruise missile, the Delta launch vehicle and the Payload Assist Module.

Information systems include computer processing, software and turnkey systems.

Summary

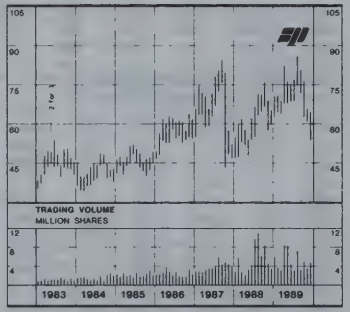
McGraw-Hill is a major supplier of informational products and services for businesses, education and industry through a broad range of media. It also operates four TV stations. In December, 1989 the company announced a reorganization of its operating structure involving costs and charges of about $152 million (net) or about $3.12 a share. MHP is the parent company of Standard & Poor's.

Current Outlook

Earnings for 1990 should advance from the depressed earnings expected for 1989.

The $0.50 quarterly dividend is expected to be raised in 1990.

Revenues for 1990 should be aided by acquisitions, new products and services, and improving conditions in several areas, including magazine advertising. Gains should be posted despite several weak areas, including construction. A substantial improvement in operating income should reflect revenue growth, effective cost controls, and a more profitable business mix. A recently-formed educational publishing joint venture and a revolutionary new textbook customizing system augur well for longer-term market share and profits.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	---	396	372	333
Jun.	[1]819	444	426	378
Sep.	452	471	455	419
Dec.		507	499	447
		1,818	1,751	1,577

Revenues for the nine months ended September 30, 1989 rose 6.4% from the year-earlier level, as restated to reflect formation of the joint venture school publishing firm. In the absence of a profit on the sale of Nikkei/McGraw Hill, pretax earnings fell 27%. After taxes at 35.3%, versus 55.4%, net income advanced 5.8%, to $2.83 a share (before a $0.16 special credit) from $2.69.

		3.83	3.27	3.04

Important Developments

Dec. '89— MHP announced a realignment of its operating units, the elimination of more than 1,000 full-time positions, the shutdown of general book operations, and certain write-downs and unusual charges associated with Data Resources and other units, to reduce costs and improve future performance. The actions will result in a charge to fourth-quarter earnings of about $152 million, or $3.12 a share, after taxes. MHP said earnings for 1990 should range between $3.50-$4.00 a share, excluding any nonrecurring gains.

Oct. '89— MHP introduced a textbook customizing system that provides the purchaser complete flexibility in selecting and formatting contents of books and materials. MHP expects the new system to enhance its market share over time.

Jun. '89— MHP and Macmillan, Inc. (MLL), an indirect subsidiary of Maxwell Communication Corp., combined their grade school and vocational educational publishing businesses in a 50/50 joint venture firm named Macmillan/McGraw-Hill School Publishing Co., headquartered in Chicago.

Next earnings report expected in late January.

Business Summary

McGraw-Hill is a major provider of informational products and services through publications, information services and financial services. Segment contributions in 1988 (prior to the late 1989 realignment of operations):

	Revs.	Profits
Publishing	40%	28%
Information services	37%	60%
Financial services	23%	12%

In December, 1989 MHP announced several moves to reduce costs and improve future performance. The actions included a realignment of operating units so as to replace the internal structure of three operating companies with two groups; the elimination of over 1,000 full-time positions; the shut down of general book operations; and certain other writeoffs. The costs associated with these actions amounted to $152 million after taxes, or $3.12 a share.

One of the two new groups consists of financial services, including Standard & Poor's Corp., Data Resources, commodity services, and international trade and logistics management services; Business Week magazine; aerospace and defense information services; and four television stations in Denver, San Diego, Indianapolis and Bakersfield (California).

The second group includes construction information services; computers and communications information services; professional publishing; legal information services; and educational publishing. Grade school and vocational publishing is conducted through a 50/50 joint venture, Macmillan/McGraw-Hill School Publishing Co.

McKesson Corp.

NYSE Symbol MCK Options on Pacific (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 4'90	1989-90					
36⅝	39¾-29⅝	16	1.44	3.9%	A	0.92

Summary

This company is a leading distributor of drugs, health and beauty aids, and general merchandise. MCK also owns 83% of Armor All Products Corp., a producer of car care products. In December, 1989 the company made a proposal to acquire the remaining interest in its 86%-owned PCS, Inc. subsidiary for $15 a share. PCS provides prescription drug claims processing services.

Current Outlook

Share earnings for the fiscal year ending March 31, 1991 should rise to $2.85 from the estimated $2.50 of 1989-90.

The $0.36 quarterly dividend is the minimum expected.

Revenues for fiscal 1990-91 should increase about 10%, mainly due to a strong drug distribution business. Margins should widen modestly in the drug distribution business, reflecting tight cost controls and efficiencies from computerization. Increased productivity in the service merchandising segment will be offset by expenditures in the other businesses.

Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jun.	1,818	1,650	1,712	1,556
Sep.	1,859	1,721	1,757	1,637

Mar.	---	1,877	1,883	1,712
	---	7,046	7,283	6,672

Revenues for the six months ended September 30, 1989 rose 9%, year to year. Gross margins narrowed and selling, distribution and administrative expenses decreased as a percentage of sales. Pretax income increased 7%. After taxes at 38.0%, versus 40.0%, and minority interest, net income rose 17%. Share earnings were $1.16 (on 4.2% fewer shares), versus $1.05, which excludes a loss from discontinued operations of $0.01.

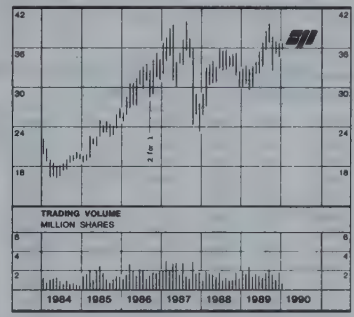
Mar.	E0.70	0.61	0.53	0.37
	E2.50	2.22	2.23	2.17



Important Developments

Dec. '89— MCK said that it made a proposal to the board of directors of PCS, Inc. to acquire all the shares of PCS not owned by McKesson for $15 a share. The offer is subject to the approval of PCS directors and a special committee of directors formed to consider McKesson's proposal. Management said that the proposed acquisition was intended to provide PCS with the flexibility to operate its business in a manner that would provide effective cost containment services for health plan sponsors, while minimizing the potential conflicts with the customers of McKesson's drug distribution business. The company said that the outlook for the second half of fiscal 1989-90 was good and it was on target with its stated objective of increasing share earnings by 10%-12% annually.

Next earnings report expected in late January.

Business Summary

McKesson Corp. (formerly Foremost-McKesson) is a leading distributor of drugs and toiletry products, bottled water, health and beauty aids, and household goods. Contributions to business segments in fiscal 1988-9:

	Revs.	Profits
Drug & health care	83%	63%
General merchandise	14%	16%
Beverage	3%	21%

The drug and health care group is the nation's largest distributor of ethical and proprietary drugs, toiletries, fragrances and sundries. MCK has emphasized electronic order entry systems and a wide range of computerized merchandising and assets management services for drug retailers and hospitals. PCS, Inc. (86% owned) provides prescription drug claims processing and consulting services.

The general merchandise segment distributes health and beauty aids, housewares, hardware and other general merchandise to supermarkets and drug and convenience stores. Armor All Products Corp. (83% owned) markets products used in the automobile aftermarket. In 1988, MCK combined its office products business with Stationers Distributing Co., retaining a 20% equity interest in the new company.

MCK processes and sells bottled water and sells and leases water dispensers and coolers. In 1988 MCK sold its wine and spirits operations.

Dividend Data

Dividends have been paid since 1962. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Mead Corp.

NYSE Symbol MEA Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 24'89	1989					
36⅞	46⅝-35⅝	10	0.88	2.4%	B	1.36

Summary

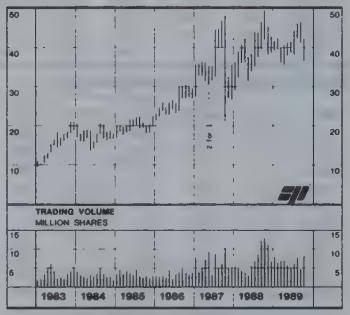
Mead is a major integrated producer of white papers, paperboard and converted products, and also makes construction materials and operates a large paper distribution business. While earnings will continue to be cyclically influenced by changes in general economic activity, recently completed capacity additions and cost-cutting measures enhance long-term prospects.

Current Outlook

Earnings for 1990 are projected at $3.25 a share, compared with 1989's estimated $3.45, which includes a nonrecurring gain of $0.23.

Dividends are expected to continue at $0.22 quarterly.

Sales for 1990 should show some modest gains on volume increases, assuming continued stability in the general economy. Prices for most paper and packaging products should remain firm, but meaningful price increases are unlikely. Little change in margins and profits is expected.



Net Sales (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	1,129	1,085	957
Jun.	---	1,207	1,160	1,078
Sep.	---	1,198	1,174	1,111
Dec.	---	---	1,045	1,063
	---	---	4,464	4,209

Sales for the nine months ended October 1, 1989 increased 3.3%, year to year. Primarily in the absence of a large gain (equal to $1.50 a share) on the 1988 sale of 50% share of Brunswick Pulp and Paper Co., pretax earnings fell 50%. After taxes at 38.4%, versus 40.0%, and higher equity in net earnings of jointly-owned companies, net income was down 40%. Earnings per share were $2.83, compared with $4.69.

Common Share Earnings ($)

Dec.	E0.70	E0.62	0.85	0.55
	E3.25	E3.45	5.54	3.47

Important Developments

Oct. '89— Third quarter 1989 earnings included a gain of $0.23 a share from the sale of Mead Release Products. Earnings for the quarter were diluted by $0.04 a share from the acquisition of Michie Co. Earnings in the third quarter of 1988 included a gain of $1.50 a share from the sale of Brunswick Pulp and Paper and $0.13 in earnings from Brunswick operations.

Aug. '88— Mead sold its Mead Release Products subsidiary to Rexham Industries for $38 million cash. Sales of the subsidiary were $29 million in 1988.

Dec. '88— Mead acquired Michie Co., a legal publishing firm with 1988 sales of $34 million. The acquisition, which greatly expands Mead Data Central's services to legal markets, will dilute 1989 earnings by about $0.25 a share.

Next earnings report expected in mid-January.

Business Summary

Mead is a major integrated producer of white papers, coated paperboard, packaging systems and school and office supplies, and operates large paper distribution and electronic publishing businesses. Industry segment contributions (profits in million $) in 1988 were:

	Sales	Profits
Paper	26%	$211
Packaging & paperboard	20%	160
Distribution & other	46%	60
Pulp	1%	37
Electronic publishing	7%	34

The company makes white papers, including bond and writing papers, technical papers, and grades used in the printing and publishing fields. A wide range of specialty and industrial paperboard items, packaging systems, corrugated containers and school supplies are also produced. Mead also operates electronic publishing services.

MEA affiliates make pulp, lumber, and other building materials. The acquisition of Crown Zellerbach's distribution group in September, 1986 greatly expanded Mead's distribution business.

At December 31, 1988 some 1,366,000 acres of timberland in the U.S. were owned or controlled and affiliates held cutting rights on additional acreage in Canada.

Dividend Data

Dividends have been paid since 1940. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

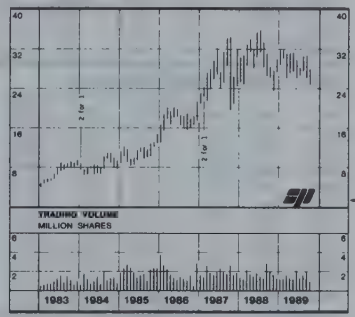
This company manufactures and services computer integrated manufacturing systems that control continuous batch manufacturing processes serving such industries as paper, plastics, and metals. Share earnings are expected to continue to advance through fiscal 1990, reflecting higher sales and a stock repurchase program.

Current Outlook

Earnings for the fiscal year ending November 30, 1990 are projected at $2.40 a share, up from the $2.20 estimated for fiscal 1989.

Dividends should remain at $0.10 quarterly.

Modest revenue growth is expected to continue through fiscal 1990, aided by the cost-effective and productivity-enhancing nature of the company's products. While margins may continue to be restrained by higher R&D expenses, profits should be aided by volume efficiencies and increased other income. Share earnings are expected to be bolstered by a stock repurchase program.



Operating Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Feb.	68.5	62.0	51.1	44.7
May	72.0	65.8	57.6	47.4
Aug.	72.0	68.3	57.7	49.8
Nov.	---	69.1	60.9	50.9
	---	265.2	229.4	192.7

Revenues for the nine months ended September 3, 1989 rose 8.3%, year to year. Margins narrowed on higher product development and sales and marketing expenses, but with higher other income, pretax income advanced 8.1%. After taxes at 20.2%, versus 26.4%, net income increased 14%, to $1.59 a share from $1.38.

Important Developments

Sep. '89— MX reported that system backlog at September 3 totaled $110 million, up 11% from $99 million the year earlier.

Sep. '89— MX announced new system orders for the third quarter of fiscal 1989 totaled some $40 million, unchanged with orders in the year-earlier interim. New system orders for the first nine months of fiscal 1989 totaled $139 million, up 4.5% from $133 million in the year-earlier period.

Jul. '89— The company announced that in the first half of fiscal 1989 it had repurchased about 405,600 Measurex common shares, raising to about 1,225,100 the number of shares bought back under authorizations to repurchase 2 million shares.

Next earnings report expected mid-January.

Business Summary

Measurex makes and services computer integrated manufacturing (CIM) systems. These sensor-based computerized systems, which control continuous, batch and discrete manufacturing processes and provide plantwide and millwide information, are designed to increase productivity, reduce raw material usage and energy consumption, and improve product quality and uniformity. Principal industries served are pulp and paper, plastics, metals, rubber, chemicals, glass, pharmaceuticals, and food processing.

Revenue contributions by industry in recent years:

	1988	1987	1986	1985
Pulp and paper	78%	77%	78%	80%
Other	22%	23%	22%	20%

Foreign operations accounted for 63% of sales in fiscal 1988.

A leader in sensor technology for the process industries, MX offers over 70 sensors that monitor various physical properties of products including weight, moisture, gloss, opacity and spacing.

Sensors are integrated into the company's computer-based process control and CIM systems.

Products and systems include the VISION 2002 ET, VISION 2002 Network, SuperVISION 2002 UT, Measurex 2002 ET, Measurex 4000M, and Profile (Cross-Direction) Control.

The Automation Systems subsidiary is involved in programs to develop CIM systems for discrete manufacturing industries such as automotive, aerospace, and electronic production.

Dividend Data

Dividends were initiated in 1977, omitted in late 1982, and resumed in late 1983. A "poison pill" stock purchase right was adopted in 1988.

59½	70-38½	16	0.70	1.2%	A	1.00

Summary

Medtronic is the world's leading producer of implantable cardiac pacemakers. It also makes nonimplantable pacemakers, related support systems, artificial heart valves, and neurological devices. Longer-range prospects are enhanced by a strong list of superior cardiac products, marketed by one of the largest medical device sales forces in the world. The shares were split 2-for-1 in August, 1989.

Current Outlook

Earnings for the fiscal year ending April 30, 1990 could reach $4.00 a share, up from fiscal 1988-9's $3.65, which includes a $0.15 net nonrecurring gain. All per-share data adjusted for the August, 1989 2-for-1 split.

Dividends on the split shares should continue at $0.17½quarterly.

Bolstered by higher sales of pacemakers and other established cardiac and neurological products and contributions from new products, sales and profits for fiscal 1989-90 should post further advances. Ambitious R&D efforts coupled with superior marketing should lead to continued above-average earnings growth in the years ahead.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Jul.	191.9	175.8	144.6	116.2
Oct.	---	181.2	152.2	120.1
Jan.	---	186.8	167.3	121.8
Apr.	---	197.9	189.2	143.9
	---	741.7	653.3	502.0

Sales for the three months ended July 31, 1989 increased 9.1%, year to year. Profit comparisons, however, were hurt by restructuring costs and the absence of a nonrecurring gain of $0.15 a share included in the 1988-9 period. Net income fell 3.8%. Share earnings were $0.91, versus $0.95, as adjusted.

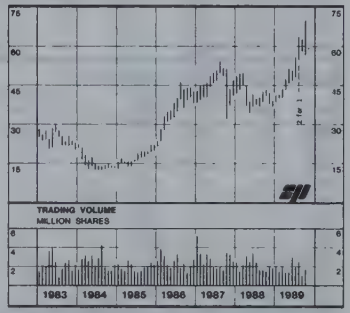
Next earnings report expected in late November.



Important Developments

Oct. '89— The U.S. Supreme Court said that it will review the key issue in patent litigation between Medtronic and Eli Lilly & Co. involving MDT's PCD device for the treatment of tachyarrhythmia (too-rapid heartbeat). In March, 1989 an appellate court reversed a lower court's decision which had ruled that testing of MDT's PCD device was an infringement of Eli Lilly & Co. patents.

Aug. '89— The FDA approved MDT's Synergyst II dual chamber pacer with automatic rate responsive capability. In July MDT received FDA clearance to sell its Legend third generation, single chamber, rate responsive pacemaker. MDT is presently conducting studies overseas on pacers with oxygen and pressure sensing capabilities, looking toward development of a multiple sensor pacer.

Business Summary

Medtronic is the world's leading producer of implantable cardiac pacemakers. Several other cardiovascular and neurological proucts are also sold. Sales by business segment in fiscal 1988-9:

	Sales
Pacemakers and related products and services	71.5%
Nonpacing cardio- vascular products	15.1%
Other products	13.4%

Foreign operations accounted for about 42% of sales and 43% of profits in 1988-9.

Cardiac pacemakers consist of implantable pulse generators (IPGs) that generate electrical impulses and leads which conduct these impulses to the heart. The pulse generator is implanted under the skin in the chest or abdomen and is connected to the heart by a lead. MDT's product line includes pacemakers that can be noninvasively programmed by a physician to adjust sensing, electrical pulse intensity, duration, rate and other factors, as well as pacers that can sense in both the upper and lower chambers of the heart and produce impulses appropriate to heart activity. Important products include Minix, one of the world's smallest pacers; the Synergyst line of dual-chamber, rate responsive pacers; and Legend, a third-generation rate responsive pacer.

Nonpacing cardiovascular products consist of prosthetic heart valves, membrane oxygenators, therapeutic catheters such as angioplasty catheters, vascular grafts and related items. Other products include transcutaneous electrical nerve stimulation (TENS) devices, implantable electrodes and other neurological products to relieve pain and stimulate muscles. An implantable drug delivery system is also sold.

Dividend Data

Dividends were initiated in 1977.

Summary

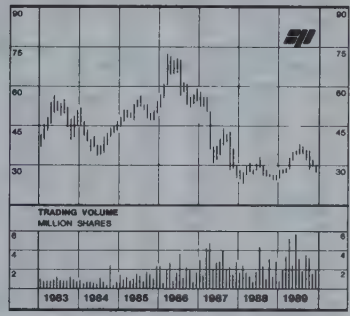
This Pittsburgh-based bank holding company is the 16th largest in the nation. In view of a serious deterioration in loan quality, new management restructured the corporation in 1988, spinning off $1 billion of problem loans to shareholders and recapitalizing the bank with $525 million of new equity. Relief from the burden of problem loans, cost-cutting efforts, and tax credits should boost earnings in 1989 and beyond. In December, 1989 MEL agreed to acquire 54 Philadelphia area branches from Meritor Savings Bank for approximately $335 million.

Current Outlook

Earnings for 1990 could approximate $5.00 a share, up from the $4.65 projected for 1989.

Dividends should continue at $0.35 quarterly.

Excluding the proposed PSFS acquisition, asset growth should be minimal in 1990, reflecting modest increases in loans. Most revenue growth will depend on MEL's success at developing its strengths in providing electronics-based services, such as trust and cash management. Problem real estate loans are on the rise accounting for about 1.4% of loans at September 30, versus 0.95% at year-end 1988. Long-term LDC loans are adequately (46%) reserved for. Cost-cutting efforts should benefit profits. The Philadelphia bank, should be aided longer-term by efficiencies gained through the melding of 54 PSFS branches. Deposit market share in Philadelphia will grow from 5% to 14%. MEL has $305 million in tax benefits to offset future taxes.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 7.5%, year to year, as loan quality improved. The provision for loan losses was 44% lower, at $150 million. With noninterest income marginally lower and noninterest expense down 14%, reflecting lower expenses on foreclosed properties, pretax earnings were $194 million, against a loss of $93 million. After taxes at 9.8%, versus taxes of $20 million, net income was $175 million ($3.47 a share, $3.41 fully diluted), versus a net loss of $113 million ($4.87, no dilution).

	E4.65	d3.65	d31.19	6.20

Important Developments

Dec. '89— MEL's Philadelpia bank subsidiary, Mellon Bank (East), signed a definitive agreement with Meritor Savings Bank to purchase 54 area branches of PSFS, the nation's oldest savings bank. MEL is expected to assume deposits of $5.2 billion and acquire assets of almost $4.9 billion. The purchase price, subject to certain adjustments, is expected to be approximately $335 million, but no less than $309 million. MEL expects to finance the purchase by issuing a combination of common stock, preferred stock and debt. MEL said that it expected to receive regulatory approval in the first part of 1990. Separately, in October MEL authorized a 250,000 common share repurchase program.

Next earnings report expected in mid-January.

Business Summary

Mellon Bank Corp. is the parent of Mellon Bank, Pennsylvania's largest bank and the 16th largest in the nation. It also owns four other Pennsylvania banks, and one each in Maryland and Delaware. Retail offices total 347. Trust operations are important ($88 billion of assets under management), as are data processing services. The Mellon Financial Services unit is engaged in commercial and consumer finance, mortgage banking and leasing (147 offices in 19 states). International operations account for 18% of assets.

At year-end 1988, earning assets of $27.9 billion were divided: loans 68%, investment securities 11%, money market investments 21%. Average sources of funds were noninterest-bearing deposits 13%, other domestic deposits 45%, foreign deposits 10%, short-term borrowings 18%, long-term debt 6%, equity 4%, and other 4%.

At year-end 1988 nonperforming assets were $964 million (5.0% of related assets), including $452 million of LDC loans, down from $1,665 million (8.1% of related assets) a year earlier. The reserve for loan losses was 4.79% of loans, down from 5.59%. Net chargeoffs during 1988 were 2.79% of average loans (reflecting the restructuring), against 1.96% in 1987.

Dividend Data

Cash has been paid each year since 1895. A "poison pill" stock purchase right was adopted in 1989.

NYSE Symbol MES Options on Pacific (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 20'89	1989					
42½	53⅝-36⅞	13	1.30	3.1%	A+	1.35

Summary

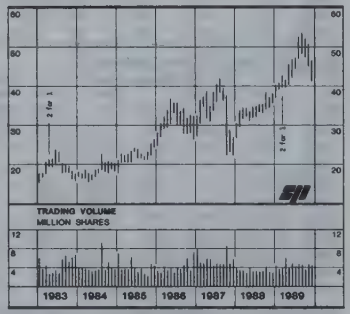
This company is one of the largest diversified specialty retailers, selling footwear, apparel, health and beauty aids, toys and games, and household items. MES has phased out most of its footwear manufacturing operations. A strong record of long-term earnings growth has been established, and further progress is expected in coming years, aided by increasing contributions from newly acquired, higher margin, specialty businesses.

Current Outlook

Share earnings for 1990 are projected to rise to about $4.00 from 1989's estimated $3.50.

The $0.32½ quarterly dividend is the minimum expected.

Sales growth in 1990 should reflect store expansion and modest same store increases. Margins stand to benefit from new, higher margin businesses and cost controls, offset somewhat by highly competitive pricing. Longer term, increasing contributions from new, higher margin businesses should contribute to earnings growth. Further acquisitions are possible.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,529	1,394	1,074	1,028
Jun.	1,675	1,470	1,449	1,245
Sep.	1,831	1,625	1,393	1,260
Dec.	---	2,291	2,014	1,730
	---	6,780	5,930	5,626

Sales for the nine months ended September 30, 1989 rose 12%, year to year. Gross margins narrowed slightly, and SG&A expenses were about the same percentage of sales. Following higher interest and other expenses, pretax income was up only 4.2%. After taxes at 31% in each period, and minority interest, net income rose 7.2%, to $1.40 a share from $1.37.

Dec.	E2.10	1.89	1.49	1.24
	E3.50	3.26	2.63	2.20

Important Developments

Oct. '89— Management said that operating results for the third quarter of 1989 were aided by the apparel sector; sales and earnings of the toy business continue to be sluggish after strong performances over the past three years. The nine months operating results reflected additional interest and goodwill amortization costs associated with the Bermans Specialty Stores acquisition last year. In June MES adopted an Employee Stock Ownership Plan, funded through an ESOP Trust which used the proceeds of a $357.5 million loan (guaranteed by MES) to purchase about 6.7 million shares of a new class of convertible preference stock. The proceeds from the issuance of stock were earmarked to repurchase shares. As of September 30, 1989, 4.4 million common shares were repurchased.

Next earnings report expected in late January.

Business Summary

Melville is one of the country's largest, diversified specialty retailers, operating 13 separate retail divisions at 1988 year-end with a total of 6,540 stores. Contributions by product line in 1988:

	Sales	Profits
Apparel	33%	36%
Footwear	24%	23%
Drug, health, & beauty aids	27%	21%
Toys & household items	16%	20%

Apparel is sold through the company's Chess King (clothing for young men), Marshalls (brand name apparel for men, women and children at reduced prices), Wilsons Suede & Leather (for men and women) chains, and Accessory Lady.

Footwear is sold through Thom McAn, Fan Club/Open Country, and Pimento stores, and Meldisco (leased departments in K Mart stores).

Drug, health and beauty aids are sold by CVS (Consumer Value Stores) and Freddy's deep discount drug stores (acquired 1984). Toys, games and hobby products are sold through Kay-Bee Toy & Hobby outlets. The household furnishings division includes Linens 'n Things (brand name linens, towels and bath items at reduced prices), and two recent acquisitions: This End Up Furniture, a manufacturer and marketer of moderately priced furniture, and Prints Plus, a California-based chain selling posters and prints.

Mercantile Stores

NYSE Symbol MST In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 19'89	1989					
44⅝	50½-42	12	0.92	2.1%	A+	1.18

Summary

This department store company operates some 80 outlets in 42 predominantly Southern and Midwestern markets under locally prominent names. MST's strategy of strengthening its position through internal consolidation, store renovation, and paring operating costs to sharpen its competitive edge should enhance the earnings potential of its existing store base. Modest expansion into adjacent markets, coupled with continued investment in existing stores, should generate moderate earnings growth over the next few years.

Current Outlook

Earnings for the fiscal year ending January 31, 1990 should rise to $4.05 a share from the $3.92 of 1988-9. Share earnings could approximate $4.45 in fiscal 1990-91.

The $0.23 quarterly dividend is the minimum expected.

Store expansion in fiscal 1989-90 within existing and adjacent markets and remodelings should boost sales modestly; the gain, however, could be offset by the discontinuance of furniture and carpet departments. Gross margins may narrow slightly, reflecting increased occupancy costs and competitive pricing. Interest expense should decline slightly. Investment in computer technology should benefit margins over time.

Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Apr.	479	465	445	416

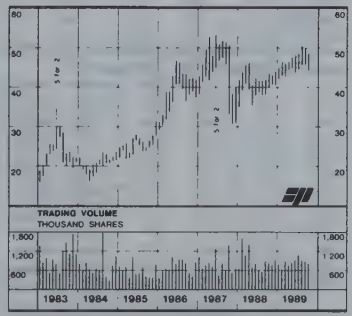
Jan.	E1.69	1.56	1.27	1.30
	E4.05	3.92	3.52	3.02



Important Developments

Sep. '89— Management said that comparable store sales for the second quarter of fiscal 1989-90 increased 2.1%. Separately, as part of a strategic plan, the company has extensively remodeled and expanded existing stores and reallocated selling space; furniture and carpet departments were discontinued in seven stores. In the past two years 19 stores have been remodeled. In fiscal 1989-90 one new 67,000 square foot store is scheduled to be completed, plus expansions of 13 stores. In fiscal 1991-2 MST planned to open three new stores, totaling 545,000 square feet, and close one small (40,000 square foot) store. MST expected to spend about $175-$200 million over the next five years for investments in hardware, software and data processing.

Next earnings report expected in mid-November.

Business Summary

As of January 31, 1989 Mercantile Stores operated 78 department stores in 16 states under 12 locally prominent trade names, and two specialty stores.

All stores carry a wide assortment of goods. The company has developed and marketed private label goods and offers well-known national brands, which recently has been augmented by the addition of higher quality designer apparel. Since the percentage of sales of higher-priced merchandise is accelerating, the average sale and price point in stores has increased significantly.

The chain stores are McAlpin's, Cincinnati, Ohio; Castner Knott Dry Goods Co., Nashville, Tenn.; The Jones Store Co., Kansas City, Mo. area; Joslins, Denver, Colo. and Gayfers, Mobile, Ala. Also, the Lion stores in the Toledo, Ohio area; Bacons, Louisville, Ky.; JB White, Augusta, Ga. Others are in Fargo, N.D.; Duluth, Minn.; and Billings, Mont.

The company also operates 16 free standing beauty salons. A partnership position is held in six operating shopping center joint ventures.

Store space at January 31, 1989 totaled 11,791,000 sq. ft. Average sales per square foot were $192. Since fiscal 1978-9, average sales per store advanced from $12.7 million to $28.8 million

The retail business is highly seasonal with the fourth quarter, which includes the Christmas selling season, the most significant. For the fiscal year ended January 31, 1989, the fourth quarter accounted for 34% of net sales and 40% of net income.

Summary

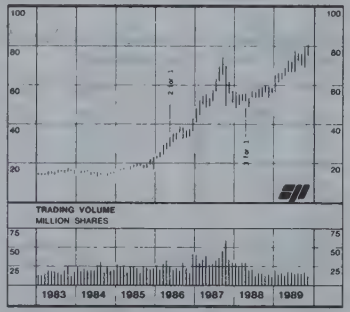
This company is the world's largest ethical drug manufacturer, producing a wide range of human and animal pharmaceuticals as well as specialty chemical and environmental products. Although expenses related to expansion of the U.S. sales force and other strategic long-term actions are expected to slow near- term earnings gains, Merck's profit growth should still be at well above-average rates for the foreseeable future.

Current Outlook

Earnings for 1990 are projected at about $4.60 a share, up from the $3.77 estimated for 1989.

Some increase in the dividend, presently at $0.45 quarterly, is likely in mid-1990.

Sales for 1990 should rise, supported by growth in established drugs, greater contributions from an impressive list of new products (including Losec for gastrointestinal ailments and Plendil cardiovascular) and an expanded sales force. Continued strength is seen for the key Vasotec, Mevacor, Primaxin, and Pepcid drug lines. Margins should benefit from the better volume, a more favorable product mix, and productivity improvements.



Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar	1,571	1,437	1,111	921
Jun	1,585	1,500	1,249	1,005

Dec	---	1,534	1,394	1,149
	---	5,940	5,061	4,129

Sales for the nine months ended September 30, 1989 increased 8.7%, year to year, aided by new drug products. Profitability benefited from the better volume and productivity improvements. Pretax income rose 24%. After taxes at 34.7%, against 35.5%, net income was up 25%. Share earnings were equal to $2.85, versus $2.28.

Important Developments

Nov. '89— Merck said that its near-term earnings growth will be slowed somewhat by several long-term strategic actions and investments. These include significant expansion of the U.S. sales force; the exchange of income-producing Sinemet and Elavil drugs to other companies for future benefits; and rising R & D outlays (indicated at $755 million for 1989, up 13% from the year before). Merck is presently awaiting FDA approval to market Plendil, an extended-release cardiovascular; and Losec, an antiulcer drug. New products in the research pipeline include Proscar, a drug used to reduce enlarged prostates; MK-217, a treatment for bone disease; and two AIDS products. In October, MRK's over-the-counter (OTC) medications joint venture with Johnson & Johnson agreed to acquire the OTC business of ICI Americas for $450 million.

Next earnings report expected in late January.

Business Summary

Contributions by business segment in 1988 were:

	Sales	Profits
Human/animal health	92%	97%
Specialty chemical	8%	3%

Foreign operations contributed about 50% to sales and 41% to earnings in 1988.

Important drug categories are anti-hypertensives and cardiovasculars (31% of total 1988 sales), which include Vasotec ACE inhibitor, Mevacor cholesterol-lowering agent, Moduretic, and Aldomet; antibiotics (13%), of which Primaxin and Mefoxin are the largest; anti-inflammatories/analgesics (13%) such as Clinoril, Indocin and Dolobid; ophthalmologicals (6%), including Timoptic for glaucoma; anti-ulcerants (5%), of which Pepcid is the largest; and vaccines/biologicals (4%), including vaccines for hepatitis B. Animal medicinals (8%) for the control and alleviation of disease in livestock, small animals and poultry include Ivomec for the control of parasites. Other products include drugs for Parkinson's disease, muscle relaxants, psychotherapeutics, agriculturals and poultry breeding stock. Drug products are sold through over 6,000 sales personnel worldwide.

The specialty chemicals group consists of Calgon Corp. and the Kelco division. Products are used for a wide variety of applications including water treatment, the manufacture of paints and paper, oil field drilling, food additives and cleaning products.

Oct. 12'89	1989					
35¼	39¼-29⅞	20	0.64	1.8%	A-	1.10

Summary

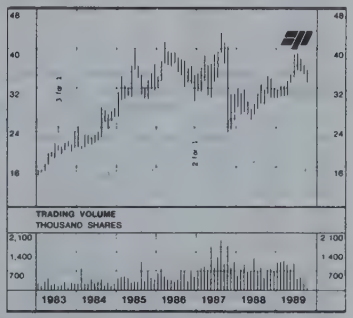
Meredith derives the bulk of its earnings from the publishing of magazines (primarily Better Homes and Gardens, Ladies' Home Journal, Metropolitan Home, and Country Home), printing activities through 50% owned Meredith/Burda Inc., and its ownership of seven TV stations. Soft business conditions and higher costs and expenses, including start-up and acquisition costs, are restricting revenue gains and profits.

Current Outlook

Earnings for the fiscal year to end June 30, 1990 are expected to rise moderately to about $1.85 a share from the $1.75 of fiscal 1989.

The $0.16 quarterly dividend may be raised to $0.17 within the next several quarters in spite of earnings softness.

Revenues for fiscal 1990 are likely to rise only moderately, as gains will continue to be restricted by a soft TV and magazine advertising climate and competitive pricing and lackluster demand in the printing business. Publishing margins should benefit from relatively flat paper prices, but rising other costs and start-up expenses will limit profitability. Programming expenses will continue to hurt broadcasting profits.



Revenues (Million $)

Quarter:	1988-9	1987-8	1986-7	1985-6
Sep.	190.5	144.0	138.4	116.5
Dec.	195.9	174.2	152.5	129.3
Mar.	196.7	166.2	151.5	145.4
Jun	208.9	194.1	156.4	142.1
	792.0	678.5	598.7	533.4

Revenues for the fiscal year ended June 30, 1989 rose 17%, year to year, boosted largely by acquisitions. Profitability was hurt by higher paper, postage and programming costs, and operating income was up 1.5%. After other items, including higher interest expense, and taxes at 36.4% versus 33.3%, net income fell 9.3%.

Important Developments

Sep. '89— Meredith said that during fiscal 1989 it launched a new subscription magazine, Country America, for country music fans and those who enjoy the country way of life. The venture is in association with The Nashville Network and Group W Satellite Comunications. Meredith also launched Better Homes and Gardens Traditional Home, also a subscription title. Developments in the book group included successful launches of children's project books and a book club for the U.S. country life-style market. The company also began a custom marketing program aimed at tailoring promotional packages for clients' specific needs by pooling its magazine, book, broadcasting, custom publishing and commercial printing operations.

Next earnings report expected in late October.

Business Summary

Contributions by business segment:

Fiscal 1989:	Revs.	Profits
Publishing	69%	66%
Broadcasting	14%	30%
Real estate	13%	7%
Allied products/services	4%	-3%

The magazine division publishes 13 subscription based magazines including Better Homes and Gardens, Successful Farming, Ladies Home Journal, SAIL, Metropolitan Home, Better Homes and Gardens Country Home, Better Homes and Gardens WOOD, Better Homes and Gardens Traditional Home, Country America and Midwest Living. MDP also publishes 20 special interest publications focusing on home improvement, home decorating, food, crafts, gardening, and family life. MDP is a contract printer of magazines, and engages in commercial printing through 50% owned Meredith/Burda.

The company owns seven TV stations, including WTVH-TV in Syracuse, N.Y.; KVVU in Henderson, Nevada; KCTV in Kansas City, Mo.; KPHO-TV in Phoenix, Ariz.; WNEM-TV in Bay City-Saginaw-Flint, Mich.; WOFL-TV in Orlando-Daytona Beach; and KSEE-TV in Fresno, Calif. Four of the TV stations are network affiliated. Through MMT Sales, the company acts as sales agent to national advertisers for 60 TV stations. The book division publishes over 175 home and family service books. Allied activities include real estate marketing, and a family relocation service.

Meridian Bancorp

NASDAQ Symbol MRDN (Incl. in Nat'l Market; marginable)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Jan. 9'90	1989-90					
19⅞	26½-17½	9	1.20	6.0%	A	0.82

Summary

The fourth largest bank holding company in Pennsylvania, Meridian Bancorp owns Meridian Bank, First National Bank of Pike County and Delaware Trust Co. (acquired in early 1988), with a total of more than 180 retail branch offices in eastern Pennsylvania and Delaware. The cash dividend was increased 9.1% effective with the January 1990 payment.

Business Summary

Meridian Bancorp, Inc., formed in 1983 through the merger of American Bancorp, Inc. and Central Penn National Corp., is the fourth largest bank holding company in Pennsylvania. Its principal banking subsidiary, Meridian Bank, has a total of 154 branch offices, with operations in 13 eastern Pennsylvania counties. First National Bank of Pike County (acquired in 1986) has six branch offices serving northeastern Pennsylvania. Delaware Trust Company (acquired January 1, 1988) operates 24 branches in three Delaware counties. The company also has various nonbanking subsidiaries supplying financial and real estate services.

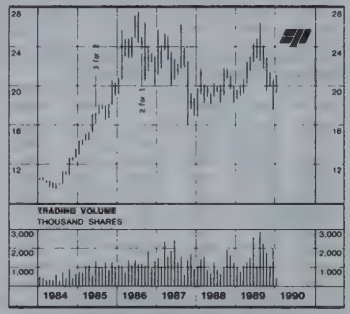
At December 31, 1988, consolidated gross loans of $6.17 billion were divided as follows:

Commercial, financial & agricultural	55%
Consumer	29%
Real estate/mortgage	8%
Real estate/construction	8%

At December 31, 1988, the reserve for possible loan losses was $84,268,000 ($66,077,000 a year earlier), equal to 1.37% (1.20%) of loans outstanding. Net loan chargeoffs in 1988 totaled $14,611,000 (0.25% of average loans), compared with $21,402,000 (0.41%) the year before. Nonperforming assets were $64,398,000 (1.02% of loans outstanding) at the end of 1988, versus $61,465,000 (1.05%) a year earlier.

Consolidated total deposits of $7.13 billion at the end of 1988 were divided: demand 18%, NOW accounts 8%, savings deposits 10%, money-market deposits 22%, time 32% and CDs of $100,000 or more 10%.

Interest and fees on loans contributed 63% of total income for 1988, interest on investment securities 14%, other interest income 5%, title insurance 6%, trust income 2%, service charges on deposit accounts 2% and other noninterest income 8%.



On a tax-equivalent basis, the average yield on total interest-earning assets was 10.22% in 1988 (9.98% in 1987), while the average rate paid on interest-bearing liabilities was 6.54% (6.09%), for a net interest spread of 3.68% (3.89%).

Important Developments

Oct. '89— The company agreed to pay a premium of about $30.5 million in cash to assume some $2 billion of deposits and $434 million of other liabilities of Hill Financial Savings Association, Red Hill, Pa. Meridian also acquired about $904 million of Hill's assets and would receive assistance of some $1.55 billion from the U.S. government's Resolution Trust Corporation (RTC), representing the difference between the amount of liabilities assumed and assets purchased.

Sep. '89— The company dropped its more than $700 million bid to acquire First Pennsylvania Corp., following the signing of a definitive merger agreement between First Pennsylvania and CoreStates Financial Corp.

Review of Operations

Net interest income for the nine months ended September 30, 1989, advanced 9.8%, year to year, primarily because of strong growth in the consumer and commercial loan portfolios of the company's three banks. The provision for possible loan losses declined 29%. Noninterest income and noninterest expense increased 2.7% and 10%, respectively, and pretax income also expanded 10%. After taxes at 18.7%, against 15.7%, net income was up 6.3%, to $68,385,000 ($1.75 a share; $1.70 fully diluted), from $64,343,000 ($1.66; $1.60). Results in the current interim were penalized by an after-tax loss of $6.2 million from title insurance operations (due to several large claims and the establishment of additional reserves), which was partially offset by a significant improvement in mortgage banking operations.

Finances

In September 1989, the company completed the redemption of its outstanding Series A preferred stock.

In January 1988, the company acquired Delaware Trust Co. (assets of $1.3 billion) for 9,370,000 Meridian common shares. In November 1986, Meridian acquired First National Bank of Pike County, Pa. (assets of $127 million) for 810,000 common shares.

In November 1989, Meridian filed an application with the Federal Reserve for approval of a $665,000 investment (a 22.5% stake) in Roderick Sutherland & Partners PLC, a Scottish brokerage firm serving institutional clients.

Summary

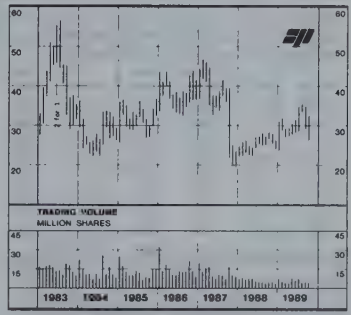
Merrill Lynch & Co. owns one of the largest firms in the securities industry, and is also engaged in insurance and other financial services. Earnings through the first nine months of 1989 were erratic, reflecting softness in certain core businesses and the volatility of the marketplace. Diversity of products and services as well as cost cutting could boost earnings in 1990.

Current Outlook

Earnings for 1990 could reach $2.10 a share, compared with the $1.75 estimated for 1989.

The $0.25 quarterly dividend is the minimum expected.

The reluctance of retail customers to commit to an oftentimes volatile market could limit earnings gains in 1990. However, while this higher margined business is expected to remain sluggish, MER has a menu of alternative products to sell to clients, including life insurance, annuities, and money market accounts. This strategy should further the company's goal of keeping client assets under its roof. Investment banking results will hinge upon a strong M&A and LBO environment (which is not certain given higher equity valuations and concerns regarding the junk bond market). While MER remains the largest underwriter of debt and equity securities worldwide (about a 10% share), margins will likely remain narrowed. Continued cost cutting will help buffer MER in a slowing martketplace.



Total Revenues (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	2.80	2.41	2.70	2.17
Jun.	2.91	2.49	2.44	2.33
Sep.	2.83	2.80	3.02	2.33
Dec.	---	2.85	2.71	2.76
	---	10.55	10.87	9.61

Total revenues for the nine months ended September 30, 1989 rose 21%, year to year. Commissions advanced 10%, while interest and dividends were up 46%, principal transaction revenues declined 11%, and investment banking fell 10%. Insurance and asset management increased 27%, and 15% respectively. Total expenses were up 22%, and pretax income fell 13%. After taxes at 42.9%, versus 43.9%, net earnings were off 12%. Following preferred dividends, share earnings were $1.23, compared with $1.45, before income from discontinued operations of $0.04 against $0.22.

Dec.	E0.52	2.69	0.02	1.84
	E1.75	4.29	3.58	4.44

Important Developments

Oct. '89— MER said results for the third quarter reflected industrywide softness in some of its core businesses. Commissions increased 21% due to higher trading volumes and strong mutual fund sales. Principal transaction revenues were off 19% reflecting lower trading revenues in fixed income securities. Investment banking revenues fell 22% primarily due to lower levels of underwriting. Higher investment income led to a 16% advance in insurance revenues, while increased assets under management boosted asset management fees 12%.

Next earnings report expected in late January.

Business Summary

Merrill Lynch & Co. is a diversified financial services company which, through subsidiaries, provides investment, financing, real estate, insurance and related services. Its chief subsidiary, Merrill Lynch, Pierce, Fenner & Smith (MLPF&S) is one of the largest in the securities industry.

Segment contributions to pretax earnings in recent years were:

	1988	1987	1986
Investment & financing services	83%	57%	84%
Real estate	4%	15%	4%
Insurance	13%	28%	12%

MLPF&S, directly and through subsidiaries, is a broker in securities, option contracts, commodity and financial futures contracts, and selected insurance products; a dealer in corporate and municipal securities; and an investment banker. MER manages mutual funds, provides investment advisory services and engages in international banking outside the U.S.

Real estate services includes financing, mortgage banking and servicing, brokerage, and relocation services. Insurance operations include the sale and underwriting of mortgage cancellation insurance, single premium whole life insurance and annuity contracts.

Dividend Data

Dividends have been paid since 1971. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1987.

Summary

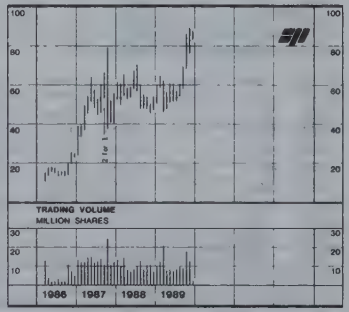
Microsoft develops and markets a diverse line of systems and applications microcomputer software—including its MS-DOS operating system, the most widely used operating system for IBM PC and IBM-compatible microcomputers. The company has introduced MS-OS/2, a long-awaited operating system designed to harness the capabilities of personal computers based on the Intel 80286 and 80386 microprocessors. Results for fiscal 1990 should benefit from continued strength across the company's broad product line and from robust international operations.

Current Outlook

Earnings for fiscal 1990 are estimated at $3.85 a share, up from the $3.03 of fiscal 1989.

Cash dividends are not anticipated.

Revenues for fiscal 1990 are expected to exceed $1 billion, reflecting strength across all product segments with particular strength in international markets. MSFT is a leading provider of applications software for the Apple Macintosh, and its development efforts on applications for IBM and IBM-compatible PCs have produced several strong products, including the popular Word and Excel programs. Margins are expected to narrow, owing to continued high R&D expenses and a shift in the product mix away from systems software products toward applications programs, which require higher selling costs. Future plans to deliver a similar graphical user interface across DOS, OS/2 and UNIX bode well for long-term earnings growth.



Net Revenues (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep	235.2	176.4	102.6	66.8
Dec.		209.9	155.9	81.0
Mar.		197.0	161.8	98.4
Jun.		220.2	170.5	99.8
		803.5	590.8	345.9

Net revenues for the three months ended September 30, 1989, advanced 33%, year to year, reflecting strong demand across all product groups, particularly in international markets. Gross margins widened on manufacturing efficiencies which outweighed a less favorable product mix; however, profits were restrained by higher R&D and marketing costs. Fcllowing higher other income (net), pretax income rose 36%. After taxes at 32.0% in both periods, net income also rose 36%, to $49,588,000 ($0.87 a share), from $36,582,000 ($0.65).

	E3.85	3.03	2.22	1.30

Important Developments

Jul. '89— A federal judge significantly narrowed the scope of the Apple (AAPL) vs. Microsoft (MSFT) and Hewlett-Packard lawsuit, ruling that all but 10 of the 189 items APPL claimed infringed on its copyrights were covered by a 1985 agreement between AAPL and MSFT. The 10 remaining items relate solely to the use of overlapping windows and certain characteristics of icons in Windows 2.03.

Next earnings report expected in mid-January.

Data as orig reptd 1. Net. NA-Not Available.

Business Summary

Microsoft Corporation develops, markets and supports a wide range of microcomputer software, including operating systems, languages and application programs, as well as books, CD-ROM products and hardware, for business and professional use.

Net revenues by product group in recent fiscal years were:

	1989	1988
Systems/language software	44%	47%
Applications software	42%	40%
Hardware & books	14%	13%

Products are sold through four primary channels—domestic OEM (14% of fiscal 1989 revenues), domestic retail (29%), international OEM (18%) and international retail (37%)—and through Microsoft Press and other channels (2%).

Microsoft markets three proprietary operating systems for microcomputers: MS-DOS, MS-OS/2 and XENIX. MS-DOS is a single-user, single-tasking operating system designed initially for the IBM PC with its 16-bit Intel 8088 microprocessor chip. Microsoft Operating System/2 (MS-OS/2) is designed to run on the new generation of computers based on the Intel 80286 and 80386 computer chips MS-OS/2 provides increased memory for running applications and is multitasking. XENIX is a UNIX-based multi-user operating system.

LAN Manager is an OS/2-based network software enabling the user to run DOS on UNIX workstations or a network server that is running under OS/2.

Microsoft's Windows provides an operating environment that allows users to run several programs at the same time and offers drop down menus, icons and mixed text and graphics.

Microsoft has developed and markets many microcomputer language products, including BASIC, "C," FORTRAN and COBOL. Applications software is offered in six product categories—word processing, spreadsheet, file management, graphics, communications and project management—for the MS-DOS, MS-OS/2 and Apple Macintosh environments, with Microsoft particularly strong in the Macintosh arena.

The Microsoft Mouse, a handheld pointing device, is the company's principal hardware product. Publishing-related activities include computer-oriented books and CD-ROM products.

Dividend Data

No cash has been paid.

Finances

During fiscal 1989, Microsoft spent about $110.2 million (13.7% of revenues) on R&D, versus $69.8 million (11.8%) the year before.

Capitalization

Long Term Debt: None (9/89).

Millipore Corp.

NYSE Symbol MIL In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 28'89	1989					
34¼	37⅜-29¼	17	0.40	1.2%	A	1.19

Summary

Millipore is a leader in the field of separations technology, manufacturing and marketing a wide array of products used primarily in the analysis and purification of fluids in the life sciences research, drug production, environmental testing, beverage processing and other areas. Expansion in major markets and a steady flow of new products should enable MIL to extend its favorable sales and earnings growth record in the years ahead.

Current Outlook

Earnings for 1990 are expected to rise to $2.30 a share from the $2.00 estimated for 1989.

Some increase in the dividend, presently at $0.10 quarterly, is likely by mid-1990.

Sales for 1990 should show more rapid growth than in 1989, aided by projected stability in foreign currency exchange (MIL typically derives close to 60% of its sales overseas) and greater contributions from new products, especially in the life sciences research area. Despite some softening likely in certain industrial markets, continued strong product demand is expected from the food and beverage and drug fields. Margins should well maintained on the better volume.

Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	160.8	145.4	116.6	100.0
Jun.	167.0	155.3	129.6	109.5

Important Developments

Aug. '89— Millipore agreed to sell its Process Water division (1988 sales of about $45 million) to Eastern Enterprises for approximately $54 million in cash. The sale was expected to be completed during the fourth quarter of 1989.

Aug. '89— The company noted that its research and development expenses for the first half of 1989 exceeded $27 million, up 20% from those of the comparable year-earlier period. MIL added that so far in 1989 it had introduced 22 new products, ranging from RNA synthesis chemistry kits to a new VAX-based chromatography data and control station that can link four chromatography systems in a busy research center. Separately, the company said that it expected to see improvements in both sales and earnings by year's end.

Next earnings report expected late October.

Business Summary

Millipore Corp. is a leader in the field of separations technology, manufacturing a wide range of products used primarily in the analysis and purification of fluids. Sales by principal product groups were divided as follows in recent years:

	1988	1987
Analytical products	61%	61%
Purification products	39%	39

The U.S. accounted for 41% of sales and 69% of profits in 1988; Europe for 30% and 15%; Pacific nations for 18% and 12%; and other areas for 11% and 4%.

Analytical products are used to detect, identify and quantify the chemical, physical or biological components of a sample. For purification applications, the company's products are used in manufacturing and research operations to isolate and purify specific components or to remove contaminants.

The principal separation technologies utilized by the company are based on membrane filters (representing products accounting for 51% of 1988 sales) and high pressure liquid chromatography or HPLC (42%). Membranes are used to filter either the wanted or unwanted particulate or molecular matter contained in a fluid. Other technologies (7%) include deionization and electrophoresis.

Membrane- based products include disc and cartridge filters and housings, filter-based test kits and ancillary equipment and supplies. HPLC instruments include injectors, pumps, columns, detectors, controllers and data analyzers.

Products are sold to industrial customers (68% of 1988 sales), which include pharmaceutical, biotechnology, chemical, food and beverage, and environmental testing firms; universities and government (23%); and clinical laboratories, hospitals and other medical research institutions (9%).

Dividend Data

Cash has been paid each year since 1966. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1988.

Minnesota Mining

NYSE Symbol MMM Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Sep. 27'89	1989					
75¼	80⅜-60⅛	14	2.60	3.5%	A	0.98

Summary

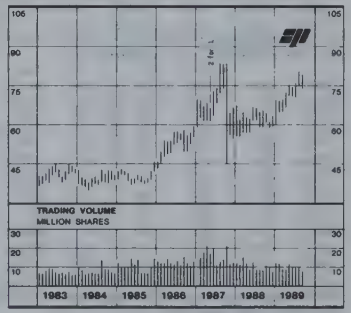
MMM is a highly diversified manufacturer of industrial, commercial, health care, and consumer products which share similar technological, manufacturing and marketing resources. The company seeks to derive 25% of annual sales from products introduced within the most recent five years. Revenue growth in the 1989 second half is expected to be impaired by the slowing U.S. economy and a stronger dollar. Profitability should continue to benefit from cost reduction and productivity improvement programs.

Current Outlook

Earnings for 1989 are estimated at $5.55 a share, versus 1988's $5.09. Earnings for 1990 could increase to $6.15 a share.

Dividends should continue at the current rate of $0.65 quarterly.

Unit volume growth is expected to slow in the second half of 1989. Increased penetration of international markets will help cushion MMM from adverse currency effects which could impact full-year 1989 earnings by about $0.25 per share. In the United States, further economic slowing will make it difficult to achieve the unit-volume growth that MMM averaged in the 1989 first half. Margins should continue to benefit from efforts to control costs and improve productivity. The tax rate is expected to decline slightly. Per share earnings growth should continue to benefit from a stock repurchase program.



Net Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	3.02	2.60	2.21	2.07
Jun.	3.03	2.71	2.38	2.19
Sep.	---	2.69	2.47	2.24
Dec.	---	2.58	2.38	2.11
	---	10.58	9.43	8.60

Revenues for the six months ended June 30, 1989 rose 5.8%, year to year; 1988 revenues were restated to reflect the consolidation of a Japanese joint venture. International unit volume was up 13%, and domestic volume grew 4%. Profitability benefited from cost reduction and productivity improvement programs, and pretax earnings advanced 8.2%. After taxes at 39.8%, versus 40.9%, net income increased 10%. Share earnings were up 13%, to $2.92 on 2.8% fewer shares outstanding from $2.58.

Dec.	E1.27	1.21	0.95	0.82
	E5.55	5.09	4.02	3.40

Important Developments

Jun. '89— Directors authorized the repurchase of up to 10 million MMM shares between May 31, 1989 and June 1, 1990. These purchases, expected to be made on the open market, will be used to replace shares sold to the ESOP, for employee stock purchase plans, and other corporate needs. Separately, in the 1989 second quarter MMM filed a $400 million shelf registration with the SEC.

Next earnings report expected in mid-October.

Business Summary

Minnesota Mining's many major product lines are separated into four major business segments. Business sector contributions in 1988:

	Sales	Profits
Industrial & electronic	36%	39%
Information imaging technologies	28%	16%
Life sciences	22%	26%
Commercial & consumer	14%	19%

Foreign operations accounted for 40% of both sales and operating profits in 1988.

The industrial and electronics sector markets a broad range of pressure sensitive tapes, coated abrasives, cleaning and finishing materials, roofing granules, films, carpet protectors, specialty chemicals and products for electro-telecommunications markets.

The information and imaging technologies segment makes a diskettes, data ca rtridges, videotape, printing plates, color proofing systems, medical diagnostic products, amateur photographics films, and micrographic systems, as well as overhead projectors, transparency films and graphics for truck fleets and architectural uses.

The life sciences segment makes a broad line of medical, surgical, orthopedic, pharmaceutical and dental products as well as a variety of traffic control and personal safety products, including reflective materials, tapes for diapers, respiratory protection devices, garment insulating materials, filtration products and films that help prevent document forgery.

The commercial and consumer segment provides Post-it notes, Scotch tapes, office supplies, computer data media, auto body repair and refinishing products, products for the construction industry, and a line of carbonless paper.

Sep. 29'89	1989					
25¼	27⅝-22⅞	11	1.78	7.0%	A	0.52

Summary

This moderate-sized utility serves an important mining area, which includes the Mesabi Iron Range; taconite producers accounted for 47% of revenues in 1988. Because of the long-term outlook of below capacity operation of the taconite mines in its territory, MPL has sought to diversify operations. In July, 1989 the company sold its telephone properties for $90 million in cash.

Business Summary

Minnesota Power & Light provides electric service in a 26,000 square-mile area in central and northeastern Minnesota. A subsidiary, Superior Water, Light, & Power (SWL&P), provides electric, water, and gas service in Superior, Wisc., and adjacent areas. Contributions to electric revenues (85% of total revenues in 1988) by customer class in recent years:

Revenues	1988	1987	1986	1985
Residential	12%	12%	13%	12%
Commercial	11%	11%	11%	11%
Industrial	67%	64%	63%	66%
Other	10%	13%	13%	11%

Revenues from sales to taconite processing customers accounted for 47% of electric operating revenues in 1988 (47% in 1987 and 46% in 1986).

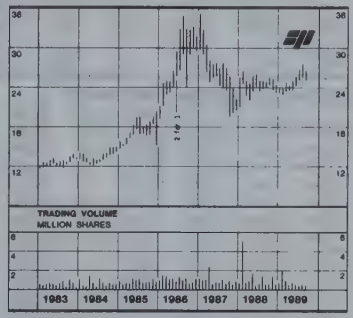
The fuel mix in 1988 was 62% steam (mostly coal), 4% hydro, and 34% purchased. Peak load in 1988 was 1,181 mw and system capability was 1,564 mw, for a capacity margin of 24%. Average residential rates were 5.42¢ per kwh (5.44¢ in 1987) on average annual usage of 8,488 kwh (8,004).

In March, 1989 MPL estimated construction expenditures for 1989-93 at $247 million, including $46 million for 1989. All construction expenditures for 1989-93 were expected to be funded internally.

Wholly-owned Minnesota Paper, Inc. is an equal participant in a joint venture with Pentair Duluth Corp. in Lake Superior Paper Industries, which recently constructed a $400 million paper mill in Duluth, Minn. that initiated operations on March 1, 1988.

Topeka Group, Inc. manages a diversification program for MPL. Activities include water and wastewater treatment utilities in the southeastern U.S.

In November, 1988 the company acquired Baukol-Noonan, Inc., which is engaged in surface mining and the sale of lignite coal in North Dakota, for 1.2 million common shares. Two electric generating companies consume substantially all of Baukol-Noonan's production of lignite coal under supply contracts which expire in 2027.



Important Developments

Aug. '89— MPL said it had reached an agreement with Boise Cascade under which MPL will install a $42 million cogeneration facility to provide energy for Boise's paper mill in International Falls, Minn. Earlier, MPL announced it had agreed to sell a 20% equity interest in its Clay Boswell Power Plant Unit 4 to a consortium of municipally owned electric utilities in Wisconsin.

Jul. '89— The company completed the sale of its Universal Telephone, Inc. subsidiary to Century Telephone Enterprises, Inc. for $90 million in cash. MPL expected the sale to contribute approximately $1.10 to $1.20 a share to earnings for 1989.

Next earnings report expected in late October.

Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	117.5	119.9	101.1	104.0
Jun.	112.2	113.1	107.1	99.0
Sep.		111.2	110.8	95.9
Dec.		116.2	107.1	96.6
		460.5	426.1	395.5

Operating revenues for the six months ended June 30, 1989 advanced 1.1%, year to year (1988 restated), reflecting strong demand for electric power. The cost of fuel for electric generation decreased significantly, and operating income was up 13%. In the absence of a $5.6 million gain on a sale of capacity, net income rose 2.4%. After preferred dividends, share earnings were $1.10, versus $1.07.

Mobil Corp.

NYSE Symbol MOB Options on CBOE (Feb-May-Aug-Nov) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 31'89	1989					
55⅜	60½-45¼	13	2.60	4.7%	B	0.74

Summary

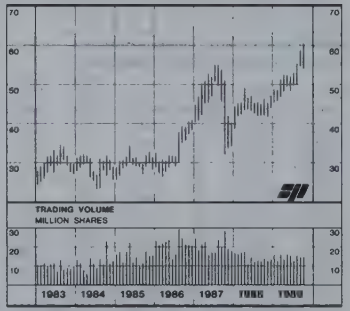
Mobil Corp., a worldwide petroleum company, is engaged in an extensive restructuring program. The company has shed its nonoil businesses while it has streamlined its basic petroleum and chemical operations in order to sustain earnings growth in a low crude-price environment. MOB can be expected to continue its asset divestitures and restructurings while seeking acquisitions that would enhance its market competitiveness. The company is positioned to exploit expanding natural gas markets.

Current Outlook

Share earnings for 1990 are projected at $4.50, compared with the $4.25 estimated for 1989, which includes a net $0.03 nonrecurring gain.

The $0.65 quarterly dividend is the minimum expectation.

Revenues for 1990 may show some modest improvement, reflecting projected firming in natural gas prices offset in part by continued volatile crude oil prices. Natural gas volumes should be greater. Margins are projected to strengthen, due to ongoing cost cutting efforts. MOB's strong gas position enhances the longer term.



[1]Sales (Billion $)

Quarter:	1989	1988	1987	1986
Mar.	13.82	13.77	12.47	13.57
Jun.	13.85	13.74	13.29	11.92
Sep.	---	12.88	14.25	11.00
Dec.	---	12.94	15.68	12.22
	---	53.32	55.68	48.71

Total revenues for the nine months ended September 30, 1989 rose 1.7%, year to year, owing in part to higher crude oil prices. Due to volatile feedstock costs, charges related to restructurings and a loss on the sale of South Africa operations, offset partially by the sale of Hong Kong property, net income fell 14%. Share earnings were $3.32, versus $3.86, excluding earnings of $0.09 from Montgomery Ward in 1988.

Dec	E0.93	1.07	0.93	0.50
	E4.25	4.93	3.06	3.45

Important Developments

Oct. '89— The company announced a restructuring of its domestic exploration and production operations. As a result of the restructuring, MOB reported a $40 million charge in 1989's third quarter. Also in the quarter, MOB recorded a $192 million gain on an exchange of property in Hong Kong. Operating profits in the third quarter were down 18%, year to year, due primarily to the chemical segment. The company said that chemical earnings in 1989 were down from 1988's record levels, due to lower polyethylene prices worldwide. The contribution from the petroleum business was down slightly, as upstream operations benefited from higher crude oil prices while the downstream margins were hurt by higher feedstock costs. Crude oil production was down 3.1% and refinery runs increased 6.8% in the quarter.

Next earnings report expected in late January.

Business Summary

Mobil is one of the major integrated international oil companies. In July, 1988 MOB sold its Montgomery Ward retailing unit (Ward contributed $130 million to 1987 profits) in line with its efforts to reduce its involvement in non-oil businesses.

Operating Profits	1988	1987
U.S. expl. & prod.	4%	18%
U.S. ref. & mkt.	22%	6%
Foreign expl. & prod.	32%	51%
Foreign ref. & mkt.	18%	4%
Chemicals	24%	15%
Retail merchandising	—	6%

In 1988 the company's worldwide net crude and natural gas liquids production averaged 735,000 barrels a day, versus 709,000 in 1987, with the U.S. accounting for about 45% of 1988 production. Net natural gas production was 4.3 Bcf a day (4.1 Bcf), of which 42% was produced in the U.S. and 32% in Indonesia. Refinery runs totaled 1,646,000 b/d (1,563,000 b/d), and petroleum product sales 2,525,000 b/d (2,362,000 b/d).

Net proved reserves at 1988 year-end stood at 3,104 million barrels of crude and natural gas liquids, of which 45% were located in the U.S. and Canada, up from 2,953 million at 1987 year-end. Net proved reserves of natural gas at 1988 year-end were 19,814 bcf (20,487 in 1987) of which 38% was in the U.S. Of the $3.9 billion in chemical sales in 1988, petrochemicals accounted for 55% and plastics 44%.

Dividend Data

Dividends have been paid since 1902. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Monarch Machine Tool

1536

NYSE Symbol MMO In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 19'89	1989					
14	21-14	23	0.80	5.7%	B-	1.13

Summary

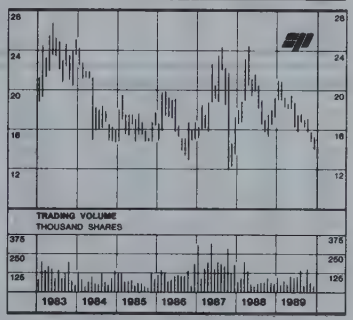
Monarch is a major producer of numerically controlled machine tools and also manufactures automated strip metal processing machinery. Earnings for the first nine months of 1989 benefited from higher sales, improved margins and a sharply lower tax rate. A forecasted rise in sales and continued margin expansion should permit higher earnings in 1990.

Current Outlook

Earnings for 1990 are projected at $0.70 a share, versus earnings of $0.50 estimated for 1989.

Although not covered in recent years, dividends may remain at $0.20 quarterly.

Revenues for 1990 are expected to rise less rapidly as the favorable impact of sharply higher order backlogs for strip metal processing machinery is offset by probable weakening in machine tools. Although pricing for machine tools will remain under pressure, an improved product mix at the Courtland unit and firm pricing for strip metal machinery should permit margin expansion. Aided further by a level tax rate and well controlled nonoperating costs, earnings should rise in 1990.



Sales & Other Income (Million $)

Quarter:	1989	1988	1987	1986
Mar.	22.2	20.3	17.0	15.1

Important Developments

Oct. '89— MMO reported share earnings of $0.07 on a 15% rise in revenues for 1989's third quarter, versus $0.06 a share for the year-earlier period. MMO said that third quarter profits were adversely affected by a $1.4 million reduction in shipments together with an abnormally poor product mix at its Cortland division and excessive installation and start-up costs involving several lines of equipment shipped by the Stamco U.K. plant. MMO added that for the first nine months of 1989 the favorable impact of higher shipments and increased capacity utilization was mitigated by severe price competition in both domestic and foreign markets. The order backlog at the end of the third quarter was $21 million higher from a year-earlier and stood $9.0 million higher than at the end of 1989's second quarter. MMO noted that orders at its domestic strip processing unit continued to be unusually strong.

Next earnings report expected in late January.

Data as orig. reptd. 1. Reflects accounting change.

Business Summary

Monarch Machine Tool manufactures a broad range of computer controlled metal-cutting turning machines and machining centers, as well as several models of manually operated engine and toolroom lathes. These tools are used in turning, milling, drilling, boring, tapping and related metalworking operations. MMO also produces a line of strip metal processing machinery used in various slitting, tension leveling, shearing, cleaning, forming, coating, galvanizing, annealing and heat treating operations.

At the company's largest facility, in Sidney, Ohio, numerically controlled turning machines, horizontal machining centers, and conventional lathes are produced. The Cortland division produces vertical machining centers and circuit board drilling machines.

The Stamco division engineers, designs and produces strip metal processing and finishing machinery and equipment, sold primarily as complete production lines to steel and aluminum mills and to fabricators on a contract basis.

Foreign operations are conducted through subsidiaries located in West Germany and England.

Foreign customers accounted for 30% of revenues in 1988, 29% in 1987, 26% in 1986, and 17% in 1985. The backlog at year-end 1988 stood at $57 million, versus $36 million a year earlier.

Monsanto Co.

NYSE Symbol MTC Options on CBOE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 15'89	1989					
115⅛	124¼-80½	12	3.40	3.0%	B+	1.05

Summary

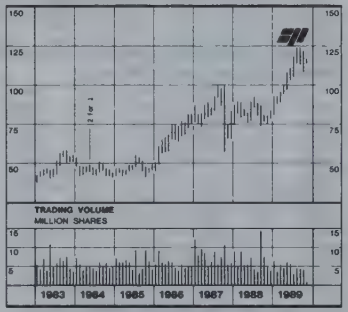
This leading chemical company produces agricultural pesticide and animal products, industrial chemicals, plastics, fibers, industrial process equipment, pharmaceuticals and low calorie sweeteners. Over the past decade MTC has shifted its product mix from commodities to less cyclical, higher valued specialty products. Earnings in recent years have benefited from the 1985 restructuring program and better worldwide demand for many products. Further gains are expected in 1989 and 1990.

Current Outlook

Share earnings for 1990 are projected at almost $11.00, up from the $9.50 expected for 1989.

An increase in the $0.85 quarterly dividend is likely with the April, 1990 declaration.

Profits in 1990 should be aided by continued growth in Roundup herbicide, while Searle is expected to post solid earnings with further growth of Calan and Cytotec despite continued heavy marketing costs. Strong order backlogs will significantly improve Fisher Controls, and NutraSweet should continue to show growth, but the possible introduction of Simplesse fat substitute will limit gains. Chemicals should benefit from the recent decline in raw material costs, but demand may soften with downturns in automobile and housing related markets. Stock repurchases will aid share earnings comparisons.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar	2,265	2,127	1,866	1,745
Jun.	2,348	2,263	2,025	1,869
Sep.	2,061	2,022	1,902	1,695
Dec.	---	1,881	1,846	1,570
	---	8,293	7,639	6,879

Sales for the first nine months of 1989 rose 4.1%, year to year. With profits gains in Searle, Fisher Controls and NutraSweet, net income advanced 7.9%. Share earnings were $8.66 on 5.8% fewer share outstanding, versus $7.57.

Dec.	E0.84	0.70	0.62	0.28
	E9.50	8.27	5.63	5.55

Important Developments

Oct. '89— MTC said that the third quarter was one of the best ever, with Searle, Fisher and NutraSweet recording significant profit gains. Searle had a quarterly profit for the first time since its acquisition in 1985, reflecting the success of Calan. The launches of Cytotec ulcer drug in the U.S., U.K., and Canada was proceeding. Chemical margins strengthened as raw materials costs continue to decline from the high levels of the first quarter. However, agricultural results were hurt by drought conditions in Europe and the western U.S., but the unit will still have a solid year. NutraSweet announced plans to double global capacity over the next two years.

Jun. '89— Searle expected no material financial effect from the settlement of about 100 cases involving the Copper 7 IUD. The settlement leaves about 350 Copper 7 suits pending against Searle.

Next earnings report expected in late January.

Business Summary

Contributions (profits in million $) by business segment in 1988:

	Sales	Profits
Crop chemicals	17%	$434
Animal sciences	2%	-10
Chemicals	48%	486
Electronic materials	2%	11
Fisher Controls	10%	29
NutraSweet	9%	154
Pharmaceuticals	12%	-62
Biotechnology discovery	Nil	-47

Foreign operations accounted for 37% of sales and 38% of profits in 1988.

Agricultural products consists of herbicides, including Lasso, Roundup, and Avadex, seeds and animal feed and growth supplements.

Chemicals include detergents and phosphates, water treatment chemicals, carpet, apparel and industrial fibers, plastics, resins, plasticizers, rubber processing chemicals and instruments, polyethylene products, polystyrene boards, and intermediate and specialty chemicals.

Electronic materials (sold 1989) included electronic-grade silicon wafers, while Fisher Controls is a producer of valves, regulators, electronic process controls and gas separation systems.

NutraSweet consists of NutraSweet and Equal brands of aspartame low-calorie sweeteners.

Searle's pharmaceuticals include anti-infectives, cardiovascular, bronchodilators, fertility control and gastrointestinal drugs. Searle said in 1988 that it has the financial resources and insurance to handle litigation related to the Copper-7 IUD.

Dividend Data

Dividends have been paid since 1925. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Summary

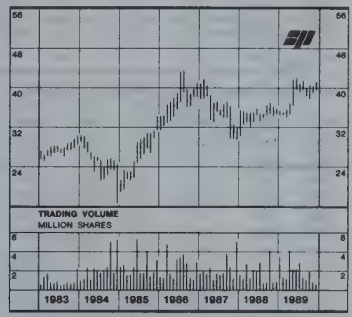
This gas and electric utility serves approximately three-quarters of the state of Montana, where agriculture and livestock constitute the largest industry. Western Energy Co., a subsidiary, is one of the nation's 10 largest producers of coal/lignite. In October, 1989 the company announced it would take a $19.9 million after-tax charge in the fourth quarter to reflect losses from the sale of its entire interest in the Colstrip Unit 4 plant.

Current Outlook

Earnings for 1990 are estimated at $3.45 a share, up from the $2.40 expected for 1989, which includes a onetime charge of about $0.81.

A modest increase in the $0.69 quarterly dividend is possible in late 1989 or early 1990.

Higher earnings in 1990 are expected to derive principally from the absence of losses related to the Colstrip Unit 4 Generating Station. MTP has been selling Colstrip 4 power at rates insufficient to recover its costs. In October MTP entered into a contract to sell its remaining interest in Colstrip 4 until its leasehold interest in the unit ends in 2010. Revenues from this and another contract were not expected to recover MTP's costs over the life of the lease. Thus, a provision of $19.9 million (about $0.81 a share) will be taken in the fourth quarter to recognize future losses. Non-utility businesses should have a slightly better year. One of the company's major assets is significant coal reserves.



Utility Revenues (Million $)

Quarter:	1990	1989	1988	1987
Mar.	---	154.1	134.6	126.6
Jun.	---	95.2	91.6	83.9
Sep.	---	91.9	90.2	90.1
Dec.	---	---	127.3	121.8
	---	---	443.7	422.5

Utility revenues for the nine months ended September 30, 1989 rose 7.8%, year to year, mainly due to colder weather. Benefiting from normal streamflow conditions as well as reduced losses by the Independent Power Group unit, net income advanced 17%, to $1.94 a share from $1.67.

Important Developments

Oct. '89— MTP said it would take a fourth-quarter after-tax charge of $19.9 million (about $0.81 a share). The charge reflects the fact that revenues from the sale of MTP's entire interest in Colstrip Unit 4 (computed on a present value basis) are not expected to recover all the costs of Unit 4 over the remaining term of the lease.

Aug. '89— MTP said that the Montana Public Service Commission granted it a $6.3 million annual increase in natural gas rates and reduced its electric rates by $16.5 million in a final decision on rate requests filed June 30, 1988. The order established a 10.62% rate of return for gas service and a 10.44% rate for electric service. As part of the ruling, the Commission rejected a proposed sale of 74 mw of Colstrip Unit 4 power from MTP's Independent Power Group to its Utility Group.

Next earnings report expected in early February.

Business Summary

Montana Power supplies electric and gas service to 82% of the population of Montana. Through subsidiaries MTP also engaged in coal and oil and gas activities, real estate, and other businesses. Contributions to net income in recent years:

	1988	1987	1986
Total utility	50%	57%	71%
Nonutility	50%	43%	29%

Electric operations contributed 78% of utility revenues in 1988 (79% in 1987); gas operations provided 22% (21%).

The fuel mix in 1988 was 27% hydro, 65% coal and 8% purchased power. Peak load in 1988 was 1,287 mw and capacity (including purchased power) was 1,515 mw, for a capacity margin of 15.0%. Gas sales in 1988 were 29,135 MMcf, up 8.9% from 1987.

The 700 mw coal-fired Colstrip Unit 3 (30%-owned), in which MTP has a $360 million investment, began commercial operation in January, 1984. In December, 1985 MTP sold for $292 million its 210 mw share of the coal-fired Colstrip Unit 4 station, and agreed to lease back the plant for 25 years. Proceeds from the sale were invested in temporary cash instruments. Capital requirements for construction were expected to total $128.3 million for 1989.

Entech owns diversified business units active in mining, oil and natural gas, technology and waste management. Proved reserves of coal/lignite were 931 million tons at 1988 year-end.

Dividend Data

Dividends have been paid since 1935. A dividend reinvestment plan is available. In June, 1989 a preferred stock purchase rights plan was adopted.

Summary

This Canadian company is a leading manufacturer of business forms and related products, and also produces data base management products and services, direct marketing products, and custom packaging. Earnings rose for the fifth consecutive year in 1988, and a further rise was reported for the first nine months of 1989, reflecting improved operating results, higher investment income and lower taxes. However, fourth quarter 1989 earnings are expected to decline due to highly competitive market conditions during a period of declining economic activity.

Business Summary

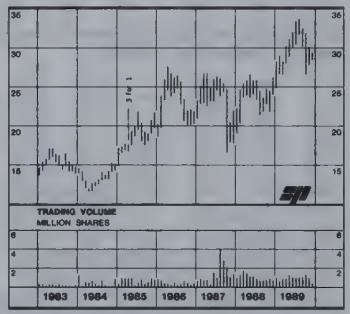
Moore Corp. is a leading manufacturer of business forms. It is active in 53 countries and operates 139 plants. Contributions by geographic area in 1988:

	Sales	Profits
United States	62%	69%
Europe	16%	8%
Canada	10%	8%
Other	12%	15%

Business forms and forms-based systems are the primary focus of Moore's operations. Forms are manufactured in a variety of constructions, ranging from handwritten types to complex forms for computers, optical scanners and other types of data reading and writing equipment. Multi-part forms may use interleaved carbon paper or carbonless paper. The company also manufactures a complete line of form handling equipment, including portable register machines, autographic registers, formaliner tractors, detachers, imprinter detachers and decollators.

Moore Data Management Services and Teela Data Management Systems market products that use database information, computer typesetting and printing to produce rapidly updated reference material. Response Graphics and Response Technologies make direct response marketing products. Two MCL subsidiaries in Canada and the United Kingdom produce and sell custom packaging.

Through its strategic customer services program Moore assumes and manages the complete business forms and office supplies needs of large organizations. The program uses electronic links to ensure that products will be delivered on demand. Smaller customers are served by Moore divisions and subsidiary companies using agents, dealers, wholesalers, catalogs, telemarketing, retail stores, and direct representatives and, in Europe, a franchise operation.



Important Developments

Nov. '89— The strong rise in earnings for the first nine months of 1989 was attributed to improved operating results, higher investment income and a lower tax rate. Pretax investment and other income for the first nine months of 1989 was $44.0 million, versus $25.9 million in the 1988 period. MCL said that lower paper prices, improvements in operating efficiencies and emphasis on value added products would not be sufficient to offset the adverse effect on operating results of highly competitive market conditions during a period of declining economic activity, and that earnings for the fourth quarter of 1989 would be lower than those of the year-earlier quarter.

Next earnings report expected in early November.

Summary

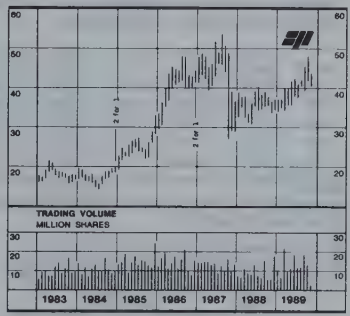
This bank holding company owns Morgan Guaranty Trust, the nation's fourth largest bank. Morgan emphasizes wholesale banking and has the largest trust department in the country. It derives a significant portion of revenues from capital markets activities, as well as corporate finance services, particularly abroad. In September, 1989 JPM boosted its allowance for loan losses by $2 billion, reflecting its reduced expectations of a favorable resolution of LDC problem loans. While the charge will result in a large loss for 1989, a rebound is expected in 1990.

Current Outlook

Earnings for 1990 could recover to $4.90 a share from the $7.00 deficit projected for 1989.

Dividends should continue at $0.41½ quarterly.

JPM's $2 billion third-quarter reserve addition for developing country loans, while resulting in a large loss for 1989, largely neutralizes the issue, and positions the company for renewed profitability in 1990. The allowance for loan losses has doubled in the past year to over $3.0 billion, due to doubts regarding payment of the LDC loans. With medium and long-term LDC loans of $2.8 billion entirely reserved for, the provision for loan losses should be moderate, as domestic credit quality remains excellent. Loan growth will be minimal at best, reflecting reduced dependence on bank loans by large corporate clients. An increasing share of revenues is coming from volatile sources such as bond and currency trading, which are difficult to predict. Fee income from corporate finance activities is expected to continue growing through 1990. Workforce reductions of up to 10% and other expense controls should also aid profits. Reported earnings over the next several years should benefit from $800 million of tax credits.



Review of Operations

Net interest income for the nine months ended September 30, 1989 declined 26%, year to year, reflecting sharply higher funding costs, together with stable yields on long-term assets. The net interest margin declined to 1.55% from 2.26%. The provision for loan losses was substantially higher at $2.05 billion, as JPM increased reserves relating to developing country debt obligations. Aided by higher fees, commissions and other income, noninterest income rose 9.6%. With noninterest expense up 7.5%, a pretax loss of $1.28 billion was incurred, versus a profit of $954 million. After taxes of $145.2 million, versus $201.7 million, the net loss was $1.43 billion ($7.87 a share), versus net income of $744 million ($4.00).

	Ed7.00	5.38	0.39	4.74

Important Developments

Oct. '89— JPM said that the $2 billion added to its allowance for credit losses reflected heightened economic and political problems in several countries where it has significant exposure. At September 30, 1989 the allowance totaled $3.04 billion, versus $1.54 billion a year earlier. During the third quarter net chargeoffs totaled $339 million of which $330 million were incurred from the sale or swap of LDC loans.

Next earnings report expected in mid-January.

Business Summary

This holding company owns Morgan Guaranty Trust, the nation's fourth largest bank. JPM emphasizes wholesale banking services to the largest corporations. In addition to lending services, it provides corporate finance and capital markets services, including bond, precious metals, and currency trading. JPM has strengths in Eurobond underwriting, and is a primary dealer in government securities. Trust operations are the largest in the nation, with $69 billion of assets under management. International operations in 35 countries account for about 46% of consolidated assets.

During 1988 average earning assets of $74.3 billion (up 3.8% from 1987) were divided: commercial loans 6%, financial loans 5%, foreign loans 24%, other loans 6%, investment securities 20%, money market instruments 39%. Average sources of funds were non-interest bearing deposits 7%, other domestic deposits 9%, foreign deposits 38%, short-term borrowings 29%, long-term debt 4%, equity 5% and other 7%.

At December 31, 1988 nonperforming loans were $1.7 billion (6.1% of loans), up from $1.6 billion (5.3%) a year earlier, reflecting largely LDC loans. The reserve for loan losses was 5.23% of loans, versus 5.58%. Net chargeoffs were 1.38% of average loans in 1988, versus 0.49% in 1987, consisting largely of LDC loans in both years.

Summary

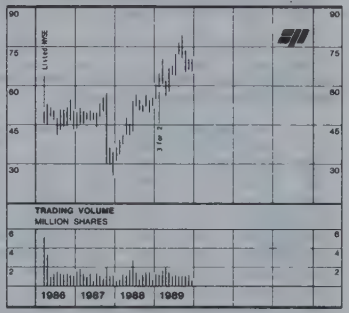
Morgan Stanley Group is a major international securities firm, serving a large and diversified group of clients and customers, including multinational corporations, governments, emerging growth companies, financial institutions, and individual investors. Earnings in 1988 and 1989 have been aided by merchant banking activities, and this source of profits could slow in 1990.

Current Outlook

Earnings, before merchant banking gains, for 1990 are projected at $8.50 a share, versus 1989's estimated $11.40, which includes an approximate $2.00 a share gain from the restructuring of an equity position.

The $0.27½ quarterly dividend is the minimum expected.

Weakness in the junk bond market and a potential slowdown of LBO activity could lead to lower earnings in 1990. MS is expected to continue to reap large advisory fees from M&A work as well as profits from its equity stakes in LBOs. MS has produced about $109 million in pretax profits from the sale of equity holdings in 1989, and a potential $140 million gain from the restructuring of Container Corp. of America is expected to be realized in late 1989 or early 1990. However, these high-return activities may tail-off, reflecting increasing concerns about risky junk bond financings. Underwriting fees and commissions may improve, while international operations are likely to grow. Gains are exepected from asset management operations.



Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,238	975	747	590
Jun.	1,516	1,048	831	691
Sep.	1,483	924	852	554
Dec.	---	1,161	718	629
	---	4,109	3,148	2,463

Total revenues for the nine months ended September 30, 1989 rose 44%, year to year. With interest expense up 86%, net revenues increased 8.6%. Investment banking fees were 6.2% higher, trading profits gained 18%, while trading of equity stakes was off 17%, primarily reflecting last year $124 million pretax gain from the sale of its Cain Chemical stake. Commissions were up 6.5%, while asset management fees advanced 4.9%. Pretax income expanded 8.0%. After taxes at 40.5%, versus 37.5%, net income advanced 2.8%.

Following preferred dividends, share earnings were $7.40, versus $7.41 (adjusted).

Dec.	E4.01	2.84	0.77	1.54
	E11.40	10.26	5.99	5.61

Important Developments

Oct. '89— MS said that third-quarter results reflected its balanced mix of worldwide businesses. MS said that mergers and acquisitions activity continued at high levels, while global sales and trading were aided by strong market positions in international equities and foreign exchange. Included in third-quarter revenues was a pretax gain of $56.2 million for the restructuring of MS's investment in Burlington Holdings Inc.

Next earnings report expected in mid-January.

Business Summary

Morgan Stanley Group is a major securities firm whose main subsidiary, Morgan Stanley & Co., is a leading investment banking company. Revenues in recent years were derived as follows:

	1988	1987	1986
Investment banking	22%	23%	27%
Principal transaction	20%	20%	19%
Commissions	6%	9%	9%
Interest and dividends	49%	45%	43%
Asset mgmt./other	3%	3%	2%

Foreign operations accounted for 16% of revenues in 1988, 22% in 1987 and 19% in 1986.

The company provides a broad range of sales, trading and research services to suppliers of capital worldwide and ranks as one of the largest dealers in equity and fixed income securities.

MS is one of 44 primary dealers in U.S. Government securities as designated by the Federal Reserve Bank of New York and is a member of the major U.S. securities and commodities exchanges, and of the Tokyo Stock Exchange.

Through its investment banking division, MS provides advice to, and raises capital for, a variety of domestic and international clients. The company participates in the underwriting of public offering of debt, equity and other securities.

The company provides advisory services, and is active in corporate merger, acquisition, defense, divestiture and reorganization transactions. MS provides advice and other services related to the development and financing of real estate. MS also manages assets for individuals, and pension and profit sharing funds.

Summary

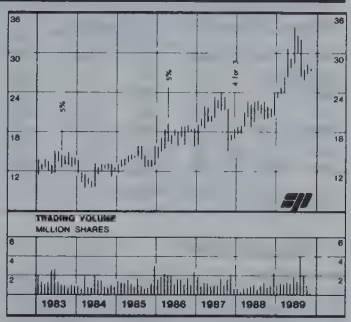
In addition to operating a large chain of public cafeterias, Morrison has a sizable institutional foodservice business and operates a variety of specialty restaurants, including the Ruby Tuesday chain. Profit growth slowed recently, largely reflecting weakness in the family dining segment. The cash dividend was increased 6.7% in September.

Current Outlook

Earnings for the fiscal year ending June 2, 1990, are estimated at $1.89 a share, up from 1988-9's $1.79 from continuing operations.

The dividend was raised 6.7%, to $0.16 a share quarterly, with the October 1989 payment.

Further growth is expected in the 1989-90 fiscal year, particularly for the specialty restaurant business. However, weakness in customer traffic for the important family dining business and favorable weather in the winter of 1988-9 may make near-term year-to-year profit comparisons somewhat difficult. MORR appears well-positioned, with the capability of using cash flow from its relatively mature cafeteria business to finance growth of its higher-margin specialty restaurant segment. An acquisition in the restaurant or contract feeding area is possible.



Revenues (Million $)

13 Weeks:	1989-90	1988-9	1987-8	1986-7
Aug.	208.2	184.7	158.9	141.7
Nov.	---	206.8	177.5	144.1
Feb.	---	207.1	176.4	147.6
May	---	[1]230.6	176.4	169.1
	---	829.2	689.3	602.5

Revenues for the 13 weeks ended September 2, 1989, increased 13%, year to year, but pretax income declined 4.5%. After taxes at 35.4%, versus 38.2%, income was down 0.3%. With 3.8% fewer shares outstanding, earnings per share increased to $0.36, from $0.35, excluding income of $0.02 from discontinued operations in the 1988-9 period. Profits from MORR's family dining business were down 31%, year to year; this more than offset increases of 24% and 44%, respectively, for the specialty restaurant and contract feeding and management segments.

Important Developments

Sep. 2'89— MORR was operating 172 family dining units, including three that were opened during the 1989-90 first quarter. MORR also operated 89 Ruby Tuesdays (six opened in the quarter), 21 L&N Seafood Grills and six Silver Spoon restaurants. In the remainder of 1989-90, MORR expected to open three additional family dining units, 20 Ruby Tuesdays, four L&N restaurants and two Silver Spoons.

Next earnings report expected in late December.

Business Summary

Morrison Incorporated is a diverse foodservice company with operations in more than 35 states. The company was founded in 1920 and had its first and only public stock offering in 1928. Currently, MORR operates one of the largest public cafeteria chains in the U.S., has more than 100 specialty restaurants and manages foodservice facilities.

Segment contributions in the 1988-9 fiscal year were:

	Revs.	Profits
Family dining	37.9%	45.7%
Specialty restaurants	20.4%	30.7%
Contract feeding & management	41.7%	23.6%

As of June 3, 1989, 169 family dining units were in operation, including 12 Sadie's Buffets. MORR's public cafeterias are located largely in the southeastern U.S.

MORR's 110 specialty restaurants at June 3, 1989, consisted of: 83 Ruby Tuesdays, specializing in salads, soups, burgers, chicken and ethnic specialties; 21 L&N Seafood Grills, which feature mesquite-grilled, sauteed and fried seafood, regional specials and pasta; and six Silver Spoon Cafes, which are casual restaurants aimed at an "upscale" market. The number of specialty restaurants operated by MORR has more than tripled since the end of 1983-4, when there were 31 in operation.

With the February 1988 acquisition of Dobbs Food Service Management, the contract feeding and management division became one of the leading such organizations providing contract foodservice nationwide. Food and beverage vending services are also provided. In addition, this division manages full-service retirement programs and provides other services.

Dec. 15'89	1989					
35 3/4	41 7/8-31 1/2	19	0.88	2.5%	NR	NA

Summary

Morton International derives the major portion of its sales and earnings from specialty chemicals, and the balance from salt and automotive inflatable restraint systems. The company was formed in July, 1989 through the spin-off of the nonaerospace operations of Morton Thiokol, Inc., which was subsequently renamed Thiokol Corp. Earnings for fiscal 1990 are expected to advance.

Current Outlook

Share earnings for the fiscal year ending June 30, 1990 are projected at about $2.70, versus the $2.03 reported for fiscal 1989.

The quarterly dividend was raised 10%, to $0.22 from $0.20, with the December, 1989 payment.

Sales for fiscal 1990 are projected at over $1.6 billion, with chemicals sales estimated at about $1.05 billion (up 12%). Lower raw material costs should boost second half chemical profits but slower electronic and automotive markets will limit the gain. Inflatable restraint systems should triple in sales to about $150 million and make a significant contribution to profits. Salt sales and profits are expected to rise modestly, reflecting good ice control pricing conditions.

Net Sales (Million $)

Quarter:	1989-90	1988-9	1987-8	1986-7
Sep.	355	322	281	255
Dec.	---	349	306	269
Mar.	---	400	340	299
Jun.	---	336	321	271
	---	1,407	1,248	1,094

Sales for the three months ended September 30, 1989 rose 10%, year to year, as airbag sales tripled. With lower chemical profits, reflecting higher raw material costs and a slowdown in the electronic materials market, and the absence of $2.5 million of nonrecurring income, net income declined 21%.

Common Share Earnings ($)

Quarter:	1989-90	1988-9	1987-8	1986-7

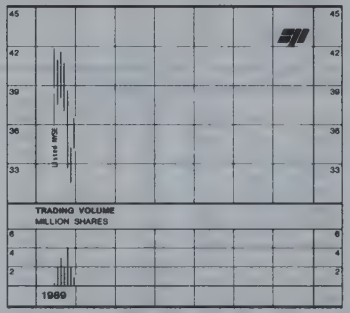
Dec	E0.65	0.65	0.59	0.50
Mar	E0.75	0.20	0.70	0.63
Jun.	E0.76	0.49	0.55	0.54
	E2.70	2.03	2.43	2.21



Important Developments

Oct. '89— MII said that quarterly comparisions should improve in fiscal 1990, as higher raw material costs in the chemical business become a less significant factor. Volume should continue to increase in the airbag business. Fiscal 1989 first quarter earnings included $2.5 million of income related to real estate transactions. Corporate expenses in the first quarter were higher, as year-earlier expenses were reduced by an allocation to the aerospace business.

Jul. '89— Morton Thiokol, Inc. (MTI) completed the spin-off of MII, consisting of its specialty chemicals, salt and automotive inflatable restraint systems (airbags) operations, through a share-for-share distribution of MII stock to MTI shareholders of record July 1. MTI was renamed Thiokol Corp. (TKC) and consists of its remaining aerospace business. A 2-for-5 reverse split of the TKC share was effected following the distribution.

Next earnings report expected in mid-January.

Business Summary

This diversified chemical company, formed by the July 1989 spin-off of the commercial businesses of Thiokol Corp. (formerly Morton Thiokol Inc.), has interests in three major areas. Contributions by segments in fiscal 1989:

	Sales	Profits
Specialty chemicals	66%	69%
Salt	30%	33%
Inflatable restraint systems	4%	-2%

Foreign operations accounted for 31% of sales and 39% of profits in fiscal 1989.

Specialty chemicals include adhesives and coatings for food packaging materials and for textile, industrial and automotive uses; liquid and powder coatings used on plastics and metals; electronic chemicals, primarily dry film photoresists, masks, and inks for semiconductors and circuit boards; polysulfide polymers used in sealants for insulated glass, rubber products, adhesives and coatings; thermoplastic polyurethanes for the adhesives and injection molding and extrustion markets; and dyes and colorants for petroleum products, fuels, inks, plastics, foods, drugs and cosmetics. Other products include heat stabilizers and lubricants for rigid PVC; reducing agents for bleaching paper; industrial biocides; metalorganic chemicals; and magnesium and bromide compounds.

Salt is marketed under the Morton and Windsor brands for human and animal consumption; residential, municipal, and industrial water conditioning; highway and residential ice control; and food and meat processing and chemical uses.

Inflatable restraint systems manufactures gas generators and modules used in automotive airbag passive restraint systems.

Dividend Data

The company or predecessor companies have paid dividends since 1925. Quarterly dividends for MII were initiated in 1989 as follows:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.20	Aug. 14	Aug. 23	Aug. 29	Sep. 11'89
0.22	Oct. 26	Nov. 24	Nov. 30	Dec. 11'89

Next dividend meeting: Jan. 25'90.

Finances

In July, 1989 Morton Thiokol, Inc. (MTI) completed the spin-off of MII, consisting of its specialty chemicals, salt and automotive inflatable restraint systems (airbags), through a share-for-share distribution of MII stock to MTI shareholders of record July 1. MTI was renamed Thiokol Corp. (TKC), and consists of the remaining aerospace business. A 2-for-5 reverse split of the TKC share was effected following the distribution. MTI shareholders approved the spin-off on June 23, 1989.

Capitalization

Motorola, Inc.

NYSE Symbol MOT Options on ASE (Jan-Apr-Jul-Oct) In S&P 500

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Oct. 3'89	1989					
56⅞	62-39½	15	0.76	1.3%	A-	1.54

Summary

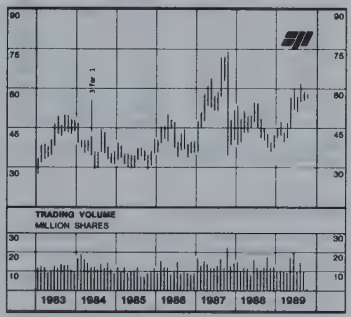
Motorola holds strong positions in semiconductor products and in two-way radios and other electronic communication systems. Data communications products, information systems, Government electronic equipment, and automotive and industrial electronic products are also manufactured. Led by sharp gains in cellular mobile telephone systems and computer systems, earnings for 1989 are likely to rise for the fourth consecutive year, despite a large nonrecurring charge. In the absence of the charge and reflecting cost reductions, further earnings progress is likely in 1990.

Current Outlook

Earnings for 1990 should approximate $4.50 a share, up from the $3.90 estimated for 1989.

The $0.19 quarterly dividend is likely to be increased in late 1989.

Sales for 1990 should rise moderately, led by continued strong growth of the general systems group. However, the gain will be restrained by only a modest increase in semiconductor sales, due to minimal industry growth. Growth of the information systems group and government electronics group segments is also likely to be limited. A possible decline in domestic automotive production would restrain results in products sold to that industry, despite rising electronic content in cars. Recent efforts to reduce costs, the absence of nonrecurring charges and the higher volume should allow margins to expand. Long-term prospects are enhanced by MOT's strong management and concentration in high growth areas.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	2,175	1,955	1,547	1,339
Jun.	2,385	2,095	1,639	1,499

Dec.	---	2,193	1,850	1,619
	---	8,250	6,707	5,888

Sales for the six months ended July 1, 1989 increased 13%, year to year, led by a 62% gain in the general systems group. Restrained by a 53% increase in interest expense (net), margins widened only slightly, and pretax income advanced 14%. After taxes at 27.9%, versus 30.4%, net income rose 18%, to $2.13 a share from $1.81.

Business Summary

Motorola is a diversified manufacturer of electronic products. Industry segment contributions in 1988 were:

	Sales	Profits
Communications	35%	40%
Semiconductor	32%	33%
General systems	13%	13%
Information systems	7%	9%
Government electronics	8%	3%
Other	5%	2%

Foreign operations accounted for 36% of sales and 27% of operating profits in 1988. Sales to the U.S. Government were 13% of revenues.

Motorola is a principal supplier of mobile and portable FM two-way radio and radio paging communications systems.

The company is also a leading supplier of semiconductors, including memory circuits, microprocessors, other logic and linear integrated circuits, and discrete semiconductors.

The general systems segment produces cellular mobile telephone systems and computer systems. Information systems products consist of high speed modems, multiplexers, network processors, local area networks and related integrated equipment, as well as modems and other digital interface devices.

Electronic products are produced for governments.

Other products include automotive and electronics products.

Dividend Data

Dividends have been paid since 1942. A "poison pill" stock purchase right was adopted in 1988.

Summary

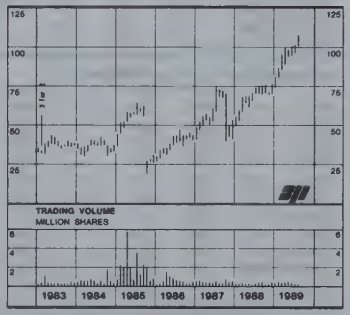
This diversified communications company owns four TV and seven radio stations, publishes 14 daily and 40 non-daily newspapers, operates cable systems serving some 320,000 subscribers and produces and syndicates TV programming, including the Phil Donahue and Sally Jessy Raphael shows. Multimedia is recovering ahead of schedule from a 1985 recapitalization that greatly increased its debt. Both near- and longer-term earnings prospects are quite favorable.

Current Outlook

Earnings for 1990 are tentatively projected at about $3.20 a share, up 16% from the $2.75 estimated for 1989.

Directors suspended cash dividend payments following the 1985 recapitalization.

Higher revenues in 1990 will reflect gains from each major business segment, with particular strength in cable and entertainment. Profitability should be strong, aided by lower newsprint prices in particular, plus ongoing cost-containment measures. Net income should get an additional boost from lower debt-service requirements. Longer-term prospects for revenues and earnings are also quite favorable.



Operating Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	106.3	99.98	89.80	81.84
Jun.	121.02	114.29	107.27	97.12
Sep.		107.95	102.49	92.45
Dec.		117.37	111.20	100.38
		439.59	410.75	371.80

Operating revenues for 1989's first half rose 6.1%, year to year. Operating profits gained 13% as increases from broadcasting, cablevision and entertainment more than countered reduced profits from newspaper operations. After other items, including reduced interest expense, pretax earnings advanced 54%. Following taxes at 42.0%, versus 46.0%, net income climbed 65%, to $1.24 a share, from $0.77.

Important Developments

Jul. '89— As of June 30, 1989, Multimedia had repaid a total of $298 million of the $650 million in bank debt incurred in the 1985 recapitalization. About $51 million in debt was repaid during the first half of 1989.

Feb. '89— The company said that it had continued to prepay bank debt and had reduced its credit line, such that the overall savings in interest costs in 1989 should approximate $3 million. The company said that its main thrust is to continue to pay down bank debt. Thus, no major acquisitions are planned at this time. Capital expenditures in 1989 are estimated at $26 million.

Sep. '88— Multimedia Entertainment premiered a new comedy/game show, SWEETHEARTS, seen weekdays in 70% of the country.

Next earnings report expected in late October.

Business Summary

Multimedia owns and operates four TV and seven radio stations, cable TV systems and newspapers and produces and syndicates various TV programs. Contributions by business segment in 1988 were:

	Revs.	Profit
Broadcasting	31%	32%
Newspapers	31%	28%
Cablevision	23%	20%
Entertainment	15%	20%

Broadcast properties include four network-affiliated VHF TV stations, in Cincinnati, Ohio, St. Louis, Mo., Knoxville, Tenn., and Macon, Ga. AM and FM radio stations are owned and operated in Greenville, S.C., Macon, Ga., Shreveport, La., and an FM station in Milwaukee, Wis.

A subsidiary produces and syndicates TV programs, including the nationally syndicated Phil Donahue Show (which is seen in 209 U.S. markets), the Sally Jessy Raphael show (seen in 145 markets), Young Peoples Specials, Sweethearts, and Music City News Awards Show, as well as other special TV programming.

The cable television division, established in 1980, had about 321,000 subscribers as of March 30, 1989, in Kansas, Oklahoma, Illinois and North Carolina.

Multimedia publishes the only daily and Sunday newspapers in 14 markets and also publishes 40 non-daily publications. Combined average paid circulation in 1988 was 332,000 daily, 353,000 Sunday and 149,000 non-daily.

Dividend Data

Dividends were suspended in the fourth quarter of 1985 as a result of the significant increase in long-term debt and the debt covenants included in the recapitalization credit agreements.

Finances

In October 1985, the company completed a merger with an insider group, and a recapitalization of Multimedia was effected. The transaction included the issuance of 11 million new common shares, plus cash and debentures valued at a total of some $826 million. Under revised terms of the agreement, holders of old Multimedia common stock could elect to exchange each share for one of the following: $125 principal of a new 16% discount debenture and a right to purchase either (a) for $5.27 cash, 0.527 of a share of the surviving company or (b) for $5.80 cash, 0.58 of a share of the surviving corporation; $52.46 cash; $47.19 cash and 0.527 of a share of the surviving corporation; or $46.66 cash and 0.58 of a share of the surviving corporation.

Capitalization

Long Term Debt: $769,075,000 (6/89).

Common Stock: 11,077,206 shs. ($0.10 par).
About 15% is closely held.
Institutions hold some 61%.

Murphy Oil

NYSE Symbol MUR Options on Pacific (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Nov. 9'89	1989					
38½	44-29⅝	25	1.00	2.6%	B-	0.94

Summary

Murphy is an integrated crude oil and natural gas company, and owns a 61% interest in Ocean Drilling & Exploration Co. (ODR: NYSE), an operator of a large fleet of contract drilling rigs. In October, 1989 ODR announced a plan to dispose of its unprofitable contract drilling business. A new subsidiary consisting of the contract drilling business would make an initial public offering of 15% to 20% of its common stock. Subsequently, ODR would make an exchange offer of the contract drilling stock for its own shares and then distribute remaining shares to existing ODR stockholders on a pro rata basis.

Current Outlook

Share earnings for 1990 are projected at $1.35, versus the $1.05 estimated for 1989. In both years, share earnings include MUR's interest in the contract drilling business prior to divestiture.

The dividend is expected to be maintained at $0.25 quarterly.

Revenues in 1990 are projected to be up, reflecting an improved outlook for the natural gas industry. Downstream margins should strengthen due to tight capacity and potentially soft feedstock costs. The loss from the contract drilling business should narrow due to its planned divestiture.

Total Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	387	357	333	418
Jun.	435	371	368	324
Sep.	407	382	427	306
Dec.	---	415	390	322
	---	1,525	1,518	1,370

Revenues for the nine months ended September 30, 1989 rose 11%, year to year, owing mostly to gains in the U.S. refining and marketing segment. A sharp improvement in exploration and production profits offset deterioration in the contract drilling business. Net income almost doubled, to $25.7 million ($0.76 a share) from $13.1 million ($0.39).

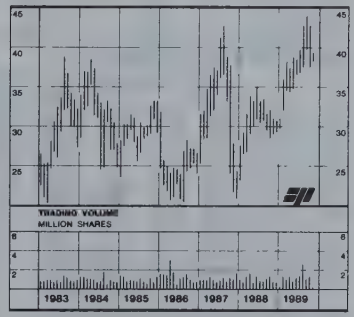
Dec.	E0.29	0.75	d1.83	d6.14
	E1.05	1.14	d1.29	d5.76



Important Developments

Oct. '89— MUR and Ocean Drilling & Exploration Co. (ODR), MUR's 61%-owned subsidiary, jointly announced that ODR's board of directors has decided to restructure ODR by separating its unprofitable contract drilling business from its other businesses. ODR will form a new subsidiary consisting of the contract drilling business which would make an initial public offering of 15% to 20% of its shares. ODR currently anticipates that during mid-1990 it will make an exchange offer of contract drilling stock for a portion of outstanding ODR common. Upon completion of the exchange offer, shares of the contract drilling business then held by ODR would be distributed (the "spin-off") to remaining ODR stockholders on a pro rata basis. MUR will report contract drilling results as continuing operations in its financial statements until after the spin-off.

Next earnings report expected in late January.

Business Summary

Murphy Oil is a medium-sized integrated crude oil and natural gas company operating domestically and internationally, with interests also in offshore drilling, farming and timber.

Net Profit/Loss (Million $)	1988	1987
U.S. expl. & prod.	$22.7	$44.2
Foreign expl. & prod.	4.5	24.1
U.S. ref. & mkt.	36.3	-0.7
Foreign ref. & mkt.	18.3	7.9
Contract drilling	-32.3	-45.2
Farm & timber	5.7	6.8
Diving	-0.9	-7.4

Murphy Oil U.S.A. is a domestic integrated oil company. The Murphy Eastern Oil Co. subsidiary provides technical services for MUR's subsidiaries in the Eastern Hemisphere. Murphy Oil Co. Ltd. is engaged in oil and gas exploration, production and transportation in Canada. The 61%-owned Ocean Drilling & Exploration Co. (ODR) is a major contract offshore driller and looks for oil/gas on its own. Deltic Farm & Timber Co. is engaged in the farming, timber, and land management businesses.

In 1988 crude oil and natural gas liquids production averaged 47,704 barrels a day (49,086 b/d in 1987), of which 33% was produced in the U.S.; natural gas sales were 193.9 million cubic feet a day (172.2), of which 80% was in the U.S.; and crude oil processed 116,415 b/d (109,294), and petroleum product sales 127,950 (122,245).

Auditors noted in their opinion on MUR's 1988 financial statements uncertainties associated with the liquidation of Mentor Insurance Limited, a subsidiary of 61%-owned ODR.

Dividend Data

Dividends have been paid since 1961.

Summary

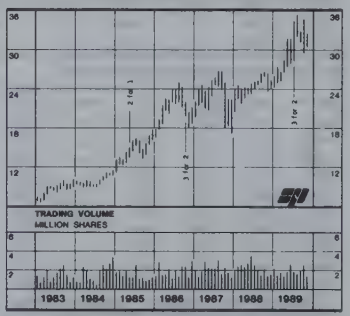
This bank holding company, the 28th largest in the U.S., owns National Bank of Detroit, and has recently expanded through acquisitions into neighboring Illinois and Indiana. Serving corporate clients in the region has been NBD's traditional strength, though retail banking is receiving increased emphasis. Superior loan quality, good cost controls, and a higher yielding mix of assets should help earnings growth in 1990.

Current Outlook

Earnings for 1990 could reach $3.85 a share ($3.70 fully diluted), up from the $3.55 ($3.40) projected for 1989.

Dividends were raised 14%, to $0.32 from $0.28, with the November, 1989 payment.

Loan growth in 1990 may not exceed 6%-7% in a cooling economy, with the strongest growth in the small to medium business and consumer lending areas. The net interest margin should continue to benefit from a greater proportion of these higher yielding loans. NBD has maintained an excellent record for loan quality. With the allowance for loan losses covering nonperforming loans by over 2:1, the provision for loan losses could be low. LDC loans of $159 million (primarily to Mexico) are reserved at 50%, and represent only 1% of total loans. NBD's strong electronics capability should help it develop new sources of fee income, including fees derived from transaction processing and the expanding trust operations. Expense control should continue to be good, aided by benefits from integration of recent acquisitions. Further acquisitions in the Great Lakes region are possible.



Review of Operations

Net interest income for the nine months ended September 30, 1989 advanced 12%, year to year, reflecting a 4.2% increase in earning assets and a higher-yielding mix of assets. The provision for loan losses was 22% higher, at $40 million, due to higher chargeoffs and increasing nonperforming loans. Aided by higher trust fees and a small investment securities gain, against a $2.8 million loss, noninterest income increased 8.2%. With noninterest expense up 6.4%, pretax earnings rose 21%. After taxes at 20.6%, versus 17.2%, net income was up 16%. Share earnings were $2.67 ($2.57 fully diluted), versus $2.34 ($2.24; adjusted).

Common Share Earnings ($)

Quarter:	1989	1988	1987	1986
Mar.	0.89	0.73	0.67	0.65
Jun.	0.92	0.79	0.22	0.68

Dec.	E0.87	0.86	0.72	0.69
	E3.55	3.21	2.31	2.58

Important Developments

Oct. '89— NBD attributed the wider net interest margin to the restructuring of its securities portfolio (reducing U.S. Treasury securities and increasing holdings of higher yielding U.S. Government Agencies) as well as continued growth in business and consumer loans.

Next earnings report expected in mid-January.

Business Summary

NBD Bancorp is the parent of National Bank of Detroit, Michigan's largest, and 18 other Michigan banks (322 branches) which contributed 79% of corporate earnings in 1988. Another 12 banks in the Chicago area (20 branches) and one in Indiana (16) contributed 17%. NBD's traditional strength is providing services to corporate clients, including international trade finance, but retail banking services are receiving greater emphasis. NBD also has large payments processing operations, including check clearing and switching for the CIRRUS teller machine network. Nonbank subsidiaries include large trust operations, mortgage banking (14 offices), commercial finance, insurance, consumer credit processing, and discount brokerage companies, which together provided 4% of income in 1988.

In 1988 average earning assets of $20.8 billion (up 5.3% from 1987) were divided: commercial loans 36%, real estate loans 14%, consumer loans 12%, foreign loans 6%, investment securities 25%, money market instruments 7%. Average sources of funds were demand deposits 16%, savings deposits 15%, time deposits 48%, short-term borrowings 11%, long-term debt 2%, equity 6% and other 2%.

At year-end 1988 nonperforming assets were $83 million (0.57% of loans), down from $107 million (0.81%) a year earlier. Net chargeoffs in 1988 were 0.39% of average loans, against 0.33% in 1987.

NYSE Symbol NBI Options on CBOE (Feb-May-Aug-Nov)

Price	Range	P-E Ratio	Dividend	Yield	S&P Ranking	Beta
Dec. 4'89	1989					
1/2	2 3/4-1/2	NM	None	None	C	1.65

Summary

In November, 1989 NBI announced that it would undertake a transition from a manufacturer of networked computer systems to a software and service concern. It also said that it would reduce its workforce by about 167 field sales employees and 266 headquarters personnel. NBI has operated at a loss for the past 15 quarters. On November 15, 1989 NBI missed an interest payment on its 8.25% convertible subordinated debentures, although it was allowed a 30-day grace period for payment.

Business Summary

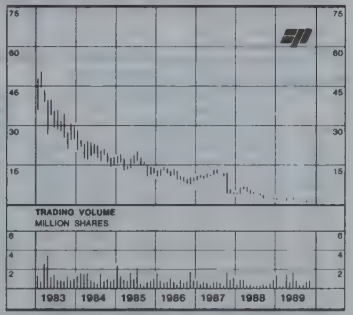
NBI designs, manufactures, markets and services networked computer systems and software products which address the information management needs of professionals and workgroups. It also markets and distributes commodity and peripheral products which support and enhance NBI networked computer systems.

Foreign operations contributed 12% of revenues in fiscal 1989, compared with 13% in fiscal 1988, and the U.S. Government accounted for 9.2% of revenues in fiscal 1989, versus 10% in fiscal 1988.

NBI provides dedicated word processing and office automation systems, serving the information management and productivity needs of professionals, managers and administrative personnel in the office environment. In response to customer needs, NBI has transitioned its product offerings from proprietary word processing and office automation systems to networked computer systems based on industry standards.

The company's key strategic product line, OfficeWorks, provides connectivity across multiple operating systems and supports industry standards. OfficeWorks, which began shipping in fiscal 1989, competes in the personal computer networking market and adds value with its information management applications.

The company's Legend word processing and page layout software provides tools for handling the document creation process from start to finish in one Microsoft Windows-based package. Legend simplifies text and page formatting, displaying a document exactly the way it will print. In October, 1989 NBI introduced the latest version of this product, Legend 2.0, which offers enhanced performance, speed and functionality.



Important Developments

Dec. '89— NBI sold its Integrated Solutions Inc. subsidiary to Mizar, a Texas-based privately held company.

Nov. '89— NBI failed to make a $1.4 million interest payment due November 15 on its 8.25% convertible subordinated debentures due 2007. Failure to make the payment before the end of a 30-day grace period would mean that the trustee under the debentures' indenture covenants or the holder of not less than 25% of the debentures' principal amount could declare the entire principal of about $34 million immediately due and payable. Earlier, management announced that the company was undertaking an immediate transition from a manufacturer of networked computer systems to a software and service concern. The restructuring would entail a workforce reduction of about 167 field sales employees and 266 headquarter personnel. NBI added that the foundation of its new direction would be the recently released Legend 2.0 word processing program, document management applications and the company's customer service and support business.

Next earnings report expected in mid-February.

d-Deficit

Dividend Data

No cash dividends have ever been paid. A "poison pill" stock purchase right was adopted in January, 1989.

Finances

In November, 1989 the company sold its Orange County, California plant to an investor group for about $2.4 million.

Management feels that the conservative use of its cash is critical to the company's future ability to operate. At the end of fiscal 1989 NBI had substantially exhausted its available borrowings under its current lines of credit. To meet working capital requirements in fiscal 1990, the company may borrow against and/or sell unpledged assets, including buildings and land listed for sale in Colorado, California and Alaska.

46½	55-27	12	1.20	2.6%	A	1.13

Summary

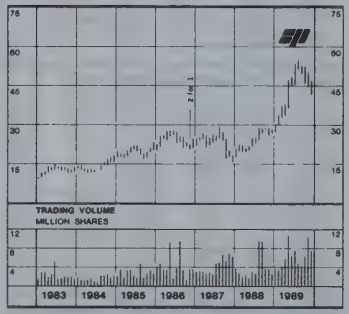
NCB is the largest superregional bank holding company in the Southeast. Headquartered in North Carolina, it has a significant presence in Florida and South Carolina, as well as in Georgia and Washington, D.C. In August, 1989 NCB purchased the remaining 51% in the subsidiary banks of the failed First RepublicBank, Texas, (now NCNB Texas) for $800 million. This acquisition should benefit share earnings in 1990 and beyond, as should efficiencies from integrating earlier purchases.

Current Outlook

Earnings for 1990 could reach $6.00 a share, up from the $4.50 projected for 1989.

The quarterly dividend was raised 20%, to $0.30 from $0.25, with the September, 1989 payment.

NCB's acquisition of the failed First RepublicBank (now NCNB-Texas) positions the company for strong earnings growth in 1990 and beyond. NCB has effectively insulated itself from any credit risk in the Texas acquisition via the Special Asset Division (problem assets) which will revert to the FDIC between November, 1991 and November, 1993. Thus, while the Texas market is still troubled, NCB has purchased an attractive turnaround situation relatively inexpensively. NCB has raised about $1.9 billion in the past year; besides financing the Texas purchase, proceeds could be earmarked for further acquisitions. Southeastern operations should benefit from continued healthy loan growth and efficiencies from the integration of the acquisitions of recent years.



Review of Operations

Net interest income for the nine months ended September 30,1989 advanced 90%, year to year, reflecting the Texas acquisition. Average earning assets increased to $47.6 billion, from $25.6 billion. The provision for loan losses was 92% higher, at $170 million. With noninterest income rising 140% (aided by $113 million in securities gains), and noninterest expense increasing 108%, pretax earnings doubled. After taxes at 13.8%, versus 23.9%, and the FDIC's interest in the earnings of NCNB-Texas of $116 million in 1989, net income expanded 65%. Share earnings were $3.30 compared with $2.22.

	E4.50	2.90	2.03	2.53

Important Developments

Oct. '89— NCB noted that included in third quarter earnings were gains on the sale of investment securities of $56.1 million ($0.59 a share) after taxes and the FDIC's interest. NCB said the sale of securities by the Texas bank occurred because the purchase price paid to the FDIC (for the remaining 51% of NCNB Texas) included an allocation of securities gains. NCNB Texas contributed $1.08 per share to earnings for the first nine months of 1989. In August, NCB completed the acquisition of NCNB Texas National Bank by purchasing the remaining 51% from the FDIC for $800 million (NCB had acquired a 20% interest in November, 1988 for $210 million and 29% in April, 1989 for $310 million). Under terms of the agreement with the FDIC, the bank may transfer to the FDIC, via the Special Asset Division, an unlimited amount of bad loans in 1989, and up to $750 million in 1990.

Next earnings report expected in mid-January.

Business Summary

NCNB, the largest banking organization in the Southeast, is the parent of NCNB National Bank of North Carolina, the largest bank in that state (with 226 branches), and banks in Florida (225 branches), South Carolina (115), Georgia (1), Maryland (8) and Virginia (2). In August, 1989 NCNB increased its ownership of NCNB-Texas National (formerly First RepublicBank) to 100%, from 49%. At September 30, 1989 NCNB-Texas had assets of $29.5 billion. In addition to providing corporate and retail banking services, NCNB is active in international and merchant banking, insurance, trust, investment management and discount brokerage.

During 1988 average earning assets of $25.5 billion (up 9.0% from 1987) were divided: commercial loans 42%, consumer loans 17%, real estate loans 11%, investment securities 22%, money market assets 8%. Average sources of funds were demand deposits 12%, consumer deposits 38%, other time deposits 17%, short-term borrowings 23%, long-term debt 2%, equity 6%, and other 2%.

At year-end 1988 nonperforming assets were $226 million (1.20% of loans), down from $297 million (1.74%) a year earlier. The reserve for loan losses was 1.22% of loans, versus 1.50%. Net chargeoffs during 1988 were 0.83% of average loans, versus 1.08% in 1987.

Dividend Data

Dividends have been paid since 1903. A dividend reinvestment plan is available.

Summary

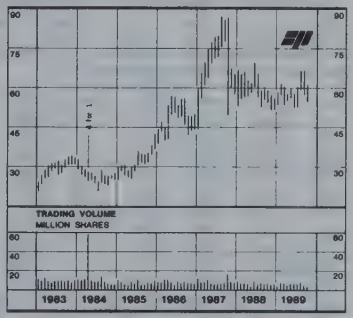
This company manufactures business information processing systems, including a range of computer systems, automated teller machines, point-of-sale terminals, and data communications products. Although earnings in 1989 will be impacted by intense competition in a soft U.S. market, earnings growth could rebound in 1990 as demand for banking automation systems, retail systems, and new products stimulates orders.

Current Outlook

Earnings for 1990 are projected to rise to $5.70 a share from the $5.30 estimated for 1989.

The $0.33 quarterly dividend is expected to be increased in early 1990.

Revenues in 1990 are expected to show only single-digit growth. Domestic sales could reflect the industrywide weakness in demand for high-end and midrange systems. International demand is expected to remain strong but could be penalized by a strong dollar. However, demand for banking automation systems, retail systems and the Tower UNIX-based multiuser systems should continue to be strong and several new personal computer products should help orders. Although gross margins may continue to be under pressure, selling, general and administrative expense is likely to decline as a percent of revenues with cost containment programs. Share earnings will continue to benefit from stock repurchases.



Revenues (Million $)

Quarter:	1989	1988	1987	1986
Mar.	1,250	1,281	1,122	961
Jun.	1,527	1,497	1,360	1,169
Sep.	1,391	1,407	1,340	1,177
Dec.	---	1,804	1,819	1,575
	---	5,990	5,641	4,882

Revenues for the nine months ending September 30, 1989 fell 0.4%, year to year, as sales and rental revenues declined 0.5% and services revenue decreased 0.2%. Gross margins narrowed, reflecting intense competition in the soft U.S. market. Despite ongoing cost containment measures on marketing, general and administrative expenses, pretax income fell 9.1%. After taxes at 44.2%, versus 44.4%, net income was down 8.7%. Share earnings were $3.40 on 6.3% fewer shares, versus $3.49.

		E5.30	5.33	4.51	3.42

Important Developments

Oct. '89— NCR said that the U.S. dollar value of third-quarter worldwide orders showed a "very good gain" over the prior year and set an all-time record for a third quarter. Orders in the U.S. showed good gains while orders overseas posted substantial gains, paced by the Pacific Group. Excluding the impact of currency changes on order backlogs in both periods, the U.S. dollar value of worldwide orders recorded a gain over the prior year. Total orders also showed a gain when measured on a local currency basis.

Next earnings report expected in mid-January.

Business Summary

NCR manufactures business information processing systems. Revenues in recent years were:

	1988	1987
Industry-specific workstations	22%	21%
Multiuser systems	13%	15%
Workstations	8%	8%
Large computer systems	6%	6%
Communications processors & other	6%	6%
Business forms/supplies	8%	8%
Components	2%	2%
Services	35%	35%

Foreign operations contributed 58% of revenues in 1988 and 56% of operating profits.

Industry-specific workstations, such as point-of-sale and automatic teller terminals, are primarily sold into the retail and financial markets. General-purpose workstations include personal computers, office automation workstations and terminals. Multiuser systems are small and mid-sized computers for departmental use and interactive and batch processing. Large systems are designed for online transaction processing and batch processing. Other related products and services include communications processors, semiconductors and components, and software.

Dividend Data

Dividends have been paid since 1934. A dividend reinvestment plan is available. A "poison pill" stock purchase right was adopted in 1986.

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.33	Jan. 18	Apr. 10	Apr. 14	May 12'89
0.33	Apr. 19	Jul. 10	Jul. 14	Aug. 11'89
0.33	Jul. 19	Oct. 6	Oct. 13	Nov. 10'89
0.33	Oct. 19	Jan. 5	Jan. 12	Feb. 9'90

Next dividend meeting: mid-Jan. '90.

Finances

NCR repurchased 6.6 million of its common shares in the first nine months of 1989 under a 10 million share buyback plan authorized in December, 1988. Substantially all of the 10 million shares under an October, 1987 authorization had been repurchased. In 1988 NCR issued $131 million of medium term notes under a $600 million note shelf registration which became effective on September 15, 1988.

Capitalization

Long Term Debt: $177,295,000.

Minority Interest: $206,177,000.

Common Stock: 75,795,959 shs. ($5 par).
Institutions hold about 64%.
Shareholders of record: 40,392.

Summary

The largest Japanese manufacturer of communications equipment and systems and of integrated circuits, this company is also a leading producer in Japan of computers and industrial electronic systems. NEC achieved substantial growth in sales and earnings in 1988-9 as demand for the company's products was boosted by the strong domestic economy and the generally favorable North American and European economies. Sales and earnings were expected to advance 8% and 24%, respectively, in 1989-90.

Business Summary

Most of the products of NEC Corporation (formerly Nippon Electric Co.) fall into four main categories. Contributions to sales in recent fiscal years were:

	1989	1988	1987
Communications	26%	28%	29%
Computers & industrial electronic systems	43%	42%	41%
Electron devices	19%	17%	17%
Home electronics	7%	8%	8%
Other	5%	5%	5%

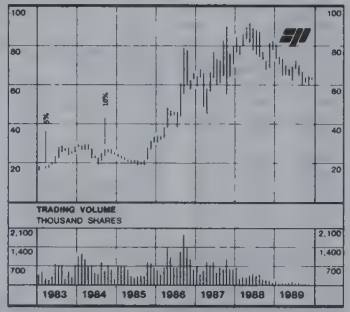
The company markets in excess of 15,000 products in more than 140 countries. Including exports from Japan, international sales accounted for 25% of total sales in 1988-9.

Major products of the communications group include: digital and electronic switching systems for central and PBX uses, carrier transmission equipment, PCM communications systems, power-line carrier equipment, fiber-optic transmission systems, microwave communications systems and facsimile equipment.

Computer and industrial electronic systems consist of mainframe computers, small business computers, supercomputers, minicomputers, software products, peripheral and terminal equipment, word processors, optical disc players, CAD/CAM and CAE systems and robots.

Electron devices include memories, microcomputers and software, linear ICs, gate arrays, standard cells, charge-coupled devices, hybrid ICs, transistors, diodes, electronic tuners, optical semiconductor devices, color display tubes, plasma display panels, capacitors, hermetic seals, gas lasers and relays.

Among NEC's home electronic products are TV receivers and projectors, DBS receivers, VCRs, compact disc players, portable video cameras, videotex terminals, lighting products, kitchen appliances and air conditioners.



Other products include VAN services, electrical connectors, aircraft electronics, semiconductor manufacturing and vacuum equipment.

NEC's product development and marketing strategy is centered on the integration of communications and computers, which it calls the C&C concept.

Important Developments

Dec. '89— NEC announced that it will begin selling compact portable telephones in the U.S., the U.K. and Hong Kong in January 1990. The company projected monthly sales of about 20,000 units, at a price of $2,200 per phone. Separately, NEC said it began selling the 98 Note notebook-size personal computer in Japan, and expected to sell 150,000 units, at $1,734 each, in the first year.

Review of Operations

Net sales for the six months ended September 30, 1989, advanced 10%, year to year, reflecting gains in all categories, particularly computers and industrial electronic systems and electronic devices. Overseas sales rose 20%. Margins widened, and pretax income expanded 52%. After taxes at 56.0%, versus 47.4%, and equity earnings from affiliated companies, income was up 27%.

In November 1989, NEC said it expected net income in 1989-90 to rise about 24% from that of the preceding year, on an 8% increase in sales. Pretax income was estimated to be up 29%.

Dividend Data

Cash has been paid each year since 1951. Recent payments, net after 15% Japanese tax to U.S. residents, were:

Amt. of Divd. $	Date Decl.	Ex-divd. Date	Stock of Record	Payment Date
0.132	---	Mar. 23	Mar. 30	Jul. 15'89
0.124 Appx.	---	Sep. 25	Sep. 29	Jan. 3'90

Finances

In September 1989, NEC America said it opened a 200,000-sq.-ft. facility in Hillsboro, Ore., to manufacture and assemble fiber optic equipment, cellular phones, pagers, data modems and fax machines. Separately, the company introduced the ProSpeed CSX personal computer, the first color laptop computer available for purchase in the U.S.

In May 1989, the NEC Home Electronics (USA) subsidiary introduced the first "improved definition" big-screen television, or IDTV. The unit has a suggested retail price of $6,499.

In February 1989, the company issued U.S. $700 million in 4⅛% bonds with warrants in Europe, which will become due in February 1993. In October 1988, NEC issued in Japan, ¥120 billion ($896 million) of 1.9% unsecured convertible debentures. Proceeds were to be used for capital expenditures and to meet the financial needs of subsidiaries.

In May 1987, NEC and Honeywell, Inc. announced plans to enter the U.S. supercomputer market. The supercomputers would be made by NEC in Japan and marketed by an NEC-Honeywell joint venture. Ranging in price from $8 million to $20 million, the three machine line would include NEC's SX-2-400, said to be the most powerful single-processor supercomputer in the world.

Capitalization

Dec. 27'89	1989					
24⅜	28-18½	9	0.60	2.5%	B-	1.79

Summary

This company is a major producer of titanium dioxide pigments, rheological additives, and anticorrosive pigments. In December, 1989 Valhi, Inc. (VHI) withdrew its offer to acquire the 34% interest in NL it did not already own through an exchange of 1.5 VHI common shares for each remaining NL common share. In November NL said that it would support Georgia Gulf Corp.'s leverage recapitalization plan. NL has raised its interest in Lockheed Corp. to 16.9%.

Current Outlook

Share earnings for 1990 are projected at about $2.75, versus the $3.00 (including a nonrecurring gain) expected for 1989.

Dividends should to continue at $0.15 quarterly.

Operating earnings in 1990 should benefit from continued strong worldwide demand and higher selling prices for titanium dioxide pigments. The stronger U.S. dollar will limit profit gains. The planned recapitalization of 9.9%-owned Georgia Gulf could result in a substantial profit.

Net Sales (Million $)

Quarter:	1989	1988	1987	[1]1986
Mar.	244	257	308	185
Jun.	269	268	347	131
Sep.	250	247	356	114
Dec.		235	360	119
		1,007	1,371	549

Sales for the first nine months of 1989 declined 1.3%, year to year, as the disposal of two chemical units, lower pigment volume, and changes in currency exchange outweighed increased pigment prices. Including pretax gains of $33.5 million on the disposal of business units, and after taxes of 36.7% against 50.0%, net income from continuing operations advanced 47%. Share earnings were $2.26, versus $1.52, before special credits of $0.04 against $0.13, and income from discontinued operations of $0.09 in 1988.

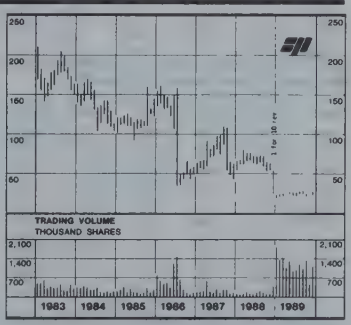
Dec.		0.49	1.1	d1.1
		2.02	d7.0	d63.1



Important Developments

Dec. '89— Valhi, Inc.(VHI) withdrew its proposal to acquire the 34% interest in NL that it did not already own. Under the offer, each remaining share of NL would have been exchanged for 1.5 shares of VHI common stock. VHI is 88% owned by Harold Simmons, chairman of both companies. VHI said that its decision to withdraw the proposal followed a preliminary determination by the investment banking firm retained by a special committee of NL's board that it would be unable to support the proposed exchanged ratio. Separately, NL raised its interest in Lockheed Corp. to 16.9% from 10.8%. NL also said that it would support 9.9%-owned Georgia Gulf Corp.'s leveraged recapitalization proposal, and that it was also willing to reinstate its offer to acquire GGC for $50 a share in cash, if requested to do so by GGC's directors.

Next earnings report due in mid-February.

Business Summary

Following the December, 1988 restructuring, NL now consists primarily of NL Chemicals, Inc. Contributions in 1988:

	Sales	Profits
Pigments	78%	87%
Specialty chemicals	22%	13%

Foreign operations accounted for 72% of sales and 80% of profits in 1988.

Titanium dioxide pigments are used for imparting whiteness, brightness, and opacity to coatings, paper, plastics, rubber and other products. NL is the world's fourth largest producer with an estimated 11% share of the world market. NL operates four plants in Western Europe and one plant in Quebec, Canada. Production in 1988 was 309,000 metric tons. NL plans to build a 80,000 ton plant in the U.S. with start-up scheduled for late 1991. About 51% of 1988 sales were to Western Europe, with 21% to the U.S., 12% Canada, with the remaining 16% to the rest of the world.

Specialty chemicals consists of rheological additives, used for suspension and viscosity control in coatings, inks, grease, cosmetics, sealants and adhesives; and anticorrosive pigments.

Finances

In December, 1988 NL completed a restructuring (approved by shareholders December 22) in which NL's petroleum services business, conducted by Baroid Corp., was spun off to NL common shareholders on a share for share basis, a 1-for-10 reverse split of the common stock was effected, and the Series C Depositary receipts was redeemed for 59.8 million post-split NL common shares. Holders of 704,720 Depositary Receipts elected to receive $15.66 in cash per receipt. Formers holders of the Depositary Receipts now hold 91% of the total NL common stock, while previous NL common shareholders now own 9%.

Dividend Data

Dividends have been paid since 1906. A dividend reinvestment plan is available.

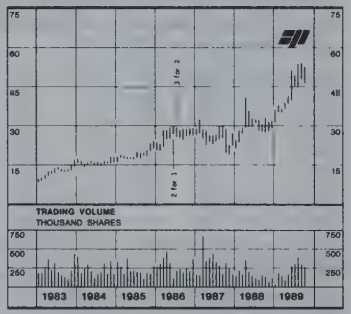
Summary

The May, 1989 acquisition of Hyster Co. for $620 million plus $80 million of debt assumption more than doubled this firm's revenue base and enlarged its position in the forklift truck market. In addition to its core coal mining business, NC also is a leading manufacturer of small household appliances through Proctor-Silex, which was acquired in 1988. Profits should advance moderately in 1990, as the full-year inclusion of Hyster outweighs softening demand for capital equipment and consumer appliances.

Current Outlook

Profits for 1990 are projected at $5.30 a share, versus the $5.15 anticipated for 1989.
Dividends, presently at $0.14½ quarterly, could be lifted moderately in 1990.

While profit comparisons in 1990 will benefit from the full-year inclusion of Hyster, earnings for the materials handling segment could slip later in the year as a slowing economy trims demand for industrial forklifts. The housewares segment could experience softening demand for small appliances as the pace of consumer spending slips. Profit comparisons, however, will be supported by the absence of costs borne in 1989 for consolidating certain manufacturing operations. Coal profits should advance, reflecting the commencement of shipments from the new Oxbow mine in Lousiana. Interest costs will be heavier.



[1]Revenues (Million $)

Quarter:	1989	1988	1987	1986

Important Developments

May '89— NC acquired privately-held Hyster Co. for $620 million plus the assumption of $80 million of debt. Hyster, which generated $772 million in revenues in 1988, produces industrial forklift trucks, warehouse equipment, towing winches and compaction equipment. The combination of NC's Yale Materials Handling Corp. unit with Hyster gives NC an estimated 30% share of the domestic industrial forklift market.

Jan. '89— NC sold its WearEver aluminum cookware and bakeware operations to a unit of Newell Co. for $39.5 million. The disposition of the WearEver cookware line, which generated about 20% of NC's housewares' revenues, reflects NC's strategy to focus on WearEver-ProctorSilex's more profitable small appliances business. NC, which acquired WearEver-ProctorSilex in April, 1988 for $105 million, has renamed its housewares division Proctor-Silex, Inc.

Next earnings report expected in late January.

Business Summary

Contributions to operating profits (in million $) by business segment in recent years:

	1988	1987	1986
Coal	$34.9	$43.3	$72.7
Housewares	17.8	---	---
Forklifts	13.5	8.1	8.5

One of the nation's 10 largest coal producers, NC operates surface mines in North Dakota and Texas. NC completed its withdrawal from underground mining in 1988 with the sale of its Nacco Mining unit. NC is to begin production in Louisiana in late 1989 through a joint venture with Phillips Petroleum. In 1988 NC sold 22.6 million tons of coal at an average price of $8.28 a ton, compared with 22.4 million tons in 1987 at $11.30 a ton. Proven coal reserves at 1988 year-end totaled 2.8 billion tons.

Proctor-Silex, Inc. (acquired April, 1988), is one of the nation's leading manufacturers of toasters, irons, coffeemakers and other small electric household appliances. The Kitchen Collection operates 39 factory outlet stores specializing in housewares.

Yale Materials Handling Corp. markets combustion engine and electric powered forklifts worldwide. Yale sold 15,800 forklifts in 1988, versus 15,000 units in 1987. The May, 1989 acquisition of Hyster Co. for $620 million substantially enlarged NC's share of the industrial forklift market.

Nov. 20'89	1989					
44	45⅞-34½	18	1.48	3.4%	A-	1.16

Summary

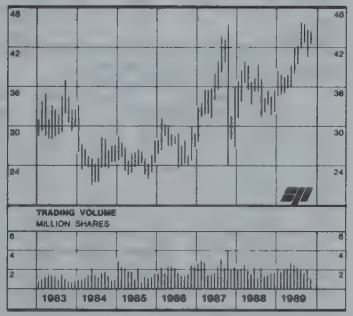
This company produces specialized service chemicals used in water and waste treatment, industrial processes and oil production and refining, designed to help customers maintain a high level of operating performance and efficiency or improve the quality of products. Earnings improved considerably in the past several years, with the upturn in domestic industrial markets, cost cutting, and the weak U.S. dollar. Further earnings gains are expected in 1989 and 1990.

Current Outlook

Share earnings for 1990 are projected at about $3.30, versus the $3.00 expected for 1989.

The quarterly dividend was raised 12%, to $0.37 from $0.33, with the October, 1989 declaration.

Sales and earnings are expected to advance about 10% in 1990, reflecting modest growth in the economy and in industrial production, relatively high industrial utilization rates, and strong export and foreign demand. Continued new product introductions, including computerized monitoring and control equipment and services, as well as an expanded sales force and selling price increases should help boost the gains. There will be the full year impact of ESOP preferred dividends.



Net Sales (Million $)

Quarter:	1989	1988	1987	1986
Mar.	249.5	236.0	191.6	178.5
Jun.	268.1	247.4	202.6	184.0

Dec.	E0.81	0.72	0.56	0.41
	E3.00	2.70	2.03	1.62

Important Developments

Nov. '89— NLC said that record third quarter results reflected increased sales by all operating units. The water and waste treatment division led a strong domestic sales performance with continued strength in the core water treatment business. Process chemicals, petroleum chemicals and the international businesses also posted stong gains. A more modest sales gain were posted by the U.S. subsidiaries, despite a decline in absorbent chemicals sales. Capital spending for 1989 was projected at $85-$90 million.

May '89— NLC establised a $200 million ESOP and sold 400,000 shares of preferred stock (convertible into 4 million shares of NLC common stock) to the plan. Directors authorized the repurchase of up to 4 million common shares.

Next earnings report expected in late January.
